FISJONSPLAN

for fisjon av

ENTRA ASA (overdragende selskap)

med overføring av de utfisjonerte eiendelene,
rettighetene og forpliktelsene til

Entra L6 AS (overtakende selskap)

Styrene i Entra ASA og Entra L6 AS har i dag, den 18. mars 2022, utarbeidet følgende fisjonsplan, der nærmere angitte eiendeler, rettigheter og forpliktelser overføres til Entra L6 AS.

1. FORMALIA

1.1 Det Overdragende Selskapet

Entra ASA

Adresse: Biskop Gunnerus' gate 14A, 0185 Oslo

Forretningskommune: Oslo

Org.nr.: 999 296 432

(heretter kalt det "Overdragende Selskapet").

1.2 Det Overtakende Selskapet

Entra L6 AS

Adresse: Biskop Gunnerus' gate 14A, 0185 Oslo

Forretningskommune: Oslo

Org.nr.: 928 866 890

(heretter kalt det "Overtakende Selskapet").

Det Overtakende Selskapet og det Overdragende Selskapet er i det følgende i fellesskap kalt "**Selskapene**".

2. FISJONEN

2.1 Bakgrunn og begrunnelse for fisjonen

Overdragende Selskap ønsker å flytte eiendommen Lagårdsveien 6 fra Overdragende Selskap og til et heleid datterselskap, slik at eierskapet og organiseringen av eiendommen er tilsvarende som øvrige eiendommer i konsernet.

Som ledd i reorganiseringen av Overdragende Selskap, har Overdragende Selskap stiftet det Overtakende Selskapet, som et heleid datterselskap.

Første steg i reorganiseringen innebærer at Overdragende Selskap fisjonerer eiendommen i Lagårdsveien 6 til det Overtakende Selskapet, som kun vil fungere som et hjelpeselskap i fisjonen. I forbindelse med fisjonen settes aksjekapitalen i det Overdragende Selskapet ned, ved reduksjon av pålydende på samtlige aksjer i selskapet.

Samtidig vil det Overtakende Selskapet beslutte en trekantfusjon, hvor eiendommen i Lagårdsveien 6 overføres til Lagårdsveien 6 AS, hvor det Overdragende Selskapet er det vederlagsutstedende selskapet. I forbindelse med trekantfusjonen settes aksjekapitalen i det Overdragende Selskapet opp, ved økning av pålydende på samtlige aksjer i selskapet.

Fisjonen og fusjonen besluttet samtidig, slik at kreditorperiodene vil løpe parallelt. Fisjonen og fusjonen skal tre i kraft så nært i tid som mulig, men slik at fisjonen av Overdragende Selskap trer i kraft rett før fusjonen, hvor Overdragende Selskap er vederlagsutstedende selskap.

Ettersom fisjonen og fusjonen vil gjennomføres samtidig og med henholdsvis kapitalnedsettelse i Overdragende Selskap i fisjonen og tilsvarende kapitalforhøyelse i Overdragende selskap i fusjonen, vil fisjonen og fusjonen ikke innebære noen reell endring i kapitalen, verdiene eller eierforholdene i det Overdragende Selskapet. Det Overdragende Selskapet vil fortsette sin notering på Oslo Børs uforandret. Det overtakende selskapet i fusjonen, som overtar eiendommen i Lagårdsveien 6 vil være et heleid unotert datterselskap.

For å unngå påvirkning på børskursen vil både fisjonen og fusjonen tre i kraft utenfor åpningstiden for handel på Oslo Børs.

Det Overdragende Selskapet har i forkant av fisjonen og fusjonen innhentet en bindende forhåndsuttalelse fra skattemyndighetene. Skattemyndighetene har i den bindende forhåndsuttalelsen datert [] 2022 bekreftet at fisjonen og fusjonen kan gjennomføres med skattemessig kontinuitet for selskapet og aksjonærene, og at reorganiseringen kan legges til grunn for beskatningen uten at det skal skje noen skattemessig gjennomskjæring, forutsatt at fisjonen og den etterfølgende fusjonen gjennomføres i henhold til kravene i aksjeloven kapittel 13 og 14 og skatteloven kapittel 11. Fisjonen og fusjonen skal gjennomføres iht. nevnte regelverk.

2.2 Lovregulering mv.

Fisjonen skal gjennomføres etter reglene i allmennaksjeloven kapittel 14 om fisjon av selskap ved overføring av eiendeler mv. som tingsinnskudd til eksisterende overtakende selskap.

Fisjonen gjennomføres med regnskapsmessig kontinuitet, slik at bokførte verdier i Overdragende Selskap på eiendeler, rettigheter og forpliktelser som overføres, videreføres underet i det Overtakende Selskapet, jf. nærmere om dette i punkt 3.1.

Fisjonen skal gjennomføres med skattemessig kontinuitet for norske skatteformål etter reglene i skatteloven kapittel 11, jf. nærmere om dette i punkt 3.2.

Det vises til punkt 3 og 4 nedenfor for en nærmere redegjørelse for den regnskapsmessige og skattemessige behandlingen og konsekvenser for selskapene og aksjonærene.

2.3 Fremgangsmåte for fisjonen

Fisjonen av det Overdragende Selskapet gjennomføres slik:

- (a) Fisjonsplanen med vedlegg skal meldes og kunngjøres i Foretaksregisteret og gjøres tilgjengelig for aksjeeierne på selskapets hjemmeside senest én måned før generalforsamlingene skal behandle planen.
- (b) Fisjonsplanen med vedlegg skal fremlegges for endelig vedtakelse av generalforsamlingene i Entra ASA og Entra L6 AS. Generalforsamlingenes beslutninger vil deretter bli meldt til Foretaksregisteret, som kunngjør en seks ukers kreditorvarslingsfrist.
- (c) Etter utløpet av kreditorfristen og forutsatt at det ikke har meldt seg noen kreditorer med innvendinger mot fisjonen eller at eventuelle innvendinger er håndtert, vil gjennomføring av fisjonen bli meldt til Foretaksregisteret.

- (d) Fisjonen trer i kraft ved registrering av gjennomføringsmeldingene. Ved fisjonens ikrafttredelse inntreer følgende virkninger av fisjonen:
- (i) Aksjekapitalen i Entra ASA er nedsatt.
 - (ii) Aksjekapitalen i Entra L6 AS er forhøyet.
 - (iii) De eiendeler, rettigheter og forpliktelser som er angitt i punkt 4 er overført fra Entra ASA til Entra L6 AS.
 - (iv) Aksjene i Entra L6 AS er utstedt til dem som er aksjeeier i Entra ASA på relevant tidspunkt.
 - (v) Vedtektene i Entra ASA er endret.
 - (vi) Vedtektene i Entra L6 AS er endret.

3. REGNSKAPSMESSIG OG SKATTEMESSIG GJENNOMFØRING

3.1 Regnskapsmessig gjennomføring

Transaksjoner i det Overdragende Selskapet med tilknytning til det som overføres til det Overtakende Selskapet ved fisjonen skal regnskapsmessig anses å være foretatt for Det Overtakende Selskapets regning fra 1. januar i det regnskapsår fusjonen selskapsrettslig trer i kraft.

Fisjonen gjennomføres med regnskapsmessig kontinuitet slik at det Overtakende Selskapet viderefører regnskapsmessige verdier av de eiendeler, rettigheter og forpliktelser som ved fisjonen overtas fra det Overdragende Selskapet i henhold til kontinuitetsprinsippet.

Selskapets revisor har bekreftet at det etter fisjonen vil være dekning for selskapets gjenværende bundne egenkapital, jf. allmennaksjeloven § 14-3 (3) jf. § 12-2.

3.2 Skattemessig gjennomføring

Fisjonen vil gjennomføres med full skattemessig kontinuitet for norske skatteformål i samsvar med bestemmelsene i skatteloven kapittel 11. Dette gjelder både for det Overdragende Selskapet og norske aksjonærer i det Overdragende Selskapet. Fisjonen vil gjennomføres med skattemessig virkning i henhold til skatteloven. Resultat i fisjonsåret frem til fisjonens gjennomføringstidspunkt fordeles slik at resultatet blir tilnærmet riktig i forhold til den virksomheten eller del av virksomhet selskapene driver videre.

I henhold til skatteloven § 11-8 (1) er nominell og innbetalt aksjekapital i det Overdragende Selskapet fordelt i samme forhold som fordelingen av de virkelige nettoverdier; dvs. 99,081 % til det Overdragende Selskapet og 0,919 % til det Overtakende Selskapet ("Bytteforholdet").

At fisjonen gjennomføres med skattemessig kontinuitet innebærer at alle skatteposisjoner i det Overdragende Selskapet knyttet til det som overføres til det Overtakende Selskapet overføres uendret, og uten at det utløses noen skatt i det Overdragende Selskapet eller oppskrivningsrett for det Overtakende Selskapet. Eventuelle skatteposisjoner som ikke har tilknytning til eiendeler eller gjeld i Overdragende Selskap, overføres til/beholdes av det selskapet som fortsetter virksomheten som skatteposisjonene skriver seg fra. Hvis det ikke kan sannsynliggjøres hvilken virksomhet skatteposisjonen knytter seg til, skal skatteposisjonen fordeles mellom Overdragende Selskap og Overtakende Selskap basert på Bytteforholdet.

Fisjonen vil ikke anses som en skattemessig realisasjon for norske aksjonærer, som etter at fisjonen og fusjonen er gjennomført vil ha nøyaktig samme antall aksjer i det Overdragende Selskapet med samme skatteposisjoner som før fisjonen.

For utenlandske aksjonærer reguleres den skattemessige behandlingen av de respektive lands skatteregler. I enkelte land kan det være at fisjonen anses som en skattemessig transaksjon. Alle utenlandske aksjonærer oppfordres til å konsultere med skatteeksperter i sine respektive jurisdiksjoner.

4. OVERDRAGELSE AV EIENDELER, RETTIGHETER OG FORPLIKTELSE

Fisjonen gjennomføres ved at det Overdragende Selskapet overdrar følgende eiendeler, rettigheter og forpliktelser til det Overtakende Selskapet:

- Eiendommen Lagårdsveien 6, gnr. 56 bnr. 918 i Stavanger kommune, med påstående bygg, med tilhørende rettigheter og forpliktelser, herunder fordring og forpliktelser relatert til forskuddsfakturert leie for 2022.

Alle andre eiendeler mv. beholdes av det Overdragende Selskapet.

Eiendeler, rettigheter og forpliktelser som ikke fanges opp av fordelingen i dette punkt 4 skal anses å tilhøre den virksomhet/eiendel/rettighet/forpliktelse som vedkommende post etter sin art mest naturlig hører inn under/sammen med. Eventuelle eiendeler, rettigheter eller forpliktelser, inklusive ikke-balanseførte, omtvistede, usikre og/eller ukjente eiendeler, rettigheter og forpliktelser, hvor dette ikke kan sannsynliggjøres, fordeles mellom selskapene i samme forhold som Bytteforholdet.

5. FISJONSVEDERLAG

Aksjekapitalen i det Overdragende Selskapet skal ved fisjonen nedsettes fra NOK 182 132 055,00 med NOK 1 673 793,58545 til NOK 180 458 261,41455 ved en reduksjon av pålydende på de 182 132 055 utstedte aksjene i det Overdragende Selskapet fra NOK 1,00, med NOK 0,00919, til NOK 0,99081.

Størrelsen på kapitalnedsettelsen i det Overdragende Selskapet er fastsatt basert på en vurdering av de virkelige verdier som overføres til det Overtakende Selskapet ved fisjonen (0,919 %) og de virkelige verdier som beholdes av det Overdragende Selskapet (99,081 %). På denne måten sikres korrekt fordeling av aksjekapitalen i forhold til fordelingen av verdiene i det Overdragende Selskapet.

Siden det ikke innløses noen aksjer ved fisjonen, vil fisjonen således ikke medføre noen endring i eiersammensetningen.

Ved fisjonen utstedes det tilsvarende antall aksjer i det Overtakende Selskapet som det er aksjer i det Overdragende Selskapet. Aksjonærene i det Overdragende Selskapet vil således motta én aksje i det Overtakende Selskapet for hver aksje de eier i det Overdragende Selskapet.

Tilleggsvederlag skal ikke utdeles.

6. FORHOLDET TIL DE ANSATTE

Det Overdragende Selskapet har 192 ansatte før fisjonen. Samtlige ansatte fortsetter sine arbeidsforhold uendret etter fisjonen, og fisjonen har således ingen betydning for de ansatte.

I samsvar med kravene som følger av allmennaksjeloven vil de ansatte blitt informert om fisjonen i forkant av behandling i generalforsamlingen.

Det vises for øvrig til styrets rapport om fisjonen.

7. MERVERDIAVGIFTSMESSIGE FORHOLD

Eventuelle justeringsplikter/-retter og/eller tilbakeføringsplikt/-retter etter merverdiavgiftsloven vil bli overført til det Overtakende Selskapet, jf. merverdiavgiftsloven kap. 9. Det gjelder særskilte krav til form og dokumentasjon knyttet til slik avtale. Partene er enige om å inngå slik avtale om nødvendig, innen de frister som følger av relevant lovgivning.

8. SÆRLIGE RETTIGHETER ELLER FORDELER

Ingen rettigheter som nevnt i allmennaksjeloven § 11-1, 11-10 og 11-12 er utstedt i Selskapene før fisjonen og ingen slike rettigheter skal tildeles i forbindelse med fisjonen.

Det skal ikke tilfalle noen særlig rett eller fordel for styremedlemmer eller andre i forbindelse med fisjonen.

9. SELSKAPSRETTSLIGE BESLUTNINGER I DET OVERDRAGENDE SELSKAPET

Det foreslås at generalforsamlingen i det Overdragende Selskapet treffer følgende vedtak til gjennomføring av fisjonen:

1. *Fisjonsplan datert 18. mars 2022 vedrørende fisjon av Entra ASA med overføring til Entra L6 AS godkjennes og skal gjennomføres i tråd med fisjonsplanen.*
2. *Aksjekapitalen i selskapet nedsettes fra NOK 182 132 055 med NOK 1 673 793,58545 til 180 458 261,41455 ved at pålydende verdi på de 182 132 055 aksjene i selskapet reduseres fra NOK 1,00, med NOK 0,00919, til NOK 0,99081. Kapitalnedsettelsen er basert på selskapets sist avlagte årsregnskap som viser at det etter kapitalnedsettelsen vil være full dekning for den gjenværende aksjekapitalen og øvrig bunden egenkapital.*
3. *Nedsettelsen av aksjekapitalen i selskapet er begrunnet i og skjer som ledd i fisjonen. Nedsettelsesbeløpet med tillegg av NOK 130 324 853,41455 av annen egenkapital (samlet NOK 131 998 647,00000) utgjør samlet aksjeinnskudd i Entra L6 AS og skal benyttes til utdeling til aksjonærene gjennom overføring av nærmere angitte eiendeler, rettigheter og forpliktelser til Entra L6 AS ved fisjonen og ved at aksjonærene mottar vederlag i form av aksjer i de Entra L6 AS. Da fisjonen gjennomføres til regnskapsmessig kontinuitet er aksjeinnskuddet fastsatt til bokført verdi av egenkapitalen som overføres ved fisjonen. Virkelig verdi av eiendelene mv. som overføres tilsvarer minst de bokførte verdiene.*

4. Ved ovenstående beslutning om fisjon forhøyes aksjekapitalen i Entra L6 AS med aksjeinnskudd ved overføring av eiendeler, rettigheter og forpliktelser som beskrevet i fisjonsplanen ved fisjonens ikrafttredelse. Kapitalforhøyelsen vedtas og anses tegnet ved generalforsamlingenes godkjenning av fisjonsplanen
5. Som følge av kapitalnedsettelsen, og med virkning fra registrering av gjennomføringen av fisjonen og kapitalnedsettelsen, endres vedtektene § 4 til å lyde:

"Selskapets aksjekapital er NOK 180 458 261,41455 fordelt på 182 132 055 aksjer, hver pålydende NOK 0,99081."

10. SELSKAPSRETTLIGE BESLUTNINGER I DET OVERTAKENDE SELSKAPET

Det foreslås at generalforsamlingen i det Overtakende Selskapet treffer følgende vedtak til gjennomføring av fisjonen:

1. Fisjonsplan datert 18. mars 2022 vedrørende fisjon av Entra ASA med overføring til Entra L6 AS godkjennes og skal gjennomføres i tråd med fisjonsplanen.
2. Som en tilrettelegging for aksjeutstedelsen i fisjonen foretas det en forutgående kapitalnedsettelse. Selskapets aksjekapital reduseres fra NOK 30 000 til NOK 0 ved at samtlige eksisterende aksjer slettes. Nedsettelsesbeløpet skal i sin helhet benyttes til utdeling til selskapets aksjonær. Nedsettelsen er basert på Selskapets mellombalanse datert 4. mars 2022. Kapitalnedsettelsen er betinget av at aksjekapitalen umiddelbart forhøyes i henhold til nedenstående vedtak, og gjennomføres således uten kreditorperiode.
3. Som ledd i fisjonen forhøyes aksjekapitalen i selskapet fra NOK 0 med NOK 1 673 793,58545 til NOK 1 673 793,58545 ved utstedelse av 182 132 055 aksjer, hver pålydende NOK 0,00919.

Fisjonen gjøres regnskapsmessig til kontinuitet, og tegningskursen fastsettes således med utgangspunkt i bokført verdi av den egenkapitalen som overføres fra Entra ASA ved fisjonen. Bokførte verdier er beregnet pr. 28. februar 2022. På denne bakgrunn er samlet tegningsbeløp fastsatt til NOK 131 998 647,00, tilsvarende NOK 0,72474143554796 per aksje. Differansen mellom nominell aksjekapitalforhøyelse og samlet tegningsbeløp fordeles med regnskapsmessig kontinuitet. Tegningsbeløpet er fastsatt per 18. mars 2022. Det utstedes én vederlagsaksje i selskapet for hver utstedte aksje i Entra ASA.

4. Kapitalforhøyelsen tegnes ved at generalforsamlingene i Entra ASA og selskapet godkjenner fisjonsplanen, og tilfaller aksjeeieren som beskrevet i fisjonsplanen.
5. Aksjeinnskuddet gjøres opp ved overtakelse av de eiendeler, rettigheter og forpliktelser som overføres fra Entra ASA til selskapet når Foretaksregisteret har registrert at fisjonen er trådt i kraft.
6. Som følge av aksjekapitalforhøyelsen, og med virkning fra registrering av gjennomføringen av fisjonen og kapitalforhøyelsen, endres vedtektenes § 4:

"Selskapets aksjekapital er NOK 1 673 793,58545 fordelt 182 132 055 aksjer hver pålydende NOK 0,00919."

11. KOSTNADER

Omkostningene ved fisjonen fordeles mellom det Overdragende Selskapet og det Overtakende Selskapet i samme forhold som nettoverdiene fordeles.

12. FULLMAKT

Ved vedtakelse av fisjonsplanen gir generalforsamlingen fullmakt til styret i det Overdragende Selskapet til å gjennomføre eventuelle mindre endringer i fisjonsplanen under forutsetning av at slike mindre endringer ikke er til skade eller ulempe for Selskapene eller aksjeeierne.

13. VEDLEGG

Som vedlegg til denne fisjonsplanen følger:

1. Vedtekter for det Overdragende Selskapet og det Overtakende Selskapet
2. Årsregnskap, årsberetning og revisjonsberetning for de tre siste årene for det Overdragende Selskapet
3. Mellombalanse for det Overtakende Selskapet (det Overtakende Selskapet er nystiftet i 2022 og har ikke avlagt årsregnskap)

— — —

Separat signaturside følger

Fisjonsplanen signeres i ett eksemplar som beholdes av det Overdragende Selskapet med kopi til det Overtakende Selskapet.

This is Entra

Entra is a leading owner, manager and developer of office properties and owns a large portfolio of centrally located high quality properties in the largest cities in Norway. Our business is characterized by solid tenants on long lease contracts and a high occupancy ratio. Entra's project development portfolio is the key driver for our growth.

Sustainability is an integrated part of our business and environmental leadership has been part of our business strategy for many years. Technology has rapidly become a core focus area in Entra. We strive to be in forefront in making use of new technology to develop new and enhanced products and services.

As a leading property owner and developer in the Norwegian market, we play an important role for the urban development in and around our property clusters. We seek to create a good atmosphere and secure surroundings in and around the buildings for the benefit of our tenants, visitors and others who live or pass through the area

Mission

To create lively and sustainable workplaces facilitating job satisfaction and efficiency.

Vision

The most satisfied people work in Entra buildings.

Business idea

To develop, let and manage flexible, centrally located, environment-friendly buildings.

Business strategy

Based on three pillars: profitable growth, high customer satisfaction and environmental leadership.

Geographic focus

Oslo and the surrounding area, Bergen, Trondheim and Stavanger.

Highlights in 2021

Q1 2021

During the first quarter, Entra started the new-build project in Holtermannsveg 1-13 (phase 2) in Trondheim, the second of three planned buildings on the landplot. The first building (11,700 sqm) was finalized in Q1 2020. The approved zoning allows total construction of approximately 48,000 sqm, where the second building is 20,900 sqm. The property is 29 per cent let, expected finalized in Q2 2023 and aims for a BREEAM-NOR Excellent classification. The property will be developed at a yield-on-cost of 5.7 per cent.

Entra also started the new-build project "Nygaarden" in Nygårdsgaten 91-93 in Bergen. The property is located in Entra's main cluster in Bergen. The property is 11,900 sqm and is 58 per cent pre let. Expected completion is in Q4 2022, and the property aims for a BREEAM-NOR Excellent classification. The property will be developed at a yield-on-cost of 5.5 per cent.

During the first quarter, Entra acquired two properties in Stavanger and one in Bergen and divested two smaller properties.

Q2 2021

During the second quarter, Entra finalised the refurbishment of 5,000 sqm in Grønland 32 in Drammen. The property is fully let to a public tenant and was developed at a yield-on-cost of 7.0 per cent.

Entra also acquired Fyrstikkalleen 1 at Helsefyr in Oslo (39,640 sqm), Lars Hilles gate 19 in Bergen (5,900 sqm), Hotel Savoy in Oslo (5,550 sqm) and increased its ownership stake in the residential developer Oslo S Utvikling to 50 per cent.

Q3 2021

During the third quarter, Entra finalised the new-build project in Universitetsgata 7-9 at Tullin in Central Oslo. The property is 21,900 sqm and was developed at a yield-on-cost of 5.8 per cent. The property is 99 per cent let and aims for a BREEAM-NOR Excellent classification.

Entra also finalised the 28,100 sqm redevelopment of the neighbouring property Universitetsgata 2 and opened the Rebel concept with full-service and flexible office solutions. The property was 96 per cent let at completion and was developed at a yield-on-cost of 5.7 per cent.

Q4 2021

In the fourth quarter, Entra announced that it would acquire the shares in Oslo Areal for 13.55 billion. Oslo Areal has an excellent strategic and operational fit with Entra and owns 17 office properties of which 15 are centrally located in Oslo and two in Sandvika just outside Oslo. The property portfolio totals 222,500 sqm and has a significant development potential with ongoing zoning of up to 95,000 sqm and additional long term development potential of approximately 45,000 sqm.

Entra also finalized the refurbishment of 10,100 sqm in Hagegata 22-24 at Tøyen in. The project was 100 per cent pre-let with a yield-on-cost of 5.7 per cent.

During the fourth quarter, AB Balder put forward a mandatory offer for the outstanding shares in Entra. The offer was concluded in December, and AB Balder held 36.6 per cent of the outstanding shares in Entra as of 31 December 2021, whereas Castellum AB held 33.3 per cent.

Letter from the CEO

Back on the growth track

2021 was a year where we learned to live with the pandemic and its effects on our work, lives, and the balance between them. Entra has navigated very well in this uncharted territory. We have safeguarded life and health, kept our buildings open, been proactive in terms of growing the business, and seen very little negative effects on our operations, projects, and financial results.

We have worked closely with our customers during national lockdowns and subsequent re-openings. The trend of flexible work has accelerated through the pandemic and is here to stay. To be an attractive employer and attract talent, companies must accept that their employees can work from anywhere. We see that future work-place solutions are evolving, and that work-place strategies are higher up on the agenda with our customers and their boards. While having to facilitate for a more flexible workday, our customers clearly see that the office plays a central role to attract, develop and retain the human capital in their companies. More than ever, the office needs to be the place for building culture, sharing knowledge, and participating in social activities with a clear purpose of building company loyalty.

So far, the Norwegian office market and Entra have seen little effect on net demand for office space. However, we clearly see an increased focus on how to program the office space to support innovation, collaboration and hybrid working.

This has resulted in strong demand for our tenant advisory services on work-place strategies. We have therefore strengthened our team to advise our customers on how they can use the office as a more strategic tool, as part of organizational development. This is an important service that we believe will keep customers within the Entra portfolio over time and supports our letting activity when targeting new tenants. More companies are open for rethinking their workplace solutions, and they are probably also more open to re-locate. Working closely with our tenants and prospects to understand their needs, providing advisory services, will be important going forward. For Entra, with its large and attractive portfolio of high-quality office assets, this provides an opportunity as we can provide flexibility within our portfolio.

While it is too early to conclude on the pandemic's long-term effects on the office market, our cluster strategy with locations on central communication hubs seems more relevant than ever. In a flexible working environment, the office needs to be

a destination the employees want to visit, and urban qualities and social activities are getting increasingly important in this respect.

In Entra, we want to offer our office customers the best possible environment and create places where our customers want to be, and where they want to return. Creating life between the buildings, also outside office hours, is thus an important focus in our urban development strategy. This involves having active ground floors and a good mix of activities, food offerings and services as part of the office experience. In 2021, while maintaining focus of the office market, we expanded our strategic focus to also include ground floor/retail development, residentials and hotels within our clusters.

Our sustainability focus has for many years been, and still is, core to our strategy and in the backbone of everything we do. Work to mitigate the effects of climate change is urgent, and we constantly search for solutions on how we can contribute. In 2021, we revised our environmental strategy, further outlining and detailing the pathway towards our overarching target of becoming net zero carbon by 2030. We have increased our focus on life cycle assessments and how to measure and reduce embodied carbon in our properties and projects. We have also done an in-depth climate risk assessment of the physical and transition risks affecting the majority of our assets and company. On the social side, we continue to support initiatives focusing on developing including cities through our collaboration with the Church City Mission, and also some new initiatives focusing on job inclusion such as Sisters in Business amongst others.

We continue to increase and enhance the quality of our portfolio, and we were very active in the transaction market in 2021. We acquired 23 properties for a total of 17.5 billion, adding gross 319,000 sqm if we include the Oslo Areal transaction that closed in January 2022. The integration of Oslo Areal will be completed during 2022. We have also rotated out some smaller, non-strategic properties. The assets we have bought

are centrally located in our existing clusters mainly in Oslo, and we have increased our greater Oslo exposure from 72 to 79 per cent. Going into 2021 we had a loan to value of 38.4 per cent. Through these transactions, we have put our balance sheet to work and enter 2022 with a pro-forma loan to value of around 47 per cent.

After a couple of years with flattish income growth as several large assets were taken out of operations for redevelopment, rental income grew by 15 per cent in the fourth quarter or 7 per cent in 2021. We finalized development projects of 65,500 sqm in 2021 and started up another 32,800 sqm. As a result of the completed projects and transactions during 2021, we expect to see rental growth above 25 per cent in 2022. We have a large and exciting project pipeline that will secure future growth for many years to come, and as of year-end our ongoing project development portfolio contained some 115,200 sqm to be finalized in the period from 2022 to 2024. Most of the project development pipeline is in central property clusters in Oslo, particularly around the Central Station and at Bryn. The planned urban development of these areas will also benefit the attractiveness of our existing assets.

The value of our property portfolio increased by 19 per cent from a combination of acquisitions and value uplifts driven by yield compression, solid project development, and letting activities. Going into 2022, Entra is well positioned in a solid Norwegian economy supported by a property market with low office vacancy rates, limited new-build activity and expectations for continued rental growth. The transaction market remains very active and demand for Norwegian office properties continue to be strong.

The Entra team has pulled together and delivered strong results also in 2021. We have provided significant growth through both acquisitions and from progressing our project pipeline. We are very satisfied with our increased exposure to the Oslo market. We have maintained top customer satisfaction scores, and we continue to work systematically to bring down our carbon footprint and engaging in social sustainability activities. With our portfolio of high-quality office buildings and the capabilities, engagement, and enthusiasm in the Entra team we are well set to meet the future.

In Entra, we want to offer our office customers the best possible environment and create places where our customers want to be, and where they want to return.

Oslo, 3 March 2022

The business

Entra is the largest investment alternative offering investors Oslo-focused, high quality office exposure. As of year-end, approximately 71 per cent of the Company's portfolio by value is located in the Greater Oslo region with prime locations in connection with public transportation hubs. After closing of the Oslo Areal and Hinna Park transactions in January 2022, around 79 per cent of the portfolio values are located in the Greater Oslo area (Oslo and Sandvika).

The value of Entra's property portfolio as of 31 December 2021 was 67.5 billion, and the company's EPRA NRV was 218 per share. The net yield on Entra's portfolio was estimated to 4.24 per cent. Entra has a strong balance sheet with a loan to value of 38.4 per cent and Baa1 credit rating with Stable Outlook from Moody's.

Entra offers investors superior cash flow visibility and quality with approximately 56 per cent of rental income from public sector tenants with AAA credit rating and with a weighted average unexpired lease term (WAULT) of around seven years as of year-end 2021. The management portfolio has had a consistently high occupancy rate, currently at 97.8 per cent. Entra's operational platform and service organisation has consistently given the Company high rankings in the annual public Norwegian Tenant Index ranking of Norwegian landlords. The Company has proved resilient during Covid-19 with payments in 2020 and 2021 collected at near normal levels. Entra is exposed to a solid Norwegian economy supported by strong public funding and a property market with low office vacancy rates and expectations for continued rental growth.

Sustainability has been an integrated part of Entra's business model for more than 10 years. Entra is working actively to reduce the CO₂ footprint of its property portfolio and has a target to become a net zero carbon company by 2030. Entra has developed several Powerhouses, office buildings producing

more energy than they consume over their lifetime. In 2020, the company also redeveloped an office property where more than 80 per cent of the input factors came from reused materials. 27 of Entra's properties are BREEAM certified, and 9 properties are in process of being certified. Entra has achieved a Green Star rating with a score of 92 on the Global Real Estate Sustainability Benchmark (GRESB) compared to an average score of 73. Entra established its first green bond in 2016 and as of 31 December 2021 has 69 per cent of its debt portfolio in green bonds and bank loans. 100 per cent of Entra's revenues are eligible within the EU Taxonomy framework, and the company will commence reporting according to the EU Taxonomy within, and at the latest, year-end 2022.

Profitable project development has been the Company's major lever for growth, and Entra and its project development organisation has a proven track record of delivering attractive new-build and redevelopment projects. In the period from 2015 to 2021, Entra invested a total of 12.9 billion across 26 projects with an average yield-on-cost of 6.3 per cent. The value of these projects upon completion was 16.5 billion, representing an increase of 28 per cent.

Entra has during 2021 started up two and finalised four development projects, and the portfolio of ongoing projects as of 31 December 2021 consists of seven properties totalling 115,200 sqm.

Entra's strategy is built around the following three focus areas.

Profitable
growth

Customer
satisfaction

Environmental
leadership

Vision

Entra's vision "The most satisfied people work in Entra buildings" has extended Entra's definition of customers to include all the people working in Entra buildings. Broadening the customer definition from around 600 tenants to around 60,000 users of Entra buildings provides new opportunities and has extended our strategic positioning and how we interact with our customers.

Strategy

Profitable growth

Entra has a solid track record of portfolio growth and value creation. During 2021, the value of Entra's property portfolio increased by 19 per cent to 67.5 billion as a result of yield compression, solid project development, letting activities and acquisition of properties.

Entra signed new and renegotiated leases with annual rent totalling 346 million (150,000 sqm) in 2021, and the occupancy ratio was 97.8 per cent (97.9 per cent) at year-end.

Entra also completed four projects adding 65,100 sqm to the management portfolio, and started two new development projects totalling 32,800 sqm in 2021.

Rental income was 2,508 million (2,353 million) in 2021. Net income from property management was 1,534 million (1,451 million). Net value changes were 5,264 million (5,705 million) and profit before tax was 6,825 million (7,274 million) for 2021.

Entra has throughout 2021 again demonstrated its ability to attract external debt capital on attractive terms from multiple

sources of funding, and Entra's average interest rate was 2.25 per cent (2.38 per cent) at year-end.

Entra's dividend policy is to distribute approximately 60 per cent of Cash Earnings to its shareholders. The board of Entra will propose to distribute a semi-annual dividend of NOK 2.60 per share for the second half of 2021. Entra's total dividend for 2021 will then be NOK 5.10 per share compared to NOK 4.90 per share for 2020.

Customer satisfaction

One of Entra's goals is to provide the best customer experience. Entra takes full responsibility for property management of its properties and has a dedicated customer service centre to provide consistent and timely follow-up to enquiries. Entra works actively on maintaining good relationships with its tenants to achieve high customer satisfaction and to maximize lease renewal rates. The Norwegian Tenant Index is used to measure customer satisfaction. In 2021, Entra again achieved an exceptionally high customer satisfaction score of 87 versus an industry average of 82. On environmental matters, Entra achieved a customer score of 87 compared with an industry average of 75, showing that our tenants truly value Entra's environmental efforts. The customer service centre contributes to increasing customer satisfaction and forms the foundation for efficient management of properties.

Entra targets early engagement with its existing tenants ahead of their lease maturities and works together with its tenants to design workspace that meets their current needs and future requirements. Adopting to and making use of new technology has become a core priority in Entra.

Environmental leadership

Entra continues to implement and seek new environmental initiatives to meet climate-related challenges, to meet stakeholder expectations and to reduce costs. The Group has developed a corporate culture with a strong environmental focus throughout the whole organisation. Entra's environmental awareness and work to combat climate change is built on the precautionary principle. The Group's environment strategy includes goals and measures for the group, for its counterparties, for the property portfolio and for the development projects. The strategy has the following overall objectives:

- To become net zero carbon by 2030
- Environmentally leading property portfolio and property management
- Low carbon project development
- Influence and set requirements for suppliers and other stakeholders

Entra has been a leader in the development of environmentally sustainable buildings and has had high environmental ambitions in all its projects. Entra's target is to achieve a rating of BREEAM-NOR Excellent or better for new and BREEAM-NOR

Very Good or better for refurbishment/redevelopment projects. On completion of buildings currently under construction, approximately 73 per cent of the rental income and 69 per cent of the property values in the portfolio stem from properties that are or are in process of being BREEAM certified.

For many years, Entra has had a strong focus on reducing energy consumption in its portfolio. Through several measures of varying scope, Entra has managed to reduce the energy consumption of its management properties by 39 per cent since 2011. Energy consumption constitutes some 75 per cent of Entra's CO₂ footprint. By 2030, Entra has an ambition to reduce its Scope 1 and 2 CO₂ emissions by at least 70 per cent as part of the strategy to become net zero carbon.

To provide insight for our stakeholders, we submit response the Global Real Estate Sustainability Benchmark (GRESB) and were proud to achieve Green Star status with a total score of 92 in 2021.

For a further description of Entra's ESG strategy and achievements, see the separate section on ESG which is included in this annual report.

The property portfolio

Geographic exposure

As of 31.12.21 Entra's management properties (i.e. not including the development projects) located in Oslo constitute 66 per cent of the portfolio values whereas the properties located in Trondheim constitute nine per cent, Bergen nine per cent, Sandvika five per cent, Stavanger five per cent and Drammen five per cent

In January 2022, Entra closed the acquisition of the Oslo Areal portfolio of 17 properties located in Oslo and Sandvika. At the same time, five assets in Stavanger were divested and put into a larger, local structure. Including these transactions, Entra's greater Oslo exposure (Oslo and Sandvika) have increased to 79 per cent and the Stavanger exposure have decreased to two per cent.

As of 31 December 2021, Entra's property portfolio comprised 96 assets, and the market value of the portfolio was 67.5 billion. A full list of the properties can be found on pages 186 to 188.

Portfolio by area

Portfolio by value

Property management

The management portfolio

Entra's management portfolio consists of 80 buildings with a total area of approximately 1.2 million square metres. As of 31 December 2021, the management portfolio had a market value of around 60.1 billion (49 billion), and the occupancy rate was 97.8 per cent (97.9 per cent). The weighted average unexpired terms for the Group's leases were 6.8 years (6.9) for the management portfolio and 7.1 years (7.1) when the project portfolio is included. Entra focuses the portfolio on the major cities in Norway: Oslo and the surrounding region, Bergen, Trondheim and Stavanger.

Entra's properties are valued by two external appraisers (Akershus Eiendom/JLL and Newsec) on a quarterly basis. The market value of the portfolio in Entra's balance sheet is based on the average of the two external appraisers' valuation of each individual property. Valuation of the management portfolio is performed on a property-by-property basis, using individual DCF models and taking into account the property's current characteristics combined with the external appraisers' estimated return requirements and expectations as to future market development. The market value is defined as the external appraisers' estimated transaction value of the individual properties on the valuation date. The project portfolio is valued based on the same principles, but with a deduction for remaining investments and specific project risk on the valuation date. The land and development portfolio is valued based on actually zoned land.

Maturity profile of the management portfolio (NOKm)

Year-on-year, the portfolio net yield decreased from 4.44 to 4.24 per cent. The 12 months rolling rent increased from 2,329 million to 2,724 million, whereas the portfolio market rent has increased from 2,444 million to 2,784 million.

¹ See the section "Definitions". The calculation of net yield is based on the appraisers' assumption of ownership costs, which at 31.12.21 is 6.5 per cent of market rent.

Letting and letting market

The letting market

The activity level in the Oslo letting market was very high particularly in the second half of 2021, and rent levels have remained flat to slightly positive during the pandemic. According to Entra's Consensus report, the Oslo office vacancy is expected to decrease towards 6.5 per cent as economic activity and employment growth continue to pick up. The new-build volume for the coming years is limited, particularly in the city center of Oslo. Combined with the strong underlying CPI growth there is expectations for solid market rental growth in the years to come.

Bergen has proven to be robust during the Covid-19 pandemic. The overall office vacancy is currently around eight per cent and seven per cent in the city centre. There is limited supply of modern premises in the city center and fairly strong demand.

Rent levels in Bergen has grown by around seven per cent in Bergen during 2021, and there has been downward pressure on yields.

In Trondheim, the vacancy in the city center is around seven per cent. Overall office vacancy is currently around eight per cent, and vacancy is highest in the fringe areas of the city. Rent levels in the central Trondheim have increased by around 10 per cent over the last two years.

In Stavanger, the vacancy is around nine per cent. For the city center and at Hinna Park, there is demand for modern, flexible, and centrally located office premises, and rent levels have held up well.

Source: Entra Consensus report, January 2022

Letting activity in 2021

For 2021, gross letting including renegotiated contracts was 346 million and lease contracts with a total value of 165 million were terminated. Net letting, defined as new lease contracts plus lease-up on renegotiated contracts less terminated contracts, came in at eight million.

Quarterly net letting

(NOKm)

The largest contracts signed in 2021 were:

- Renegotiated 2-year lease contract with Western Police district for 14,100 sqm in Allehelgens gate 6 in Bergen
- Renegotiated 10-year lease contract with Oslo Municipality Planning and Building Services for 13,200 sqm in Vahls gate 1-3 in Oslo
- Renegotiated 5-year lease contract with Southwestern Police district for 12,900 sqm in Lagårdsveien 6 in Stavanger
- Renegotiated 5-year lease contract with Statsbygg for 9,300 sqm in Biskop Gunnerus' gate 6 in Oslo
- New 10-year lease contract with Bergen Municipality for 7,400 sqm in Møllendalsveien 6-8 in Bergen
- New 15-year lease contract with Fellesforbundet for 4,400 sqm in Sundtkvartalet in Oslo
- New 10-year lease contract with Volue for 3,500 sqm in Holtermanns veg 1-13 phase 2 in Trondheim

Occupancy in Entra's portfolio has remained stable during the year, and the Group had an occupancy level of 97.8 per cent as at 31 December 2021 compared to 97.9 per cent at 31 December 2020. The occupancy level was highest in Sandvika at 99.6 per cent and lowest in Stavanger with 94.1 per cent.

Tenants and tenant structure

Entra's tenant base comprises to a large extent of public sector and high-quality private tenants on long-term leases. At year-end 2021, public sector tenants accounted for 56 per cent of total contractual rent. As of 31 December 2021, the management properties had around 600 tenants and the 20 largest tenants' share of Entra's rental income represents 46 per cent.

The following table sets out Entra's 20 largest tenants as of 31 December 2021. Several of these tenants are present in multiple buildings with different lease contracts and lease durations.

Tenant	Proportion of total contractual rent	Public/private sector
Norwegian Tax Administration	4.7%	Public
Rebel U2	3.2%	Private
National Library of Norway	3.0%	Public
The Norwegian Public Roads Administration	2.9%	Public
Sopra Steria	2.9%	Private
Norwegian Labour and Welfare Administration	2.8%	Public
Oslo Municipality	2.5%	Public
University College of Oslo	2.5%	Public
The Norwegian Defence	2.4%	Public
The Norwegian police	2.1%	Public
Trondheim Municipality	1.7%	Public
Schjødt	1.7%	Private

Projects and property development

The main growth and value lever for Entra stems from property and project development, and the company normally has 5-10 per cent of the portfolio value in project development. During 2021 and also into 2022, the share of assets in project development has increased to 10-15 per cent. The company has considerable expertise and experience in zoning, planning, building and redevelopment of office properties.

Projects completed in 2021

Grønland 32, Drammen

In Grønland 32, a central riverside location in Drammen outside Oslo, Entra refurbished 5,000 sqm in a 7,400 sqm office building. The project was 100 per cent pre-let and was completed in Q2 2021.

Universitetsgata 7-9, Oslo

In Tullinkvartalet in Oslo, Entra has built a new 21,900 sqm office property in Universitetsgata 7-9, finalised in Q3 2021. Occupancy at completion was 99 per cent, and Entra has set out high environmental ambitions for the project, aiming for a BREEAM-NOR Excellent classification.

Universitetsgata 2, Oslo

Next to Tullinkvartalet, Entra redeveloped the property Universitetsgata 2 with the Rebel concept. Rebel is a tech company hub managed 50/50 by Entra and an external partner. The 28,100 sqm building consists of office spaces, co-working areas, a conference center and restaurants. The project was finalised in Q3 2021 and occupancy in the office part was 96 per cent let at completion and more than 60 tech companies have moved into the building.

Hagegata 22-24, Oslo

At Tøyen in Oslo, Entra has refurbished 10,100 sqm in Hagegata 22-24. The refurbished office space makes up almost half of the building area, and occupancy in the project space remained at about 85 per cent during the construction period. The project was 100 per cent pre-let and was completed in Q4 2021.

Portfolio of ongoing projects

As of 31 December 2021, Entra had seven ongoing development projects exceeding 50 million, with total project area of around 115,200 sqm. These projects are presented below. A full list of the project properties can be found at the back of this report.

Ownership	Location	Expected completion	Project area	Occupancy	Estimated total project cost ¹	Of which accrued ¹	Yield-on-cost ²

² Estimated net rent (fully let) at completion/total project cost (including cost of land)

³ Weighted average occupancy of the project portfolio

St Olavs plass 5, Oslo

At St. Olavs plass 5, Entra is redeveloping a 16,500 sqm office property located near Tullinkvartalet in Oslo. The project is scheduled for completion in Q3 2022 with occupancy currently at 95 per cent. The project is planned with a BREEAM-NOR Very Good classification.

Tordenskioldsgate 12, Oslo

In the middle of Oslo's central business district, Entra is redeveloping Tordenskiolds gate 12 for completion in Q3 2022. The property is 13,000 sqm and is 92 per cent pre-let.

Stenersgata 1, Oslo

Entra is redeveloping 15,800 sqm in Stenersgata 1. This is the first phase of a redevelopment project comprising the office spaces. The project was 57 per cent pre-let at year-end. Tenant optionality has conservatively been taken into consideration in the occupancy rate. The project is expected to be completed in Q2 2023 with a BREEAM-NOR Very Good classification.

Schweigaardsgate 15, Oslo

Schweigaards gate 15 is a 22,900 sqm office building located near Oslo central station. The redevelopment is estimated for completion in Q2 2023. The project was 34 per cent pre-let at year-end.

Møllendalsveien 6-8, Bergen

Entra is redeveloping the 14,200 sqm property in Møllendalsveien 6-8 in Bergen. The project was 95 per cent pre-let to two public tenants on 10-year contracts at year-end. The property is redeveloped in two phases, and the first phase was completed in Q4 2021. The second phase will be finalized in Q4 2022.

Nygårdsgaten 91-93, Bergen

Entra is building a new 11,900 sqm office building at Nygårdsgaten 91-93 in central Bergen. The project is planned for completion in Q4 2022, and the project was 58 per cent pre-let at year-end. The project aims for a BREEAM-NOR Excellent classification.

Holtermanns veg 1-13 phase 2 , Trondheim

In Holtermanns veg 1-13 in Trondheim, Entra is constructing a 20,900 sqm office building, this is the second of three planned buildings totaling 48,000 sqm. This second building was 29 per cent pre-let at year-end. Expected completion of this building is in Q2 2023. This project aims for a BREEAM-NOR Excellent classification.

Development sites and project pipeline

Entra's portfolio of development sites contains properties with zoned development potential, but where no project start decision has been made. As of 31 December 2021, Entra had five development sites with a total area of around 110,000 sqm. A list of the properties with defined land and development potential can be found at the end of this report. In addition, Entra continuously works to develop and extend the area in its existing portfolio.

Transactions and transaction market

Transaction market

The Norwegian transaction market for commercial real estate reached record levels in 2021, both in terms of volume and number of transactions. Total transaction value was around 160 billion in 2021 compared with 113 billion in 2020. The transaction pipeline and activity going into 2022 is solid, and the transaction market going forward is expected to remain strong. Investor surveys show that a very high proportion of investors (80-90 per cent) report to be net buyers in the next 12 months.

New construction volume ended up well below the yearly average, at approximately 140,000 sqm seen over the period of 1998 to 2021. 2022 is expected to see even less new construction because of fluctuating commodity prices and many projects being postponed during the pandemic.

The year-on-year growth in the November CPI, used to adjust most of Entra's leases, came in at 5.1 per cent in 2021. The financing market continues to be well functioning, particularly for solid counterparties like Entra. Norway's Central Bank increased the policy rate to 0.5 per cent in December 2021 and has signalled further increases over the next 12 months. There is some concern among investors due to projected increase in interest rates. Yields are, however, not expected to increase significantly, even with the higher geopolitical uncertainty, as the real interest rate, as a function of the expected interest rate and inflation estimates, is expected to be negative for many years to come.

Transactions

Entra actively seeks to improve the quality of its property portfolio and focuses on acquisitions of selected properties and urban development projects in specific areas within its four core markets: Oslo and the surrounding region, Bergen, Trondheim and Stavanger. Targeted locations include both areas in the city centers and selected clusters on public transportation hubs outside the city centers, allowing Entra to offer rental opportunities at a price range that fits its customer base. Entra's experience, financial strength and knowledge of its tenants makes the company well positioned to make acquisitions that meets these criteria. The acquisition and divestment strategy is flexible, allowing Entra to adapt to feedback from customers and market changes, and to create and respond to market opportunities as they arise.

Partly-owned companies

The vast majority of Entra's assets and development projects are wholly owned. In addition, Entra selectively gains access to properties and development projects through its shareholding in subsidiaries and jointly controlled entities. Entra's ownership interests as of year-end include the following companies:

Papirbredden Eiendom (60%)

Entra and Drammen Kommune Eiendomsutvikling own Papirbredden Eiendom. The company owns six properties totalling 61,100 sqm and a future development potential of 60,000 sqm in Drammen.

Hinna Park Eiendom (50%)

Entra and Camar Eiendom own Hinna Park Eiendom. The company owns five office properties totalling 67,000 sqm and development potential for two new office properties of 48,000 sqm. The company is consolidated in the Group's financial statements as Entra has a controlling vote on the Board of Directors. In January 2022, Entra and Camar Eiendom sold Hinna Park Eiendom to SVG Property.

Entra OPF Utvikling (50%)

Entra and Oslo Pensjonsforsikring (OPF) own Entra OPF Utvikling. The company owns two office properties totalling 59,800 sqm. The company is consolidated in the Group's financial statements as Entra has a controlling vote on the Board of Directors.

Oslo S Utvikling "OSU" (50%)

OSU is a property development company that is undertaking primarily residential development on the seafront in Bjørvika, Oslo's CBD East. In the financial accounts, OSU is classified as an associated company. In 2021, Entra increased its ownership stake in the company from 33.3 to 50.0 per cent.

Rebel U2 (50%)

Rebel U2 is the operator of the technology hub in Universitetsgata 2 in Oslo. The company offers full-service solutions, flexible and short-term leases, co-working facilities as well as conference and event activity.

Financing

The Group's financing is diversified between bank and capital market instruments. The interest-bearing debt of 26,903 million as of year-end has a diversified maturity structure, with an average time to maturity of 6.1 years (5.4 years). As a general principle, Entra's financing is based on a negative pledge of the Group's assets that enables a broad and flexible financing mix. Entra has strong banking relationships and currently has significant business activities with five of the top six Nordic banks. Further, Entra has a strong presence in the Norwegian debt capital market as it is among the largest issuers in Norwegian kroner.

During the year, Entra's interest-bearing nominal debt increased by 5,757 million to 26,903 million (21,146 million). The increase in interest-bearing debt was mainly due to project investments. The change in interest-bearing debt comprised an increase in bond and commercial financing of 5,829 million and 200 million, respectively, and a decrease in bank financing of 272 million.

The capital markets funding as of 31 December 2021 consisted of bonds and commercial paper outstanding of 19,886 million (14,057 million) and 1,400 million (1,200 million), respectively, which accounted for 79 per cent of total interest-bearing debt.

Bank funding of 5,617 million (5,889 million) represents the remaining part of the financing mix. The Group's bank facilities are mainly revolving credit facilities at the ultimate parent company, which enables active liquidity management by adjusting the facilities according to any ongoing cash needs or surplus. The Group's liquid assets amounted to 309 million (217 million) as of 31 December 2021. Net nominal interest-bearing debt after deduction of liquid assets was 26,594 million (20,930 million). In addition, the Group had committed, unutilised credit facilities totalling 8,830 million (7,290 million).

Entra is obtaining increasing access to "green financing" from debt investors, banks and other financial institutions, and 69 per cent of Entra's funding was "green" on 31 December 2021. Entra is well positioned to utilise this conditional and favourable capital source as the development and management portfolio consist of many highly environment friendly and BREEAM certified properties. Entra is established as a high-quality Green Bond issuer and has to date issued 13 Green Bonds with a total outstanding nominal amount of 15,546 million. CICERO (Norway's foremost institute for interdisciplinary climate research) has certified the Green Bond Framework. Entra was awarded the rating Dark Shade of Green, which is the best rating possible.

Maturity profile and composition of interest-bearing debt

Maturity profile	0-1 yrs	1-2 yrs	2-3 yrs	3-4 yrs	4+ yrs	Total	%
Commercial papers (NOKm)	1 400	-	-	-	-	1 400	5

Unutilised credit facilities (%)	-	-	17	35	48	100	

Interest rates and maturity structure

The Group's average interest cost as of 31 December 2021 was 2.25 per cent (2.38 per cent), and 47 per cent (50 per cent) of the Group's total interest-bearing debt was subject to fixed interest rates. The change in average interest rate stems mainly from repurchase of outstanding bonds with high coupon rates. At the same time, the average remaining term to maturity of the Group's interest rate hedging instruments was 3.1 years (2.4 years).

The Group manages interest rate risk through floating-to-fixed interest rate swaps and fixed rate bonds. The table below shows the maturity profile and contribution from these fixed rate instruments, as well as the maturity profile for credit margins on debt.

Fixed rate instruments ¹			Forward starting swaps ²			Maturity credit margins	
	Amount (NOKm)	Interest rate (%)	Amount (NOKm)	Interest rate (%)	Tenor (years)	Amount (NOKm)	Credit margin (%)
<1 year	1 332	1.83				5 992	0.99
1-2 years	745	2.81	3 000	1.73	7	1 579	1.06
2-3 years	1 300	2.55				924	0.80
3-4 years	2 700	1.94				2 470	0.75
4-5 years	3 839	1.84				4 029	0.77
5-6 years	1 050	2.10				2 094	0.86
6-7 years	1 000	0.92				2 000	0.84
7-8 years	1 400	1.50				3 400	0.76
8-9 years	400	5.63				3 915	0.74
9-10 years	100	1.75				500	0.85
>10 years	-	-				-	-
Total	13 866	1.99	3 000	1.73	7	26 903	

¹ Excluding forward starting swaps and credit margins on fixed rate bonds (credit margins are displayed in the table to the right).

² The table displays future starting point, notional principle amount, average fixed rate and tenor for forward starting swaps.

Investment grade

Entra has a strong investment grade credit rating assigned by Moody's at Baa1 with Stable Outlook. According to the latest credit opinion, Entra's Baa1 long-term issuer rating reflects (1) its position as the largest office property company in Norway; (2) its leadership position in office properties in attractive locations on the fringes of the central business district (CBD) in Oslo; (3) its modern, high-quality property portfolio; (4) a clear, well-defined strategy to focus on offices in Norway's four largest cities and government tenants; (5) the large exposure

to highly creditworthy governments and public tenants with very long-dated average lease maturities and consistently high occupancy rates across all cities; and (6) good liquidity and a high unencumbered asset ratio.

The Moody's Baa1 rating contributes to a strong credit availability for Entra in domestic and international debt capital markets and enables Entra to maintain its debt maturity profile.

Financing policy and status

The Group has adopted a conservative financial strategy that secures financial flexibility throughout an economic cycle. In this respect, Entra's financial profile is characterised by a moderate loan-to-value ratio, strong interest coverage ratio, diversified debt maturity and an ample liquidity position. Entra targets a loan-to-value ratio which shall be below 50 per cent over time. The Group's loan-to-value ratio as at 31 December 2021 was 38.4 per cent, up from 36.4 per cent at year-end 2020. The increase in loan-to-value ratio is mainly due to property

investments during 2021, however somewhat counteracted by increased property valuations. The interest coverage ratio increased slightly to 3.5 in 2021 from 3.4 in 2020.

The Group manages financial risk in accordance with a framework included in the financial policy. The main financial risks, in addition to financial leverage referred to above, are interest rate risk, financing and liquidity risk. The Group's financial policy is revised at least on an annual basis.

Financial risk	31.12.2021	Financial policy
<i>Financial leverage</i>		
Loan-to-value (LTV)	38.4%	Below 50 per cent over time
<i>Financing risk</i>		
Financing commitments next 12m	236%	Min. 100%
Average time to maturity (debt)	6.1	Min. 3 years
Debt maturities <12 months	14%	Max. 30%
<i>Interest rate risk</i>		
Interest coverage ratio (ICR)	3.5	Min. 1.8x
Average time to maturity (hedges)	3.1	2-6 years
Maturity of hedges <12 months	53%	Max 60%
<i>Credit risk / currency exposure</i>		
Counterparty's credit rating	Fulfilled	Min. A-/A3
Share of debt per counterparty	Fulfilled	Max. 40%
Currency exposure	Fulfilled	-

Risk management

Through owning, developing and managing properties, Entra is exposed to various risks that may affect the Group's ability to achieve the overall strategic targets and goals. Entra works continuously and in a structured manner to identify, monitor and manage these risks. The Group's risk management takes place through a structured analysis and decision-making process with the aim of creating a balance between the desire to limit uncertainty or risk and the task of creating growth and shareholder value.

Risk management aims to balance risk limitation and achieving defined objectives. To be able to estimate the effect of identified risks, an internal risk matrix is made where each individual risk is assessed, both from the perspective of effect and probability. The following 12 identified risks are viewed as the most important for the company to manage going forward.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Access to and price of financing Responsible: - CFO	A reduction in access to finance could weaken the company's global credit rating from Moody's, refinancing possibilities and ability to finance new investments. In such a situation, the company could be exposed to an increase in financing costs which would weaken the underlying result, debt service ability and dividend capacity. Greater risk aversion in financial markets could limit access to financing and weaken investor interest in the sector. Non-compliance with environmental regulations can increase cost of financing.	The development in the company's financing needs, ability and costs is monitored on a continuous basis and reported quarterly in business reviews in order to ensure that the financing operation supports the overall business strategy. We maintain strong relations with five of the top six Nordic banks and participants in the debt capital market. We maintain a diversified financing structure with a balanced maturity profile and financing mix in order to ensure stable and predictable access to capital. Entra established, and has kept, an official global, and a strong investment grade, credit rating Baa1 with stable Outlook from Moody's in 2018. The rating contributes to a significant increase in credit availability and has enabled Entra to further extend its debt maturity profile. We have committed, unutilized revolving credit facilities in order to secure financing of debt maturities due in the next 12 months as well as interesting investment opportunities. We limit interest rate risk through interest rate hedges and by issuing fixed rates bonds. We monitor closely, and act upon, any new regulations in the bank and debt capital market with respect to possible implications for the company's future financing We carry out Bream-In-Use certification, climate reporting on projects, technical mapping of climate risks of the properties in the portfolio.	➡ The market for commercial real estate financing has been open and attractively priced during the year. Market interest rates are still on historically low levels and are expected to remain at relatively low levels for an extended period of time. The acquisition of Oslo Areal in 2022 has brought the LTV up to approximately 47 per cent. However, this is fully manageable in light of Entra's high quality assets with limited residual risk combined with a very strong tenant mix on long WAULTs. We believe that Entra will be an attractive borrower in the coming period based on the company's predictable cash flow, strong tenant base, low leverage and solid global credit rating. Increased focus on EU Taxonomy and increasing reporting requirements on environmental track record and ambitions.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Health, Safety & Environment Responsible: - EVP Project development	There is an inherent risk that Entra's own employees, tenants in Entra's buildings and workers on Entra's construction sites may be injured. Entra's HSE policy states that "it shall be safe to work, visit and move in and around Entra's properties and construction sites".	Entra's employees receive HSE training according to 'the Entra school', which covers statutory and Entra policy HSE training. As part of this, all new employees are given HSE training and an introduction to Entra's HSE management systems. Entra has an open, clear and systematic HSE communication; and HSE is a topic at all board, top management, and employee meetings. Entra has HSE management systems to ensure that we comply with HSE requirements and internal routines - Entra has implemented HSE working routines to reduce HSE risk, both in construction projects and property management. - Entra's HSE management system is accessible by all employees, and by external parties when required. - Incidents are reported both on construction sites and in our management portfolio, and HSE reports are used to identify and mitigate areas of risk. - Continuous efforts are made to ensure a strong HSE focus with Entra's contract partners. - Audits are performed on selected construction projects, suppliers and topics. - During the Covid-19 pandemic we have taken proactive measures to comply with new and changing regulations and best practice to fulfill Entra's HSE policy Entra continuously focuses on enhancing the safety culture in the organization Entra's HSE Manager represents property developers in the managing committee for an industry-wide HSE system.	 Covid-19 has affected all Entra's business areas in different ways through 2021. Appropriate infection control measures according to legislation and recommendations from the government and local public administrations have been implemented; both in connection with the operation of buildings, in building construction projects and for Entra's own employees. The ordinary HSE work has progressed as normal throughout the year. There is clear focus on identifying and avoiding unwanted incidents on all levels of Entra. Severe incidents are followed up and investigated to ensure both learning and future avoidance. Entra has had very high construction activity through 2021 following the start of several new development projects. The increased project load also means that Entra has employed contractors without a proven history working with Entra's HSE policies which increases the HSE risk in the project portfolio. To reduce the risk of injuries at the construction sites special attention has been given to HSE Planning in the 'early phase' of the projects before start-up at the construction site.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Development in value of property Responsible: - CFO	The property portfolio of Entra is valued quarterly by two external appraisers. A substantial negative development in the property value will affect both the profit and loss account through unrealized changes in value and through an increase in key figures like the loan to value ratio (LTV). A too high LTV could potentially have negative effects on Entra's cost of capital, access to capital and shareholders' interest and attention. Entra have signed several contracts with solid tenants with long contract maturity in a major part of our project portfolio during 2021. The contract terms have been above or in line with the market expectations, which have led to a substantial value increase of these properties. Regulatory changes as well as large fluctuations in energy costs could potentially effect the valuation of assets.	We follow up the risk quarterly through active dialogue with the external appraisers and continuously monitor the market. We work continuously on portfolio optimization and risk mitigation in relation to geography, letting profile, segment, and "strategic fit". We focus on risk reducing measures in the portfolio, including rent levels, lease lengths, counter party risk, occupancy ratio, and the overall quality of the portfolio. We have an objective to keep LTV below 50 per cent over time, and we regularly simulate different negative scenarios in the market, which could affect the market value of Entra. We focus on sustainability, including when appropriate to maintain and upgrade older properties rather than re-build. Further, we focus on environmental impact in a holistic perspective, rather than limited to scope 1 and 2.	➡ Entra's property portfolio has increased in value substantially in recent years, mainly as a result of lower yield requirements but also as a result of ongoing project completion and the signing of new and renegotiated leases. During 2021, market rents has been stable, but continued low return requirements especially for properties with long maturity and solid tenants in the fringe areas of large cities has been a substantial contributor to the positive value changes in the property portfolio. The risk of an increase in the interest rate levels could make investors seek other type of assets, which could affect the return requirements and further the value of the properties. Increased focus on holistic sustainability requirements and cradle to grave perspectives with potential implications on construction costs.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Occupancy ratio Responsible: - EVP Market and commercial real estate development	The occupancy ratio in the management portfolio affects Entra's bottom line through growth in rental income and lower operating costs. The occupancy ratio in the management portfolio relates mainly to lease expiries and to what extent we are able to renegotiate with existing tenants. In addition, projects completed with vacant space will affect the occupancy ratio. In the long term, the occupancy ratio is also affected by how flexible our buildings are regarding changes in customer demand. The pre-let occupancy ratio in development projects is a key measure for indicating the level of risk Entra takes when we make investment decision. Fluctuating energy cost may increase tenant focus on total cost of letting and may have adversely effect on rent levels and on tenant appetite for less energy efficient buildings.	The occupancy ratio in the management portfolio and in the development project portfolio are important key figures in all external and internal reporting. Vacancies and market opportunities are monitored regularly, and reported quarterly through a detailed overview of all forthcoming lease expiries in the next four years. Vacancies and market opportunities are monitored regularly and reported on quarterly Expiring lease contracts in the next four years, and the probability of renegotiation, are evaluated continuously. The largest customer accounts are followed up with separate "key account strategies". For all the major leases that expires during the next four years we focus on early involvement and broad contact with the relevant customers to identify future needs, flexibility related to increased/reduced space, and different ways of organizing the workplace. In all ongoing development projects, dedicated letting teams are established, consisting of letting, property and project resources. The letting teams work to ensure an optimized design and solution for the relevant building to attract new tenants. The pre-let occupancy ratio in projects is reported and followed up continuously and reported on externally every quarter. In the planning of future development projects, a separate early phase strategy is prepared in order to secure a flexible building and an attractive product independent of long-term workspace trends. Here, we combine markets and customer knowledge with building and operational expertise. In relation to Covid-19 implications we are in regular contact with potential and existing tenants for direct customer insight, sharing relevant research, experience, analyses to better understand future needs and to reduce uncertainty. Continuously monitor energy efficiency and work to reduce energy consumption. Screen and prioritize which buildings should have mitigating improvements.	➡ Through the Covid-19 pandemic, both existing and potential tenants are reevaluating previous office solutions, letting and decision processes are thus taking more time. The occupancy rate in the management portfolio during 2021, has been consistently high and in line with, or better, than historical averages for Entra. Entra started several new projects through 2021 reducing the pre-let occupancy rate in the overall project portfolio. The letting activity is high on all ongoing projects, market fundamentals are favorable and there still is a long time to completion on projects where the pre-let occupancy is in the lower range. Major leases expiring in the coming years could affect the occupancy ratio negatively. The increased focus from potential tenants on new work place strategies and how to organize the office space can potentially impact the occupancy ratio negatively on forthcoming renegotiations. Due to increased rent levels in Central Oslo, tenants in the public sector are increasingly searching for alternative locations outside city centres.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Customer satisfaction Responsible: - COO	Customer satisfaction affects Entra in different ways. A high score on customer satisfaction over time reduces the risk that tenants will move out of our buildings. A high level of customer satisfaction is an important competitive advantage in any negotiating situation and in attracting new tenants, allowing us to focus on other value drivers than price. Customer satisfaction can also be affected by other factors, such as negative comments about Entra in the media, or other situations that affect the reputation of the company negatively. Negative customer feedback on environmental strategy. Tenants located in less energy efficient properties may expect Entra to upgrade more and faster than planned. Damage to third party equipment and installations from physical climate related incidents.	Customer satisfaction is measured annually through the Norwegian Tenant Index and is recorded and tracked on individual tenant level. This index is used by a large part of the real estate sector and enables us to benchmark ourselves with our competitors. The survey is a good tool to identify areas for improvement and areas where we perform better than our competitors. Based on results from the customer satisfaction survey we make an action plan on how to further improve customer satisfaction. We carry out regular "customer journeys" together with our large customers to evaluate our customer offering and identify areas of improvement. Large customers are followed up through "key account strategies", a plan for how we systematically should interact and work together with customer and strengthen the relationship We aim to continuously develop our product and service offering to meet customer expectations Mapping of physical risk and consequences on all properties to assess the risk and gain the ability to prioritize and implement adequate mitigating measures.	 In recent years, Entra's customer satisfaction has increased considerably. At the end of 2021, it was at a record high level of 87 points. A customer satisfaction score of 80 or higher is considered to be satisfactory across all industries. Entra has been above this level for seven consecutive years, which supports the view that our systematic work on customer satisfaction is well established in the company's culture. On the other hand, we experience more demanding customers with increased service requirements. We also see both new and existing players in the real estate sector targeting our prime customers offering new concepts and services. We expect this development to continue in the years to come and believe that product- and service offering will be of even greater importance. Through a continued strong customer focus in the entire organization and solid deliveries in our extended service offering, we regard the risk of customer satisfaction moving below the targets we have set as low. Steadily increased focus on ESG reporting, energy efficiency and costs.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Project profitability Responsible: · EVP Project Development	Entra uses the net present value method to determine if a project is profitable using a discount rate that reflects the individual risk profile of the project. Project profitability is assessed continuously in relation to changes in financial key figures; mainly yield-on-cost and economic occupancy rate. Profitability is measured and reported against assumptions made at the time of the investment decision. Investments are also affected by several external factors that are outside the company's control, such as CPI growth, interest rate levels, changes in currency levels, taxes and duties, etc. Sustainable performance may influence cost of financing, project profitability and tenant demand.	A thorough risk assessment is performed before any investments are made. To reduce vacancy risk, it is normally required that a substantial part of the property is pre-let before project commencement. Pre-let requirements is assessed based on a combination of market outlook, demand/supply in relevant micro location and aggregate vacancy risk in the property portfolio. Working with a main contractor on a fixed price contract, including extensive use of turnkey construction contracts, reduces the risk of cost and time overruns. Covid-19 risks has been mitigated through use of local suppliers and materials reducing dependence on global sourcing and transportation, as well as working with companies that have a good track record of handling the pandemic. Use of internal project managers to secure proper ownership, strong project management and key risk focus throughout the entire project. Financial parameters, quality and progress are closely monitored and reported on regular basis for all ongoing projects. On all turn-key projects, we establish regular meetings with the main-contractor to proactive identify and mitigate risk Marketing strategies and letting plans are established for known vacancies before project start and continuously updated during the project development phase ESG budget and performance included in project calculation processes. Assessing climate performance from new technology.	↑ Entra's project management process enables us to mitigate risks and keep the project profitability intact, also taking into account the following changes in risk assessment through 2021: · Uncertainty related to the Covid-19 pandemic has decreased substantially, partly due to the response of the Norwegian health authorities, and partly due to Entra and industry specific actions mitigating supply-chain disruptions and worker absences. · We currently have several ongoing redevelopment projects which have been started with a lower pre-let ratio. Letting has progressed well in spite of covid restrictions throughout the year, and occupancy has increased through 2021. The risk of cost increases affecting project profitability is higher in projects with a low pre-let ratio seeing that we to some extent need to comply with new tenant requirement upon signing. This risk is partly mitigated through the contract strategies for these projects. · Changes in tenant demand may change from the traditional office space rent model with long leases to more flexible lease contracts increasing income risk/project cost and affecting project profitability. · Several projects are likely to be multi-user buildings giving increased flexibility in respect of future reletting of buildings. Experience indicates that this increases complexity, potential cost and schedule overruns, and potential vacancy in the first years of operation. · With a larger number of ongoing projects Entra has expanded the number of suppliers to include contractors without a proven history of working with Entra thereby increasing supplier risk. · During 2021 there has been a significant increase in construction costs.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Build and retain critical competence Responsible: - EVP HR and organization	The risk that Entra does not maintain the expected personnel quality and capacity on critical deliveries within the company's core business. The lack of a solid and convincing ESG strategy may discourage new employees/possibility to attract new employees. On the other hand, companies with focus on ESG increasingly attract talent.	The development and management of competence is an integral part of the business strategy. We have initiated measures on recruitment to attract and retain relevant talent and applicants with future-oriented competence. We work systematically with talent development and succession planning. We follow up employees with individual plans to develop competence and career development, including, but limited to, the "Entra School". Our employees participate in professional networks and participate on external courses. We conduct an annual employee survey to measure the engagement and satisfaction of employees and make action plans where required. We benchmark and assess compensation and benefits to ensure that we are competitive. Through the Covid-19 pandemic, we have systematically taken proactive measures to ensure the collective and individual experience of safety and support employees to facilitate productivity, motivation and professional development. Well established communication of ESG strategy, continue to gain insight and implement ESG related matters	 In general very high employment growth rate and low unemployment following the rebound of the economy post covid-19. There is still a high level of activity in the real estate sector and a strong competition for talent and attractive candidates. Within certain areas of expertise, such as ICT/digitalisation, building and environmental technology and technical management, we are experiencing strong competition in the labour market for leading edge competence. Compared to a all time low turnover in 2020, we experience a significant increase in turnover rate in 2021. Uncertainty in respect of the future ownership structure for Entra has negatively affected the job satisfaction within certain areas of the company. Entra still experience a competitive advantage in the recruitment of new employees due to a strong ESG employer brand, however a sustainable workplace is more becoming a hygiene factor in the competition for talent acquisition.
Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Investment strategy Responsible: - CFO	Acquisition and divestments of assets, including portfolio rotation, is an important tool to achieve Entra's objectives. Particular risk factors identified include: - Diversification, including geographic, sector and type - Timing of transactions in relation to economic cycles and the life-cycle of the individual property - Access to development sites and property for development - Technical errors and incorrect assumption in valuations and investment calculations - Matters that are not revealed or overlooked in due diligence - Poor decision-making processes, including a lack of objectivity, an incorrect agenda/incentives, "group thinking", the degree of risk appetite, and inadequate expertise	Our key employees have long experience from M&A combined with commercial real estate market knowledge. We evaluate each investment case by reference to strategy, risk and profitability. This is done at several levels, including the CFO unit, Entra's investment committee, executive management, and Board of directors. We review capital return requirement with the board at least annually, but more often with changes in the underlying macro and risk sentiment. We thoroughly scrutinize and verify assumptions in the investment model by different external and internal professionals. Financial models are always reviewed by at least two people. All investments exceeding NOK 100 million must be approved by the Board of directors.	 The economic cycle appears to be in a recovery phase after the severe adverse impact from the Covid-19 pandemic outbreak. There is greater competition for sites/development projects. There is still significant activity in the transaction market, and the buyer interest stemming from both domestic and foreign investors is very strong

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Compliance Responsible: - Chief Compliance Officer	Compliance is a compilation of Entra's specific assessment of risk factors within the compliance area. Entra's key risk factors within compliance are viewed to be the following: - Corruption and financial crime - Ethics - Social responsibility - Personal data protection - Insider rules - Information security	Risk assessment, monitoring, and follow-up is an integral part of Entra's operations on all levels, including the Board of directors, that discuss risk on a regular basis. Entra has a structured plan to follow up each key compliance risk, including, but not limited to, the following: Corruption and financial crime: - E-training program - Purchase and invoice controls - External and internal whistle blower channel Ethics: - Dilemma training - External and internal whistle blower channel Social responsibility: - Socially responsible purchasing - Procurement policy - Supplier controls - Human Rights Policy Personal data protection: - Data processing agreements - Establishment/ follow-up of internal routines - E-training program - Focus on GDPR Insider rules	➡ The overall compliance risk is perceived to be unchanged during 2021. GDPR has lead to a potentially higher impact on risk through fines on companies that are not compliant with the regulations. Management has, however, worked diligently during 2018-2021 to ensure that the company is compliant regarding GDPR.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Information/ cyber security Responsible: - COO	Information security risk includes the threats that an external or internal attacker exploits vulnerability in Entra's ICT systems, processes, building technology systems or applications in order to cause harm to the company and/or users of the company's systems. Information security risk deals with the requirement for reliability and security in relation to the transfer and storage of information, including, but not limited to: - Cyber security that covers securing information values that are vulnerable via access from ICT systems - ICT security that covers securing information and communications technology in relation to confidentiality, integrity and availability.	We focus on security and employees' knowledge and attitudes, including training of all of Entra's employees. To increase focus and improve understanding of ICT threats, nanolearning (short, internet-based learning sessions) are implemented for all employees. We use suppliers with certifications that focus on security. We have outsourced the operational part of ICT security to one of Norway's top-class companies. We regularly carry out analyses of critical systems related to operation of our buildings and the company, some major systems are connected to the external ICT security company's platform and fire wall. We use a third party to carry out audits and testing of actual security on systems and users. We continuously close identified security gaps. We are implementing an information security management system (ISMS). As part of this, we are defining a yearly security activity plan, and the role CISO (chief information security officer) and ISM (Information security manager) has been established. A strategy and action plan for the next three years has been updated and the plan is being executed upon. Entra has acquired a cyber security insurance with a global insurance company in order to have the ability to use all recourse necessary if a serious incident occurs and to reduce financial risk.	 We have seen an increased cyber crime activity in recent years. National Cyber Security Center (NCSC) reports an increase in specifically ransomware towards Norwegian companies. A new and more frequent threat is that is that company data is threatened to be auctioned off unless ransom is payed. Increased and more sophisticated use of phishing and CEO fraud has become a more frequent threat and is also noticeable in Entra; this requires more competent end users. Increased use of home office has escalated the challenge to protect Entra users and Entra information. Entra's buildings are becoming more technologically sophisticated, and new technology also constitutes a possible increased security risk.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Physical climate risk Responsible: - CFO	We consider short-, medium- and long-term time horizons to be 0-3, 3-10 and 10+ years respectively. Herein, we recognize that climate-related issues tend to manifest themselves over the medium to long term and that our properties have a life-time of many decades. Regulatory changes imposed resulting from climate related risks are highly relevant and are monitored closely. Increased severity of extreme weather events such as storms and floods is a long-term risk. Property values constitutes most of Entra's balance sheet, and potential physical damage to property values could be severe. Damage to third party equipment and installations may lead to increased insurance cost and/or reduced customer satisfaction. Lagging behind with regards to new technology is a risk facing every company today on many levels, also climate related. Failure to comply and adapt to climate related matters is also a significant reputation risk which could result in e.g., lack of tenant interest, higher cost of capital in the financial market, and lack of ability to attract or retain talent. Also, not handling the company's corporate social responsibilities in an informed and good matter is a reputation risk, whereas the opposite is an opportunity.	Entra's buildings are well maintained, and we build and refurbish buildings to higher standards than current regulation demand. All newbuilds and major redevelopment projects are certified according to BREEAM-NOR, and we continue to certify our management portfolio according to BREEAM-In-Use. We map consequences and probabilities of all properties regarding physical climate risk to assess the risk and gain the ability to prioritize and implement adequate mitigating measures. We observe that green buildings get higher valuations, slightly higher letting price per sqm (believed to be a stronger trend going forward), and green financing is more favorable than traditional financing. We invest in new technology and methods for producing more energy of our own, and we actively seek to use technology to make our buildings smarter and greener. Technology is driving changes in how we work and has an impact on the space we occupy. Entra has a separate digital and technology department seeking to harmonize initiatives and drive the development. We actively work to reduce the CO₂ footprint, waste disposal, and energy consumption in our portfolio, and KPIs within energy efficiency and waste disposal are included in the scorecard for determining variable pay for all employees in Entra. The location of Entra's properties is not seen as particularly exposed to flooding. Damage to property from e.g. heavy rain is an integral part of risk management on individual asset level. When establishing outdoor façade scaffolding and weather protection superstructure for buildings, we focus on safe and "extreme weather" robust solutions. We engage in industry campaigns to build internal competence and enhance qualification processes for suppliers. The EU Taxonomy provides a methodology and standards for measuring and classifying the portfolio. Entra will, when setting the new targets for its environmental strategy, to a large extent base this on the Taxonomy and follow up accordingly.	➡ Increased premium on insurance due to a general increase in both number of incidents and the cost of each incident. While the gross risk related to climate has increased, Entra has invested significantly in process improvements and technologies to reduce the physical climate risk in the portfolio. As such, we find that the overall risk is unchanged during 2021.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2021
Changed use of, and demand for, offices Responsible: · CFO	The overall demand for office space is primarily driven by the number of office workers in the economy, the space required per office worker, and the time each spend at the office. The number of office workers in general, at least over the medium and long run, follows the state of the macro economy within a country. Space per employee has in the last decades been reduced following the introduction of open spaces and activity based working. The extent that each office worker spends time, and thus requires a separate desk, varies greatly from tenant to tenant. Work-from-home has in the last decades increased in popularity but it has not, until Covid-19, been a significant part of the daily life for most Norwegian office workers.	We closely monitor key macro variables, e.g., economic activity, investments levels, employment participation ratios and unemployment, interest rates, asset prices, etc. to be prepared for major changes affecting Entra's business. Entra's property portfolio has during the last six years been focused on the largest cities in Norway where we assess that the growth potential of office activity is the largest and thus with lowest residual risk. Further, we have streamlined the portfolio towards office clusters in the central parts of these cities with excellent commute opportunities. In all renegotiations, we work closely with our tenants to provide optimal solutions for them. During the last decade, the public sector tenants have taken steps towards reducing the office space per employee significantly, and we now see limited risk of further reducing the required space per employee in our portfolio consisting of approximately 56 per cent public tenants. Increased co-operation with prospective and existing tenant through Entra's new in-house tenant advisory team.	↓ Whilst Covid-19 reduced the economic activity in Norway during 2020 and first half of 2021, the underlying fundamentals for the Norwegian economy has remained strong. Covid-19 greatly increased the use of work-from-home, and a shift to hybrid work seems abundantly clear for office and knowledge workers. We believe, though, that negative effects are not significant and thus fully manageable. In a number of recent negotiations in the Norwegian market during the last 18 months the new volumes required in most cases have equaled the volumes prior to renegotiations. This applies to both Entra-specific negotiations and the Norwegian office market in general and also substantiated in various international studies and meta studies. Thus, whilst work-from-home could be a negative contributor to the overall office demand, the negative effect will at least be partly offset for the following reasons: · Employers/management have experienced that employees working in the office together with their co-workers are more proactive and creative · The office has an important function with regards to develop competence and retain critical competence and installing and maintaining the company's culture amongst the company's employees. This is particularly important with regards to the new hires · The costs of renting offices are normally a very small part of a company's cost base, estimated to around 5 per cent of employee costs. · Whilst most employees appreciate the flexibility to work-from-home, and particularly in the beginning of the pandemic, the trend is very clear that almost all employees prefer to spend a large part of their working time at the office with their colleagues · In Norway, the typical day of working from home is Friday (and thereafter Monday). During mid-week, most employees are in the office, and the office design and volume must thus anyway be designed to fit almost 100 per cent of the employees · With Covid-19, and possible later pandemics in the coming years, the office designs need to take social distancing into account with desks further apart. In addition, it is our experience that most companies require a significant increase in small meeting rooms to enable video meetings which require more space. In short, employers are reshaping offices to become more inviting social spaces that encourage face-to-face collaboration, creativity, and serendipitous interactions, which will benefit landlords like Entra. · Time spent on commuting is limited for the majority of Norwegian employees seeing that we have smaller cities and well developed transportation infrastructure.

Summary risk-matrix

¹ Both financial and/or non-financial effects

ESG

It is of key strategic importance to Entra to operate our business in a sustainable manner and it is a prerequisite for the company's long-term results and value creation. Entra has a systematic approach towards understanding and managing the company's impact on society, as well as stakeholder requirements and expectations. This report highlights our 2021 activities in greater detail and outlines what we have planned for 2022.

Reporting standards and responses

To enable our stakeholders to compare and evaluate our reporting, we compile and align the ESG reporting for 2021 with three reporting frameworks: the European Public Real Estate Association Sustainability Best Practices Recommendations on Sustainability Reporting (EPRA BPR), the Global Reporting Initiative Standards (GRI) and the Task Force on Climate-related Financial Disclosures (TCFD).

The EPRA BPR Guidelines provide a consistent way of measuring sustainability performance for real estate companies and cover environmental, social and corporate governance categories. The GRI Standards, applicable to all industries, include both relevant disclosures for a range of economic,

environmental and social topics as well as reporting principles related to the reporting process. This report has been developed in accordance with the GRI Core option. The TCFD framework provides for consistent climate-related financial risk disclosures. The EPRA, GRI and TCFD tables and references are included at the back of this report.

Entra believes that 100 per cent of its income and investments will be eligible for EU Taxonomy alignment. While actual requirements for alignment is still to be finalised, Entra has put significant efforts into understanding the new regulations, and will start reporting according to this framework during 2022.

In this report we have also set out a review of our Environmental, Social and Governance (ESG) strategy relative to the UN Sustainable Development Goals (SDG) against

We achieved the EPRA Sustainability Gold Level also in 2021 and the Global Real Estate Sustainability Benchmark (GRESB) Green Star status with a total score of 92, up from 87 in 2020.

Third party verification

Entra has engaged Deloitte to conduct a review and provide a limited level of assurance on Entra's ESG reporting. The review and assurance are carried out in accordance with the assurance standard ISAE 3000 "Assurance Engagements other than Audits or Reviews of Historical Financial Information" established by the International Auditing and Assurance Standards Board. The auditor's conclusion and scope of work is presented in the Auditor's report, included at the back of this Annual report.

Management approach

ESG is fundamental to Entra's strategy and has been so for more than a decade. The Board of Directors determine the ESG strategy and review performance. This includes responding to climate related opportunities such as investment in renewables, improvements in energy efficiency and investment in low-carbon solutions. The Board also review and determine how to respond to different climate-related risks including policy, regulatory and legal risks, as well as the physical risks to our assets.

Entra's main stakeholders

In addition to the quarterly reviews, Entra's business units also present in-depth business reviews to the Board of Directors at least on an annual basis. These reviews also include ESG targets and KPIs. Targets are aggregated into company KPIs which are followed up on a regular basis.

The CEO is responsible for following up the implementation of the ESG strategy in Entra. Entra's risk management framework is structured to enable effective identification, evaluation and management of climate-related risk. Ownership and management of all key risks, including climate related risks, are assigned to members of the corporate management who are responsible for implementing key risk mitigation plans. Implementation is mostly handled by the individual business units and is reported to the CEO/CFO through quarterly business reviews and in corporate management meetings.

Entra also has an ESG Committee with a separate responsibility to evaluate, follow-up and implement the ESG strategy as well as new initiatives. This Committee reports to corporate management on a regular basis.

Stakeholder dialogue

It is important for Entra to maintain an open and honest dialogue with its main stakeholders. Such dialogue provides valuable feedback and enables Entra to continue to improve, to build trust and to enhance its reputation.

A process towards selecting the annual report's content and confirming its validity is undertaken on an annual basis. Entra engages with various groups and individuals to understand

specific opportunities and concerns about our business and its impact. Such engagement is, amongst others, based on dialogue, meetings and feedback from business partners, investors, customers, authorities and employees. Other sources of information include an assessment of media and industry reports. In 2021, the materiality analysis and focus areas have been revisited and the validity confirmed by Entra's Board and management.

Entra's stakeholders are particularly concerned about how we handle environmental matters, governance, ethics and anti-corruption measures, our corporate culture and employee satisfaction and our role as a major owner and urban developer of properties in the largest cities in Norway.

Materiality analysis and focus areas:

Entra believes that a systematic approach towards understanding and managing the company's external factors is a prerequisite for future value creation. The main steps in selecting the focus areas involve identifying and understanding topics that are important to our business strategy and to our stakeholders.

The focus areas and priorities are based on a broader materiality analysis of areas where Entra and its stakeholders believe the company can make an important and sustainable impact. The topics are important for future progress and long-term value creation. The outcome of the analysis is in all material aspects similar to previous years and is illustrated on the next page.

Materiality analysis

Focus areas

Based on the materiality analysis the following five areas continue to be seen as core to Entra. The work within each field is further described in this report.

Climate and the environment

Urban development

Motivated employees

Ethics and anti-corruption measures

Health and safety

Supporting the UN Sustainable Development Goals

As a major participant in the Norwegian commercial real estate market, we believe that we have an important role to play in supporting Norway's response to the 17 Sustainable Development Goals (SDGs). To do this, we have reviewed our sustainability strategy and program against the SDGs to highlight where we align.

We see the following goals as particularly significant to our business and how we operate: SDG 9 Industry, Innovation and Infrastructure, SDG 11 Sustainable cities and communities, SDG 12 Responsible consumption and production, and SDG 13 Climate action.

Goal 9: Industry, innovation and infrastructure

Entra focuses on innovation and actively seeks innovative environmental solutions for its properties and building projects. Entra focuses primarily on low energy consumption and renewable energy in the existing asset portfolio and in all of its projects, with an overall ambition that new and totally renovated buildings will have an energy consumption of less than 40 kWh per sqm (close to zero energy buildings). Entra also seeks solutions for increased production, storage and exchange of renewable energy.

Goal 11: Sustainable cities and communities

Entra seeks to contribute to cities and communities that are sustainable, attractive, inclusive and accessible for residents and others that work or visit the area. We take an active role in developing the areas and public spaces around our buildings, and we ensure they are accessible to those with disabilities. We seek to use environment friendly materials and solutions when developing and operating our buildings. We seek solutions for re-use and upcycling of furniture and materials to reduce carbon emissions, and we focus on making and maintaining our buildings climate resilient.

Goal 12: Responsible consumption and production

Entra sets performance requirements in its development projects which focus on the efficient use of natural resources, lifecycle efficiency and high levels of waste reduction and recycling. This is reflected in our management of our buildings where we set targets for waste sorting and place focus on re-use of materials in our projects.

Goal 13: Climate action

We have set science-based targets which are set towards not exceeding a 1.5 degrees Celsius rise in global temperature, in line with the Paris agreement. This means we are committed to reducing our carbon emissions and making sure our portfolio is climate-resilient. For a more comprehensive description of our work on taking climate action, please see the section below.

Environment

Environmental leadership is one of Entra's three strategic pillars, and Entra has over many years developed a corporate culture with a strong environmental focus throughout the entire company. Entra's work to prevent climate change is built on the precautionary principle. Entra's environmental leadership has become well-known among its stakeholders, and the environmental commitment contributes to its ability to attract the best and most competent resources.

Environment strategy

Entra is deeply committed to contribute to the transition towards a low carbon society and the overarching target is to become a Net Zero Carbon company within 2030, **according to the definitions and targets set out by World Green Building Council.**

Entra's environment strategy has a 360° approach and includes strategies and targets for 1) own organisation, 2) the property portfolio and property management, 3) the development projects, and 4) stakeholders, including suppliers and customers, amongst others.

At the core of the strategy lies Entra's continuous efforts to reduce energy consumption along with initiatives to produce green energy in order to reduce emissions from the buildings in its operational phase.

For new-build projects, Entra's long-term goal is to have CO₂ emissions that are 50 per cent below the industry average, in accordance with the criteria's set in Futurebuilt Zero¹. For redevelopment projects, stronger focus is put on retaining and upgrading existing buildings rather than demolishing and building new. A greater focus on reuse of materials in accordance with Entra's strategy for circular economy has been developed. CO₂ accounting is applied for all new-build and redevelopment projects to better evaluate the projects impact and use of low emission materials. The results achieved regarding CO₂ emissions of some of Entra's reference buildings and pioneer projects in terms of environmental leadership are used as benchmarks for the ongoing and planned project portfolio.

Our environment strategy

¹ https://www.futurebuilt.no/Nyheter#/Nyheter/FutureBuilt_ZERO-veien-1001-pullutslipp

The Group

Entra's overarching target is to become a Net Zero Carbon company within 2030. This is an ambitious target that needs focused work on reducing both direct and indirect emissions throughout the value chain. The most important measures will be taken within property management and property development where knowledge and expertise about existing and new solutions will be crucial. All employees in Entra are obliged to contribute, to influence and to continuously search for solutions to solve the problem.

Focus areas own organisation

Entra has a corporate culture where environmental awareness is strongly embedded at all levels in the organization. This is something that Entra continuously seek to develop further and use as a lever in implementing an even broader environmental focus. Entra strives for a culture in which every one of the company's employees seeks to influence suppliers, customers, and partners to make wise environmental choices. Entra strives to attract the best employees and actively seeks to develop employee competence through R&D projects, education, and training. It is a strategic priority for Entra to stimulate this type of competence building to increase both employees' and Entra's overall expertise within the field. Entra works actively to increase environmental engagement and responsibility among its employees, customers, and suppliers. Entra still has much to gain from reinforcing its focus on a circular economy, reduced consumption, reuse and recycling of building materials, and waste handling.

Entra has an ambition to act as a role model in relation to lessees' environmental focus. As a consequence, Entra's head office in Oslo is certified in accordance with the environment requirements set out in "Miljøfyrtårn" (Environment Lighthouse).

Entra's ambition is that the operation of its buildings is climate neutral. Today, energy consumption amounts to approximately 77 per cent of Entra's CO₂ emissions from Scope 1 and 2 and is thus the most important source impacting our operational carbon footprint. Reducing energy consumption in the managed assets is therefore an important part of the path towards net zero carbon by 2030. From 2020 to 2021, Entra reduced its greenhouse gas intensity from 4.45 kg CO₂e/sqm to 4.00 kg CO₂e/sqm.

As part of the net zero carbon strategy Entra has set a target to reduce its Scope 1 and 2 CO₂ footprint by at least 70 per cent from 2015-2030, based on the science-based target methodology and principles. This will be achieved through reduced energy consumption, increased production of green energy, phasing out harmful cooling media, reducing the quantity of waste, and focusing on green transport. The rapid developments taking place within prop-tech, solar energy and battery technology contribute to our optimism in this regard.

In order to compensate for emissions from electricity used in our buildings and make Entra's business close to climate neutral

TARGETS AND FOCUS AREAS IN OWN ORGANIZATION

Focus areas	Targets and measures
Environmental awareness is part of our corporate culture	- Continuous work to improve expertise and increase environmental awareness and responsibility among the employees - Encourage employees to choose environmentally friendly transport
Climate neutral operations and property management	- Net zero carbon by 2030 - Work actively to reduce the CO₂ footprint, target to reduce this by at least 70 per cent from 2015-2030 - Gradually replace bought energy with self-produced renewable energy - Deliver only green energy on Entra's buildings through guarantees of origin for all electricity use - Phase out all cooling media that are not climate-friendly - Focus on innovation, potential for lower return requirements for environmental investments
Environmental leadership is an important part of our social responsibility and reputation	- Attract the most competent and innovative people and partners - Make our environmental commitment known to our counterparties - Influence our suppliers to deliver low carbon materials, products and solutions - Continue to issue green bonds and secure green bank financing where applicable
Environmental certification and reporting targets	- Organisation and head office certified in accordance with "Miljøfyrtårn" (Environment Lighthouse) process - Retain GRESB Five star rating - Retain EPRA Gold rating - Retain CICERO rating "Dark shade of Green" - Ownership and follow-up of environmental targets in the management portfolio and project development

already today, Entra buys guarantees of origin (“green power”) corresponding to the electricity consumption of its buildings. Entra will also gradually produce more and more renewable energy through new development projects, on refurbishment projects and with solar panels on the roof of existing buildings.

Entra has also carried out several green measures in its buildings, amongst others through green benefit agreements together with the tenants as further described below. This has been an important contributor to succeeding in reducing energy consumption. This type of investment usually has a long payback period, and Entra has adopted a slightly lower return requirement in relation to environment investments and innovation that protects the environment.

Our Stakeholders

Entra works actively with influencing and setting requirements for its suppliers, customers, and other stakeholders in order to contribute to the “green transition”. Specifically, this means that Entra puts environmental matters on the agenda in meetings with its counterparties and seeks to work with companies with a credible environmental profile. Entra sets environmental requirements on its suppliers and partners through conditions on purchasing and social responsibility. Entra has imposed a total prohibition on the use of materials hazardous to health and the environment that are on the Substance of Very High Concern (SVHC) list and works towards fossil-free construction sites.

Entra works to increase awareness of the environment among users of its buildings. Not only its customers, the tenants of the buildings, but also their employees and visitors are included in this definition. Entra seeks to implement environmental measures that are visible and inspiring for the people that work in our buildings such as working with the lunch restaurants to reduce food waste and removing plastic packaging. Entra also works to enable the implementation of environmental measures, both by tenants individually and in cooperation with

Entra. An example is waste sorting where Entra has developed waste sorting stations and supporting material/information brochures. This initiative also underpins Entra’s ambition to achieve at least 70 per cent waste sorting on its properties.

Green Benefit Agreements

These agreements are Entra’s own scheme for working with customers on environmental measures. Entra’s role is to identify the potential measures together with customers and then implement and provide financing. Customers refund the cost through an increased rent for a set period on the basis that the customer’s share of energy cost is reduced by more than the increase in rent. Once the initial investment has been paid down, the customer receives the benefit through lower common costs while Entra owns a more valuable property. Since 2011, Entra has signed more than 100 Green Benefit Agreements with its tenants.

In addition, Entra will continue to focus on reduction, reusing and recycling when making tenant alterations and furnishing premises and common areas, and will seek to influence customers and suppliers to make the right environmental choices.

Entra has been successful in making its environmental commitment known to its stakeholders, and has shared, and will continue to share, its expertise and experience with other industry participants.

Membership of associations

Entra participates actively in various technical bodies, industry cooperation and industry organisations such as Powerhouse collaboration, Næring for Klima, Norwegian Green Building Council, Norsk Eiendom and Norges Bygg og Eiendomsforening (NBEF). Entra has signed up for Oslo European Green Capital Industry Challenges and has participated in several R&D projects such as “Svalvent” together with Sintef.

TARGETS AND FOCUS AREAS IN WORK WITH STAKEHOLDERS:

Focus areas	Targets and measures
Set environmental requirements for our suppliers	• Environmental requirements in Entra’s procurement conditions • Requirements for reduced waste quantities, reuse and recycling • Prohibition of use of materials hazardous to health and environment • Put environmental matters on the agenda in meetings and contracts with suppliers
Increased environmental awareness among customer and end users of Entra’s buildings	• Carry out environmental measures that are visible and inspiring for people that work in and visit our buildings • Facilitate environmental measures implemented by customers • Identify green measures and sign “green benefit agreements” with customers
Share our expertise and experience	• Hold lectures, contribute to technical bodies, industry cooperation, industry organisations etc.
Contribute to sustainable and good urban development	• Contribute to relevant environmental solutions in property and urban development, with good transport and energy solutions, climate adaptation and greater biological diversity

The property portfolio

Entra uses a management system to compare, follow-up and control the various buildings' environmental qualities with a focus on the consumption of energy and water, as well as waste and waste sorting.

Energy consumption in the portfolio 2011-2021

kWh/sqm.

Internal measurement method deviates from EPRA methodology as it adjusts for differences in e.g. outside temperature.

Over time Entra has built a culture in which energy management is an integrated part of its operating organisation. Entra has worked diligently to reduce energy consumption in its portfolio (from 202 kWh/sqm in 2011 to 123 kWh/sqm in 2021). Energy consumption in 2020 and 2021 was particularly low as activity in the buildings was significantly reduced during periods of partial lock down through the Covid-19 pandemic. An important reason why Entra has succeeded in this work is focused and systematic work and technical upgrades over time, supported by an energy management system which has made it possible to measure, compare and follow up various initiatives. Entra has operational staff with high technical competence who focus on deviations and energy use. Entra is now at a level where continued reductions in consumption primarily will be driven through technological development and continuous upgrading of the management portfolio to green buildings.

Entra will maintain its focus on reducing energy consumption in its management portfolio and has a long-term target to get the entire portfolio below 100 kWh per sqm by 2030. The short term target and KPI for 2022 is 126 kWh, reflecting a return to normal during 2022 with regards to utilization of the properties. Entra also works to reduce the load on the energy grid and lower costs in relation to energy intensity in the portfolio.

TARGETS AND FOCUS AREAS FOR PROPERTY PORTFOLIO AND PORTFOLIO MANAGEMENT:

Focus areas	Goals and measures
Environmental management	Use environment leadership system for control, comparison and follow-up of individual buildings
Reduce CO ₂ emissions in Scope 1 and 2 with 70 per cent by 2030	Reduce energy consumption and phase out all harmful refrigerants
Increase proportion of self-produced green energy.	Solar panels installed on four buildings as of year-end 2021
100 per cent green energy in Entra's buildings	- Either self-produced or through guarantees of origin. - Entra produces energy on four buildings as of year-end 2021 - Entra buys guarantees of origin for entire remaining energy consumption
Reduce peak load	Focus on load control in order to reduce energy demand during peak usage times
BREEAM-In-Use certify the portfolio	- Target 100 per cent - Status as of 2021 is 73 per cent of rental values and 69 per cent of asset values either are, or are in process of being certified
Considerably reduce waste and increase waste sorting	- Target 70 per cent waste sorting in property management and 90 per cent in development projects - Status 2021: 69 per cent in property management and 95 per cent in development projects
Reduce water consumption	Reduced water consumption (m³ per sqm) by 6 per cent in 2021
Environmental measures	- Strategy for roof surfaces and facades under development - Make provision for bicycle transport - Actively seek innovative and environmentally friendly solutions

Powerhouse Brattørkaia

Entra has BREEAM-In-Use certified the asset performance and management of 20 buildings in the portfolio of which one is certified Outstanding, 15 are certified Excellent and four are certified Very Good. Entra has another six BREEAM-In-Use certifications ongoing as of year-end 2021. In addition, Entra has BREEAM-NOR certified 17 of its newbuild and redevelopment projects and have another four in process.

Entra will continue to enforce a culture where all Entra employees work systematically on all aspects of a circular economy, i.e., reducing, reusing and recycling. This means that Entra will focus on reducing the quantity of waste in buildings as well as looking at solutions for multi-use and reuse. Examples of this are paperless offices, a reduction in food waste in canteens, as well as a focus on reuse in relation to tenant alterations. Entra has set specific ambitions in relation to residual waste, the degree of sorting and water consumption.

In 2019, Entra did a pilot project and implemented solar panels on the roof and facades of Professor Olav Hanssens vei 10 in Stavanger. In 2020, Entra evaluated the attractiveness of all its roof surfaces in terms of potential implementation of solar panels, solutions for surface water and biological diversity, also considering climate risk.

Part of Entra's strategy is to own properties close to public transportation hubs. Entra thus encourages its tenants' employees to use public transport, to cycle or to walk. All Entra's buildings have provision for bicycle parking.

Low carbon project development

Reducing emissions from refurbishments and project development is where Entra can make the largest contribution. The indirect CO₂ emissions from purchased goods and services is many times the level stemming from operations and management of buildings. Entra has developed its environment strategy for project development further during 2021 and set new and ambitious targets.

By 2030, the CO₂ emissions from project development shall be reduced by 80 per cent from today's average levels. Going forward, Entra will target Future-Built criterias in new-build and redevelopment projects. The overall target for energy use will be 30-40 kWh/sqm for newbuilds, and for redevelopment projects Entra's target is to obtain at least a 35 per cent reduction in energy consumption. Entra will seek to implement a high proportion of renewable energy on its projects, and all new-build projects shall be certified BREEAM-NOR Excellent or better. Entra will seek to use low emission materials, to considerably reduce waste, and to have close to 100 per cent waste sorting on its projects. In redevelopment projects, focus will be on reuse of inventory and materials. Entra strives to build with robust, reusable materials and installations. Ensuring that new materials are reusable is as important as reusing existing materials.

Entra is a leader in developing environmentally sustainable buildings and has for many years had high environmental ambitions on all its development projects. In cooperation with the Powerhouse alliance, Entra has redeveloped five older buildings to "Plus buildings/Powerhouses" at Kjørbo in Sandvika. At Brattørkaia in Trondheim, a new-built Powerhouse was finalised and opened in 2019.

A Powerhouse produces more energy than it uses over its lifetime, including the materials used for construction. In practice, the buildings therefore act as local power stations that deliver environment-friendly energy. Entra has thus contributed to increased focus of the entire industry to consider "virtually zero use of energy" on both new buildings and redevelopment projects.

In the early phase of development projects/urban development projects, Entra seeks to develop individual projects in connection with their surroundings in order to ensure optimized and efficient utilization of common infrastructure. As an example, Entra participates in a R&D project of a microgrid at Brattørkaia where the Powerhouse delivers energy to neighbouring buildings, electrical buses and buffering in a battery. Other measures include planning for location and design of power plants, supply of district heating and cooling, common solutions for waste, minimization and/or streamlining of traffic and logistics, as well as standard solutions for cluster technology.

In 2020, Entra renovated and expanded a 4,300 sqm office property at Kristian Augusts gate 13 in Oslo where more than 80 per cent of the materials in the project was reused. Kristian August gate 13 became Norway's first circular building according to the FutureBuilt definition. The project demonstrates Entra's strong commitment to work for more sustainable and innovative solutions

Entra's projects are BREEAM-NOR certified, with a goal of obtaining, as a minimum, BREEAM-NOR Excellent for new-build projects, while for redevelopment projects the objective is a minimum of BREEAM-NOR Very Good. This requires, among other things, analysis of life-cycle costs, low energy consumption, a good internal climate and innovative measures. On completion of buildings currently under construction and ongoing certification processes Entra will have BREEAM-NOR built/redeveloped 21 buildings and BREEAM-In-Use certified 26 buildings.

BREEAM certification of the portfolio

Percentage share of portfolio certified in accordance with BREEAM-NOR/BREEAM-In-Use Very Good or better

BY RENTAL INCOME

BY VALUE

Entra's new buildings and redevelopment projects are planned and constructed in accordance with Entra's specifications - the "Entra building". This is to ensure high quality and lower costs. In the "Entra building", focus is placed on standardisation that will give reduced costs in a life cycle cost perspective (LCC) and operational synergies. Standardised technological systems in the buildings will also simplify integration with new "smart building" technology. Entra is working with requirements for materials with low CO₂ emissions and low life-cycle costs. Planning provides for flexible solutions with multi-use and reuse of materials. Entra will also develop a standard delivery description for tenants where these factors are taken into account.

Entra applies for and receives financial support from Enova for individual environmental measures taken in its development projects. Entra received NOK 1.4 million in support for its development projects in 2021.

Green Bonds

Entra has issued 13 Green Bonds to date, capitalizing on the environmental qualities in the property portfolio. CICERO Center for International Climate Research (Norway's foremost institute for interdisciplinary climate research) has provided a second opinion to Entra's Green Bond Framework where Entra in 2016 was awarded the rating Dark Green, which is the best rating possible, for its future Green Bonds issues.

The rating Dark Green is given to projects and solutions that realise the long-term vision of a low-carbon and climate-resilient future already today. Typically, this will entail zero-emission solutions and governance structures that integrate environment concerns into all activities. Examples include renewable energy projects such as solar or wind.

TARGETS AND FOCUS AREAS FOR PROJECT DEVELOPMENT:

Focus areas	Goals and measures
Reduce CO ₂ emissions from projects by 80 per cent by 2030	• Target Future Built criteria's in new-build and redevelopment projects • Target energy use of 30-40 kWh/sqm for newbuild projects and 35 per cent energy use reduction for redevelopment projects • Implement a high proportion of renewable energy • Use low emissions materials • Reuse of inventory and materials • Set requirements for fossil-free construction sites and request fossil-free transport
Certification	• Objective of a minimum of BREEAM-NOR Excellent on all new development projects, and minimum of BREEAM-NOR Very Good on refurbishments
Waste	• Considerably reduce waste and close to 100 per cent waste sorting in development projects
Innovation	• Actively seek innovative and environmentally friendly solutions

“Based on the overall assessment of the project types that will be financed as well as well as governance, reporting and transparency considerations, Entra's Green Bond frameworks gets a *Dark Green shading*.”

– CICERO, Second opinion

THE ROADMAP TOWARDS 2050 BY THE GREEN BUILDING COUNCIL

Entra has signed up to “The New Roadmap towards 2050 for the Property Sector” by Grønn Byggallianse and Norsk Eiendom. Entra complies with and follows the 20 immediate measures set out in the Roadmap and listed below:

Measure	Status
Certify the organization	Entra's headquarters is certified as Miljøfyrtårn
Remove fossil heating in buildings	Completed on all Entra's properties except on four buildings where bio-oil is used on peak-load.
Only buy building products that do not contain hazardous substances	Covered by Entra's sustainable purchasing procedures
Introduce BREEAM-In-Use as a management system for the entire portfolio	26 properties certified or in process of being BREEAM-In-Use certified.
Conduct a study of what the roofs can and should be used for	Pre study performed, plans for more detailed study
Demand and reward innovative environmental solutions	Implemented in Entra's Environmental Follow-up Plan
Require architects to make plans for re-use of materials and minimize waste.	Implemented in Entra's Environmental Follow-up Plan
Order energy budgets to calculate real energy use	Implemented in Entra's standard technical requirements
Demand and prioritize building products with low CO ₂ emissions	Covered by Entra's sustainable purchasing procedures
Demand fossil free construction sites	Implemented in Entra's Environmental Follow-up Plan
Define sustainability ambitions in the project	Implemented in Entra's Environmental Follow-up Plan
Demand biodiversity and use of native species	Implemented, part of BREEAM certification process
Plan for waste minimization and high sorting rate	Implemented in Entra's Environmental Follow-up Plan
New buildings must achieve an energy rating of A or B	Implemented in Entra's Environmental Follow-up Plan
Have an energy certificate for commercial buildings over 1,000 sqm and make a plan for upgrading the building portfolio to a higher energy rating	Plan for updating on total portfolio
Require reusable materials	Implemented in Entra's Environmental Follow-up Plan
Require re-use mapping in the early phase of rehabilitation and demolition projects and set goals for re-use share.	Implemented in Entra's Environmental Follow-up Plan
Set environmental competence requirements on contract partners.	Covered in< Entra's environmental pre-qualification criterias
Require CO ₂ accounting for materials and set a goal of at least 20 per cent CO ₂ reduction.	Part of Entra's environment strategy
Demand emission-free construction site.	Implemented in Entra's Environmental Follow-up Plan

Climate risks and scenario analysis

Climate change and environmental damage are two of the most dramatic known challenges facing the world today, and many countries are already feeling the effects. In the Nordic countries the most relevant changes to be expected are in the form of a projected rise in sea level, milder winters, and increased intensity of extreme rainfall. A direct consequence of these are increased challenges related to surface water and flooding.

During 2021, Entra, together with Norconsult, has assessed the climate risks facing Entra in detail. Entra has used a scenario-based approach in analysing climate risks, in accordance with the TCFD framework and mitigating actions are prioritized based on a cost-benefit analysis. Entra aims to continuously monitor and mitigate climate related risk, like other risk factors facing the company.

The scenarios used

Entra has used three different scenarios (SSP1-RCP2.6, SSP2-RCP4.5, SSP3-RCP7.0) for temperature and wind related risks. Future sea level rises are based on scenario RCP8.5 for the period 2081-2100. Future changes in rainfall intensity and flood flows in 2100 are based on the relevant regional profile from the Norwegian Centre for Climate Services. For transition risk Entra has used a holistic analysis using a monte-carlo approach to ensure that correlation between the possible future scenarios are taken into account.

Critical input parameters, assumptions, and analytical choices for the scenarios used

Described below under Climate adaptation.

Time frames used for scenarios

The time frames are short (2020 – 2049), medium (2050 – 2079) and long (2080 – 2099).

The TCFD framework distinguish between two categories of climate related risk; 1) risk related to the physical impacts of climate changes, and 2) risk related to the transition to a low-carbon-society.

In the current studies, the impacts in category 1 has been found to be of minor consequence. Analysis in the studies has covered changes in risks related to water, wind, temperature and possible outcomes as wildfires and landslides. These are all events that cause physical consequences, and Entra therefore treats them as physical climate risk.

The expected effects of climate change have been quantified in terms of net present value to assess if and what mitigating measures should be performed at each property. Uncertainty analysis is included within the assessment, in order to gain insight into the volatility and effects caused by lack of data and/or poor data quality. Overall, the portfolio has high robustness to physical climate changes. Both the extent of and number of required physical mitigating actions have been assessed to be limited.

A similar approach has been used to identify the transition risk. During 2021, this analysis has been performed at the portfolio level. In terms of net present risk, rapid changes in demand for office space and changes in the accepted lifespan of the buildings in the portfolio is found to be of most importance and relevance. This key insight is now included in our risk management process, and Entra will continue to develop further processes to monitor and address these new perspectives.

There is considerable uncertainty ahead. Entra acknowledges this and will continue to develop processes to gain more insight into and knowledge of climate change and the consequences that are related to it. Entra has an active approach to assessing, monitoring, and following up climate related risks. Climate risk, together with other risks is a regular topic at Board of Directors meetings.

Actions and follow-up plans from the assessments are being acted upon by the organization, including, but not limited to, ensuring that Entra's portfolio of assets are prepared for the possible challenges ahead.

With the data at hand, Entra can continue to make better decisions and will focus on how to most efficiently make use of and implement the new information into its business model. The most important skill for Entra will be the ability to change and adapt.

Climate adaptation

To adapt, one need to understand both the expected changes to come and the possibilities that new technology may bring. During 2021, Entra has mapped and analysed the physical climate risk to 74 of its properties. The goal is to meet every identified risk with the correct level of mitigation measures in order to ensure a suitable balance between investments and potential risk.

The method used for mapping and analysing climate risks is in accordance with the requirements given in BREEAM-In-Use version 6, EU taxonomy annex 2 and the TCFD criteria. The analysis covers the subjects Rsl 01, Rsl 03 and Rsl 06 in BREEAM-In-Use and the table in Appendix A to Annex 2 in EUs taxonomy, which is shown on the next page.

It is important to analyse the climate-related hazards in a correct and reliable manner. The analyses are undertaken by external experts in the following disciplines:

- Hydrology
- Geotechnics
- Engineering geology
- Hydrogeology
- Meteorology
- Risk management
- Building physics

	Temperature-related	Wind-related	Water-related	Solid mass-related
Chronic	Changing temperature (air, freshwater, marine water)	Changing wind patterns	Changing precipitation patterns and types (rain, hail, snow/ice)	Coastal erosion
	Heat stress		Precipitation of hydrological variability	Soil degradation
	Temperature variability		Ocean acidification	Soil erosion
	Permafrost thawing		Saline intrusion	Solifluction
			Sea level rise	
Acute			Water stress	
	Heat wave	Cyclone, hurricane, typhoon	Drought	Avalanche
	Cold wave/frost	Storm (including blizzards, dust and sandstorms)	Heavy precipitation (rain, hail, snow/ice)	Landslide
	Wildfire	Tornado	Flood (coastal fluvial, pluvial, ground water)	Subsidence
			Glacial lake outbursts	

Analysis of climate risk and possible future scenarios is not something done only once. It is a continuous process where Entra acknowledge the importance of staying up to date with available information and knowledge. By continuously updating its understanding, Entra cannot only react to, but proactively plan its adaption to, the changing climate.

Future climate scenarios

In the EU taxonomy it is described that assessment of climate-related risk should be:

“(…) performed using the highest available resolution, state-of-the-art climate projections across the existing range of future scenarios consistent with the expected lifetime of the activity, including, at least, 10 to 30 year climate projections scenarios for major investments.”

State-of-the-art climate projections are based on climate data which have been produced by using the Shared Socioeconomic Pathways (SSP) and Representative Concentration Pathways (RCP) for the Coupled Model Intercomparison Project 6 (CMIP6). CMIP6 is a collection of global climate model simulations which are used in the UN climate panel's newest assessment reports (AR6). The models used in this project are MPI-ESM1-2-HR and CESM2, which are considered to give the most correct results for Scandinavia. Simulations with the regional scale Weather Research and Forecasting Model (WRF) have been used to downscale the data from the two selected climate models to a smaller grid. The following combinations of scenarios have been

used for the global climate model simulations and are gathered data from:

- SSP1-RCP2.6
- SSP2-RCP4.5
- SSP3-RCP7.0

The simulations have been run through a historic period (1990 – 2014) and a future period (2015 – 2100) for each scenario, giving a total of six sets of climate data (2 models with 3 scenarios each).

The climate data has been controlled against actual historic measurements and the model which gave the best fit has been used to analyze the different scenarios and different 30- or 20-year periods in the future. The climate data has then been used for temperature-related risk and wind-related risk. Changes in wind and temperature have been considered for each of the three scenarios.

Entra, together with its advisors, have used the state of the art models described above for temperature- and wind-related climate risk to ensure that our analysis is based on the most up to date projections. For water-related and solid mass-related climate risks the models are based on more uncertain input and assessment of these risks are therefore based on other methods, described in the relevant chapters below.

Temperature related climate risk

Based on climate data from one of the climate models described in the previous chapter, CESM2, assessments have been made to examine how the net energy requirements for a building might change in the future if the external temperatures change.

The assessments were done with the same reference building for offices which forms the basis for the net energy requirements in the Regulations on technical requirements for construction works (TEK17). This makes it possible to compare results to those achieved using the climate data typically used today.

Using the reference building as a basis, three different building models were constructed. Each model represents a different building standard in terms of structural properties and technical installations:

- New building (TEK17)
- Intermediate level (TEK 07)
- Older buildings

This made it possible to consider how sensitive buildings from different time periods are to changes in temperature. For example, the energy consumption in an older building is more dependent on temperature than in a new building. This is due to a greater heating need because the requirements for thermal insulation, technical installations etc. at the time of construction were less strict than they are today. Assessments have been made for both Oslo and Bergen for the time period 2020-2050, with the three emission scenarios described in the previous chapter - SSP1-RCP2.6, SSP2-RCP4.5 and SSP3-RCP7.0.

There are major uncertainties associated with the climate model simulations. One of them is related to the projected cooling over the North Atlantic Ocean suggested by the CESM2 model, resulting in lower temperatures in some scenarios, in particular for

Bergen. The climate models involved in CMIP6 strongly disagree whether such a large cooling will occur.

Given that Entra mainly own office buildings in big coastal cities in Norway, the results of the simulations and calculations show that temperature related risks for Entra's portfolio are low, rather showing temperature related opportunities due to lower energy demand.

Wind related risk

Using the future climate scenarios described above, an analysis of the expected future wind climate for Oslo and Bergen has been performed. Based on the level of detail and the climate data on which the analyses are based, it is considered that the wind climate for these two cities could be represented by the climate data for Eastern Norway and Western Norway/Central Norway. Combined, these climate data will be representative for all cities where Entra has properties.

The two climate models MPI-ESM1-2-HR and CESM2 form the basis for the analyses that have been performed for wind climate. Wind climate data has been extracted from both climate models for Oslo and Bergen, with three different emission scenarios, as described earlier. To assess the accuracy of the models, the simulated historic wind climate data from the two climate models have been compared to actual historical wind climate data from Oslo and Bergen.

Furthermore, average wind and 50-year return values for wind speed have been calculated for both Oslo and Bergen for each of the three emission scenarios. These values have been compared to the historical climate data from the climate models. Wind roses have also been prepared for the two cities at each of the three emission scenarios, for the time periods 2020-2049, 2050-2079 and 2080-2099.

Figure. Changes in surface temperature during winter (December-February) from period 1990 - 2009 and 2080 - 2099 for scenario SSP2 (4.5). The colours represents the mean increase for each of the maps. Source: CICERO (Icebox).

In addition, an analysis of extreme wind has been performed, represented by a 99th percentile, for both cities and using both climate models.

The extreme wind values found from the climate models were significantly lower than expected, and a simple correction of the wind climate data for each city and climate model was therefore made. The simulated historical climate data from the climate models have been corrected against a set of climate data from the weather model WRF for the same period of time. This resulted in a correction matrix which was applied to the wind climate data from the different emission scenarios.

The results from the wind climate analysis show no clear trend for future mean values and return values. There are tendencies towards a reduction in mean wind speed, but one does not have sufficient grounds to make a firm conclusion. This is in accordance with the report Climate in Norway 2100 from the Norwegian Centre for Climate Services, which concludes that very small changes in mean wind and extreme wind can be expected, based on the same emission scenarios used for these assessments. When it comes to wind roses, they only show minor changes in wind speed and direction over time with the different emission scenarios.

The assessments show low wind related risk for Entra's portfolio since wind patterns and wind speed will probably not change significantly in the future.

Mass related risk

The methods and acceptance criteria used to analyse mass related risk are found in the Regulations on technical requirements for construction works (TEK17) and Norwegian Water Resources and Energy Directorates (NVE) guidelines on quick clay landslide safety (veileder Nr. 1/2019 Sikkerhet mot kvikkleireskred).

According to acceptance criteria in TEK17 Entra's properties must be assessed with an annual probability of different landslides, avalanches, and rockslides of less than 5000-year return period (safety class S3). Assessments regarding quick clay landslides are done by using special criteria based on consequence (tiltakskategori K4).

An initial assessment of the hazard related to quick clay landslides, avalanches and rockslides has been undertaken by an expert group with geotechnical and geological competence. Hazards related to individual buildings are then studied closer to determine risk. NVE has mapped different types of landslides, avalanche and rockslides that are used to identify and determine the degree of hazard and consequence for areas that are potentially exposed.

NVE has also mapped quick clay zones displaying the degree of hazard, consequence and risk of quick clay landslides. These maps together with geotechnical reports that are available for the individual buildings or cluster of buildings are then studied and NVEs guidelines are used to determine actual risk.

The assessments show low mass related risk for Entra's portfolio.

Water related risk

The risk of flooding to each of Entra's properties has been assessed for both existing and future climate scenarios. The risk of flooding from a variety of sources (tidal, fluvial, surface water, sewers, groundwater and reservoirs) has been assessed.

Flood risk has been assessed based on a review of existing information on flood risk and a qualitative assessment by flood risk experts. Where available, flood risk maps produced by NVE (The Norwegian Water Resources and Energy Directorate), Kartverket (The Norwegian Mapping Authority) or local authorities have been used. ScalgoLive has also been used to identify local pathways for surface water flow and upstream catchment areas. Existing and future sea levels are provided by The Norwegian Mapping Authority, based on data from the Norwegian Directorate for Civil Protection (DSB). Future sea level rises are based on scenario RCP8.5 for the period 2081-2100. Sea levels are expected to rise by between 46 cm (Oslo) and 78 cm (Stavanger) in the cities where Entra has properties. Future changes in rainfall intensity and flood flows in 2100 are based on the relevant regional profile from the Norwegian Centre for Climate Services. In the Oslo area, short-term rainfall intensity is expected to increase by up to 50 per cent, whilst flood flows in larger rivers may increase by around 20 per cent.

In accordance with BREEAM, properties with an annual probability of flooding greater than 0,5 per cent (200 year return period) have been assessed as being high risk, whereas properties with an annual probability of flooding of less than 0,1 per cent (1000 year return period) have been assessed as low risk. Existing mitigation measures (for example non-return valves, waterproofing of basements etc.) have been taken into account when assessing flood risk. Changes in flood risk due to climate change and potential mitigation measures have been identified for each building.

There are several cost drives related to physical climate risk. The various scenarios may influence several drivers at the same time. We also distinguish between direct and indirect consequences. In the analysis we also include consequences for third parties such as clients and owners of equipment stored in or on the properties. Regardless of the cause, most of the risk is related to direct damage to the property and equipment. In the study, cleaning and refurbishing of affected areas are generalised, while expensive technical equipment is mapped and assessed for each property. Examples of technical equipment that is included in the analysis is:

- Main electrical intake
- Electrical distribution units
- Generators and UPS
- Ventilation main units
- Heating units
- Electrical Transformers

In addition, third party entities as server-rooms, archives, store-rooms, shops and parking areas are included as cost items. Indirect downtime for repair and re-construction is also included. The cost level has been assessed by experts and compared to similar historical events. For each risk element, an affected area is calculated based on the building footprint, localisation and floors below ground level. This is the basis used to compute the consequence for each property.

The risk can then be computed based on the assessed probability of occurrence for each property as assessed by the climate experts. The expected effects of climate change have been quantified in terms of net present value to assess if and what mitigating measures should be performed at each property. Uncertainty analysis is included within the assessment in order to gain insight into the volatility and effects caused by lack of data and/or poor data quality.

Overall, the portfolio is considered to have high resilience to flooding.

Transition risks and opportunities

In addition to physical climate risk, Entra has started to assess the climate-related transition risks and opportunities for the portfolio in accordance with BREEAM-In-Use issue Rsl 07.

The purpose of the assessment was to evaluate financial risks and opportunities for Entra's operations related to the transition to an economy with lower CO₂ emissions. As recommended in the TCFD framework, the considered transition risks are related to politics, technology, market and reputation.

To identify relevant risks and opportunities, a brainstorming was initially carried out and information was obtained from several platforms identifying topics considered relevant in terms of significance for a real estate company's existing building.

Consequently, a large amount of the potential transition risks and its potential impacts were identified. Climate-related transition risks are often complex, uncertain, and dependent upon other risks. A goal for the process has therefore been to identify the key drivers that influence the risk and the mechanisms that connect them. To ensure that correlation between the possible future scenarios is taken into account, a holistic analysis was applied and carried out with a monte-carlo approach. Important drivers identified has been:

- Changes in energy cost
- Changes in demand for space
- Changes in construction and rehabilitation cost
- Changes in quality needs
- Changes in demand for reporting and analysis
- Changes in Entra's reputation

At present, this analysis has been performed at a portfolio level. Based on the scenarios in the TCFD framework, distributions for each of the drivers has been estimated. This is not an exact science but is thought to be a good representation of the risk probability space for the upcoming years and will yield a detailed information on which drivers and possible scenarios that bring the most volatility.

This key insight is now included in Entra's risk management process, and Entra will continue to develop further processes to gather data, monitor and address these new perspectives.

Social

Entra is a sustainable and socially responsible company and has included several procedures and initiatives in its daily operations. Entra's focus areas involve own employees and working environment, human rights, health and safety, urban development, and community engagement. Entra sets requirements for its own operations as well as for suppliers and partners. When evaluating new initiatives, Entra seek partners and suppliers with common values and targets.

Motivated and responsible employees

Entra strives to develop a value-based culture characterized by the company's core values; Innovative, Responsible, Hands-on and One team. The core values and the company's principles for leadership are closely connected to behavior and how to follow up and develop own employees. Emphasis is put on employee motivation, which is considered to form the basis for an individual's desire and willingness to perform and thus to the development of the company. Employees are offered opportunities for personal and professional development through close dialogue with, and follow-up by, their immediate superior. It is fundamental that employees consider Entra to be a good and attractive place to work.

Health and working environment

Entra aims to be a health-promoting workplace and carries out several measures to contribute to the health and wellbeing of its employees. All employees are offered annual health checks and a broad range of health services through Entra's occupational health service and health insurance. Entra also has an internal sports club where employees on a voluntary basis engage in social activities and several sports such as hiking, golf, running, squash, skiing and yoga. During 2021, the internal sports club has also facilitated interactive training sessions that employees can attend from home. Sick leave in Entra in 2021 was 2.6 per cent. This is low compared to a country average of 6.6 per cent as of Q3 2021. The objective is a continued low level of sick leave.

Workers' rights

Entra complies with established standards and employment legislation. Entra is a member of the Confederation of Norwegian Enterprise, and tariff agreements have been established with employee organizations. Entra is covered by collective bargaining and the agreements are made applicable to all employees. Negotiations and follow-up in the event of operational changes or restructurings follow Norwegian law.

Safety officer, working environment committee and Board representation

Entra's employees have elected safety officers. Their main function is to take care of employee's interests in matters that relate

to the working environment. The safety officers are elected for a two-year period among employees with experience and knowledge of the working conditions in the company. The safety officers have regular meetings with the HSE department. One of the safety officers is appointed as the chief safety officer, coordinating the work among the other safety officers.

Entra also has a working environment committee, according to Norwegian legislation. Entra's working environment committee is a decision-making and advisory body. The committee's most important function is to work for a safe working environment. The committee covers issues on its own initiative and at the request of the safety officers. All employees can contact the committee. The working environment committee consists of members from the company management and of representatives from the employees. Entra's current working environment committee consist of the CEO, EVP of HR and Communication, the chief safety officer and a person elected from the employees.

Employees in Entra are free to organize themselves and are organized in several different labour associations. Entra has established an accord with the Norwegian Engineers and Managers Association (FLT).

Employees are represented on Entra's Board with two employee-elected directors, and they are usually elected by employees organized in the labor associations.

Information on worker participation and consultation is given on www.entra.no. All new employees also receive information on this topic through health and safety introduction and training.

Employee relationship and employee engagement

Each year, Entra carries out an employee job engagement survey. In recent years including 2021, Entra has used a standardized survey from Ennova. The survey gives a score both for the level of motivation and satisfaction of employees and the factors that drives their behaviors and attitudes. Entra's score is compared against a representative national benchmark (GELx) and a benchmark "top in class" of the 25 per cent best in Ennova's client database. In 2021, Entra had an employee motivation and engagement score of 79. Even with a decrease of 3 points from 2020, the score is significantly above the national benchmark GELx score of 73 and above the "top in class" score of 78. The past year has been characterized by new ways of working, due to Covid-19 and social distancing. Many employees have been working from home most of the year and just rarely attended physical meetings. These changes may have affected the score in 2021. Through 2021 the strategic

interest for the company, in addition to changes made in the organizational structure, also affected the score.

Employees in Entra

The Board of Directors consists of four women and three men, whereof the Chair is a woman. The senior management team in Entra consist of two women and five men, whereof the CEO is a woman. Of all other managers in Entra, 49 per cent are women and 51 per cent are men.

At the end of 2021, Entra had 112 men and 65 women employed, of which two men and one woman were employed in Hinna Park AS. Entra had five temporary employees as of end 2021 whereof 20 per cent are women. Of the six employees working part-time 83 per cent are men and 17 per cent are women. All have voluntarily decided to work part-time as part of Entra's policy for seniors and early retirement or are employed part time because of studies.

Equality and diversity

Different expertise and experience contribute positively to Entra's development and to a broader and better basis for decision-making. Equal opportunities and diversity are an integral part of Entra's standards. Entra believes in the benefits of diversity, and this goal is incorporated into Entra's recruitment procedures and is reflected in the composition of senior management. Entra strives for diversity on a broad basis, including gender, age, background, education, and nationality.

Average parental leave in 2021 was fourteen and eighteen weeks for men and women, respectively.

Recruitment

Entra has professional recruitment processes that ensure transparency and equal opportunities. Most recruitments are handled using internal resources and is managed by the HR department. A recruitment process in Entra is a structured process which includes an analysis of the job description with the purpose of choosing the preferred tone of voice in the announcements to attract the right candidates, a relevant and position-adapted case for the candidate to solve, and a final interview with both the direct manager and their superior manager.

During a recruitment process, Entra aims to be open-minded, and all announcements invite everyone with the right competence to apply for a position. When recruiting for senior or key positions in Entra, both sexes should be represented in the final interview round. This applies for both internal and external recruitments and, if needed, targeted recruitment processes are used to fulfil this goal. Furthermore, Entra strive to attract younger employees within property management to secure continuity and transfer of experience. During 2021, Entra recruited sixteen new employees, of which four women and twelve men.

Developing competence and engagement

Entra has HR processes where performance review, talent and succession planning, and development plans are closely linked together. This includes a dedicated development plan in accordance with each employee's ambitions and potential.

GENDER EQUALITY IN ENTRA ASA – KEY METRICS

	2021	2020	2019
Gender distribution among employees (women/men)	64/110	70/116	66/108
Employee level 1 gender distribution (women/men)	2/5	3/4	3/4
Employee level 2 gender distribution (women/men)	23/24	24/31	22/27
Employee level 3 gender distribution (women/men)	39/81	42/79	41/77
Women's earnings in relation to men's (all employees at Entra)	106%	96%	101%
Women's salary in relation to men's at employee level 1	111%	101%	77%
Women's salary in relation to men's at employee level 2	93%	89%	87%
Women's salary in relation to men's at employee level 3	105%	97%	-
Women's bonus in relation to men's (all employees)	105%	110%	101%
Women's bonus in relation to men's at employee level 1	108%	125%	69%
Women's bonus in relation to men's at employee level 2	88%	82%	87%
Women's bonus in relation to men's at employee level 3	93%	105%	-
Sick leave per cent (women/men)	4.1%/1.7%	5.4%/1.8%	4.5%/1.5%
Absence for sick children, number of days total (women/ men)	40.5/52.2	34/24	43/35
Average weeks of parental leave taken (women/men)	25/15	18/14	23/0
Number of employees working part-time (women/men)	1/5	2/3	2/3
Number of employees involuntarily working part-time (women/men)	0/0	0/0	0/0
Number of employees in temporarily positions (women/men)	1/4	2/2	2/1

Employee level 1 = top management

Employee level 2 = managerial positions

Employee level 3 = other employees

Employees are evaluated based on achievements, ambitions, and potential based on specific criteria, including achievement of specific goals and compliance with Entra's values. This evaluation is part of a process where Entra builds its talent pool and secures succession planning.

Entra has also developed a training and competency policy relevant for most positions. Some courses and training are offered to all or most of the employees, whilst others are more specifically related to roles within property management.

Entra's value chain is broad and imposes significant requirements regarding relevant experience and expertise. Entra therefore acknowledges individual employee's needs for ongoing professional training suited to his/her area of work and has developed the Entra School to provide education and training programs for all levels of the organization. The Entra School includes an introduction course for new employees to enable employees to view their role in the company in a wider context and an internal management and key talent development program that runs for 1.5 years and focuses on the responsibilities and challenges of a management role. Ethics training occupies a central position in the introduction course and through annual dilemma training programs.

Work-Life balance

Entra seeks to facilitate for a good work-life balance based on the life phases and family situation of our employees. We act in compliance with the laws and collective agreements that regulate the various leave schemes and have implemented solutions that are easy to use if applying for a leave or time-off. Employee benefits, such as flexible working hours and full pay during illness and parental leave regardless of the National Insurance scheme limits, are important measures in the efforts to ensure equal opportunities.

Regular working hours are 37.5 per week, with the core time from 09:00 to 15:00. Employees in senior positions or in special independent positions have exemptions from the rules of the Working Environment Act § 10.2. Entra seeks to minimize the amount of overtime, but extra work is expected to be done during hectic periods. We experience that there is a mutual understanding of this in the company and that flexible working hours or a day-off can be used during less intense periods.

Facilitation

As far as practically possible, Entra seeks to facilitate for the different needs of all employees. The premises are universally designed with sufficient space and accessibility for potential users of wheelchair. Our workplaces are designed in accordance with the Workplace Regulations 4-2: § 2-4. This statutory provision ensures that the workplace design takes disability into account.

Wages and working conditions

Entra has developed a policy for compensation and benefits that ensures that employees with a similar position and at the same level are assessed according to specific and similar criteria to ensure equality. There is equality in the remuneration of men and women, and all employees are included in a collective bonus scheme. All employees are included in the same insurance schemes, and there is an equal pension scheme based on the salary level. Entra has no employees involuntarily working part-time.

Annual salary and tariff settlement in Entra follow a standardized process based on central negotiations with the union representatives and involves individual evaluation of the employee from their immediate superior based on standardized criteria. This process ensures consistent and performance-based salary adjustments. Evaluation and salary adjustments are reviewed by HR and the CEO. Entra monitors salary levels through external benchmarks in addition to internal benchmarks of positions of similar responsibility.

Equality and diversity

Different expertise and experience contributes positively to Entra's development and to a broader and better basis for decision-making. Equal opportunities and diversity are an integral part of Entra's standards. Entra believes in the benefits of diversity, and this goal is incorporated into Entra's recruitment procedures and is reflected in the composition of senior management. Entra strives for diversity on a broad basis, including gender, age, background, education, and nationality.

Entra seeks to have an organization that reflects the diversity of a modern society and has a particular focus on generations, gender and cultural backgrounds. Diversity is an important part of Entra's social responsibility work. In general, social responsibility is an important reputation factor when it comes to attracting a new generation of competent employees. Entra has worked actively with diversity for many years and has had a particular focus on:

- Achieving a more balanced distribution of generations in property management, which historically has been over-represented with men of high seniority.
- increasing the proportion of women in our defined group of talents and key personnel
- increasing the diversity of people with different cultural backgrounds

The work with diversity and gender equality in Entra is structured through:

- HR reporting: Annual reporting from HR to senior management and the Board, hereunder status on achievement of HR targets and plans and targets for the year to come.
- ESG Committee: Entra's ESG Committee is an interdisciplinary group working on all different aspects of ESG. The Committee works with the strategic focus areas for ESG, identifying objectives and KPIs in cooperation with the responsible in both business units and group functions.
- Practice and policy: All practices that address diversity are anchored with group management and the Board. Entra's ethical guidelines covers diversity, discrimination, and harassment, including procedures for whistleblowing both internally and through an external law firm.

Entra's work for diversity is also given weight through procurement of products and services. Requirements for diversity are set for purchasing of external legal services and for providers of facility management services. The company has structured and professional HR procedures that ensures follow-up of employees through the various phases of employment as well as safeguarding against discrimination.

Identified focus areas

Entra is in the process of further developing its recruitment strategy to focus on age and gender balance and fulfill a diversity analysis for the specific departments that are recruiting.

To recruit young people in the future, Entra participate in the apprenticeship scheme of the Norwegian public education system as a mean to develop own talents. The public apprenticeship is a two-year program, and the employer must be approved by the county municipality. Entra became an approved employer in 2021 and employed its first apprentice. Some departments in Entra already work with educational institutions or directly with students as examiners, supervisors or conducting lectures. An internship is a temporary employment for students, where the candidate gets relevant work experience, and will be a benefit for both parties. Entra will further assess the opportunity with relevant universities or business schools, after successfully trying this form of internship in the HR-department during the fall of 2021.

Potential risks of discrimination

The main risk of discrimination in Entra is unconscious discrimination. This is a risk that never can be eliminated, but which will be assessed and acted upon if it occurs. When starting up new initiatives, Entra will also initiate training of managers on how to succeed with inclusion. Entra currently has no reports from employees, safety representative or union representatives that discrimination has been experienced as part of our work processes.

Measures implemented to counter discrimination and contributing to increased equality and diversity

Entra is on a continuous basis working to ensure equal treatment of our employees and to further enhance diversity through our recruitment strategy. For 2022, Entra has planned for the following measures to follow up on equality and diversity:

- Use recruitment processes to actively increase diversity in Entra and make targeted searches to expand the candidate pools
- Equality and discrimination are regular agenda items in meetings of the working environment committee (AMU) to share an overview of areas of discrimination and get input from union and safety representatives on how current HR processes can be improved.
- Use data and third-party expertise to have the best possible processes regarding anti-discrimination, diversity and equality
- Courses and events to increase competence in diversity and inclusion

Evaluation of the work with diversity

Entra's efforts to increase the proportion of female employees and young employees have given results. Entra has an organization characterized by equality, with an increasing proportion of women in the property management department. Diversity is an important part of Entra's social responsibility work, and several measures have been implemented to contribute to increased equality and diversity.

Achievements in 2021:

- Started third-party data collection on discrimination, diversity and inclusion
- Developed a diversity policy
- Equality and discrimination have been discussed in in the working environment committee (AMU) to get input from union and safety representatives on areas of discrimination and current HR processes.
- Explored training opportunities that could be implemented in the organization

Targets for 2022

Entra seeks to maintain high employee engagement and targets a continued high score in the employee job engagement survey.

Entra actively seeks to increase the share of women within property management year on year. The challenge has historically been that there has been lower interest from women for jobs with required expertise within technical building operations and management. During the last years, we have adjusted the tone of voice in announcements, definition of the roles and targeted search processes to attract female candidates whilst maintaining the quality of applicants.

It will be difficult to achieve a 50 per cent share of women as property management contains almost one third of our employees and as the pool of applicants for new positions still has a majority of men. Our ambition is to have a relatively equal share of women and men in the rest of the company and among our talents and strategic successors to leading roles. In 2021, 39 per cent of the company's talents and strategic successors were women, and we had 49 per cent women in senior positions (Level 2).

To achieve the targets, the administration has defined measures on how to hire and develop employees. Such measures include, amongst others, a requirement policy to include both sexes in the final interview round for key positions, talent development and leadership development as well as coaching that seeks to encourage and promote female talent.

Entra also has an overall target to increase the level of employees with various cultural backgrounds.

Human rights policy and statement

Entra is committed to develop an organizational culture which respects and supports internationally recognized human rights. Entra supports all internationally recognized human rights standards such as the United Nations Guiding Principles on Business and Human Rights, as well as relevant international conventions and standards such as those of the International Labor Organization.

Our commitment to the realization of human rights is set out in the Group's Human Rights Policy and its Social strategy. Key human rights issues and due diligence procedures are embedded in internal risk assessment processes and guidelines, as well as being addressed explicitly in documents such as the Socially Responsible Purchasing Guidelines. Entra reports on its performance in the annual ESG report based on the criteria appropriate to Entra in the Global Reporting Initiative. During 2022, Entra will also report on its work with transparency and work on fundamental human rights and decent working conditions in accordance with the new Transparency Act that will enter into force on 1 July 2022.

Entra does not accept discrimination or bullying in the workplace. Everyone is to be treated with respect, irrespective of gender, religion, age, ethnicity, nationality, any disability or sexual orientation. To secure compliance, Entra has a Human Rights policy, and human rights are included in guidelines and management tools, including those dealing with fundamental values, ethical guidelines, socially responsible procurement and through the focus on HSE and the working environment. Entra provides its employees with opportunities for professional and personal development and facilitates training to ensure that employees have the right competence and can use their expertise and assume responsibility. Entra demonstrates respect for its employees' private life and consider requirements for personal data protection (GDPR) through secure IT and HR systems.

Health, Safety and Environment (HSE)

HSE work is central to Entra in all parts of the value chain. It shall be safe to visit and work in Entra's properties and construction sites. HSE is well established as a natural part of day-to-day operations, including being part of the bonus scheme for all employees. It is a focus area at all levels of the organisation and thus recognised widely in the organisation as a personal responsibility of all employees.

Entra's HSE strategy involves systematic work with:

- HSE in the daily operation of the buildings
- HSE in development projects
- HSE for own employees

The internal HSE policy in Entra has the following targets:

- It should be safe to work, visit and stay in and around Entra's properties and construction projects
- For own employees, Entra shall have a health-promoting work environment where no one will be injured or sick because of their work

Entra performs systematic HSE-training of its employees where different positions receive different training. All new employees are given an introduction to the HSE-system after joining the company.

Special training on operation of buildings is given to property managers. This involves training in fire protection, conflict management, FSE-course (electricity) and work in heights. Entra's project managers receive training in Entra's routines for ensuring HSE in the building projects as part of their introduction to Entra.

Members of the senior management are involved in practical HSE work and are expected to take the lead through behaviour and leadership. As part of this, a review of the latest HSE report is regularly on the agenda at management meetings and Board meetings. HSE status is also an important item on the agenda at all employee meetings. During 2020, particular focus was on the safeguarding of Entra's parking facilities against fire. In 2021, extra attention has been paid to follow up HSE focus in the ongoing development projects reflecting the very high number of projects, also with some new suppliers.

Entra works actively to increase awareness with regards to the registration of all types of incidents (including accidents and near misses). The reporting of incidents is important to prevent potential accidents and to increase the awareness internally among Entra's employees, suppliers and customers.

Entra has an occupational health and safety management system covering all parts of its business in accordance with Norwegian legislation. The regulations in the Working Environment Act is important, hereunder:

- Regulations concerning organization, management and employee participation ("Forskrift om organisering, ledelse og medvirkning")
- The workplace regulations ("Arbeidsplassforskriften")
- Regulations concerning performance of work ("Forskrift om utførelse av arbeid")
- Regulations concerning action and limit values ("Forskrift om tiltaks- og grenseverdier")
- Internal control regulations ("Internkontrollforskriften")
- Construction client regulations ("Byggherreforskriften")
- Regulations concerning HSE-card ("Forskrift om HMS-kort")

The HSE system has also been developed and implemented based on risk management and risk analysis on different levels of the organization. The system primarily covers Entra's workplaces and Entra's employees. However, Entra has

HSE-requirements on its suppliers and their subcontractors. In general, Entra requires that its social responsibility requirements, which involves HSE-requirements, are made valid throughout the chain of vendors.

Entra has contracted an occupational health service (OAS) for own employees. Entra's OAS is an officially approved organization for delivering OAS-services.

Among other things, the OAS performs:

- Annual health checks of employees.
- Vaccination
- Ergonomic evaluations
- Risk evaluations
- Emergency stand by
- Participation in work councils

Targets and status

HSE targets are also aggregated into group KPI's with a focus on avoiding serious accidents. The HSE targets for 2021 were:

- There shall be no injuries in and around our buildings involving sick leave absence with more than three days sick leave, where Entra can be held responsible, and
- there shall be no injuries in our construction projects involving more than 16 days of sick leave.

Incidents are reported to the CEO and to the Board. Serious incidents are investigated to see what lessons can be learned and are an important element in further strengthening the HSE work.

There was one injury involving sick leave absence in and around our buildings in 2021, and there was one injury involving sick leave absence in our construction projects that involved more than 16 days sick leave.

Entra performs regular HSE audits of both development projects and management properties. In 2021, Entra performed nine HSE audits of which three development projects and six management properties.

Urban development

Entra's strategy is to invest in clusters on the public communication hubs in the the four largest cities of Norway, Oslo and the surrounding area, Bergen, Trondheim and Stavanger. Entra aims to contribute to urban clusters that are attractive, inclusive, and accessible for residents, office users and all other relevant parties. A part of Entra's environment strategy is to be located close to major public transportation hubs, thus contributing to less use of private cars to the benefit of public transport and environment-friendly alternatives such as bicycles.

For Entra, urban development includes creating a good atmosphere and secure surroundings in and around the buildings for the benefit of tenants, visitors and others who pass through the area. Entra ensures that the space around its buildings and building sites is neat, clean, and attractive. Entra works to get a mix of activities on the ground floors within its property clusters to create life and variation among visitors and users of its buildings. Where applicable, Entra considers how to activate the ground floors of our buildings to contribute to city life at street level.

Entra emphasises the importance of a good dialogue with partners, competitors, and other stakeholders in its work on urban development. Entra involves neighbours, local politicians and others who live or work in the group's urban development districts in connection with new buildings and refurbishments. Involvement may constitute meetings and correspondence with neighbours, open meetings, information to the local press and a one-on-one dialogue with selected target groups.

Examples of areas and buildings where Entra has contributed to positive urban development are in Tullinkvartalet,

Sundtkvartalet and at Tøyen in Oslo, at Papirbredden in Drammen, Brattørkaia in Trondheim, Media City in Bergen and at Hinna Park in Stavanger. In the years to come, Entra will also be involved in the urban development of Bryn and the area around the central station in Oslo and Sandvika on the west fringe of Oslo.

Community engagement

Community engagement has been an important part of Entra's ESG work for many years, and in total Entra has contributed with community engagement in and around 53 properties or around 63 per cent of its portfolio in 2021. The major initiatives are described below.

Entra has been a sponsor of the Church City Mission ("Kirkens bymisjon") in Norway since 2014. Entra's financial support to, and dialogue with, the Church City Mission strengthens the constructive measures that the Church City Mission is carrying out in connection with social challenges in the cities covered by the agreement. In Oslo, Entra is, among other things, involved in the "Neighbour cooperation" project. This initiative involves several companies located in the Oslo city centre, working to create a safer and better local environment for all those passing through the area, and to contribute to increased employment to disadvantaged groups that are currently out of work. Entra is actively involved in annual campaigns to provide Christmas dinners for the homeless and other initiatives to support "someone who dreads Christmas". The Church City Mission has also provided valuable insight in the planning of activities towards selected groups in Entra's work with social sustainability initiatives as part of the Urban development In Oslo.

For 21 consecutive years, Entra has also been a key sponsor of Ridderrennet, a global winter sports competition for disabled. Due to Covid-19, the event was cancelled also in 2021. To ensure the financial situation of the organisation, and future competitions, Entra's monetary support remained at the same level even though the competitions was cancelled.

During the autumn of 2021, Entra entered into a pilot project with Sisters in Business (SiB). SiB is a social entrepreneur that creates work for immigrant women through local textile production and repair of clothes. SiB has succeeded in providing work to women who have found it difficult to enter the labour market. The pilot took place at two of Entra's buildings, giving our tenants the opportunity to have different clothes repaired for free or buy textile products produced by SiB. All tenants that used the services provided by SiB were also encouraged to contribute to the Church's City mission instead of paying for the service. During the pilot, our tenants potentially saved 10.5 tonnes of CO₂ on repairing clothes.

In 2022, Entra will continue to investigate how the cooperation with the Church City Mission and Sisters in Business can be further developed. Community engagement, hereunder initiatives within social sustainability and new initiatives that contribute to, and support employment of the new generation and disadvantaged groups is a particular focus area in Entra's social strategy.

Governance

Board's Corporate Governance statement

Entra's Board ("the Board") actively adheres to good corporate governance standards and will ensure that Entra complies with the requirements of section 3-3 b of the Norwegian Accounting Act and the Norwegian Code of Practice for Corporate Governance of October 2021, issued by the Norwegian Corporate Governance Board (NUES). This is done by ensuring that good governance is an integral part of the decision-making process in matters dealt with by the Board. Moreover, Entra's corporate governance standards are subject to at least annual assessment and discussion by the Board.

Roles and responsibilities

Board of Directors

- Responsible for the long term success of Entra
- Sets the overall strategy and oversee its implementation
- Provides leadership and direction to the Group on its values and ethics
- Responsible for corporate governance
- Sets risk appetite and investment strategies
- Determines significant investments, acquisitions and disposals
- Responsible for risk management
- Responsible for financial performance, financial management and financial reporting
- Appoints core executive management positions

Audit Committee

- Preparatory body supporting the Board on the exercise of its responsibilities relating to
 - Financial reporting
 - Internal controls and financial reporting processes
 - Compliance with ethical guidelines
 - Overall risk management
 - Review of the performance and independence of the auditor
 - Preparing the audit tender processes, and giving the Board a recommendation on the election of auditor

Remuneration Committee

- Preparatory body to Board's considerations on compensation issues
- Prepares principles for remuneration packages and employment terms of the CEO and other Senior Executives
- Oversight of remuneration practices for all employees

Nomination Committee

- Reviews structure, size and composition of the Board and its Committees
- Leads Board appointment processes
- Ensures shareholders' views are taken into account
- Recommends appointments to the Board

CEO

- Leads the executive team and responsible for the overall management of Entra
- Articulate vision, values and purpose
- Develops and implements strategy
- Responsible for the overall performance of the business

Executive management

- Supports the CEO on the implementation of strategy, financial performance and management of the group

Management committees

- Investment committee
- Sustainability committee
- Compliance

Board activity

The Board attends eight regular board meetings each year. Additional meetings are held on an ad hoc basis. 22 Board meetings were held in 2021 as a number of extraordinary board meetings were held in January, November and December following the strategic interest in in Entra as well as Entra's acquisition of Oslo Areal. The calendar below sets out the main topics discussed at each regular board Meeting.

BOARD REPRESENTATION AND PARTICIPATION IN BOARD

February	March	April	June
- Financial and operational performance - HSE report - Transactions and investments - Annual results and the Q4 report - Portfolio valuation - Management remuneration, STI and LTI - Portfolio investments	- Financial and operational performance - HSE report - Transactions and investments - Annual results and Annual report - Going concern and viability statement - ESG strategy and reporting - Management review: - HSE and annual HSE report	- Financial and operational performance - HSE report - Transactions and investments - Q1 report - Portfolio valuation - CEO and Board Committees instructions - General remuneration principles - Management Review: - HR and competence development - IT/cyber security	- Financial and operational performance - HSE report - Transactions and investments - Board meeting calendar - CEO and Board Committee instructions - Compliance - Risk review - Management Review: - Procurement og vendors - Strategy session: - Macro economic outlook - Financial outlook - Market insight and customer trends - Portfolio strategy - Capital structure

The Board's work

The Chair of the Board chairs board meetings. The Board has a Vice Chair who chairs meetings when the Chair cannot or should not lead the work of the Board. All directors receive information about the Group's operational and financial progress in advance of the Board meetings. The Company's business plan, strategy and risk are regularly reviewed and evaluated by the Board to ensure that the company creates value for shareholders in a sustainable manner. The Board draws up and adopts an annual plan, including topics for the Board meetings. Ordinarily, the CEO proposes the agenda for each individual Board meeting. The final agenda is decided in consultation between the CEO and the Chair of the Board. In addition to the directors, Board meetings are attended by the CEO, CFO, EVP Legal and Procurement (secretary of the Board), and other EVPs as needed. Other participants are called in on an ad-hoc basis. The Board decides on matters of material importance to the Group. These include, but are not limited to, approval of the annual and quarterly accounts, strategies and strategic plans, the approval of significant investments, the approval of significant contracts and the approval of substantial business acquisitions and disposals. When carrying out this work, the Board consider financial, social and environmental matters.

The Board receives quarterly reports and presentations on the Group's operational and financial status. The reports describe progress and status in the Group's operative and administrative functions during the reporting period. The individual business units hold meetings with the CEO and CFO to review operating activities prior to and in connection with such reporting. The reports form the basis for internal control, communication on status and necessary measures. The quarterly reports are reviewed at Board meetings and form the basis for the external financial reporting.

Each year the Board and its committees assess their own work and way of working as a basis for reviewing the need for changes and other measures. This assessment includes an evaluation of the Board's expertise, collectively and for each member, and how well the Board works as a team.

Monitoring and control of financial reporting

Procedures have been established for financial reporting that involve carrying out a review of significant estimates, provisions, and accruals in conjunction with preparation of the quarterly and annual financial statements. Memorandums are prepared for significant accounting assessments, and non-routine transactions and are discussed in the Audit Committee. The valuation of the Group's properties is subject to a separate review and assessment at management level at the close of each quarter. This involves, among other things, holding meetings with the external appraisers conducting quarterly valuations of Entra's investment properties, with a particular emphasis on discussing perceptions of the market, risk premiums and documentation.

The Group reconciles and documents all balance sheet items in the group companies each quarter. Balance sheet items such as bank deposits, receivables, non-current assets, and liabilities are subject to thorough reviews. Loans, interest rates and interest rate hedging are subject to manual reconciliation each month. Ongoing projects are reviewed on a quarterly basis by the Project Development department. Rental income and other significant profit and loss items are subject to reconciliation each quarter. All reconciliations are reviewed and quality assured, as well as being analysed against the Group's forecasts and previous accounting periods.

Management reports significant operational and financial matters to the Board at the Group's Board meetings. Any significant matters and situations that arise outside Board meetings are discussed with the Chair of the Board and if necessary additional Board meetings are held.

In connection with the quarterly reporting, the Group's external auditor performs a review of the financial reporting, without issuing a review report.

The Group's quarterly and annual financial statements are reviewed by the Audit Committee before they are considered by the Board. As part of this process, management prepares a memorandum for the Audit Committee that describes significant accounting and financial assessments made during

the quarter. The Audit Committee annually reviews the external auditor's audit report, as well as the findings and assessments of reviews and audits in conjunction with interim and annual reports, if applicable. Any key audit matters and significant issues in the auditor's report are presented to the whole Board.

Financial management

The Group is managed by means of financial and operational targets linked to results and development, the return on equity and the weighted average cost of capital, the management of the debt portfolio and the return on the property portfolio. Risk assessments and profitability calculations are performed when acquiring properties and commencement of development projects in accordance with the Group's calculation model and required rate of return. The expected net present value and other key financial metrics of development projects are monitored throughout the course of each project. Long-term projections are made of expected financial developments as a component of the Group's risk management, using a model with detailed assumptions concerning the business's results, cash flow and balance sheet. The projections take into account cyclical developments in the economy, financial parameters and the property market. Scenarios and simulations are prepared for various developments. The simulations provide insightful information for the Board and management in their monitoring of developments in key balance sheet figures and cash flow.

Allocation of capital and the attitude towards risk are important parameters for guiding financial operations. Entra's finance policy contains a framework for the day-to-day management of the Group's financial risk. Principles have been defined for borrowing, management of liquidity risk and interest rate risk, and credit and counterparty risk. The Group's model for financial projections is updated on a continuous basis. Quarterly reports are made in accordance with the management guidelines for the financial operations, and to the Board through the quarterly business report.

Systematic monitoring of the general economic situation and its impact on the Group's financial risk is carried out. Based on expected developments in the economy and analysis of the Group's financial position, expected developments in both short-term and long-term interest rates, the strategy for interest rate positioning, capital requirements and planned financing activities are discussed, as well as opportunities in the financing market.

Financial reporting and communication

The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as approved by the EU. Entra's reporting fulfils statutory requirements and provides sufficient information to allow the company's stakeholders to form an accurate picture of the business. Entra reports in accordance with the rules in the Norwegian Securities Trading Act, as well as with the requirements specified by the Oslo Stock Exchange for companies with listed shares and bonds.

Entra provides its shareholders, the Oslo Stock Exchange and the financial market in general with timely, consistent and precise information. Such information is given in the form of

annual reports, quarterly reports, stock exchange notices and investor presentations and meetings. The Board has set an IR policy for Entra's reporting of financial and other information.

The Group considers it important to inform shareholders about the Group's development and economic and financial status. Management members (CEO, CFO and Investor Relations Manager) are available for discussions with shareholders in order to develop a balanced understanding of such shareholders' situation and focus, subject however to the provisions in legislation and regulations. Management ensures that shareholders' viewpoints are communicated to the whole Board.

The Board has approved regulations relating to the handling of inside information and trading in the company's shares. Primary insiders require internal clearance by the EVP Legal and Procurement before they buy or sell Entra shares.

Risk management

The Board is responsible for ensuring that the Group's business, financial reporting and asset management are subject to adequate control and in accordance with applicable law. Entra's risk management is to support the Group's strategic and financial goals and help the Group avoid events that may have an adverse impact on the Group's operations, financial situation and reputation. This is further elaborated on pages 28-39.

Internal control and compliance

The Board reviews at least twice per year the Group's risk and internal control activities. This, combined with the management's risk assessments and information on ongoing measures, enables the Board to judge whether the Group's risk management procedures are satisfactory. Risk management and internal controls are also considered by the Board's Audit Committee.

Entra works systematically to ensure continuous improvement of its internal controls linked to financial reporting and efficient operations. The Group has a proactive approach towards risk management, and potential risks are identified, assessed, quantified and managed. This is further elaborated in the section on Risk Management.

In consultation with the Audit Committee, management defines areas where the Group conducts review of internal controls. Both internal and external resources are used on these reviews. The results of the most important reviews related to internal control are presented to the Audit Committee and the Board on at least an annual basis. An internal control plan is presented to the Board.

The Group follows up issues relating to ethical guidelines and corporate social responsibility. The environmental perspective is an integral part of the assessments made in connection with the Group's potential investments. Special requirements have been defined for the Group's suppliers in the document "Socially Responsible Procurement", and a supplier verification process is conducted each year to ensure that the Group's suppliers are familiar with and adhere to the contractual conditions. This is further elaborated under the section "Ethics and anti-corruption".

The Group's Chief Compliance Officer (CCO) is responsible for ensuring that the company has implemented a compliance program that will ensure that Entra is compliant with regulatory and legal requirements as well as internal policies and bylaws. The CCO performs an annual review of the Group's governing documents, including guidelines for ethical conduct, procurement, sustainability, anti-corruption, data protection and privacy, and supports the Board and the CEO in ensuring that these guidelines are implemented and enforced.

Whistleblowing mechanisms and channels

The CCO is responsible for the Group's internal and external whistleblowing channels. The external channel is directly linked to an external law firm and contact details are available at www.entra.no. The Board are provided at least semi-annual reports on compliance related matters.

Board committees

The Board has established an Audit Committee and a Remuneration Committee. The Board has established mandates for the work of the committees, which are subject to annual revision. In accordance with their respective mandates, the Audit Committee and the Remuneration Committee shall have two or three qualified shareholder representatives from the current Board. The representatives are in general elected by the Board for two years at a time. In case of Board changes during the election period affecting members of the Audit Committee or Remuneration Committee, the period lasts until the representative is up for next election as a Board member. The committees assist the Board with preparing its work, but decisions are taken by the whole Board.

Audit Committee

The Audit Committee acts as a preparatory body and supports the Board in assessing the integrity of Entra's financial reporting, internal controls and financial reporting processes, compliance with ethical guidelines, overall risk management and review of the performance and independence of the auditor. The CFO, the Head of Group Accounting, the Group Controller and the Head of Accounting (secretary of the Audit Committee) attend as representatives of the management. The Group's auditor also participates in all meetings. Other members of the management team attend as required. The chair of the Audit Committee reports on the significant assessments discussed in an Audit Committee meeting in the first following board meeting. The Board further has access to the minutes from each Audit Committee meeting. The Audit Committee has an established calendar of meetings, which in 2021 also included meetings to prepare and oversee the audit tender process, including a recommendation to the Board on the election of auditor. 9 (6) meetings were held in 2021.

Remuneration Committee

The purpose of the Remuneration Committee is to act as a preparatory body for the Board's consideration of compensation issues. The Remuneration Committee's main task is to prepare the Board's consideration of matters relating to the salary and employment terms of the CEO and Senior Executives, as well as changes to them. In addition, the Remuneration Committee prepares the Board's consideration of principle issues relating

to salary levels, result-related pay schemes (including share schemes), the pension scheme/conditions, employment contracts and similar for the Senior Executives of Entra, as well as other matters relating to compensation that are of particular importance for the Group's competitive position, profile, ability to recruit, reputation etc. The CEO discusses the handling of individual conditions of Senior Executives with the Remuneration Committee. The Remuneration Committee furthermore discusses and presents proposals to the Board on guidelines for the remuneration of Senior Executives, prepares the Board's statement on the determination of salaries and other remuneration of Senior Executives in accordance with section 6-16a of the Norwegian Public Companies Act, and deals with other statutory reporting requirements.

The Remuneration Committee is composed of the Chair of the Board and one or two members of the Board and shall be independent of Senior Executives. The CEO and EVP HR and Communication attend as management representative. The CEO does not participate in discussions on issues that affect the CEO personally or matters that relate to the Senior Executives as a whole. The Group's EVP Legal and Procurement acts as the committee's secretary. Five meetings were held in 2021.

Salaries and remuneration of Board and senior executives

Remuneration of Board and Senior Executives

Pursuant to section 6-16a of the Norwegian Public Limited Liability Companies Act, the Board presents guidelines on the determination of salaries and other remuneration of the Board and Senior Executives, defined as the CEO and other members of the management team, to the annual general meeting for approval. The following guidelines were approved by the 2021 annual general meeting.

Guidelines for management remuneration

Remuneration of Senior Executives is based on the following general principles:

- Entra shall be a professional organization that attracts and retains skilled personnel and develops the competence of its staff. Entra thus needs to use remuneration, including competitive salaries, to ensure that the Group can recruit and retain competent and attractive expertise
- Moderation in the level of salaries of the Group's employees
- Management remuneration shall be competitive, but not leading
- The fixed salary shall be the main element of the remuneration, but all remuneration elements shall be considered in total
- The targets for any performance-related pay scheme shall be objective, measurable and definable, and there should be a clear correlation between the Group's business goals and the targets in such performance-related pay scheme
- Senior Executive remuneration shall be transparent and in line with the principles of good corporate governance

Process for determination of remuneration

The Board has established a separate Remuneration Committee. The Remuneration Committee functions as an advisory body for the Board and the CEO and is responsible primarily for:

- Making recommendations to the Board based on the committee's evaluation of the principles and systems underlying the remuneration of the CEO and other Senior Executives
- Making recommendations to the Board based on the committee's evaluation of the overall remuneration of the CEO, including the annual basis for bonus payments and bonus payments made
- Assisting the CEO in determining the remuneration of the other Senior Executives
- Advising the Board and the CEO in compensation matters which the committee finds to be of material or principal importance for Entra

Determination of remuneration in 2021

The guidelines for management remuneration set forth above form the basis for all remuneration of Senior Executives. Furthermore, the following principles applied for 2021 and up until the annual shareholders' meeting in 2022.

The total remuneration of the CEO and other Senior Executives consists of a fixed package of salary and benefits supplemented by performance-based bonuses, share-based long-term incentive plans, employee share plans, pension, and insurance arrangements.

Fixed remuneration

The fixed remuneration provided to Senior Executives includes a base salary (which is the main element of remuneration) and benefits in kind such as a car allowance, mileage agreements and telephone. The Senior Executives also have insurance coverage and other benefits in line with what is offered to all employees in accordance with collective agreements, legislation, and normal practice in Norwegian companies.

Performance-related pay

The Group operates performance-related pay schemes for Senior Executives. For the Group's Senior Executives, performance-related pay in 2021 includes a performance-related pay scheme ("STI") and a long-term performance-based share incentive program ("LTI").

STI scheme

The STI scheme is based on set targets at Group level in accordance with Board approved scorecards for 2021, as well as predefined personal targets. The scorecard for 2021 consist of the following KPIs and topics:

- NOI margin (net operating income less administrative cost/ rental income)
- Customer satisfaction score
- Energy consumption and waste management in the property portfolio
- HSE (health, safety, and the environment)
- Employee satisfaction
- Compliance

For the CEO and the Deputy CEO, the STI scheme has a maximum limit of 50 per cent of base salary and for other Senior Executives the maximum limit is 30 per cent of base salary.

LTI scheme

The LTI scheme is based on two Key Performance Indicators (KPIs); Return on Equity before tax (RoE) and Total Shareholder Return (TSR), each weighting 50 per cent. The Board believes that these KPIs align the interest of Senior Executives and shareholders in a beneficial manner, even though both KPIs are also influenced by external factors beyond the control of management.

Actual performance is determined on a linear target scale between a hurdle at 100 per cent and a cap at 120 per cent for both KPIs.

1. Return on Equity: three-year average RoE before tax compared to a target determined by the Board of Directors
2. Total Shareholder Return: three-year Entra TSR performance compared to the performance of the FTSE EPRA/NAREIT index.

Overview of remuneration scale LTI scheme 2021

			Maximum LTI result CEO and Deputy CEO (%) ¹	Maximum LTI result Senior Executives (%) ¹
Target achieved	100	120		
RoE	5.5	6.6	30	20
	100% of index	120 % of index		
TSR			30	20
Result LTI	0	100	60	40

¹ Calculated as actual achieved RoE & TSR divided by target RoE & TSR ("Result"). This Result is compared to the applicable target scale and if between 100 and 120 per cent, the linear percentage achievement is multiplied with the maximum 2021 result. I.e., if the Result is 110 per cent on the target scale, 2021 remuneration is calculated by 50 per cent multiplied by maximum 2021 result of 40 per cent and 60 per cent for Senior Executives and CEO/Deputy CEO, respectively.

The LTI remuneration will be distributed in shares which will have a vesting period of five years, whereof 1/3 matures after three years, another 1/3 after four years and the remaining 1/3 after five years. LTI remuneration is not included in the basis for pensionable salary and there is a cap on share price increase under the LTI scheme at 200 per cent share price increase.

Reclaiming performance-related pay

The Company shall have the right to demand the repayment of any performance-related remuneration that has been paid on the basis of facts that were self-evidently incorrect, or as the result of misleading information supplied by the individual in question.

Share purchase scheme

The CEO and other Senior Executives are eligible to participate fully in Entra's discounted employee share purchase plan on the same terms as all other employees.

Pension benefits

The CEO and other Senior Executives has a contribution-based service pension on the same terms as other employees. The contributions are 5 per cent of salaries between 0 G¹ and 7.1 G and 15 per cent of salaries from 7.1 G to 12 G.

Board compensation for company management and other employees

The CEO and certain other Senior Executives have a number of internal directorships in subsidiaries and partly-owned companies. They do not receive any remuneration for these directorships.

Severance package arrangements

The CEO has the right to six months' severance pay based on the base salary in cases where the Board takes the initiative to terminate the employment. No other Senior Executives have pre-agreed severance pay agreements.

Board remuneration

The general meeting determines each year the remuneration of the Board based on the Nomination Committee's proposal. The Board's remuneration shall reflect the Board's responsibilities, expertise, and use of time and the complexity of the business. Remuneration is not dependent on results and no share options are issued to Board members.

Board members or companies to which they are connected shall not normally undertake separate assignments for the Group in addition to the Board appointment. If they nevertheless do, the whole Board is to be informed, and the fees for such assignments are to be approved by the Board. If remuneration is paid above the normal Board fee, this is to be specified in the annual report.

Employee-elected members of the Board receive fees in line with shareholder-elected Board members.

Deviation from the Guidelines

The Board may decide to deviate entirely or partly from the Guidelines in individual cases provided that there are special circumstances that make such deviation necessary in order to satisfy the long-term interests of the Company or to ensure the financial viability of the Company.

Annual remuneration report

Pursuant to Section 6-16b of the Norwegian Public Limited Liability Companies Act, a report on salaries and other remuneration to Senior Executive personnel and the Board will be presented at the Annual General Meeting, first time at the Annual General Meeting in 2022. The report will be made available on the Company's website.

Remuneration of the Board in 2021

Board remuneration in 2021

The Board has in 2021 received remuneration in accordance with the Nomination Committee's proposal, approval by the AGM. No remuneration was paid above the Board fee approved by the AGM.

All amounts in NOK thousand	Board fees	Committee fees	Total remuneration 2021 ²
Siri Hatlen, Chair	501	61	562

Total	18 269	1 013	950	6 845	4 040	31 117

¹ Includes the provision based on targets met in 2021, which will be paid out in 2022.

² The LTI scheme has a vesting period of five years, whereof 1/3 matures after three years, another 1/3 after four years and the remaining 1/3 after five years. LTI is reported on expensed basis. As such, the earned LTI for 2021 also includes a portion of LTI earned in previous years.

³ Remuneration for the six months period Halgeir Østrem has been EVP Legal and Procurement.

The above amounts are subject to National Insurance contributions of 14.1 per cent. No loans were given by Entra to senior executives as of 31 December 2021.

Equity and shareholders

Entra has only one class of shares. Each share carries one vote and otherwise has equal rights including the right to participate in general meetings.

Free transferability

The shares are freely negotiable, with the exception of shares purchased by employees at a discount, and shares allocated in connection with the company's long-term incentive (LTI) scheme, see the section on Salaries and remuneration of Board and senior executives above. The Articles of Association place no restrictions on voting, ownership or negotiability in the shares.

Equity and dividend

At 31 December 2021, the Group's book equity was 33,571 million (29,205 million), representing an equity ratio of 48 per cent (49 per cent). The Board considers this to be satisfactory by reference to the Group's goals, strategy and risk profile. At any given time, the company's financial strength and exposure is considered in the light of its objectives, strategy and risk profile.

The Board of Entra targets to pay out dividends corresponding to approximately 60 per cent of Cash Earnings on a semi-annual basis. Cash Earnings is defined as net income from property management less tax payable.

Board authorisations

Capital increase

The Board has been authorised to increase the share capital by up to NOK 18,213,205, equivalent to 10 per cent of the company's share capital. The authorisation may be used for

the purpose to strengthen the company's equity and to cover capital need in connection with business opportunities. The authorization shall be valid until the annual general meeting in 2022 and will in all cases expire on 30 June 2022.

Purchase of own shares

The Board has been authorised on behalf of the company to acquire Entra shares in the market with an aggregated par value of up to NOK 9,106,603 e, equivalent to approximately 5 per cent of the company's share capital, for a maximum purchase price of up to NOK 2,731,980,900. Treasury shares acquired under this authorisation may only be disposed of by way of a subsequent cancellation in connection with a share capital decrease, cf. section 12-1 (1) no. 2 of the Companies Act. The lowest and highest price to be paid per share is NOK 50 and NOK 300, respectively. The company's acquisition and divestment of own shares shall be carried out on a stock exchange or otherwise at a trading price and in accordance with generally accepted principles for equal treatment of shareholders. This authorisation shall be valid until the annual general meeting in 2022 and will in all cases expire on 30 June 2022.

The Board has also been authorised on behalf of the company to acquire up to 500,000 shares in Entra ASA on behalf of the company with an aggregated par value of up to NOK 500,000, equivalent to approximately 0.27 per cent of the company's share capital, for a maximum purchase price of up to NOK 125,000,000. Shares may be acquired for the purpose of carrying out the company's share scheme for all employees in the Entra group and the long-term share incentive scheme for members of the senior management in the Entra group.

The lowest and highest price to be paid per share is NOK 50 and NOK 300, respectively. The company's acquisition of own shares shall be carried out on a stock exchange or otherwise at a trading price and in accordance with generally accepted principles for equal treatment of shareholders. Divestment shall be carried out in accordance with the purposes set out above, or on a stock exchange or otherwise at a trading price and in accordance with generally accepted principles for equal treatment of shareholders. This authorisation shall be valid until the annual general meeting in 2022 and will in all cases expire on 30 June 2022.

Equal treatment of shareholders and transactions with related parties

In the case of not immaterial transactions between Entra and a shareholder, a shareholder's parent company, a Board member, a Senior Executive, or persons related to them, the Board is to ensure that a valuation is in place from an independent third party. This does not apply when the general meeting is to consider the matter in accordance with the rules in the Norwegian Public Companies Act. An independent valuation shall also be provided in the case of transactions between companies in the same group where there are minority shareholders in such companies.

The Board is not aware of any transactions in 2021 between the company and shareholders, directors, executive personnel or parties closely related to such individuals that could be described as material transactions.

Takeover bids

The Board has an approved set of guidelines for takeover bids and will handle such situations in accordance with Norwegian law and the Norwegian Code of Practice for Corporate Governance. In a bid situation, Entra's Board and Senior Executives have a responsibility to help ensure that shareholders are treated equally, and that the Group's business activities are not disrupted unnecessarily. The Board will not hinder or obstruct takeover bids for Entra's activities or shares. The Board will ensure that shareholders are given sufficient information and time to form an opinion on an offer. If a takeover offer is received, the Board will issue a statement making a recommendation as to whether shareholders should or should not accept the offer. The guidelines have been followed during the recent strategic interest in Entra.

General meeting

The Board shall arrange for as many shareholders as possible to be able to exercise their rights to participate in Entra's general meeting, and for the general meeting to be an effective meeting place for shareholders and the Board, through, among other things, ensuring that:

- Agenda documents are sufficiently detailed for shareholders to be able to take a position on all matters that are to be considered,

- the deadline for notice of attendance is set as close to the meeting as practically possible and in accordance with the provisions in the Articles of Association,
- the Board and chair of the Nomination Committee attend the general meeting,
- routines are in place to ensure that the general meeting can elect an independent person to chair the general meeting; and,
- the Board and the person chairing the meeting shall ensure that the general meeting is able to vote on each item, hereunder for individual candidates for appointment to the Group's governing bodies.

Shareholders who are not able to be present at the general meeting shall be given the opportunity to vote through a proxy or through electronic participation. Entra shall:

- Give information on the procedure for attending by proxy,
- appoint a person who can vote for shareholders as proxy, and
- prepare a proxy form, which as far as possible is laid out in such a way that votes can be given for each matter that is to be considered and candidates who are to be elected.

The entire Board has not usually attended the General Meeting as the items on the agenda of the General Meeting have not required this. The Chair of the Board is always present, and other Board members participate on an ad-hoc basis. From the Group's perspective, this is sufficient.

Nomination Committee

Article 6 of the Group's Articles of Association states that the company shall have a Nomination Committee composed of up to five members.

The members of the Nomination Committee, including the chair, are elected by the general meeting for a period of up to two years. Members of the Nomination Committee shall be shareholders or representatives of shareholders and the committee should be composed so that broad shareholder interests are represented. Each gender shall be sought represented in the Nomination Committee.

The Nomination Committee shall give its recommendation to the general meeting regarding election of shareholder-elected members to the Board of Directors and members of the Nomination Committee, as well as remuneration to members of the Board of Directors and the Nomination Committee. The remuneration to members of the Nomination Committee is determined by the general meeting, and the general meeting may adopt instructions for the Nomination Committee. The Nomination Committee ensures that shareholders' views are taken into account when qualified members are nominated to the governing bodies of Entra, and shareholders are invited to provide input to the Nomination Committee.

None of the Committee's members represents Entra's management or Board, and they are all considered to be independent. The Nomination Committee is considered to have a composition that reflects the common interests of the community of shareholders.

See www.entra.no for more information on the members of the Group's Nomination Committee and the Nomination Committee's contact details.

Ethics and anti-corruption

Entra has zero tolerance for corruption in all parts of the group's business. Ethical behaviour is a necessary condition for a sustainable business. Entra conducts its business in an ethical and transparent manner, acts within the law and its ethical guidelines and behaves in line with its fundamental values of being responsible, innovative, hands-on, and one team.

Ethical guidelines

Entra's ethical guidelines are built on principles of equal opportunities for all, concern for the environment and a society view that emphasizes ethics, transparency, honesty and sincerity. The long-term success of the Group is based on trust. To maintain this trust Entra must ensure that its behaviour is consistent with its corporate values. The Group's ethical guidelines describe the way Entra is to treat its stakeholders and the behaviour which is expected of its employees. The ethical guidelines provide guidance and support to the Group and its employees in decision making and problem-solving processes.

The ethical guidelines are incorporated in the management development programme and are evaluated by the Board on an annual basis. Entra creates ethical awareness through training programmes, including an e-learning programme, and all employees and the Board of Directors are required to sign the ethical guidelines annually.

Entra has established whistle-blowing routines. Internal and external questions about ethics, harassment, whistleblowing etc. can be directed to the Group's Compliance Officer, or anonymously to an independent, experienced law firm with a duty of confidentiality in order to lower the threshold for an employee compared with having to contact a member of staff in Entra. The Compliance Officer reports on any matters to the board twice a year. A direct point of contact on such matters to an external law firm is available on www.entra.no and on Entra's intranet. There have been no reported incidents in 2021.

Entra's fundamental procurement principle is to achieve the best possible total result through competition and supplier management. Procurement is also to take advantage of economies of scale.

Entra aims to be a responsible purchaser in all parts of the value chain and has established a set of processes and routines for procurement that include requirements on documentation, role/work division (dualism) and equal treatment of suppliers

through competition. The routines are set to counter conflicts of interest and corruption.

New employees participate in procurement training covering processes, guidelines and tools for implementing best practice and fair procurement processes. Anti-corruption measures is an item on these training courses.

In 2017, Entra implemented dilemma training in ethics for its employees. The dilemma training is part of the introduction course for new employees, and there is an annual target that all employees should complete such online training each year. 100 per cent of the employees as well as the Board of Directors completed online training course in 2021.

Entra continuously monitors the suppliers within its supplier base to ensure that the company only does business with serious counterparties.

Entra's supply chain

Entra spends approximately 2 billion per year on external suppliers. The main suppliers are the largest construction companies in Norway and their sub-suppliers such as carpenters, electricians and plumbers. In property management, the largest suppliers are facility service suppliers such as canteen operations and cleaning services. Entra has signed framework agreements with its largest suppliers which mainly consist of large Norwegian companies.

Sustainability in the supply chain

The construction industry in which Entra operates faces challenges related to business crime and social dumping. Entra has established procedures to ensure that Entra only uses qualified suppliers.

Entra performs risk assessments for its entire value chain and facilitates action plans to reduce any identified risk. Entra has identified suppliers that perform work on Entra's construction sites and cleaning vendors as high-risk suppliers within social responsibility and follow-up this sector accordingly.

There is considered to be limited risk associated with rights to e.g., exercise freedom of association and collective bargaining, child labor or forced and compulsory labor in Entra's direct supply chain. There may, however, be more risk further down in the supply chain with sub-suppliers, although none have been identified in 2021.

Supplier qualification requirements

Entra has set "Socially Responsible Purchasing Guidelines" that must be followed by suppliers and their sub-contractors in its supplier qualification requirements. The document is an integral part of all purchasing contracts.

The document covers themes such as:

- Sustainable development and environmental considerations in the choice of materials
- External environment and focus on energy and environmental footprint savings
- HSE on construction sites
- Well-functioning work conditions and labour rights
- Economy and solidity
- Business ethics and relations

The guidelines are set to ensure that there are good working conditions in the suppliers' and in their sub-suppliers' businesses. The guidelines states that it is only allowed with two levels of sub suppliers for large suppliers and one for others.

Suppliers and sub-contractors are to be registered in the Registry of Business Enterprises and are obliged to provide a corporate identity code.

Entra is against all forms of discrimination. All employees and hired staff who are engaged in working on contracts must have salary and working conditions that fulfil the statutory requirements in accordance with the applicable collective agreements at the relevant time. Entra may require a supplier to produce documentation that shows the salary terms and working conditions for employees and hired staff at the supplier and their sub-suppliers.

Supplier audits

Entra performs audits of its suppliers to assure that operations follow Norwegian legislation and those principles stated in Entra's Socially Responsible Procurement Guidelines. Risk factors in the supply chain as well as HSE risks are the main focus issues for the audits. An annual audit plan for Entra's operations and especially the property portfolio is prepared based on a risk assessment of the following:

- Project/property/supplier size and complexity
- Contract conditions, contract model and vendor selection
- The results of changes, previously conducted audits and controls
- Project organization
- Start and lifetime of the project

There are no set criteria for the number of audits to be performed each year, although there is typically a correlation with the number of ongoing development projects in the portfolio. During 2021, five supplier audits were carried out. The audits were undertaken by a combination of internal personnel and external audit companies. The reports were thoroughly evaluated, and deviations and suggestions for improvements have been followed up.

Supplier reviews

In addition to supplier audits, Entra performs bi-annual reviews of "high-risk suppliers", with annual sales to Entra exceeding NOK 0.2 million. The review emphasizes supplier adherence to

Entra's supplier qualification requirements and includes;

- Credit checks to ensure suppliers' financial stability
- Checks to ensure suppliers have reported tax/vat submissions (last six months)
- Checks whether construction suppliers are registered in the "StartBank" qualification system
- Checks to determine if cleaning vendors are listed in the regulatory register for cleaning companies

Supplier Management Programme

Since 2015, Entra has invited master agreement suppliers to annual meetings to develop a common approach to the challenges faced by the industry (including HSE). The main purpose is to have an established arena for dialogue and cooperation that, in addition to resolving commercial issues, will focus on contributing to meeting the sector's challenges relating to working conditions, corruption and business crime. In 2020, Entra reviewed and updated its Socially Responsible Procurement Guidelines. A self-assessment questionnaire was sent out to all perceived high-risk suppliers to get confirmation of receipt and compliance with the new guidelines. The goal is closer involvement, increased awareness levels and better reporting.

Auditor

The Audit Committee evaluates and makes a recommendation to the Board and the general meeting regarding the choice of external auditor. When evaluating the auditor, emphasis is placed on the firm's qualifications, capacity and the auditor's fee. The general meeting elects the Group's auditor. Since 2012, Entra's auditor has been Deloitte. Roger Furholm was appointed responsible partner of the audit team in 2021.

Plan for the auditor's work

Each year the auditor presents a plan for the execution of the auditor's work to the Audit Committee that in turn informs the Board of its most important aspects.

Auditor's relationship to the Board

The auditor attends all meetings of the Audit Committee, as well as the Board meeting in which the annual report and financial statements are considered and adopted. At the meetings, the auditor goes through any significant changes in the Group's accounting principles, the evaluation of material accounting estimates and any material matters where there has been disagreement between the auditor and the management. There is one annual meeting with the Audit Committee and the auditor, and one meeting with the whole Board and the auditor, which is not attended by representatives from the management.

Auditor's review of the Group's internal controls and financial reporting

When presenting the results of the interim audit to the Audit Committee, the auditor focuses on the Group's internal controls, identified weaknesses and proposals for improvements. The auditor summarises the findings and assessments of the annual audit for Group management and the Audit Committee. Material issues if applicable are summarised for the Board.

Auditor's independence

Each year the auditor's independence is assessed by the Audit Committee. The Board has drawn up guidelines on the engagement of the external auditor, governing what work the auditor can do for the Group in view of the requirement for independence. Any major assignments other than statutory audits are approved by the Audit Committee in advance. Management informs the Audit Committee of all additional services supplied by the external auditor at each Audit Committee meeting.

Audit firm rotation

Entra is required to initiate a tender process for the appointment of the external auditor every 10 years. As a public-interest entity, Entra is not allowed to have the same external auditor for more than 20 consecutive years. In 2021, Entra conducted a tender for audit services starting in 2022, and will present the recommendation to the AGM on 22 April 2022.

General meeting

The auditor attends the annual general meeting for consideration of the annual financial statements. The auditor's fee for the statutory audit and other services is approved by the general meeting.

To the Board of Directors of Entra ASA

INDEPENDENT AUDITOR'S ASSURANCE REPORT ON ENTRA'S ESG REPORT FOR 2021

We have been engaged by the Board of Directors of Entra ASA to provide limited assurance in respect of the environmental, social and governance information presented in the Entra – Annual Report 2021, the sections ESG in Entra, pages 42 – 83, GRI and TCFD tables, pages 173 – 178, and EPRA Sustainability Performance Measures, pages 179 - 185, in total referred to as “the Report”. Our responsibility is to provide a limited level of assurance on the subject matters concluded on below.

Responsibilities of the Board of Directors

The Board of Directors are responsible for the preparation and presentation of the Report and that it has been prepared in accordance with the reporting criteria described in the Report, including the GRI Standards and the Norwegian Code of Practice for Corporate Governance. The Board of Directors are also responsible for establishing such internal controls that they determine are necessary to ensure that the information is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities

Our responsibility is to express a limited assurance conclusion on the information in the Report. We have conducted our work in accordance with ISAE 3000 (Revised) Assurance Engagements other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board.

Deloitte AS is subject to International Standard on Quality Control 1 and, accordingly, applies a comprehensive quality control system, including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Considering the risk of material misstatement, our work included analytical procedures and inquiries with management and individuals responsible for the preparation of the Report and for sustainability management at corporate level, as well as a review on a sample basis of evidence supporting the information in the Report.

We believe that our work provides an appropriate basis for us to provide a conclusion with a limited level of assurance on the subject matters.

Deloitte AS and Deloitte Advokatfirma AS are the Norwegian affiliates of Deloitte NSE LLP, a member firm of Deloitte Touche Tohmatsu Limited (“DTTL”), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as “Deloitte Global”) does not provide services to clients. Please see www.deloitte.no for a more detailed description of DTTL and its member firms.

*Conclusions*

Based on our work, nothing has come to our attention causing us not to believe that:

- Entra has applied procedures to identify, collect, compile and validate ESG information for 2021 to be included in the Report, as described in the Report.
- ESG information presented for 2021 is consistent with data accumulated as a result of these procedures and appropriately presented in the Report.
- Entra applies a reporting practice for its corporate governance reporting aligned with the Norwegian Code of Practice for Corporate Governance.
- Entra applies a reporting practice for its sustainability reporting aligned with the Global Reporting Initiative (GRI) Standards reporting principles and the reporting fulfils level Core according to the GRI Standards. Entra's GRI index presented in the Report appropriately reflects where information on each of the disclosures of the GRI Standards is to be found within the Entra - Annual Report 2021.

Report of the Board of Directors 2021

Entra was in 2021 back on the growth trajectory after some years with flat income development as several, large properties were non-income generating as they underwent redevelopment. Rental income grew by 7 per cent in 2021, net income from property management grew by 6 per cent and net asset value grew by 15 per cent during 2021. The Board proposes to pay a semi-annual dividend of NOK 2.60 per share for the second half of 2021 and thus NOK 5.10 per share for the full year, up from NOK 4.90 per share in 2020.

Entra is one of Norway's leading commercial real estate companies and number one in the office segment, focusing on large, high-quality, flexible and environment-friendly office properties in clusters around central public transportations hubs in the largest cities in Norway. Entra has its head office in Oslo.

The Norwegian society and office market has been less affected by Covid-19 than most other countries, and Entra's operations, projects and financial results have only to a limited extent been impacted by the pandemic. Office rents have held up well through the pandemic, the activity in the letting market has picked up and we expect to see increasing activity during 2022. The investment market is strong and competitive, with the highest transaction volume ever in 2021 in the Norwegian transaction market for commercial real estate.

Entra had rental income of 2,508 million (2,353 million) in 2021. Net operating income was 2,274 million (2,142 million) and net income from property management was 1,534 million (1,451 million). Net positive value changes were 5,264 million (5,705 million) and profit before tax was 6,825 million (7,274 million).

Entra's tenant base is robust with a WAULT of 7.1 years and a solid backbone of public tenants, comprising 56 per cent of revenues. Entra signed new and renegotiated leases with an annual rent totalling 346 million. Net letting for the year was 8 million.

The most important lever for securing profitable growth for Entra is through project development, and Entra normally has 5-10 per cent of the portfolio in project development. Entra currently has a higher share of assets in project development. In 2021, Entra finalised the redevelopment projects Universitetsgata 2 and Universitetsgata 7-9 in Central Oslo, and the refurbishment of Hagegata 22-24 in Oslo and Grønland 32 in Drammen. Further, Entra started the newbuild projects

Nygårdsgaten 91-93 in Bergen and Holtermanns veg 1-13 phase 2 in Trondheim.

Entra was active in the transaction market in 2021, and acquired Møllendalsveien 1A and Lars Hilles gate 19 in Bergen, Fyrstikkalléen 1 and Universitetsgata 11 in Oslo, and Lagårdsveien 6 and Laberget 24-28 in Stavanger. The acquisition of Laberget 24-28 was done through Hinna Park Eiendom, a partly owned company controlled by Entra. These acquisitions increased Entra's management portfolio by 96,390 sqm. In addition, Entra increased its share in the joint venture Oslo S Utvikling from 33.3 per cent to 50 per cent. In December 2021, Entra agreed to acquire Oslo Areal, a portfolio of 17 properties in the Greater Oslo region. The transaction closed in January 2022, upon which the management portfolio increased by 222,500 sqm.

The property Tollbodallmenningen 2A in Bergen was divested in 2021, and the property Nytorget 1 in Stavanger was sold by Entra to Hinna Park Eiendom. Following year-end, Entra sold its 50 per cent share in Hinna Park Eiendom, with a management portfolio of 67,000 sqm.

After the outbreak of the Covid-19 pandemic, one of the Board's top priorities has been to ensure that we are taking the necessary measures to protect the health and safety of our employees, our tenants and other users of our buildings. The Board has further supervised management and monitored the Group's business in accordance with good corporate governance. This includes a focus on organisational development, business strategy, hereunder new and ongoing development projects, active portfolio management (acquisitions and divestments), HSE, ICT and cyber risk, climate risk, ESG strategy and compliance. In addition, the Board has continuously monitored and evaluated the continued strategic interest in Entra.

Statement of comprehensive income, balance sheet and statement of cash flows

Results

Rental income was up by 7 per cent from 2,353 million in 2020 to 2,508 million in 2021. The increased rental income is explained in the table below.

All amounts in NOK million

Rental income previous period	2 353
Finalised development projects	58
Vacated properties for redevelopment	-53
Acquisitions	91
Divestments	-3
CPI growth	15
Like-for-like growth above CPI	35
Other	13
Rental income	2 508

The increase in rental income in 2021 is driven by acquisitions and an underlying like-for-like growth of 2.3 per cent (50 million), of which the underlying CPI adjustment was 0.7 per cent.

The acquisition of Lagårdsveien 6 and Kanalpiren in Stavanger, Møllendalsveien 1A and Lars Hilles gate 19 in Bergen and Hagegata 27, Fyrstikkalléen 1 and Universitetsgata 11 (Hotel Savoy) in Oslo contributed with rental income of 91 million, whereas the divestment of Tollbodallmenningen 2A in Bergen in February 2021 reduced rental income by 3 million.

Net contribution from development projects was 5 million. The completion of the redevelopment projects Universitetsgata 2, Universitetsgata 7-9, Kristian Augusts gate 13, Hagegata 22-24 and Grønland 32, and full year effect of Holtermanns veg 1-13 phase 1 finalised in 2020, contributed a total of 58 million on rental income. However, the vacating of Møllendalsveien 6-8 in Bergen, parts of Stenersgata 1 in Oslo and Kongens gate 87 and Brattørkaia 13 B in Trondheim, scheduled for redevelopment, reduced the rental income by 53 million.

Other effects stems from an administrative fee of 13 million during 2021.

Nearly all of Entra's lease contracts are 100 per cent linked to positive changes in CPI. The annual adjustment are mostly made on a November to November basis.

The occupancy rate was 97.8 per cent (97.9 per cent) as of 31 December 2021. The rental value of vacant space was approximately 60 million (48 million) on an annualised basis.

Operating costs amounted to 234 million (211 million) and are split as follows:

All amounts in NOK million	2021	2020
Maintenance	29	33
Tax, leasehold and insurance	64	57
Letting and property administration	89	70
Direct property costs	52	51
Operating costs	234	211

Rent (12m rolling) per sqm. and occupancy rate

The increase in letting and property administration costs is mainly driven by higher letting activity and management initiatives. The increase in tax, leasehold and insurance is mainly due to property tax on acquired properties in 2021 and higher turnover-based lease payments for Langkaia 1 in Oslo.

As a consequence of the effects explained above, net operating income came in at 2,274 million (2,142 million) in 2021.

Other revenues totalled 73 million (113 million) and other costs amounted to 43 million (79 million) in 2021. Other revenues and other costs mainly consists of services provided to tenants and income and costs related to inventory properties (properties in the Bryn portfolio which is expected to be zoned for residential development and subsequently sold to a third party at a predetermined price).

Administrative expenses amounted to 210 million (186 million) in 2021. The increase is mainly driven by advisory fees related to the strategic interest for Entra and triggered by Balder's mandatory offer to acquire all outstanding shares in the company.

Entra's share of profit from associates and JVs was 19 million (120 million) in 2021, a reduction mainly driven by limited completion and delivery of residential apartments and commercial assets in Bjørvika by OSU. Further, Rebel U2 opened its concept in Universitetsgata 2 in Oslo, which has seen lower than anticipated activity to Covid-19 restrictions.

Net realised financials amounted to -551 million (-541 million) and are composed as follows:

All amounts in NOK million	2021	2020
Interest and other finance income	7	11
Interest and other finance expense	-558	-551
Net realised financials	-551	-541

Net income from property management per share

Annualised, rolling 4 quarters

Net income came in at 1,561 million (1,569 million). When including only the income from property management in the results from JVs, the net income from property management was 1,534 million (1,451 million) for 2021. Reference is made to the alternative performance measures section of this report for calculation of the net income from property management.

Net value changes amounted to 5,264 million (5,705 million) for 2021.

The valuation of the property portfolio resulted in a net positive value change of 5,057 million (5,980 million) for the financial year 2021, of which about 2,510 million is attributable to compressed market yields.

Lower interest rates have contributed to a significant yield compression in the Norwegian market, particularly in Oslo, Bergen and Trondheim where 86 percent of the asset value of Entra's properties are located. Following the uncertainties from Covid-19, the activity in the transaction market has been high during the year, yields were relatively stable, and the yield gap increased. A number of transactions of relevance for Entra's portfolio were completed at yield levels significantly lower than observed in 2020.

About 1,090 million of the value changes stems from development in the project portfolio, mainly explained by new lease contracts signed in 2021 and reduced risk as each project moves towards completion. In addition, 290 million is related to the net effect from strong letting activities in the portfolio and 840 million is due to increased market rents, especially in the Oslo market where we are expecting an increase in market rents for the next two-three years. The remaining is a result of other effects from property related changes.

Net changes in the value of financial instruments totalled 206 million (-275 million) in 2021. The positive value change is mainly explained by higher long-term interest rates.

Tax payable is 19 million (26 million) in 2021, mainly related to the partly owned entity Papirbredden Eiendom in Drammen.

EPRA NRV

Per share

The change in deferred tax was -1,433 million (-1,552 million)

Profit before tax was 6,825 million (7,274 million) whereas profit after tax was 5,373 million (5,696 million). Total comprehensive income for the period was 5,351 million (5,677 million).

Balance sheet

The Group's assets amounted to 70,292 million (59,141 million) as at 31.12.21. Of this, investment properties amounted to 67,568 million (56,834 million). The property Borkenveien 1-3 in Sandvika is classified as held for sale on 31 December 2021 as the tenant has exercised the option to acquire the property during 2022.

Inventory properties of 469 million (461 million) relates to the properties expected to be zoned for residential development at Bryn in Oslo, and subsequently sold to a third party at a predetermined price.

Interest bearing debt were 26,579 million (21,146 million) as of 31.12.21, of which 19,582 million were the carrying amount of bonds outstanding, 5,597 million were bank financing and 1,400 million were commercial papers.

Book equity totalled 33,571 million (29,205 million). As at 31.12.21, EPRA NRV per share was 218 (189) and EPRA NTA 216 (187).

Cash flows

Net cash flows from operating activities came to 1,488 million (1,521 million) in 2021. The decrease mainly relates to working capital movements.

The net cash flows from investment activities was -5,865 million (-1,868 million) for 2021. Proceeds from property transactions of 42 million (15 million) is mainly related to the divestment of the property Tollbodallmenningen 2A in Bergen. Purchase of investment properties of -3,540 million (-194 million) is related to the acquisition of Lagårdsveien 6 and Laberget 24-28 (Kanalpiren) in Stavanger, Møllendalsveien 1A and Lars Hilles gate 19 in Bergen, and Fyrstikkalléen 1 and Universitetsgata 11 (Hotel Savoy) in Oslo.

The cash effect from investment in and upgrades of investment properties amounted -2,078 million (-1,683 million) in 2021.

Net payment on financial assets of 70 million (72 million) is mainly related to the repayment of a seller credit in relation to a divestment of a property in 2019. Investments in associates and JVs of -476 million (-13 million) is related to Entra's increase in the share in Oslo S Utvikling from 33.3 per cent to 50 per cent.

Net cash flows from financing activities was 4,469 million (246 million) in 2021.

Net proceeds of interest bearing debt was 5,460 million (1,245 million) in 2021. During 2021, Entra had a net nominal increase in bond financing of 5,829 million, with a corresponding cash effect of 5,532 million, and an increase of commercial paper financing of 200 million, partly offset by a net decrease in bank financing of 272 million and million.

Dividends paid amounted to 911 million (874 million) in 2021. For 2021, Entra paid dividends of NOK 2.50 per share to the shareholders for the first six months and has proposed NOK 2.60 per share for the second half year. For the financial year 2021, Entra will thus have paid out NOK 5.10 per share compared to NOK 4.90 per share in 2020.

Dividends paid to non-controlling interests was 70 million (114 million) in 2021. The dividends was paid to the non-controlling interests in Entra OPF Utvikling and Papirbredden Eiendom.

The net change in cash and cash equivalents was 92 million (-100 million) for 2021.

Going concern

The financial statements have been prepared based on the going concern assumption, and the Board confirms that this assumption is valid. The company is in a healthy financial position and has good liquidity.

Financial structure and exposure

The Group has a well staggered debt maturity profile and a diversified financial structure comprising of both bank credit facilities and capital markets instruments.

We have strong relationships and continuous dialogues with five of the top six Nordic banks, and we assess that the bank market is open and supportive to our funding needs. Entra has a strong presence in the Norwegian debt capital market as it is the largest issuer in Norwegian kroner. Entra has a Moody's investment grade rating Baa1 with Stable Outlook. The Moody's Baa1 rating contributes to increased credit availability and enables Entra to maintain a well-staggered debt maturity profile.

The Group has adopted a conservative financial strategy that secures financial flexibility throughout an economic cycle. This is reflected in the financial policy through a set of financial risk parameters limiting risks related to financial leverage, interest rates, financing and liquidity. Consequently, Entra's financial

profile is characterised by a moderate loan-to-value ratio, strong interest coverage ratio, diversified debt maturity and an ample liquidity position. As a general principle, Entra's financing is based on a negative pledge of the Group's assets that enables a broad and flexible financing mix.

"Green financing" has been well established within real estate finance. The real estate sector is responsible for about 40 per cent of global greenhouse gas emissions. This fact has spurred increasing awareness among investors and financial institutions that a conditional capital supply represents a key factor in accelerating the green shift within the sector. Entra, with its environment friendly development projects and BREEAM certified investment properties, is well positioned for capitalizing on this favourable supply of green financing and currently 69 per cent of Entra's financing is "green".

The debt capital markets funding accounted for 79 per cent (72 per cent) of the total interest bearing debt, with bank funding representing the remaining part of the financing mix. The Group's liquid assets amounted to 309 million (217 million) as of 31 December 2021. In addition, the Group had committed, unutilised credit facilities totalling 8,830 million (7,290 million). The Group's average interest rate as of 31 December 2021 was 2.25 per cent (2.38 per cent), and 47 per cent (50 per cent) of the Group's total interest bearing debt was subject to fixed interest rates. Entra's loan-to-value ratio decreased to 38.4¹ per cent (36.4 per cent) at year-end 2021 and the interest coverage ratio increased to 3.5 (3.4).

Corporate governance

Entra's Board has approved guidelines for good corporate governance in accordance with the Norwegian Code of Practice for Corporate Governance issued by the Norwegian Corporate Governance Board (NUES).

The corporate governance section of this annual report on pages 68-80 provides a more detailed description of the corporate governance principles and reporting pursuant to Section 3-3b of the Norwegian Accounting Act.

Entra has taken out directors and officers liability insurance for the Group and subsidiaries. The insurance covers the Board's and the CEO's legal personal liability for financial damage caused by the performance of their duties.

Health, safety & environment

It should be safe to work, visit and live in and around Entra's properties and development projects. Entra's goal of being a zero-harm workplace for people, the environment and society underpins all the Group's health, safety and environmental work. HSE is an important focus area for the Board. The Board is satisfied with the dedicated HSE work in the organisation and the initiatives taken to prevent serious incidents.

In 2021, Entra had one incident in the management portfolio which led to an injury involving sick leave absence and one injury involving sick leave absence of more than 16 days in its construction projects. Absence due to illness in Entra was 2.6

¹ The definition of LTV is amended from 2021. Refer to page 165 for further details.

per cent in 2021, compared to 3.1 per cent in 2020. This is low compared to a country average of 6.6¹. Cooperation with the employee organisations is good and constructive and yields a positive contribution to the operation of the Group.

To operate its business in a sustainable manner is of key strategic importance to Entra. Entra's ESG report can be found on pages 42-80. The outputs are compiled and aligned using three reporting frameworks: The EPRA Best Practices Recommendations on Sustainability Reporting, the Global Reporting Initiative Standards (GRI) Core option and the Task Force of Climate-related Financial Disclosures (TCFD). Entra has also reviewed the UN Sustainable Development Goals for its business.

Entra believes that 100 per cent of its income and investments will be eligible for EU Taxonomy alignment. While actual requirements for alignment are still to be finalised, Entra is prepared to report in accordance with the EU Taxonomy requirements as soon as it is finalised.

Equality and diversity

At 31 December 2021, 37 per cent (38 per cent) of the Group's 177 employees were women and 63 per cent (62 per cent) were men. 49 per cent of employees in managerial positions were women. Two out of seven of the Senior Executives were women, and four of seven of the Board members were women.

The Group believes in the benefits of diversity, and this goal is incorporated into Entra's recruitment procedures and is reflected in the composition of management. Entra strives for diversity on a broad basis, including gender, age, ethnicity, personal beliefs, background, education, sexual orientation and nationality. Key metrics regarding diversity and information on Entra's efforts to increase diversity are included the ESG report.

Risks associated with the business

The Board assesses risk on an ongoing basis, primarily through a semi-annual comprehensive review of the groups risk maps, which includes assessments of all risk factors in collaboration with all levels of the organization. Each risk factor is described and presented with the possible negative outcome given an increased probability of a situation to occur. The risk assessment also includes a broad description on how we monitor and work to minimize the risks, as well as a statement on how we assess the changes in the last period on each risk factor.

Entra's main risk factors, both financial and non-financial, are described on pages 28-39.

Shareholder information

Entra's share capital is NOK 182,132,055 divided into 182,132,055 shares, with each share having a nominal value of NOK 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra.

Outstanding shares at 31 December 2021 totalled 182,129,968 (182,129,247) as Entra held 2,087 (2,808) treasury shares.

As of 31 December 2021, Entra had 4,524 shareholders. Norwegian investors held 10 per cent of the share capital. The 10 largest shareholders as of 31 December 2021 were as follows:

Shareholder	Shareholding %
Fastighets AB Balder	36.6
Castellum AB	33.3
J.P. Morgan Securities	2.3
State Street Bank and Trust Comp	2.0
The Bank of New York Mellon	1.4
Danske Invest Norske Aksjer	1.0
Verdipapirfondet Alfred Berg Gambak	0.8
State Street Bank and Trust Comp	0.8
J.P. Morgan Bank Luxembourg	0.7
JPMorgan Chase Bank	0.7
Total 10 largest shareholders	80.0

Profit for the year and allocations

In 2021, the parent company Entra ASA made a profit after tax of 160 million (428 million), as set out in the financial statements prepared in accordance with the Norwegian Accounting Act and Norwegian generally accepted accounting principles.

In accordance with the defined dividend policy of paying out approximately 60 per cent of Cash Earnings, defined as net income from property management less tax payable, the Board proposes that Entra ASA distributes a dividend of 474 million (455 million) corresponding to 2.60 per share (2.50 per share) for the last six months of 2021. The proposed dividend exceeds profit after tax for the year, and the variance is deducted from retained earnings.

The Board confirms that the company has sufficient equity and liquidity following payment of the proposed dividend.

Outlook

When entering what might be the final stage of the Covid-19 pandemic, it is fair to conclude that the Norwegian society and office market has been less affected than most other countries. Further, Entra has proved to be very resilient, and our operations, projects and financial results have been only marginally impacted.

A shift to hybrid work seems abundantly clear for office and knowledge workers. However, both market data and Entra's experience throughout the last two years suggest only marginal cuts in demand for office space, primarily driven by three factors. Firstly, high density at the office is uncomfortable, and employees in general want more room around their desks than previously. Secondly, the office of the future must be more inviting to attract talent, and many tenants plan to implement more spacious, lounge-style, open seating plans and meeting rooms that accommodate a mix of in-person and remote participants. Thirdly, many employees want to work from home on Mondays and Fridays. As such, the need to facilitate for

¹ Source: Statistics Norway: Sickness absence Q3 2021

simultaneity in the office means that the shift towards hybrid office solutions only offer meagre opportunities to economize on office space. In short, employers are reshaping offices to become more inviting social spaces that encourage face-to-face collaboration, creativity, and serendipitous interactions, which will benefit landlords like Entra.

Office rents in Norway have held up well throughout the pandemic, and the activity in the letting market has picked up. Entra is thus well positioned in a solid Norwegian economy supported by strong public funding and a property market with low office vacancy rates and expectations for continued rental growth.

Long-term interest rates have during recent months trailed upwards, which in isolation should impact investors' yield requirements. However, strong CPI growth, that is fully implemented into Entra's tenant contracts, and an expected very positive rental market particularly in Oslo, combined with solid macro and continued good investor appetite for commercial real estate, should provide a strong mitigating force. The investment market is very active and competitive, and prime yields have remained stable.

Sustainability has been an integrated part of Entra's business model for more than 10 years. Entra is working actively to reduce the CO₂ footprint of its property portfolio and has a firm ambition to become a net zero carbon company by 2030.

Assets representing almost 69 per cent of the value of the management portfolio are, or in the process of being, BREEAM certified. Entra issued its first green bond in 2016 and currently has 69 per cent of its debt portfolio in green bonds and bank loans.

With the acquisition of Oslo Areal, a portfolio of 17 properties located within Entra's existing clusters that was closed on 12 January 2022, Entra has significantly increased its exposure to Oslo and enhanced and expanded Entra's attractive project development pipeline for the years to come.

Even after the fully debt-financed 13.5 billion acquisition of Oslo Areal, Entra has a strong balance sheet, a well staggered debt maturity profile, and a diversified financing mix with an ample supply of unutilized credit facilities. Going forward, Entra will optimize and grow its high-quality portfolio and continue to build and progress the development pipeline. Entra will focus on its role as an urban developer and leverage its competitive advantages, including expertise, network and ESG leadership.

Entra owns and manages modern, flexible and environmentally friendly assets located in selected clusters near public transportation hubs. Geopolitical uncertainty will prevail going forward, but Entra, with a solid tenant base with long lease contracts, a strong financial position, and an extensive project pipeline for future growth, has a proven and resilient business profile that is well positioned for the future.

Notes

NOTE 1 GENERAL INFORMATION

Entra ASA ("the Company") is listed on Oslo Stock Exchange with the ticker ENTRA. The Company and its subsidiaries (together "Entra" or "the Group") is one of Norway's leading commercial real estate companies, focusing on high quality, flexible office buildings with central locations. The Group owns and manages 96 (90) buildings with a total area of approximately 1.5 million (1.3 million) square metres. As of 31.12.21 the real estate portfolio had a market

value of around 68 billion (57 billion). The public sector represents approximately 56 per cent (58 per cent) of the total customer portfolio. Entra's strategic areas are Oslo, Trondheim, Bergen, Sandvika, Stavanger and Drammen. Entra has its head office in Oslo.

The financial statements were adopted by the Company's Board on 3 March 2022.

NOTE 2 ACCOUNTING PRINCIPLES

ACCOUNTING PRINCIPLES

The most important accounting principles applied in the preparation of the annual financial statements are described below. These principles are applied in the same way for all periods presented, unless otherwise indicated in the description.

BASIC PRINCIPLES

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations by the IFRS Interpretation Committee (IFRIC), as adopted by the EU, as well as additional Norwegian reporting requirements pursuant to the Norwegian Accounting Act.

The consolidated financial statements have been prepared on the basis of the historical cost principle, with the following modifications: investment properties as well as certain financial assets and financial liabilities have been measured at fair value. Financial instruments measured at fair value include the Group's derivatives.

Presenting the accounts in accordance with IFRS requires the management to make certain assessments and assumptions. The application of the Group's accounting principles also requires management to exercise judgement. Estimates and subjective judgements are based on past experience and other factors that are considered appropriate. Actual results may deviate from these estimates.

Estimates and underlying assumptions are continuously reassessed. Changes in accounting estimates are recognised in the period in which the changes occur if they apply only to that period. If the changes also apply to future periods, the impact is distributed over the current and future periods. Note 3 details items in the accounts that are based on a significant amount of subjective judgement.

The consolidated financial statements have been presented on the assumption of the business being a going concern.

Application of new and revised International Financial Reporting Standards (IFRSs) in 2021

New and amended standards adopted by the Group

The accounting policies adopted, and methods of computation followed are consistent with those of the previous financial year, except for items disclosed below.

Interest Rate Benchmark Reform – Phase 2: Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16

The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR). The amendments include the following practical expedients:

- A practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest
- Permit changes required by IBOR reform to be made to hedge designations and hedge documentation without the hedging relationship being discontinued
- Provide temporary relief to entities from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component

These amendments had no impact on the consolidated financial statements of the Group. The Group intends to use the practical expedients in future periods if they become applicable.

New standards and interpretations not yet adopted by the Group

None of the new accounting standards or interpretations that have not yet come into effect are expected to have a significant impact on the Group's consolidated financial statements.

CONSOLIDATION PRINCIPLES

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from

its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. The Group reassesses whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether the Group's voting rights in an investee are sufficient to give it power, including:

- The size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including vote patterns at previous shareholder's meetings.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method is used to account for purchases of subsidiaries that constitute a business. The consideration given is measured at the fair value of the transferred assets, the equity instruments that have been issued, liabilities assumed on the transfer of control and direct costs relating to the actual purchase. The cost of acquisition also includes the fair value of all assets or liabilities that are the result of an agreement on contingent consideration.

Identifiable purchased assets, assumed liabilities and contingent liabilities are recognised at fair value on the date of acquisition. The costs associated with the business combination are expensed when they are incurred.

If the aggregate of the consideration, the carrying amount of non-controlling interests and the fair value on the acquisition date of any previously held ownership interests exceeds the fair value of the acquired entity's identifiable net assets, the difference is capitalised as goodwill. If the aggregate is less than the company's net assets, the difference is immediately recognised in profit or loss.

Contingent consideration is recognised at fair value on the date of acquisition. Subsequent changes in the fair value of the contingent consideration are recognised in profit or loss or recognised as a change in other comprehensive income (OCI), if the contingent consideration is classified as an asset or a liability. Contingent consideration classified as equity is not remeasured, and subsequent settlement is recognised in equity.

For accounting purposes, acquisitions of subsidiaries that do not constitute a business as defined in IFRS 3, such as acquisitions where substantially all of the fair value of the gross assets acquired is concentrated in a single property or group of similar properties, are treated as asset acquisitions. The cost of acquisition is then

attributed to the individual identifiable assets and liabilities based on their relative fair values on the acquisition date. Expenses associated with the transaction are capitalized under the investment property. In such cases, deferred tax liabilities or assets are not recognised, except for deferred taxes related to losses carried forward, in accordance with the exceptions in IAS 12.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and other components of equity, while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

Intra-group transactions, balances and unrealised gains are eliminated. Unrealised losses are eliminated, but are considered evidence of impairment in terms of writing down the value of the transferred asset. If necessary, the accounting policies at subsidiaries are changed in order to bring them into line with the Group's accounting policies.

Transactions with non-controlling interests

Transactions with non-controlling interests in subsidiaries are treated as equity transactions. If shares are acquired from a non-controlling interest, the difference between the payment and the proportion of the carrying amount of the subsidiary's net assets attributable to the shares is recognised in the equity of the parent company's owners. Gains and losses arising from the sale of shares to non-controlling interests are similarly recognised in equity.

If the Group loses control, any residual holding is remeasured at fair value through profit or loss (FVTPL). Thereafter, the fair value is used as the acquisition cost for accounting purposes, and the holding is treated as an investment in an associate, in a jointly controlled entity or in a financial asset. Amounts previously included in OCI that relate to the company are treated as if the Group had disposed the underlying asset and liability. This may result in amounts that were previously included in OCI being reclassified to the income statement.

Joint arrangements

Under IFRS 11, investments in joint arrangements are classified as either joint operations or joint ventures. In a joint arrangement, no single party controls the arrangement on its own. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

Entra classifies its investments based on an analysis of the degree of control and the underlying facts. This includes an assessment of voting rights, ownership structure and the relative strength, purchase and sale rights controlled by Entra and other shareholders. Each individual investment is assessed. Upon changes in underlying facts and circumstances, a new assessment must be made as to whether this

is still a joint venture. Changes in contractual rights and obligations relating to the underlying asset or debt and changes in the shareholders agreement might lead to a shift in the accounting method.

In joint ventures, the Group's share of the companies' profit/loss after tax, adjusted for amortisation of excess value and any deviations from accounting policies, are presented on a separate line in the consolidated income statement. Joint ventures are recognised in the consolidated accounts using the equity method and presented as non-current assets.

A transaction that entails a change of control from an investment in a joint venture to an investment in a subsidiary is treated as a realisation and require that a gain/loss at the time of derecognition of the joint venture has to be calculated and recognised in the income statement as results from associates and JVs according to the equity method. Equity transactions in a joint venture is presented as an equity transaction in the Group's statement of changes in equity.

Associates

Associates are companies over which the Group has significant influence but not control or joint control. Significant influence normally exists where the Group's investment represents between 20 and 50 per cent of the capital with voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost. Investments in associates include any excess values and goodwill identified at the time of acquisition, less any subsequent impairment losses.

The Group's share of the profit and loss of associates is recognised and added to the carrying amount of the investments. The Group's share of the comprehensive income of associates is recognised in the Group's comprehensive income and added to the carrying amount of the investments. The Group does not recognise its share of a loss if this would result in a negative carrying amount for the investment (including the entity's unsecured receivables), unless the Group has taken over obligations or made payments on behalf of the associate.

The Group's share of unrealised gains on transactions between the Group and its associates is eliminated. This also applies to unrealized losses, unless there is a permanent loss of value. Where necessary, the accounts of associates have been brought into line with the Group's accounting policies. Gains and losses arising from the dilution of ownership interests in associates are recognised in profit or loss.

If the Group no longer has significant influence, any residual holding is remeasured at FVTPL. Thereafter, the fair value is used as the acquisition cost for accounting purposes, and the holding is treated as a financial asset. Amounts relating to the company that were previously recognised in comprehensive income are treated as if the associate had disposed of the underlying assets and liabilities. This may result in amounts that were previously included in comprehensive income being reclassified to the income statement. If the Group reduces its shareholding but retains significant influence, a proportionate share of the amounts previously recognised in comprehensive income is reclassified to the income statement.

INVESTMENT PROPERTY

Investment properties are owned with the aim of achieving a long-term return from rental income and increase in value. Investment properties are recognised at fair value, based on market values estimated by independent appraisers.

Initial measurement also takes into consideration the property's cost price, which includes direct transaction costs such as document duty and other public duties, legal fees and due diligence costs. Transaction costs associated with properties acquired through business combinations (as defined in IFRS 3) are expensed.

Subsequent expenditure is added to the investment property's carrying amount, if it is probable that future financial benefits associated with the expenditure will flow to the Group and the expense can be measured reliably. Other maintenance costs are recorded through the income statement in the period in which they are incurred. When investment properties are disposed of, the difference between the net sales proceeds and carrying amount is recognised as change in value from investment properties.

Investment properties are valued at each reporting date. The values are estimated by independent appraisers. The valuation is based on the individual property's assumed future cash flows, and property values are arrived at by discounting cash flows with an individual risk-adjusted required rate of return.

The required rate of return for each property is defined as being a long-term risk-free interest rate plus a property-specific risk supplement. The latter is defined on the basis of the property segment to which the property belongs, its location, standard, occupancy rate, tenants' financial reliability and remaining lease term. Known market transactions with similar properties in the same geographical area are also taken into consideration.

Changes in fair value, including gains and losses on sale of investment properties, are recognised as "Changes in value of investment properties".

Investment properties held for sale

Investment properties are classified as held for sale if their carrying amount will be recovered through a sales transaction rather than through their continuing use. This condition is regarded as met if the sale is highly probable and the investment property is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets. For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the investment property, and an active programme to locate a buyer and complete the plan must have been initiated. Further, the investment property must be actively marketed for sale at a price that is reasonable in relation to its current fair value. In addition, the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification. Investment properties classified as held for sale are measured at fair value in the same way as other investment properties.

Borrowing costs

Borrowing costs for capital used to finance investment properties under construction are capitalised under the asset in question. When calculating the capitalised borrowing costs, the average interest rate on the company's debt portfolio over the course of the year is used, unless there is separate financing for the specific project. In such cases the specific borrowing cost for the loan in question is used. When calculating the average interest rate to be used for the capitalisation of borrowing costs, loans taken out for specific projects are not included.

REVENUE RECOGNITION**Revenue from lease contracts**

The Group enters into lease agreements as a lessor with respect to its investment properties. Lease contracts where a significant proportion of the risks and benefits of ownership remain with Entra are classified as operating leases. Revenue recognition under a lease commences at the inception of the lease. Rent payments for the leases are recognised in a straight line over the duration of the lease.

In negotiating a new or renewed operating lease, Entra may provide incentives for the lessee to enter into the agreement. Examples of such incentives are rent exemptions, up-front payments to the lessee or the reimbursement or assumption by the lessor of costs of the lessee (such as relocation costs, leasehold improvement and costs associated with a pre-existing lease commitment of the lessee). Entra recognises the aggregate benefit of incentives as a reduction of rental income over the lease on a straight-line basis. The accrued loss of rent or costs is presented under other receivables. Payments relating to the termination of contracts are recognised in the period from the contract being entered into until the date of its termination. Rental income encompasses the fair value of the payments received for services that fall within the ordinary activities of the company. Rental income is presented net of VAT, rebates and discounts.

Rental income from letting of inventory properties is presented as "Other revenues".

Costs for shared services provided to the tenants by external parties do not affect the result beyond an administrative premium recognised as rental income. Shared costs are charged to tenants and recognised in the balance sheet together with payments on account of tenants. Shared costs are settled after the balance sheet date.

Revenue from contracts with customers

In determining the basis for revenue recognition from contracts with customers, the Group identifies the distinct performance obligations under the contracts, allocate the transaction price to each identified performance obligation and account for revenue as each performance obligation is met.

Revenue from development of commercial properties, including transactions that are structured as sale of shares, are recognised over time according to the stage of completion if the buyer does not have the right to cancel a contract, and the Group as a seller can require a buyer to pay the consideration agreed in the contract even if the buyer acts to terminate a contract. A project's stage of completion is measured by reference to the contract costs incurred

up to the end of the reporting period as percentage of total estimated costs. Contract assets related to non-invoiced revenue from such construction contracts are included in "Other receivables and other current assets".

Revenue from development of inventory properties for sale is recognised when the properties are handed over to the customer as the Group does not have an enforceable right to collect payment for the benefits performed to date.

Service income for extra services to tenants is recognised in the period the service is performed.

FINANCIAL INSTRUMENTS

A financial instrument is defined as being any contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity. Financial instruments are recognised on the transaction date, i.e. the date on which the Group commits to buying or selling the asset. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them.

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through OCI, and FVTPL. For a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are "solely payments of principal and interest (SPPI)" on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Further, the financial assets shall be held within a business model whose objective is to hold the financial assets in order to collect contractual cash flows. The majority of the Group's financial assets are classified as measured at amortised cost.

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. The Group's financial assets at amortised cost includes trade and other current receivables, cash and cash equivalents and other financial assets.

Financial assets at FVTPL include financial assets held for trading, financial assets designated upon initial recognition at FVTPL, and financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term.

Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVTPL. The Group's financial assets at FVTPL includes financial derivatives and shares held for trading.

The Group recognises an allowance for expected credit losses on all debt instruments not held at FVTPL. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

Financial liabilities are classified upon initial recognition as financial liabilities at FVTPL and financial liabilities at amortised cost. Financial liabilities at FVTPL comprise loans designated at fair value upon initial recognition and derivatives. Financial liabilities at amortised cost consist of liabilities that do not fall under the category at FVTPL.

Trade receivables, contract assets and other financial assets

Trade receivables, contract assets and other financial assets are classified as financial assets measured at amortised cost. Interest is ignored if it is insignificant. The Group applies the simplified approach in IFRS 9 to measure the loss allowance at lifetime expected credit losses. A provision for bad debt is determined by estimating expected credit losses with reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. There has been no change in the estimation techniques or significant assumptions made during the current reporting period. Any subsequent payments received against accounts for which a provision has previously been made are recognised in the income statement. Trade receivables, contract assets and other financial assets are classified as current assets, unless they are due more than twelve months after the balance sheet date. If so, they are classified as non-current assets.

Cash and cash equivalents

Cash and cash equivalents consist of bank deposits and other short-term, highly liquid investments with an original term to maturity of no more than three months.

Financial derivatives

The Group uses derivatives to manage its interest rate risk. Derivatives are initially recognised at fair value on the date on which the contract was signed, and subsequently at fair value. Gains or losses on remeasurement at fair value are recognised in the income statement. Regular payments are presented as interest and other finance expenses. Changes in the value of the derivatives are presented under "Changes in value of financial instruments".

The fair value of interest rate swaps is the estimated amount the Group would receive or pay to redeem the contracts on the balance sheet date. This amount will depend on interest rates and the contracts' remaining term to maturity. The derivatives are classified on the balance sheet as current or non-current, depending on whether they are expected to be redeemed under or over 12 months from the balance sheet date.

Trade payables and other non-interest bearing financial liabilities

Trade payables and other non-interest bearing liabilities are classified as financial liabilities at amortised cost, and are measured at fair value upon initial recognition, and subsequently at amortised cost using the effective interest rate method. Interest is ignored if it is insignificant.

Interest bearing liabilities

Interest bearing liabilities are classified as financial liabilities at amortised cost, and are measured at fair value upon initial recognition, and subsequently at amortised cost using the effective interest rate

method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included as net realised financials in the statement of profit or loss. The liabilities are measured at their nominal value when the effect of discounting is immaterial.

Interest bearing liabilities are classified as current liabilities where the debt is due for repayment less than 12 months from the balance sheet date.

LEASE CONTRACTS (THE GROUP AS A LESSEE)

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease contracts in which it is the lessee, except for leases with a lease term of 12 months or less, and leases of low value assets (such as vehicles and technical and office equipment), for which the Group applies the "short-term lease" and "lease of low-value assets" recognition exemptions. For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the lease term.

Only fixed payments are included in the initial measurement of the lease liability, and the lease term corresponds to the non-terminable period. The discount rate used to calculate the lease liability is determined, for each asset, based on the Group's incremental borrowing rate for leases with under 15 years until maturity. For leases with over 15 years until maturity, the discount rate is based on the properties' net yields, adjusted for features that affect Entra's incremental borrowing rate, such as tenant-specific factors and the length of the lease. The lease liability is presented as part of other liabilities in the balance sheet.

For lease contracts where the leased properties meet the definition of investment properties in IAS 40, Entra applies the fair value model to the associated right-of-use assets. The right-of-use assets are measured by discounting the assumed future cash flows under the lease contracts. The discount rate used to calculate the right-of-use asset may be different from the discount rate used to calculate the lease liability. The right-of-use assets are presented as part of investment properties in the balance sheet.

INTANGIBLE ASSETS

Goodwill

Goodwill is the difference between the cost and the fair value of the Group's share of net identifiable assets in the entity on the acquisition date. Goodwill arising from the acquisition of subsidiaries that constitute a business as defined in IFRS 3, is classified as an intangible asset. For the purposes of impairment testing, goodwill is allocated to the relevant cash-generating units. Goodwill is allocated to the cash-generating units or groups of cash-generating units that are expected to benefit from the acquisition from which the goodwill arose. Goodwill is tested for impairment annually and is recognised at cost less any impairment losses. Impairment of goodwill is not reversed. Gains and losses on the sale of an operation include the carrying amount of goodwill relating to the sold operation.

Goodwill arising from the purchase of shares in associates and jointly controlled entities is included under the investment in the associate or jointly controlled entity, and is tested for impairment as part of the carrying amount of the investment.

Impairment of intangible assets

Intangible assets with an uncertain useful life are not depreciated and are instead tested annually for impairment. Intangible assets that are depreciated are also tested for impairment if there is any indication to suggest that future cash flows cannot justify the carrying amount of the asset. Write-downs are recorded through the income statement as the difference between the carrying amount and the recoverable amount. The recoverable amount is the value in use or fair value, whichever is the higher, less selling costs. When testing for impairment, intangible assets are grouped at the lowest possible level at which it is possible to identify independent cash flows (cash-generating units). In conjunction with each financial report, the company assesses whether it is possible to reverse past write-downs of non-financial assets (except goodwill).

PENSIONS

The Group has both defined benefit and defined contribution pension schemes. A defined benefit pension scheme is a pension arrangement that defines the pension payment an employee will receive on retirement. The pension benefit payable is dependent on a number of factors, such as the employee's age, number of years of membership of the Norwegian Public Service Pension Fund and salary.

The recognised pension obligation relating to defined benefit plans is the present value of the defined benefit on the balance sheet date less the fair value of the plan assets. The gross pension obligation is calculated annually by an independent actuary using the projected credit unit method. The gross pension obligation is discounted using a discount rate based on bonds with preference rights, which mature around the same time as the related pension obligations.

Changes to benefits payable under the pension plan are recognised in the income statement as they arise. Actuarial gains/losses resulting from new information or changes to actuarial assumptions are recognised against equity via comprehensive income in the period they arise.

Contributions to defined contributions plans are recognised in the income statement in the period in which they accrue.

SHARE BASED PAYMENTS

The Group has a share-based incentive program for executives ("LTI"). The LTI scheme is reported in accordance with IFRS 2. LTI remuneration is share-based and has a vesting period of five years, whereof 1/3 matures after three years, another 1/3 after four years and the remaining 1/3 after five years. The fair value at the grant date is measured applying Black-Scholes (BS) based on the market price. The fair value of the shares allocated through the LTI is calculated on the basis of the share price at grant date, taking into account the likelihood of the employee still being employed after the lock-up period. The amount is recognised as payroll expenses at grant date and accrued for the period from grant date to the date when the shares are without any restrictions.

SHARE DISCOUNTS

Sales of shares to employees in the share saving scheme are reported in accordance with IFRS 2. The recognised discount is calculated as the difference between market price and purchase price at the time of purchase, taking into account the agreed lock-in period for the shares. The effect of the agreed lock-in period is calculated as the value of a put option using the BS model. The assumptions relating to volatility are based on the actual fluctuations in the price of Entra's shares. The share of the discount that represents the difference between the calculated BS value and the market value of the shares is recognised against equity and the remaining discount, that represents the difference between the paid amount for the shares by the employees and the BS value, is recognised as payroll expenses at the time of allocation.

TAX

The tax expense consists of tax payable and deferred tax. Tax is charged to the income statement, except where it relates to items that are recognised in OCI or directly in equity. In such cases, the tax is either recognised in OCI or directly in equity.

Deferred tax is calculated using the liability method for all temporary differences between the tax values and consolidated accounting values of assets and liabilities. Deferred tax liabilities are not calculated and recognised upon initial recognition of assets or liabilities obtained through an acquisition of a subsidiary not classified as a business combination. Deferred tax is defined using tax rates and laws which are enacted or likely to be enacted on the balance sheet date, and which are expected to be used when the deferred tax asset is realised or when the deferred tax is utilised.

Deferred tax is calculated and provided or reduced in the event of adjustments to the value of investment properties at a nominal tax rate of 22 per cent. A deferred tax asset is recognised to the extent that it is likely that future taxable profit will be available against which the temporary differences can be offset.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in jointly controlled entities, except where the Group is able to control the reversal of the temporary differences and it is probable that the temporary difference will not be reversed in the foreseeable future.

PROVISIONS

The Group recognises provisions for legal claims when a legal or self-imposed obligation exists as a result of past events, when it is likely that an outflow of resources will be required to settle the obligation and its amount can be estimated with a sufficient degree of reliability.

In cases where there are several obligations of the same nature, the likelihood of settlement is determined by assessing the Group as a whole. A provision for the Group is recognised even if there is little likelihood of settlement of the Group's individual elements.

Provisions are measured at the present value of expected payments to settle an obligation. A discount rate before tax is used which reflects the present market situation. Any increase in an

obligation as a result of a changed time value is reported as a financial expense.

A provision for onerous contracts is recognised when the expected benefits to be derived by Entra from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract and taking into consideration any reasonably obtainable subleases.

INVENTORY PROPERTIES

The Group's inventory properties comprise residential projects under zoning, development and construction. The residential projects under development and construction are intended for sale in the ordinary course of business. Properties under zoning for residential purposes may be handed over to other residential developers. Where the Group constructs the residential projects, the individual units are handed over to the purchaser when they are completed. Inventory properties may comprise properties held for resale, property under development and construction, and completed units which are not sold. Inventory properties are measured at the lower of cost and net realisable value.

OTHER OPERATING ASSETS (EQUIPMENT)

Other operating assets are recognised at acquisition cost, less depreciation. The acquisition cost includes costs directly related to the acquisition of the asset. Other operating assets are depreciated in a straight line over their anticipated remaining useful life.

The assets' remaining useful life and residual value are reassessed on each balance sheet date and changed if necessary. If the carrying amount of an asset is higher than its recoverable amount, the value of the asset is written down to the recoverable amount.

Gains and losses on disposals are recognised through profit or loss, and are calculated as the difference between the sales price and the carrying amount at the time of disposal.

CURRENCY

The Group's presentation currency is NOK. This is also the functional currency of the parent company and all its subsidiaries.

Foreign currency transactions are translated at the exchange rate on the date of the transaction. Monetary foreign currency items are translated to NOK at the exchange rate on the balance sheet date. Non-monetary items that are measured at cost in a foreign currency are translated to NOK using the exchange rate on the transaction date. Non-monetary items that are measured at fair value in a foreign currency are translated to NOK using the exchange rate on the balance sheet date. Exchange rate fluctuations are recognised in profit or loss as they arise.

SEGMENT INFORMATION

Operating segments are reported in the same way as in internal reports to the Group's highest decision-making authority. The Group's highest decision-making authority, which is responsible for allocating resources and assessing the profitability of the operating segments, has been identified as the Board of Directors and the CEO.

STATEMENT OF CASH FLOWS

The statement of cash flows is prepared using the indirect method. This means that the statement is based on the Group's profit before tax in order to present cash flows from operating, investing and financing activities respectively. Interest on leases and net interest and fees paid on loans are presented as operating cash flows. Dividends paid to shareholders and non-controlling interests are presented under financing activities.

DIVIDENDS

Entra pays semi-annual dividends. Dividend payments to the company's shareholders for the first half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Board of Directors. Dividend payments to the company's shareholders for the second half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Annual General Meeting.

NOTE 3 CRITICAL ACCOUNTING ESTIMATES AND SUBJECTIVE JUDGEMENTS

Fair value of investment properties

Investment properties are measured at their fair value based on external, independent valuations.

Each quarter, all the properties are valued by two independent, external appraisers. The valuations at 31 December 2021 were obtained from Akershus Eiendom/JLL and Newsec. The valuations are mainly based on the discounted cash flow method, which involves discounting future cash flows over a specified period using an estimated discount rate and then adding a residual value at the end of the period. Future cash flows are calculated on the basis of cash flows from signed leases, as well as future cash flows based on an expected market rent at the end of the lease terms. The fair value of investment properties is therefore mainly affected by expected market rents, discount rates and inflation. The market rent for each property takes into account the property's location, situation, standard and leases signed for comparable properties in the area. For the duration of existing lease terms, the discount rate is mainly based on an assessment of the individual tenants' financial solidity and classification. After the end of the lease term, cash flows are discounted using a discount rate that takes into account the risk relating to letting and location. Inflation is estimated using the consensus of a selection of banks and official statistics.

When carrying out their valuations, the appraisers receive comprehensive details of the leases for the properties, floor space and details of any vacant premises, and up-to-date information about all ongoing projects. Any uncertainties relating to the properties/projects and leases are also clarified verbally and in writing as and when required. The Group management performs internal controls to ensure that all relevant information is included in the valuations.

The appraisers perform their valuations on the basis of the information they have received, and estimate future market rents,

yields, inflation and other relevant parameters. Each individual property is assessed in terms of its market position, rental income (contractual rents versus market rents) and ownership costs, with estimates being made for anticipated vacancy levels and the need for alterations and upgrades. The remaining term of the leases is also assessed for risk, along with any special clauses in the contracts. Each property is also compared with recently sold properties in the same segment (location, type of property, mix of tenants, etc).

Market transactions serve as important reference points for the appraisers and the number of transactions thus influence the level of uncertainty in the valuations. Total transaction volume in the Norwegian commercial real estate market in 2021 came in above NOK 160 billion. The transaction activity has been high in the whole country during 2021, and a number of transactions of relevance for Entra's portfolio were completed, providing the appraisers with relevant reference transactions for the valuation of Entra's portfolio at year-end.

Properties representing approximately 69 per cent of the market value of Entra's properties are, or are in the process of being, BREEAM certified. There is high demand for environment-friendly office properties in both the letting and transaction market. The appraisers monitor the transaction market closely, and current transaction market trends indicate that the potential short-term adverse effect on the market values of Entra's property portfolio due to climate-related risks, including physical and transition risks, is limited.

The table below shows to what extent the value of the management property portfolio is affected by market rents and exit yields (market yields), assuming that all other factors are equal. However, there are interrelationships between these variables, and it is expected that a change in one variable may influence one or more of the other variables.

Value change (NOK million) ¹⁾	% Δ Yield				
	-0.50%	-0.25%	0.00%	0.25%	0.50%
% Δ Market rent	-10.0%	3 802	-3 826	-6 021	-9 991

¹⁾ Estimates by Newsec in conjunction with valuations at 31 December 2021.

Consolidation of entities in which the Group holds less than a majority of shares

Entra considers that it controls Entra OPF Utvikling AS and Hinna Park Eiendom AS with a 50 per cent holding in the companies. In this assessment, Entra has considered all relevant facts and circumstances in assessing whether the voting rights are sufficient to give Entra power over the two companies. A key consideration is whether Entra has the practical ability to unilaterally direct the relevant activities that affect the amount of Entra's return. The relevant activities, including property management, ongoing maintenance and minor redevelopment projects, are directed by the Board of Directors in the two companies. The shareholder agreements include certain provisions that restricts Entra from

making significant changes to the business of the two companies. These provisions are not considered to give the co-investors power over the companies, and are only considered to be protective rights. As Entra shall appoint the Chairman of the two companies and the Chairman has a double vote in the Board of Directors of the companies, Entra has concluded it controls these companies.

Fair value of financial derivatives

The Group uses interest rate derivatives and fixed rate loans to manage the interest rate risk. The financial derivatives are valued at fair value in the Group's balance sheet. See note 8 for further information on the valuation of the Group's financial derivatives.

NOTE 4 FINANCIAL RISK MANAGEMENT

All amounts in NOK million

Governance structure, exposure and reporting

The Board of Entra ASA has defined limits for the financial exposure of the Group through the financial policy. The financial policy regulates the following:

- Allocation of responsibility for financial management
- Overall limits and principles for management of financial exposure
- Principles for borrowing
- Definitions of financial risk parameters and key controls that must be in place to ensure adequate risk management
- Requirements for reporting and monitoring. The Group's overall financial risk exposure is reported regularly to the Board.

There is a responsibility and authority matrix for the Finance department, which defines authority for the day-to-day management of financial transactions within the overall framework of financial management.

The Group must ensure that there is adequate operational risk management and internal control through clear areas of responsibility and allocation of duties. The procedures relate in particular to the management of financial exposure and the division of responsibility between the various roles in the Finance department and the department's financial systems. There are guidelines for managing financial exposure, which include checklists related to the control of current transactions.

The finance department is continuously assessing the Group's financial risks and opportunities. Projections and simulations are made in the corporate financial model based on detailed assumptions on macroeconomic development, financial parameters and the property market. The simulations are intended to provide information for the Board and management in their monitoring of key financial figures for the Group.

The Group's finance strategy shall ensure that the Group has financial flexibility and that it achieves competitive financial terms. The Group is exposed to financial risk and has defined the following relevant risk areas:

- Financing risk
- Capital management and solvency
- Interest rate risk
- Credit/counterparty risk
- Currency risk

Financing risk

Financing risk is the risk that the Group will be unable to meet its financial obligations when they are due and that financing will not be available at a reasonable price.

The Group seeks to limit financing risk through:

- minimum level of committed capital to cover refinancing requirements
- average time to maturity requirements for the group's financing
- the use of various credit markets and counterparties
- diversified maturity structure for the Group's financing

Capital management and solvency

The main purpose of the Group's capital management is to maintain a good balance between debt and equity, in order to maximise the value of the shares in the Group, while also maintaining a good credit rating and obtaining loan terms with lenders that reflect the risk profile of the Group. The Group has defined a target for the Loan-To-Value ratio which shall not exceed 50 per cent over time. There are covenants in the Group's loan agreements that specify requirements in relation to the company's financial strength.

Interest rate risk

Interest rate risk arises from the interest-bearing debt being affected by changes in market rates. Interest rate risk affects the Group's cash flows and the market value of the Group's liabilities. The main purpose of the Group's interest rate strategy is to ensure that the Group achieves the desired balance between the interest expense and interest rate risk. The Group's interest rate risk is managed within the following financial policy requirements:

- minimum 40 per cent of the interest-bearing debt to be hedged at fixed interest rate.
- average remaining time to maturity for interest rate hedges in the interval 2-6 years.
- diversification of the maturity structure for fixed interest rates.

Credit and counterparty risk

Stable, predictable and long-term access to capital is critical for Entra. Entra considers that the ability of creditors to behave predictably over the long term is often dependent on their creditworthiness. For this reason, Entra wants the Group's creditors to be of a good credit quality and has established credit rating limits for the Group's creditors. The credit ratings of the Group's financial counterparties are continuously monitored. The fair value of all financial derivative assets was 254 million (347 million).

Trade receivables at 31 December 2021 was 77 million (64 million), contract assets was 2 million (11 million), external loans was 3 million (69 million) and other long-term receivables was 85 million (89 million). The concentration of credit risk with respect to trade debtors is assessed to be low, as the majority of Entra's customers are paying their rent in advance. The creditworthiness of counterparties in construction contracts that give rise to contract assets and contracts with debtors that give rise to other receivables are thoroughly evaluated before entering into the contracts.

Cash and bank deposits at 31 December 2021 amounted to 309 million (217 million). The deposits were placed with financial institutions with A-/A3 or better credit ratings.

Currency risk

The Group shall not incur any currency risk. The Group did not have any currency exposure at 31 December 2021.

Financial covenants

There are covenants in the Group's bank loan agreements relating to interest cover ratio (ICR) and the loan-to-value of property (LTV). At 31 December 2021, the Group was not in breach of any covenants.

There are no covenants in relation to the Group's bond or commercial paper loans.

Lease liabilities	6	15	21	42	38	21	20	360	523
Trade payables	281	-	-	-	-	-	-	-	281
Other financial liabilities	45	-	-	-	-	-	-	-	45
Total	850	2 029	3 005	8 528	3 571	4 627	1 166	361	24 137

The table is based on undiscounted contractual cash flows. The maturity analysis is based on the earliest possible redemption for instruments where the counterparty has a choice as to when to redeem the instrument. Estimated interest is based on the interest rate on the individual loan/ instrument on the balance sheet date. In order to manage its liquidity risk, the Group has available, unused credit facilities with Norwegian and international banks, as well as available liquid assets.

UNUSED CREDIT FACILITIES

31.12.2021	TERM TO MATURITY								Total
	Under 3 months	4-12 months	1-2 years	2-4 years	4-6 years	6-8 years	8-10 years	Over 10 years	
Unused credit facilities	-	-	-	4 580	4 250	-	-	-	8 830
Total unused credit facilities	-	-	-	4 580	4 250	-	-	-	8 830

UNUSED CREDIT FACILITIES

31.12.2020	TERM TO MATURITY								Total
	Under 3 months	4-12 months	1-2 years	2-4 years	4-6 years	6-8 years	8-10 years	Over 10 years	
Unused credit facilities	-	-	-	3 160	4 130	-	-	-	7 290
Total unused credit facilities	-	-	-	3 160	4 130	-	-	-	7 290

At 31 December 2021, the Group had 277 (181) million of available liquid assets. See Note 22.

Interest rate risk

The Group's liabilities are subject to fixed interest rates (47 per cent of liabilities at 31 December 2021 compared to 50 per cent at 31 December 2020). The Group uses a variety of derivatives to adapt its portfolio to the chosen fixed rate structure. The choice of fixed interest profile is based on an evaluation of the Group's financial strength and ability to generate long-term, stable cash flow.

At 31 December 2021, the weighted average remaining term to maturity was 3.1 years (2.4 years). The average interest rate was 2.25 per cent (2.38 per cent) at 31 December 2021.

The table below shows the nominal value of outstanding current and non-current interest-bearing debt including derivatives.

MATURITY STRUCTURE OF THE GROUP'S EXPOSURE TO NOMINAL INTEREST RATE RISK

As at 31.12.2021	31.12.2022	31.12.2023	31.12.2025	31.12.2027	31.12.2029	31.12.2031	31.12.2031+	Total
Term to maturity	Up to 1 year	1-2 years	2-4 years	4-6 years	6-8 years	8-10 years	Over 10 years	
Percentage	13.9	9.7	15.7	24.3	20.1	16.4	-	100

KEY FIGURES FOR THE GROUP'S FINANCIAL INSTRUMENTS

	2021	2020
Nominal value of interest rate derivatives on the balance sheet date ¹⁾	15 160	12 210
of which		
- Fixed-to-variable swaps ¹⁾	4 300	3 300
- Variable-to-Fixed swaps	10 860	8 910
Range of fixed interest rates	From 1.1050% to 5.640%	From 1.1050% to 5.6450%
Variable rate basis	NIBOR	NIBOR
Average fixed rate excl. forward starting swaps	1.99%	2.37%
Average fixed rate incl. forward starting swaps	1.64%	2.37%

¹⁾ 4,300 million (3,300 million) of swaps linked to the fixed-interest bonds issued by the Group are included in the volume of interest rate swaps. These bonds are swapped to a variable rate in order to ensure that the Group is in a position to manage its interest rate fixing independently of the bonds. The real volume used for interest rate fixing is therefore 10,860 million (8,910 million). At 31 December 2021, the Group has no interest rate options or option-related products.

NOTE 5 RISK LEASE MANAGEMENT

All amounts in NOK million

The Group mainly enters into lease contracts with fixed rent for the lease of property. Lease payments for the majority of the contracts include CPI increases.

THE GROUP'S FUTURE ACCUMULATED RENT FROM NON-TERMINABLE OPERATIONAL LEASE CONTRACTS AT 31.12.

	2021	2020
≤ 1 year	2 792	2 450
1 year < 2 years	2 612	2 286
2 year < 3 years	2 384	2 157
3 year < 4 years	2 186	1 918
4 year < 5 years	1 904	1 702
≥ 5 years	8 773	7 887
Total¹⁾	20 651	18 401

THE GROUP'S LEASE CONTRACTS AT 31.12 HAVE THE FOLLOWING MATURITY STRUCTURE MEASURED IN ANNUAL RENT ¹⁾

Remaining term	2021			2020		
	No. of contracts	Contract rent	Contract rent, %	No. of contracts	Contract rent	Contract rent, %
≤ 1 year	197	187	6	232	173	7
1 year < 5 years	238	955	33	245	883	34
5 years < 10 years	120	1 078	37	105	896	35
≥ 10 years	48	689	24	46	626	24
Total	603	2 910	100	628	2 578	100

The table above shows the remaining non-terminable contractual rent for current leases without taking into account the impact of any options.

¹⁾ The rent is stated as the annualised contractual rent, and is therefore not reconcilable with the rental income for the year for accounting purposes.

OTHER PARAMETERS RELATING TO THE GROUP'S LEASE PORTFOLIO

	2021				2020			
	Area (sqm.)	Occupancy (%)	Wault (yrs)	Share of public sector tenants (%)	Area (sqm.)	Occupancy (%)	Wault (yrs)	Share of public sector tenants (%)
Oslo	635 820	97.8	7.2	55	550 010	98.0	6.9	58
Trondheim	152 188	98.7	6.3	77	158 940	97.1	7.1	77
Bergen	115 695	98.0	5.0	51	105 045	97.1	5.4	55
Sandvika	98 989	99.6	6.8	54	98 988	99.4	7.5	57
Stavanger	121 404	94.1	6.0	49	78 607	99.0	6.3	51
Drammen	69 421	99.1	8.5	86	62 107	97.6	9.5	84
Total management portfolio	1 193 517	97.8	6.8	58	1 053 697	97.9	6.9	61
Project portfolio	154 090		9.6	36	162 785		9.7	23
Regulated development sites	109 847		0.4	-	128 195		5.3	-
Total property portfolio	1 457 453		7.1	56	1 344 677		7.1	58

On account of the high occupancy rate, the high proportion of public sector tenants and the relatively long average remaining contract term, the risk to the Group's cash flow is considered low. There is no significant effect of the Covid-19 pandemic on rental income from 2021.

NOTE 6 SEGMENT INFORMATION

All amounts in NOK million

The Group has one main operational unit, led by the COO. The property portfolio is divided into six different geographic areas in Oslo, Sandvika, Drammen, Stavanger, Bergen and Trondheim, with management teams monitoring and following upon each area. The geographic units are supported by a Market and Property Development division and a Project Development division. In addition, Entra has group and support functions within accounting, finance, legal, investment, ICT/digitalisation, procurement, communication and HR.

The geographic areas do not have their own profit responsibility. The geographical areas are instead followed up on economical and non-economical key figures ("key performance indicators"). These key figures are analysed and reported by geographic area to the chief operating decision maker, that is the board and CEO, for the purpose of resource allocation and assessment of segment performance. Hence, the Group report the segment information based upon these six geographic areas.

	No. of properties	Area	Occupancy	Wault	Market value		12 month rolling rent		Net yield	Market rent	
31.12.2021	(#)	(sqm.)	(%)	(yrs)	(NOKm)	(NOK/sqm.)	(NOKm)	(NOK/sqm.)	(%)	(NOKm)	(NOK/ sqm.)
Oslo	38	635 820	97.8	7.2	39 729	62 485	1 683	2 647	3.96	1 732	2 724
Trondheim	10	152 188	98.7	6.3	5 589	36 722	297	1 953	5.01	278	1 826
Bergen	8	115 695	98.0	5.0	5 560	48 056	251	2 168	4.16	292	2 523
Sandvika	9	98 989	99.6	6.8	3 267	33 006	177	1 783	5.14	159	1 608
Stavanger	7	121 404	94.1	6.0	3 249	26 762	175	1 441	4.89	189	1 559
Drammen	8	69 421	99.1	8.5	2 707	38 991	141	2 034	4.94	133	1 923
Total management portfolio	80	1 193 517	97.8	6.8	60 101	50 356	2 724	2 282	4.24	2 784	2 332
Project portfolio	11	154 090		9.6	6 463	41 943

Total property portfolio	96	1 457 453		7.1	67 547	46 346					

The calculation of net yield is based on the appraisers' assumption of ownership costs, which at 31.12.21 corresponds to 6.5 per cent of market rent.

The Groups 20 largest tenants accounts for approximately 46 per cent of the Group's total rental income. The Group does not have any tenants contributing to more than 10 per cent of the Group's rental income.

NOTE 8 INFORMATION ABOUT FAIR VALUE

All amounts in NOK million

Investment properties are valued at fair value based on independent external valuations.

Financial derivatives are measured at fair value using valuation methods where the significant parameters are obtained from quoted market data.

The Group uses the following hierarchy to classify assets and liabilities, based on the valuation methods used to measure and disclose their fair value.

Level 1: Quoted (unadjusted) prices in active markets for identical assets and liabilities.

Level 2: Other techniques where all of the parameters that have a significant impact on measuring fair value are either directly or indirectly observable.

Level 3: Valuation techniques that use parameters that significantly affect the valuation, but which are not observable.

ASSETS MEASURED AT FAIR VALUE

	31.12.2021	Level 1	Level 2	Level 3
Assets at fair value through profit or loss				
· Investment properties	67 568			67 568
· Derivatives	254		254

Number of employees at 31.12.	177	186

¹⁾ Salaries, performance-related pay and other taxable benefits includes a 19 million (15 million) provision for performance-related pay for all employees in 2021, which has not yet been paid out.

REMUNERATION OF SENIOR EXECUTIVES

The total remuneration of the CEO and other Senior Executives consists of a fixed package of salary and benefits supplemented by cash-based (STI - short-term incentive) and share-based (LTI - long-term incentive) variable remuneration plans, share purchase scheme (on the same terms as all other employees), pension and insurance arrangements. For further details on Entra's compensation policy and practice, refer to pages 73-76 in the corporate governance section of this annual report.

OVERVIEW OF TOTAL REMUNERATION OF SENIOR EXECUTIVES IN 2021

All amounts in NOK thousand	Salary	Cash-based variable remuneration ¹⁾	Share-based variable remuneration ¹⁾	Benefits in kind	Pension costs	Total remuneration 2021
Sonja Horn, CEO	3 841	2 519	1 042	135	127	7 663
Anders Olstad, CFO and Deputy CEO	3 238	2 162	885	135	127	6 547
Kjetil Hoff, COO	2 262	514	337	135	127	3 375

The goodwill relates to the acquisition of 50 per cent of Hinna Park Eiendom. The Group performs an annual impairment test of the goodwill at year-end. No impairment indicators were identified at 31 December 2021. In January 2022, Entra sold its 50 per cent share in Hinna Park Eiendom. Refer to note 36 for further information.

NOTE 16 INVESTMENT PROPERTIES

All amounts in NOK million

VALUE OF INVESTMENT PROPERTIES

	2021	2020
Closing balance at 31.12 previous period	56 867	49 095
Purchase of investment properties	3 500	193
Investment in the property portfolio	2 224	1 580
Capitalised borrowing costs	42	35
Sale of investment properties	-35	-15
Change in value from investment properties	5 057	5 980
Closing balance at 31.12	67 655	56 867
Of which investment properties held for sale	87	33
Investment properties	67 568	56 834

Investment properties are valued at fair value based on independent external valuations. The valuation method is included at level 3 in the valuation hierarchy. Reference is made to note 8.

For information about valuations and fair value calculations for investment properties, see Note 3 "Critical accounting estimates and subjective judgements".

Pursuant to the lease agreement entered into between Entra and Bærum municipality on 23 June 2005, which expires on 27 January 2027, the tenant has an option to acquire Borkenveien 1-3 in Sandvika (Vøyenenga School). In 2021, the Entra received

notification that the tenant intended to exercise the option in 2022 at the purchase option price of 86.9 million, and the property is classified as held for sale at 31 December 2021. The transaction is expected to close in 2022.

Certain other of the Group's properties are subject to purchase options, as described below.

Pursuant to the lease agreements entered into between Entra and the Norwegian Ministry of Culture on 22 April 2005, 15 October 2003 and 30 June 2005, respectively, the tenant has an option to acquire the three buildings comprising the National Library in

Henrik Ibsens gate 110/Observatoriegaten 1 in Oslo (the refurbished buildings "Magasinet" and "Halvbroren"). The tenant has the right to acquire the refurbished buildings at expiry of each 25 year lease period (expiring on 6 June 2030 and 31 December 2029, respectively). The leases include an unlimited number of 25-year extension periods, at market rents. Further, the tenant has the right, upon six months' notice, to acquire "Halvbroren" if the tenant itself leases and uses more than 50 per cent of the building. As of 31 December 2021, the tenant leased and used more of the building than the threshold. The purchase price for all three buildings shall equal the market value of the buildings based on the capitalised future rental income based on the assumption that the lease agreements are continuously prolonged in accordance with the renewal clause in the lease agreements.

Pursuant to the ground lease agreement entered into between Entra and Oslo Havn KF on 4 October 1979 relating to the Langkaia 1 in Oslo, the ground lessor has an option to acquire the buildings without any compensation and free of any encumbrances upon expiry of the ground lease agreement on 1 January 2031. As the property is valued based on the cash flow until expiry of the ground lease agreement (i.e. no residual value), there will be an ongoing decrease in the balance sheet value until 2030.

Pursuant to the lease agreement entered into between Entra and University of Oslo ("UiO") on 16 June 2016, the tenant has an option to acquire the property Kristian Augusts gate 15-21 (building and land) in Oslo in 2034 and in 2044. The purchase price shall be based on a gross market yield at time of calling the option and valued at a remaining vault of fifteen years of the lease agreement. The gross yield has a cap at 5.25 percent (gross yield < 5.25 per cent). The option to acquire must be called twelve months ahead of the two points in time at the latest. If the option to acquire is called at the first possible point in time (after 15 years), the remaining rent compensation paid by UiO to Entra regarding St. Olavs Plass 5 (previous lease agreement), must be paid in full together with the purchase price for the property.

Pursuant to the lease agreement and option agreement entered into between Entra and BI Norwegian Business School ("BI") on 15 February 2016, the tenant has an option to acquire the company which owns the building Brattørkaia 16 in Trondheim in the years 2023, 2028, 2033 and 2038. The purchase price shall be based on a pre-agreed net yield. The net rent at the time of exercising the option, includes value added tax (vat) compensation. The option to acquire must be called twelve months ahead of the four points in time at the latest.

NOTE 17 ASSOCIATES AND JOINTLY CONTROLLED ENTITIES

All amounts in NOK million

Investments in associates and jointly controlled entities are recognised using the equity method.

SUMMARY OF SIGNIFICANT ITEMS IN THE CONSOLIDATED FINANCIAL STATEMENTS OF JOINTLY CONTROLLED ENTITIES (100 PER CENT)

Oslo S Utvikling AS is a property development company that is undertaking primarily residential development in Bjørvika, Oslo's CBD East. In July 2021, Entra increased its share in OSU from 33.3 per cent to 50 per cent.

Rebel U2 AS provides facility management services at Universitetsgata 2 in Oslo – with full-service solutions, flexible and short-term leases, co-working, conferences and events. Rebel U2 AS opened its concept in 2021, which has seen lower than anticipated activity due to Covid-19 restrictions.

The purchase option was for the property Lagårdsveien 6 in Stavanger. The option expired in 2022, but was called early in January 2021.

NOTE 19 INVENTORY PROPERTIES

Entra owns a development site at Bryn in Oslo. As part of the acquisition of the site, JM Norge AS agreed to acquire land expected to be zoned for residential development subject to detailed plan. The properties expected to be zoned for residential development are Østensjøveien 29 and Brynsveien 1, 2-4, 3, 6, 8 and 12. See notes 10 and 11 for information on rental income from letting of the properties and the related property costs.

NOTE 20 TRADE RECEIVABLES

All amounts in NOK million

TRADE RECEIVABLES

	2021	2020
Trade receivables	85	76
Provision for bad debts	-8	-12
Net trade receivables	77	64

Except the trade receivables from the joint venture Rebel U2 AS (see note 31 for further information), there is no concentration of credit risk with respect to trade debtors as the majority of Entra's customers are paying rent in advance.

The age analysis of these trade receivables is as follows:

	2021	2020
Up to 3 months	41	21
Over 3 months	21	14
Total overdue	62	34

NOTE 21 OTHER RECEIVABLES AND OTHER CURRENT ASSETS

All amounts in NOK million

OTHER RECEIVABLES

	2021	2020
Accrued interest	62	38
Accrued income, not invoiced	35	24
Advance payments and accruals	23	36
Other current receivables and assets	174	182
Total other receivables and other current assets	295	279

NOTE 22 CASH AND BANK DEPOSITS

All amounts in NOK million

	2021	2020
Bank deposits	277	181
Restricted bank deposits	31	35
Total bank deposits	309	217

Restricted bank deposits relate to the withholding tax account and guarantees for loans.

NOTE 23 SHARE CAPITAL AND SHAREHOLDER INFORMATION

Entra's share capital is 182,132,055 divided into 182,132,055 shares, with each share having a par value of 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra. At 31 December 2021, Entra owns 2,087 (2,808) of its own shares and has a total of 182,129,968 (182,129,247) shares outstanding.

As at 31 December 2021, Entra had 4,524 shareholders (5,660 shareholders). Norwegian investors held 10 per cent (29 per cent) of the share capital and foreign investors 90 per cent (71 per cent).

	Number of shares	Par value (NOK)	Share capital (NOK million)
31 December 2020	182 132 055	1	182
31 December 2021	182 132 055	1	182

Paid-in capital amounts to 3,706 million (3,706 million) and consists of 182 million (182 million) in share capital, of which nil (nil million) is related to treasury shares, and 3,524 million (3,524 million) in other paid-in capital.

Entra ASA has a share purchase scheme, offering all employees, including senior executives, the opportunity to purchase shares in Entra ASA at a 20 per cent discount. The shares are subject to two-year lock-in period. The purchase price in the employee offering was calculated as the volume weighted average share price the last 30 days (VWAP) until and including 23 April 2021 less a 20 per cent discount. A total of 72,473 (102,699) shares were acquired and sold to the employees in connection with the share purchase scheme in May 2021. In addition, a total of 25,248 (12,503) shares were awarded to senior executives in March 2021.

For other changes in shareholders' equity, see the consolidated statements of changes in equity.

The 20 largest shareholders as registered in the VPS as of 31 December 2021 were as follows:

MORTGAGES

In general the Group's financing is based on the parent company borrowing from external parties using negative pledge clauses. Wholly-owned subsidiaries are generally financed using intra-group loans.

For projects/properties with special characteristics, separate mortgage-based financing can be arranged. At 31 December 2021, there are one bond loan that is secured with pledge on assets. The bond of 1,100 million (1,100 million) is secured against the National Library and associated buildings, located at Henrik Ibsens gate 110 in Oslo. The lender also has a mortgage on the rental income from the property.

For subsidiaries that are not wholly-owned by Entra ASA, separate financing is generally arranged without any guarantee from the shareholders. This kind of financing is generally secured through a mortgage.

	2021	2020
Carrying amount of liabilities secured through mortgages	2 797	2 529
Carrying amount of mortgaged assets		
Investment properties	6 668	5 794

NOTE 25 TAX

All amounts in NOK million

INCOME TAX EXPENSE

	2021	2020
Tax payable	19	26
Change in deferred tax on profit and loss	1 433	1 552
Change in deferred tax on comprehensive income	-6	-5
Income tax expense	1 445	1 572

INCOME TAX PAYABLE IS CALCULATED AS FOLLOWS

	2021	2020
Profit before tax	6 825	7 274
Share of profit/loss at associates and jointly controlled entities	-19	-120
Other permanent differences	27	18
Net effect of acquired losses carried forward in asset acquisitions	-274	-
Changes in temporary differences	-6 436	-6 965
Changes in loss carry-forwards	-49	-90
Profit for tax purposes	73	117
Tax payable on the balance sheet	16	26
Tax payable on the balance sheet	16	26

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits of the consolidated entities as follows:

	2021	%	2020	%
Profit for accounting purposes multiplied by nominal tax rate	1 501	22.0	1 600	22.0
Tax on share of profit/loss at associates and jointly controlled entities	-4	-0.1	-26	-0.4
Tax on permanent differences	6	0.1	4	0.1
Tax effect of re-measurement of recoverability of acquired tax losses	-54	-0.8	-	-
Profit/loss on disposal of deferred tax	3	0.4	-	-
Tax expense for accounting purposes	1 452	21.7	1 578	21.7

DEFERRED INCOME TAX

The Group has offset deferred tax assets and deferred tax liabilities on the balance sheet as the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority. The following net value was recognised:

	2021	2020
Deferred tax liability	8 604	7 191
Deferred tax assets	298	278
Net deferred tax	8 307	6 914

CHANGE IN DEFERRED TAX (+)/DEFERRED TAX ASSETS (-)

	Non-current assets	Financial instruments	Current assets	Gains/losses account	Provisions	Losses carried forward	Total
01.01.2020	5 540	-11	66	20	-70	-178	5 367
Recognised in profit and loss	1 584	-57	-17	-2	24	20	1 552
Recognised in comprehensive income	-	-	-	-	-5	-	-5
31.12.2020	7 124	-68	49	19	-52	-158	6 914
Recognised in profit and loss	1 409	50	8	-3	3	11	1 476
Recognised in comprehensive income	-	-	-	-	-6	-	-6
Losses carried forward acquired in asset acquisitions	-	-	-	-	-	-77	-77
31.12.2021	8 532	-17	56	15	-55	-224	8 307

NOTE 26 PENSIONS

All amounts in NOK million

The Group's pension scheme for new employees is a defined contribution scheme. The defined contribution scheme includes 168 (169) employees in the Group. The defined benefit pension scheme for the Group cover a total of 13 (15) current employees and 74 (70) pensioners.

The Group also has a contractual early-retirement scheme (AFP) from the age 62. At 31 December 2021, 5 (6) former employees had chosen to make use of the AFP scheme. The net pension liabilities associated with the AFP scheme amounted to 8 million (18 million), which is included under total pension liabilities in the table below.

The Group's pension scheme satisfies the requirements of the Norwegian Act on Compulsory Occupational Pensions.

The cost for the accounting period shows the employees' pension entitlement of the agreed future pension in the financial year.

THE BALANCE SHEET LIABILITIES HAVE BEEN CALCULATED AS FOLLOWS

	2021	2020
Present value of accrued pension liabilities in defined-benefit schemes in unit trusts	229	206
Fair value of pension scheme assets	-130	-130
Employers' NICs accrued	14	10
Net pension liabilities on the balance sheet at 31.12	112	86

TOTAL COST RECOGNISED IN THE INCOME STATEMENT

	2021	2020
Cost of pension benefits accrued during current period	1	2
Contribution scheme	20	13
Total pension benefits accrued during the period	22	15
Net interest expense	1	1
Total pension benefits accrued in income statement	23	16
Actuarial losses (-)/gains (+) accrued in comprehensive income	29	25
Total pension benefits accrued in total comprehensive income	52	41

The actuarial assumptions are based on generally accepted assumptions in the insurance industry with regard to demographic factors. The pension scheme assets are invested in government bonds.

NOTE 27 LEASES

THE GROUP AS A LESSEE

The Group has entered into certain operating leases of ground, parking lots and buildings classified as investment properties, with remaining lease terms between 7 and 59 years. The Group applies the fair value model to right-of-use assets associated with the property lease contracts. Leased assets included in investment properties at 31 December 2021 was 923 million (934 million).

The majority of the lease payments for Langkaia 1 in Oslo, where the lease agreement expires on 1 January 2031, are based on the turnover of the property. Only the fixed parts of the lease payments are included in the lease liability. Variable, turnover based lease payments for the property is included in Operating costs.

See note 24 for details on the movements in lease liabilities during the period.

Set out below are the amounts recognised in profit or loss:

	2021	2020
Interest expense on lease liabilities	11	11
Expense relating to leases of low-value assets and short-term leases	1	1
Variable lease payments	16	9
Total amount recognised in profit or loss	28	22

The Group had total cash outflows for leases of 37 million in 2021 (31 million).

Refer to note 4 for maturity profile of the Group's lease liabilities based on contractual undiscounted payments as at 31 December 2021.

THE GROUP AS A LESSOR

The Group has entered into operating leases on its investment property portfolio. Refer to note 5 for the Group's future accumulated rent from non-terminable operational lease contracts, maturity structure and further details relating to the Group's lease portfolio.

NOTE 28 OTHER NON-CURRENT LIABILITIES

All amounts in NOK million

	2021	2020
Lease liabilities (note 27)	210	220
Pension liabilities (note 26)	112	86
Prepayments from customers	85	107
Subordinated loans	65	18
Seller's credit and withheld purchase price	90	84
Other non-current liabilities	88	40
Total non-current liabilities	650	554

NOTE 29 OTHER CURRENT LIABILITIES

All amounts in NOK million

	2021	2020
Accrued interest	154	124
Tenant prepayments	115	129
Lease liabilities (note 27)	10	10
Holiday pay owed	20	19
Public taxes and duties	17	17
Income tax payable	16	26
Provisions for current liabilities	22	17
Other liabilities	13	9
Total other current liabilities	367	351

NOTE 30 SUBSIDIARIES

See note 3 for considerations regarding consolidation of entities in which the Group holds less than a majority of shares.

NOTE 31 RELATED PARTIES

All amounts in NOK million

The Group's transactions and balances with associates and jointly controlled entities in 2021 mainly related to rental income, administrative fees, loans, interest payments on loans and dividends. The aggregate figures show an increase in 2021 due to the opening of Rebel U2 AS' concept in Universitetsgata 2.

	2021	2020
Income statement		
Rental income	37	1
Other revenues	2	4
Dividends	152	3
Balance sheet		
Receivables	42	4
Loans	13	1

NOTE 32 AUDITOR'S FEE

All amounts in NOK thousand

	2021	2020
Statutory audit	2 773	3 230
Tax advice	-	177
Other services not related to auditing	-	101
Other assurance services	304	374
Total auditor's fee (excl. VAT)	3 078	3 882

NOTE 33 EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the net profit attributable to shareholders by the weighted average number of ordinary shares outstanding during the year.

Entra has not issued options or other financial instruments which have a dilutive effect on outstanding shares.

	2021	2020
Total comprehensive income for the year attributable to equity holders of the Company (NOKm)	5 042	5 440
Average number of outstanding shares	182 127 420	182 120 760
Basic earnings per share (NOK)	28	30

NOTE 34 DIVIDEND PER SHARE AND DIVIDEND POLICY

Entra targets a dividend pay-out ratio of approximately 60 per cent of Cash Earnings. Refer to the alternative performance measures section of the annual report for calculation of Cash Earnings.

Entra's dividend policy is based on semi-annual dividend payments. In line with the dividend policy, the board of Entra will propose to distribute a semi-annual dividend of 2.60 (2.50) per share for the second half of 2021. In October 2021, Entra paid out 2.50 per share (2.40 per share) for the first six months of 2021. For the financial year 2021 Entra will thus have paid out 5.10 per share (4.90 per share).

Dividend payments to the company's shareholders for the second half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Annual General Meeting.

NOTE 35 LEGAL DISPUTES

Entra was in 2016 in zoning processes regarding two of the Groups properties in Oslo. Oslo municipality claimed Entra for a contribution for unrelated projects, of which 16 million was paid in 2017. Entra was of the opinion that the claim was unlawful and applied for a ruling by Oslo District Court, which ruled in favour of Entra in June 2019. Oslo municipality appealed the ruling, and Borgarting Court of Appeal ruled in favour of Oslo municipality in January 2021. Entra appealed the ruling to the Supreme Court.

In May 2021, the Supreme Court's Appeal Committee denied the appeal for judicial review by Supreme Court, and the ruling from Borgarting Court of Appeal is consequently final. Entra's claim was regarded as a contingent asset, and the denial from the Supreme Court's Appeal Committee has no impact on Entra's balance sheet.

NOTE 36 SUBSEQUENT EVENTS

On 12 January 2022, Entra closed the acquisition of the Oslo Areal portfolio, with 17 properties in the Greater Oslo Region with property value of 13,550 million. The transaction will be recognised as an asset acquisition.

In January 2022, Entra divested its 50 per cent share in Hinna Park Eiendom to the newly established SVG Property AS ("SVG Property"). As settlement, Entra received 15 per cent of the shares in SVG Property, 64 million through a seller credit and a cash consideration of 99 million. Hinna Park Eiendom will be deconsolidated from Entra's financial statements from closing of the transaction, and the investment in SVG Property will be recognized as a financial asset at fair value through profit and loss.

NOTE 1 GENERAL INFORMATION

Entra ASA ("the Company") is listed on Oslo Stock Exchange with the ticker ENTRA. The Company and its subsidiaries (together "Entra" or "the Group") is one of Norway's leading commercial real estate companies, focusing on high quality, flexible office buildings with central locations. The Group owns and manages 96 (90) buildings with a total area of approximately 1.5 million (1.3 million) square metres. As of 31.12.21 the real estate portfolio had a market

value of around 68 billion (57 billion). The public sector represents approximately 56 per cent (58 per cent) of the total customer portfolio. Entra's strategic areas are Oslo, Trondheim, Bergen, Sandvika, Stavanger and Drammen. Entra has its head office in Oslo.

The financial statements were adopted by the Company's Board on 3 March 2022.

NOTE 2 ACCOUNTING PRINCIPLES

ACCOUNTING PRINCIPLES

The most important accounting principles applied in the preparation of the annual financial statements are described below. These principles are applied in the same way for all periods presented, unless otherwise indicated in the description.

Basic principles

The annual financial statements have been prepared in accordance with Norwegian Accounting Act of 1998 and good accounting practice (NGAAP).

The annual financial statements have been prepared on the basis of the historical cost principle.

Presenting the accounts in accordance with NGAAP requires the management to make certain assessments and assumptions. The application of the company's accounting principles also requires management to exercise judgement. Estimates and subjective judgements are based on past experience and other factors that are considered appropriate. Actual results may deviate from these estimates.

Estimates and underlying assumptions are continuously reassessed. Changes in accounting estimates are recognised in the period in which the changes occur if they apply only to that period. If the changes also apply to future periods, the impact is distributed over the current and future periods.

The annual financial statements have been presented on the assumption of the business being a going concern.

General principles for measurement and classification of assets and liabilities

Assets intended for long-term ownership or use are classified as non-current assets. Other assets are classified as current assets. Receivables that are repayable within a year are classified as current assets. When classifying non-current and current liabilities, equivalent criteria have been applied.

Current assets are valued at the lower of the acquisition cost and fair value.

Income recognition

Revenue is recognised when it is earned, i.e. when the claim to remuneration arises. This occurs when the service is performed, as the work is being done. The revenue is recognised with the value of the remuneration at the time of transaction.

Costs

Costs are normally reported in the same period as the related income. Where there is no clear link between expenditure and the income, allocation is determined on the basis of assessment criteria.

Currency

The presentation currency is NOK. This is also the functional currency of the company.

Foreign currency transactions are translated at the exchange rate on the date of the transaction. Monetary foreign currency items on the balance sheet are translated at the exchange rate on the balance sheet date.

Property and equipment

Property and equipment are recognised at acquisition cost on the balance sheet and are depreciated to a schedule over the anticipated useful life of the assets. The acquisition cost includes costs directly related to the acquisition of the asset. Direct maintenance of property and equipment is recognised in the income statement on an ongoing basis. Additions or improvements are added to the asset's cost price and are depreciated in line with the asset.

Subsidiaries

Investments in subsidiaries are included in the company accounts using the cost method. Investments are written down to their fair value if the reduction in value is other than temporary and the write-down appears to be necessary in accordance with generally accepted accounting principles.

Dividends and Group contributions from subsidiaries are recognised as income from the investment in the subsidiary in the year that the allocation is made by the subsidiary. Dividends and Group

contributions from subsidiaries that exceed the retained earnings over the period of ownership are considered as repayments of the acquisition cost.

Jointly controlled entities and associates

Jointly controlled entities are entities where the company shares control with other parties, and where an agreement between the parties ensures that strategic decisions on financial and operating policies are unanimous. This applies to companies where a shareholder agreement ensures joint control of the business.

Associates are entities over which the company has significant influence but not control. Significant influence normally exists where the company's investment represents between 20 and 50 per cent of the capital with voting rights.

Investments in jointly controlled entities and associates are included in the company accounts using the cost method. Investments are written down to their fair value if the reduction in value is other than temporary and the write-down appears to be necessary in accordance with generally accepted accounting principles.

Trade receivables

Trade receivables and other receivables are reported at nominal value after deduction of loss provisions. Loss provisions are made on the basis of an individual assessment of each receivables.

Cash and cash equivalents

Cash and cash equivalents consist of bank deposits and other short-term, highly liquid investments with an original term to maturity of no more than three months.

The company has an account in a Group cash pooling arrangement and finances its subsidiaries' liquidity requirements.

Non-current liabilities

Non-current liabilities are shown on the balance sheet at nominal value on the initial date. Premiums and discounts in connection with taking on non-current liabilities, as well as arrangement fees, are accrued over the period of the loan. Similarly, in the event of the repurchase of bonds, premiums and discounts are accrued over the remaining term to maturity for the relevant liabilities.

All of the company's debt is subject to variable rates (including fixed rate bonds, which are swapped to a variable rate). The company has then used interest rate swaps to convert its debt to fixed rate loans with varying maturities. For information on maturities, please see Note 14. The company accrues these interest-rate swaps in such a way that the fixed rate is expensed in the income statement. On the termination of interest rate swap agreements, the profit or loss is accrued over the remaining term to maturity of the agreement in question.

The company has chosen to apply accounting principles which mean that changes in the value of the company's interest rate swaps are not recognised in the income statement. Hedged items are carried at their nominal value.

In general, the Group's financing is based on negative pledge clauses.

Pension

The company has both a defined-benefit pension scheme and a defined contribution pension-scheme. A defined benefit pension scheme is a pension arrangement that defines the pension payment an employee will receive on retirement. The guarantee means that employees will receive at least 66 per cent of their pension qualifying salary. Any income over and above 12 times the National Insurance Scheme's basic amount is not included in the qualifying salary. The pension benefit payable is based on the employee's salary, average percentage of full-time equivalents and length of service (30 years' service qualifies for a full pension)

The recognised pension obligation relating to defined-benefit plans is the present value of the defined-benefit on the balance sheet date less the fair value of the plan assets. The gross pension obligation is calculated annually by an independent actuary using the projected credit unit method. The gross obligation is discounted using a discount rate based on bonds with preference rights, which mature around the same time as the related pension obligations.

Changes to benefits payable under the pension plan are recognised in the income statement as they arise.

Actuarial gains/losses resulting from new information or changes to actuarial assumptions are recognised against equity.

Defined contribution schemes comprise arrangements whereby the company makes annual contributions to the employees' pension plans, and where the future pension is determined by the amount of the contributions and the return on the pension plan assets. In the defined contribution schemes, the cost is equal to the contributions to the employees' pension savings in the accounting period and are recognised in the income statement in the period in which they accrue.

Tax

Tax The tax expense consists of tax payable and deferred tax. Tax is charged to the income statement, except where it relates to items that are recognised directly in equity. In such cases, the tax is recognised directly in the balance.

Deferred tax is calculated using the liability method for all temporary differences between the tax values and accounting values of assets and liabilities. Deferred tax is defined using tax rates and laws which are enacted or likely to be enacted on the balance sheet date, and which are expected to be used when the deferred tax asset is realised or when the deferred tax is utilised.

A deferred tax asset is recognised to the extent that it is likely that future taxable profit will be available against which the temporary differences can be offset.

In principle, deferred tax is not calculated on temporary differences arising from investments in subsidiaries. This does not apply in cases where the company is not in control of when the temporary differences will be reversed, and it is probable that they will be reversed in the foreseeable future.

STATEMENT OF CASH FLOWS

The statement of cash flows is prepared using the indirect method. This means that the statement is based on the company's profit before tax in order to present cash flows from operating, investing and financing activities respectively. Dividends paid to shareholders are presented under financing activities.

DIVIDENDS

Dividend payments to the company's shareholders for the fiscal year are classified as debt at the balance sheet date.

GROUP

Entra ASA is the parent company of a Group of companies. The consolidated financial statements can be obtained from Entra ASA, Postboks 52, Økern NO-0508 Oslo.

NOTE 3 SALES REVENUE

Sales revenue consists of property management services, project development services and administrative services provided to subsidiaries, associates and jointly controlled entities. All services are delivered in Norway.

NOTE 4 PAYROLL AND RELATED COSTS

NOTE 13 SHARE CAPITAL AND SHAREHOLDER INFORMATION

Entra's share capital is 182,132,055 divided into 182,132,055 shares, with each share having a par value of 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra. At 31 December, Entra owns 2,087 (2,808) of its own shares and has a total of 182,129,968 (182,129,247) shares outstanding.

As of 31 December 2021 Entra had 4,524 shareholders (5,660 shareholders). Norwegian investors held 10 per cent (29 per cent) of the share capital and foreign investors 90 per cent (71 per cent) at 31 December 2021.

	No. of shares	Share capital (NOKm)	Share premium (NOKm)	Par value (NOK)
End of year 31.12.2020	182 132 055	182	2 595	1
End of year 31.12.2021	182 132 055	182	2 595	1

Entra ASA has a share purchase scheme, offering all employees, including management, the opportunity to purchase shares in Entra ASA at a 20 per cent discount. The shares are subject to two-year lock-in period. The purchase price in the employee offering was calculated as the volume weighted average share price the last 30 days (VWAP) until and including 23 April 2021 less a 20 per cent discount. A total of 72,473 (102,699) shares were acquired and sold to the employees in connection with the share purchase scheme in May 2021. In addition, a total of 25,248 (12,503) shares were awarded to senior executives in March 2021.

The 20 largest shareholders as registered in the VPS as of 31 December 2021 were as follows:

SPECIAL TERMS AND CONDITIONS IN ENTRA ASA'S LOAN AGREEMENTS

In general, the financing is based on negative pledge clauses.

LOANS AND INTEREST RATE HEDGES

Interest rate hedging at Entra ASA is part of the Group's overall risk management, and must be viewed in that context. Interest-rate positions should support the company's strategic development, risk profile and anticipated future market interest rates based on the Group's interest rate view. The Group's guidelines on managing interest rate risk are expressed as a preferred interest rate structure (standard portfolio).

At 31 December 2021 the weighted average remaining term to maturity was 3.4 years (2.6 years). The company's average interest rate was 2.2 per cent (2.4 per cent) at 31 December 2021.

ENTRA ASA PORTFOLIO OF LOANS AND INTEREST RATE HEDGES HAVE THE FOLLOWING INTEREST RATE MATURITY PROFILE

	%	Fixed interest 2021
Up to 1 year	48	11 682
1-2 years	3	745
2-4 years	17	4 000
4-6 years	20	4 779
6-8 years	10	2 400
Over 8 years	2	500
Total	100	24 106

The effect of interest rate hedges is shown in the income statement. The fair value of the company's portfolio of interest rate hedges is not shown on the balance sheet.

INTEREST BEARING DEBT ASSOCIATED WITH HEDGING ACTIVITIES

Entra ASA uses interest rate derivatives and fixed rate loans to manage the interest rate risk associated with the company's interest bearing debt financing.

The company's debt financing consists of bank loans, as well as commercial paper and bonds. The bank loans are subject to variable interest rates. Commercial paper is subject to variable interest rates. The company has issued both fixed-rate and variable-rate bonds. Outstanding fixed-rate bonds are hedged using fixed-to-variable interest rate swaps. As a result, the hedged bonds are classified as part of the company's portfolio of variable rate loans. Fixed rate bonds without hedging amounted per 31 December 2021 to 6,099 million. These bonds are fixed rate and is included as part of the company's cash flow hedges.

NOT VALUE HEDGED FIXED RATE BONDS IN 2021

	Maturity	Nominal value	Market value
ISIN NO0010740061	13.06.2022	800	804
ISIN NO0010766389	02.06.2023	470	474
ISIN NO0010852684	22.05.2026	279	281
ISIN NO0010895964	21.04.2028	1 000	939
ISIN NO0011011256	28.11.2025	1 000	981
ISIN NO0011094633	10.09.2026	1 150	1 096
ISIN NO0011094641	10.09.2029	1 400	1 321
Total		6 099	5 895

The company's exposure to variable interest rates is hedged for cash flow risk using variable-to-fixed interest rate swaps.

CASH FLOW HEDGING

Entra ASA's debt are directly or indirectly subject to variable interest rates. Entra ASA uses variable-to-fixed interest rate derivatives to manage the company's interest rate risk. Cash flows are hedged by matching the terms and volumes of the interest rate derivatives with the expected maturity profile of the company's interest bearing debt. The expected maturity profile of Entra ASA's interest-bearing debt is based on an assessment of the need to refinance existing debt and to obtain additional financing.

The table below shows that after taking into account cash flow hedges, 52 per cent (55 per cent) of the company's interest bearing liabilities are effectively subject to fixed interest rates.

Changes in NIBOR rates will therefore affect the interest expense on 48 per cent (45 per cent) of the company's interest bearing debt.

CASH FLOW HEDGING

	2021	2020
Hedged item		
Variable interest rate liabilities	24 106	18 617
Hedge		
Interest rate swaps (variable-to-fixed)	12 424	10 300
Hedge ratio (unhedged position)	11 682	8 317
Hedge ratio (% hedged)	52%	55%

Changes in the cash flow hedges over the financial year:

CHANGE IN VALUE

	2021	2020
Opening balance - market value of liability	625	289
Change in value	-412	337
Closing balance - market value of liability	213	625

The fair value of the company's interest rate swaps used as cash flow hedges specifies the present value of the contractual fixed-interest rate agreements. The present value represents the market value of the company's liabilities to the counterparty of the interest rate swaps. The change in value over the financial year represents the change in the market value of liabilities. The reason for the increase in the company's market value of liabilities for financial year 2021 is mainly due to lower interest rate.

FAIR VALUE HEDGING

Entra ASA has the following fair value hedges for the company's outstanding fixed-rate bonds:

FAIR VALUE HEDGING 2021

	Total	Maturity structure up to 1 year	Maturity structure 1-5 years	Maturity structure > 5 years
Hedged item				
Fixed interest rate liabilities	9 206	1 182	3 624	4 400
Hedge				
Interest rate swaps (fixed-to-variable)	3 200	400	800	2 000
Hedge ratio (unhedged position)	65%	66%	78%	55%
Hedge ratio (% hedged)	35%	34%	22%	45%

FAIR VALUE HEDGING 2020

	Total	Maturity structure up to 1 year	Maturity structure 1-5 years	Maturity structure > 5 years
Hedged item				
Fixed interest rate liabilities	5 000	-	2 800	2 200
Hedge				
Interest rate swaps (fixed-to-variable)	2 200	-	900	1 300
Hedge ratio (unhedged position)	56%	-	68%	41%
Hedge ratio (% hedged)	44%	-	32%	59%

Changes in the value of fair value hedges over the financial year:

CHANGE IN VALUE

	2021	2020
Opening balance - market value of liabilities (+) /receivables (-)	-26	-27
Change in value	101	-
Closing balance - market value of liabilities (+) /receivables (-)	75	-26

At 31 December 2021, the market value of the company's fair value hedges represented a receivable for the company.

NOTE 15 PENSION

All amounts in NOK million

The company's pension scheme for new employees is a defined contribution scheme. The defined contribution scheme includes 167 (168) employees. The defined benefit pension scheme cover a total of 11 (13) current employees and 74 (70) pensioners.

The company also has a contractual early-retirement scheme (AFP) from the age of 62. At 31 December 2021, 5 (6) former employees had chosen to make use of the AFP scheme. The net pension liabilities associated with the AFP scheme amounted to NOK 8 million (NOK 18 million), which is included under total pension liabilities in the table below.

The company's pension scheme satisfies the requirements of the Norwegian Act on Compulsory Occupational Pensions.

THE BALANCE SHEET LIABILITIES HAVE BEEN CALCULATED AS FOLLOWS

	2021	2020
Present value of accrued pension liabilities in defined-benefit schemes in unit trusts	223	201
Fair value of pension scheme assets	-126	-127
Employers' NICs accrued	14	11
Net pension liabilities on the balance sheet at 31.12	111	85

CHANGE IN DEFINED-BENEFIT PENSION LIABILITIES OVER THE YEAR

	2021	2020
Pension liabilities at 01.01	201	182
Present value of pensions earned this year	1	1
Interest expense	3	4
Pension benefits paid	-7	-6
Actuarial losses/(gains)	24	21
Pension liabilities at 31.12	223	201

CHANGE IN FAIR VALUE OF PENSION SCHEME ASSETS

	2020	2019
Pension scheme assets at 01.01	127	128
Anticipated return on pension scheme assets	2	3
Contributions from employer	5	3
Pension benefits paid	-7	-6
Actuarial (gains)/losses	-1	-1
Pension scheme funds at 31.12	126	127

TOTAL COST RECOGNISED IN THE INCOME STATEMENT

	2021	2020
Cost of pension benefits accrued during current period	1	1
Contribution scheme and contractual early-retirement scheme	14	13
Total pension benefits accrued during the period	16	14
Net interest expense	1	1
Total pension benefits accrued in income statement	17	16
Actuarial losses (-)/gains (+) accrued in equity	29	25
Total pension benefits accrued	46	40

The actual return on pension scheme assets was NOK 2 million (NOK 3 million).

THE FOLLOWING ECONOMIC ASSUMPTIONS HAVE BEEN USED

	2021	2020
Discount rate	1.90%	1.70%
Anticipated return on pension scheme assets	1.90%	1.70%
Annual wage growth	2.50%	2.00%
Annual adjustment to the National Insurance Scheme's basic amount ("G")	1.75%	2.00%
Annual adjustment of pensions	2.50%	1.25%
Mortality rates	K2013	K2013
Disability rates	200% * K63	200% * K63
Proportion of entitled employees making use of AFP	20%	20%

The actuarial assumptions are based on generally accepted assumptions in the insurance industry with regard to demographic factors.

The pension scheme assets are invested in government bonds.

NOTE 16 RELATED PARTY TRANSACTIONS AND INTRA-GROUP BALANCES

All amounts in NOK million

Transactions with related parties	Counterparty	2021	2020
Services for property management	Subsidiaries	55	54
Services for Project development	Subsidiaries	55	49
General manager fee	Subsidiaries	1	1
Accounting and management fee	Subsidiaries	31	30

To the General Meeting of Entra ASA

INDEPENDENT AUDITOR'S REPORT

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Entra ASA, which comprise:

- The financial statements of the parent company Entra ASA (the Company), which comprise the balance sheet as at 31 December 2021, the income statement and cash flow statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and
- The consolidated financial statements of Entra ASA and its subsidiaries (the Group), which comprise the balance sheet as at 31 December 2021, the income statement, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion:

- the financial statements comply with applicable statutory requirements,
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and
- the financial statements give a true and fair view of the financial position of the Group as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

Our opinion is consistent with our additional report to the Audit Committee.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company and the Group as required by laws and regulations and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

To the best of our knowledge and belief, no prohibited non-audit services referred to in the Audit Regulation (537/2014) Article 5.1 have been provided.

We have been the auditor of the Company for 10 years from the election by the general meeting of the shareholders on 14.05.2012 for the accounting year 2012.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited ("DTTL"), its global network of member firms, and their related entities (collectively, the "Deloitte organization"). Independent Auditor's Report -
Entra ASA

statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of investment property

Key audit matter

The majority of the Group's assets consist of Investment property. Investment property is recognised at fair value, based on fair values from third party valuers.

Each quarter, all properties are valued by two third party valuers. Market transactions serve as important reference points for the third party valuers and the level of transactions thus influence the level of uncertainty in the assumptions used by the third party valuers. We refer to note 3 "Critical accounting estimates and subjective judgments" for further information.

The fair value is based on assumptions and estimates as well as property specific information. These assumptions and estimates require significant judgment and therefore valuation of investment property is a key audit matter.

How the matter was addressed in our audit

The Group has established control activities to ensure that relevant property information is included in the external valuations. We have assessed the design of the control activities and tested if they have operated effectively in the reporting period.

For a sample of the investment properties, we reconciled the property information regarding annual rent and square meters in third party valuers' reports to the Group's own records.

We met with the third party valuers and discussed and challenged their judgements used in the valuation of investment properties, particularly in light of the market development during 2021. We assessed their qualifications and expertise and reviewed their terms of engagement in order to determine whether there were any matters that might have affected their objectivity. We assessed the valuation methods used against generally accepted valuation standards and practices.

For a sample of investment properties, we obtained the third party valuers' valuation reports and reconciled the values used in the financial statements to the valuation reports.

For a sample of investment properties, we obtained and assessed the Group's analysis and rationale for the changes in fair value from quarter to quarter.

In carrying out the procedures related to valuation of investment property, we used our internal valuation specialists.

We assessed whether the disclosures in note 3, 8 and 16 regarding valuation of investment properties were adequate.

Other Information

The Board of Directors and the Managing Director (management) are responsible for the information in the Board of Directors' report and the other information accompanying the financial statements. The other information comprises information in the annual report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the information in the Board of Directors' report nor the other information accompanying the financial statements.

In connection with our audit of the financial statements, our responsibility is to read the Board of Directors' report and the other information accompanying the financial statements. The purpose is to consider if there is material inconsistency between the Board of Directors' report and the other information accompanying the financial statements and the financial statements or our knowledge obtained in the audit, or whether the Board of Directors' report and the other information accompanying the financial statements otherwise appears to be materially misstated. We are required to report if there is a material misstatement in the Board of Directors' report or the other information accompanying the financial statements. We have nothing to report in this regard. Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

side 3
Independent Auditor's Report -
Entra ASA

- is consistent with the financial statements and
- contains the information required by applicable legal requirements.

Our opinion on the Board of Director's report applies correspondingly to the statements on Corporate Governance and Corporate Social Responsibility.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for the preparation and true and fair view of the consolidated financial statements of the Group in accordance with International Financial Reporting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements of the Company use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations. The consolidated financial statements of the Group use the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's or the Group's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting, and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible

side 4
Independent Auditor's Report -
Entra ASA

for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Board of Directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Report on compliance with Regulation on European Single Electronic Format (ESEF)

Opinion

We have performed an assurance engagement to obtain reasonable assurance that the financial statements with file name entraasa-2021-12-31-en have been prepared in accordance with Section 5-5 of the Norwegian Securities Trading Act (Verdipapirhandelloven) and the accompanying Regulation on European Single Electronic Format (ESEF). In our opinion, the financial statements have been prepared, in all material respects, in accordance with the requirements of ESEF.

Management's Responsibilities

Management is responsible for preparing, tagging and publishing the financial statements in the single electronic reporting format required in ESEF. This responsibility comprises an adequate process and the internal control procedures which management determines is necessary for the preparation, tagging and publication of the financial statements.

Auditor's Responsibilities

Our responsibility is to express an opinion on whether the financial statements have been prepared in accordance with ESEF. We conducted our work in accordance with the International Standard for Assurance Engagements (ISAE) 3000 – "Assurance engagements other than audits or reviews of historical financial information". The standard requires us to plan and perform procedures to obtain reasonable assurance that the financial statements have been prepared in accordance with the European Single Electronic Format.

As part of our work, we performed procedures to obtain an understanding of the company's processes for preparing its financial statements in the European Single Electronic Format. We evaluated the completeness and accuracy of the iXBRL tagging and assessed management's use of judgement. Our work comprised reconciliation of the financial statements tagged under the European Single Electronic Format with the audited financial statements in human-readable format. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Alternative performance measures

Entra's financial information is prepared in accordance with the international financial reporting standards (IFRS). In addition, the company reports alternative performance measures (APMs) that are regularly reviewed by management to enhance the understanding of Entra's performance as a supplement, but not as a substitute, to the financial statements prepared in accordance with IFRS. Financial APMs are intended to enhance comparability of the results and cash flows from period to period, and it is Entra's experience that these are frequently used by analysts, investors and other parties. The financial APMs reported by Entra are the APMs that, in management's view, provide the most relevant supplemental information of a real estate company's financial position and performance. These measures are adjusted IFRS measures defined, calculated and used in a consistent and transparent manner over the years. Operational measures such as, but not limited to, net letting, vacancy and WAULT are not defined as financial APMs according to ESMA's guidelines.

ENTRA'S FINANCIAL APMS:

- Net Income from property management
- Net value changes
- Cash Earnings
- Market value of the property portfolio
- Net nominal interest bearing debt
- Debt ratio – Loan-to-value (LTV)
- Interest coverage ratio (ICR)
- EPRA Earnings
- EPRA Net Asset Value metrics – EPRA NRV, EPRA NTA and EPRA NDV
- EPRA Net Initial Yield
- EPRA Cost Ratio

Total Capital Expenditure on cash basis	5 617	1 877

¹⁾ Also includes tenant alterations and maintenance capex when this is done as a part of asset redevelopment or refurbishment

A. EPRA EARNINGS

EPRA Earnings is a measure of the operational performance of the property portfolio. EPRA Earnings is calculated based on the income statement, adjusted for non-controlling interests, value changes on investment properties, changes in the market value of financial instruments and gains/losses on the sale of properties and the associated tax effects.

All amounts in NOK million	2021 IFRS reported	2021 EPRA adjustments	2021 Non- controlling interests ¹⁾	2021 EPRA Earnings	2020 IFRS reported	2020 EPRA adjustments	2020 Non- controlling interests ¹⁾	2020 EPRA Earnings

¹⁾ Excluding non-controlling interests in relation to EPRA adjustments.

B. EPRA NET ASSET VALUE METRICS

Net Asset Value (NAV) is the total equity that the company manages for its owners. Net asset value can be calculated in different ways, where the difference mainly is explained by the expected turnover of the property portfolio. Entra presents the three NAV metrics introduced in the Best Practices Recommendations Guidelines released in October 2019; EPRA NRV, EPRA NTA and EPRA NDV; which has replaced the previous NAV metrics EPRA NAV and EPRA NNNAV.

EPRA NET REINSTATEMENT VALUE (NRV)

The objective of the EPRA NRV measure is to highlight the value of net assets on a long-term basis and assumes that no selling of assets takes place. Assets and liabilities that are not expected to crystallise in normal circumstances such as the fair value movements on financial derivatives and deferred taxes on property valuation surpluses are therefore excluded. Real estate transfer taxes are generally not levied on property transactions in Norway, and such taxes are accordingly not included in Entra's valuation certificates. Consequently, no adjustment is done for real estate transfer taxes in Entra's calculation of EPRA NRV.

All amounts in NOK million	31.12.2021 Total	31.12.2021 Attributable to non-controlling interests	31.12.2021 Attributable to shareholders (EPRA NRV)	31.12.2020 Total	31.12.2020 Attributable to non-controlling interests	31.12.2020 Attributable to shareholders (EPRA NRV)

Outstanding shares at period end (million)			182.1			182.1
EPRA NRV per share (NOK)			218			189

¹⁾ In January 2021, Entra acquired the property Lagårdsveien 6 for an option price lower than the fair market value. The difference between the option price and the fair market value was included in NAV at fair value at 31.12.20, adjusted for transaction fees and the carrying amount of the option. The property is included in investment properties measured at fair value from 2021.

EPRA NET TANGIBLE ASSETS (NTA)

The EPRA NTA is focused on reflecting a company's tangible assets and assumes that entities buy and sell assets, thereby crystallising certain levels of unavoidable deferred tax liability. Entra has adopted second option in the EPRA BPR guidelines to adjust for deferred tax, estimating the real tax liability based how the company has completed property transactions in recent years.

All amounts in NOK million	31.12.2021 Total	31.12.2021 Attributable to non-controlling interests	31.12.2021 Attributable to shareholders (EPRA NTA)	31.12.2020 Total	31.12.2020 Attributable to non-controlling interests	31.12.2020 Attributable to shareholders (EPRA NTA)

EPRA NTA per share (NOK)			216			187

Estimated real tax liability

The Group's estimated real deferred tax liability related to temporary differences of properties has been calculated to 1.2 per cent of the based on a discount rate of 5.0 per cent and the assumption that 50 per cent of the property portfolio are realized over 50 years in transactions structured as sale of properties in corporate wrappers, with an average tax discount of 6.5 per cent. Further, the real tax liability related to the gains/losses account is estimated by assuming an amortisation of 20 per cent annually and a discount rate of 5.0 per cent.

	31.12.2021	31.12.2021	31.12.2020	31.12.2020
All amounts in NOK million	Nom. tax liability	Real tax liability	Nom. tax liability	Real tax liability
Non-current assets	8 532	460	7 124	384

Loss carried forward	-224	-224	-158	-158
Deferred tax liability	8 307	249	6 914	238

EPRA NET DISPOSAL VALUE (NDV)

The EPRA NDV measure provides readers of financial reports with a scenario where deferred tax, financial instruments, and certain other adjustments are calculated as to the full extent of their liability. This enables readers of financial reports to understand the full extent of liabilities and resulting shareholder value under an orderly sale of business and/or if liabilities are not held until maturity. The measure should not be viewed as a "liquidation NAV" for Entra, as fair values may not represent liquidation values, and as an immediate realization of Entra's assets may be structured as sale of property-owning companies, resulting in the deferred tax liabilities only partially crystallising.

	31.12.2021	31.12.2021	31.12.2021	31.12.2020	31.12.2020	31.12.2020

C. EPRA NET INTIAL YIELD

EPRA Net Initial Yield (NIY) measures the annualised rental income based on the cash rents passing at the balance sheet date, less non-recoverable property operating expenses, divided by the market value of the property, increased with (estimated) purchasers' costs.

EPRA "topped-up" NIY incorporates an adjustment to the EPRA NIY in respect of the expiration of rent-free periods (or other unexpired lease incentives such as discounted rent periods and step rents).

All amounts in NOK million except ratio	Oslo	Trondheim	Sandvika	Stavanger	Drammen	Bergen	Total
Investment property - wholly owned	45 004	6 220	3 365	1 611	389	3 449	60 038

Reporting according to the Task Force on Climate-Related Financial Disclosures (TCFD)

Entra has started a process to adapt the company's reporting in accordance with the recommendations in the TCFD framework to describe how we work strategically with climate related risks and opportunities. Entra's approach to climate risk and opportunity is discussed in our ESG Report on pages 54-59, and as part of the overall risk analysis on page 28-39. The table below describes the scope of the reporting and page references are made for the respective areas.

Governance Recommended disclosures	Strategy Recommended disclosures	Risk Management Recommended disclosures	Indicators and goals Recommended disclosures
A. The Board's monitoring of climate-related risks and opportunities → ESG report page 54-59, and Risk Factors page 28-39	A. Climate-related risks and opportunities the organisation has identified → ESG report page 54-59, and Risk Factors page 28-39	A. The organization's process for identifying climate-related risks → ESG report page 54-59, and Risk Factors page 28-39	A. The organisations indicators for evaluating climate-related risks and opportunities → ESG report page 54-59, and Risk Factors page 28-39
B. Management's role regarding assessing and managing climate-related risks and opportunities → ESG report page 54-59, and Risk Factors page 28-39	B. Impact from risks and opportunities on the organisations operations, strategy and financial planning → ESG report page 54-59, and Risk Factors page 28-39	B. Emissions of Scope 1, 2 and 3 under the Greenhouse Gas Protocol → pages EPRA reporting 179-185
	C. Preparation of the organisation's strategy in consideration of various climate-related scenarios → ESG report page 54-59, and Risk Factors page 28-39	C. Integration of the above processes in the organizations general risk management → ESG report page 54-59, and Risk Factors page 28-39	C. Goals for managing climate-related risks and opportunities → ESG report page 54-59, and Risk Factors page 28-39

EPRA Sustainability Performance Measures

Entra reports on its energy, GHG emissions, water, waste and social governance impacts in accordance with the EPRA Sustainability Best Practice Recommendations (SBPR). This common reporting standard is a framework developed by property companies to promote transparency in sustainability reporting. To give our stakeholders greater confidence, this report has been independently assured by Deloitte based on the international standard ISAE 3000 "Assurance Engagements other than Audits or Reviews of Historical Financial Information".

ORGANIZATIONAL BOUNDARY

Entra reports on asset-level sustainability impacts for assets within the management portfolio over which it has full operational control. This boundary coincides with the Group organizational structure as determined for financial reporting purposes and excludes assets under construction or in redevelopment. We do not report data for single-let properties as we have no management control of these properties and are unable to collect utilities data. For the reporting year 2021 this is only one property. The environmental reporting period corresponds to the period from 1 January to 31 December.

DATA COVERAGE

For each asset-level performance measure, Entra discloses the number of properties reported on out of the total number of management properties in the Group portfolio. Entra does not presently have data collection on each asset-level performance measure for every asset within the organizational boundary but aims to increase the data coverage going forward as it creates conditions for proper efficient technical management in our buildings.

Like-for-like performance measures include properties consistently in operation during the two most recent full reporting years and exclude asset acquisitions, disposals, major refurbishments and developments as well as fully vacant properties. Like-for-like performance measures also exclude assets with changes in the level of data coverage between the two reporting periods where the missing data cannot be reliably estimated.

ESTIMATION

In general estimation of missing data for partially unavailable or unreliable utility consumption for asset-level performance measures is carried out to a very small extent. In these cases, data for missing periods is estimated using known consumption from other periods for the metered supply in question. The proportion of estimated data is disclosed as a percentage of the total data provided for the relevant performance measure. The same method of estimation is used for all performance measures and for all assets. For 2021 there was no estimation except for HQ as described below.

Note that while there is limited estimation of waste data itself, the percentage of waste per disposal route is calculated by multiplying actual waste created by the proportion of waste solutions for each waste group. This information on waste processing is provided directly by our waste management supplier.

As information is unavailable for Entra's office space HQ only, all performance measures for Entra's headquarters (excluding electricity) are calculated based on Entra's proportionate share of actual utility data for the property where Entra is a tenant. Entra's HQ is located in Oslo.

Entra does not carry out data adjustment based on climate or occupancy rates. Variations in asset-level performance attributed to fluctuations in these factors are instead commented directly in the performance narrative, if relevant. As of 31.12.21, the portfolio occupancy was 97,8 per cent.

THIRD PARTY ASSURANCE

Entra has obtained third party assurance of its sustainability data for this reporting period. Statement from our auditors can be found on page 82-83.

LANDLORD/TENANT BOUNDARY

Entra is responsible, as landlord, for obtaining a portion of the overall utilities consumed at the assets level. Total landlord-obtained consumption includes both utilities for common areas as well as tenant consumption sub-metered from the landlord. The remaining consumption is obtained and paid directly by the tenants. Entra has access to tenant-obtained consumption data and reports on whole building consumption for all asset-level environmental performance measures. Utilities purchased by Entra as the landlord (landlord-obtained) and those directly purchased by tenants (tenant-obtained) are presented separately under total consumption.

NORMALIZATION

As a majority of Entra's management portfolio is utilized as office space, floor area is deemed the most appropriate denominator for asset-level performance measures. Whole building consumption is divided by Gross Leasable Area (GLA). The denominator GLA is closely aligned with the numerator as total consumption includes tenant-obtained utilities and is also consistent with the areas disclosed in Entra's financial reporting.

For absolute intensities, Entra either includes pre-existing data or pro-rates consumption up to the full year for properties entering or exiting the management portfolio during the reporting period. This removes the mismatch between the collected consumption data in the numerator and GLA as the denominator for more comparable absolute intensities.

Number of hours/days worked is used as the denominator when calculating health and safety performance measures.

SEGMENTAL ANALYSIS

Segmental reporting and analysis by geography or property type does not grant significantly greater insight into asset-level performance measures. As presented in its financial reports, Entra's management portfolio contains mainly office properties within Oslo, Norway and other regional cities, of which Oslo represents the majority location of portfolio value.

DISCLOSURE ON OWN OFFICES

Entra discloses the environmental impact of its own occupation separately within its sustainability reporting. As Entra is a tenant at a property within its own management portfolio, this data is also included in the total portfolio consumption. Please refer to the paragraph on estimation for a note concerning the calculation of data for Entra's headquarters.

PERFORMANCE NARRATIVE ON OUR MANAGED ASSETS

The following provides a short commentary on the asset-level performance indicators for Entra's management portfolio and headquarters for 2021. For an outline on our plans for managing future performance please refer to the ESG section page 42-59.

COVID-19 SITUATION

2021 was yet a challenging year due to the Covid-19 pandemic. Just before summer it all seemed brighter, and the Norwegian government removed all restrictions in Sept 2021. In December lock-down was introduced again due to a new virus. 2021 was a year where the Government still was encouraging employees to work from home if possible and avoid using public transportation - especially in the biggest cities. We have no concrete measures on how many people that have worked from an Entra office building in 2021 as we do not count people entering security gates. Nevertheless, we know that utilizations are directly correlated with the number of people in the building, and that activity in the office buildings throughout the year has been reduced compared to before the pandemic. Still, we see that the activity in our office building was higher in 2021 compared to 2020.

MANAGEMENT PORTFOLIO

Energy

Entra's focus on improving energy efficiency has given results over the past 10 years, not only through concrete measures such as replacing central environment operation control systems and improving the zoning control of outdoor environments but also by generally optimizing the management of its properties. In 2021, absolute electricity consumption across the 67 managed assets with available data, totaled 85,748 MWh, a 5 per cent increase from 2020. Measured as like-for-like, the increase was 7 per cent. Landlord-obtained consumption amounted to 62,440 MWh, of which 2.1 per cent came from renewable resources (four buildings). Entra aims to increase this proportion by extending its green energy consumption through solar panels, wind and hydropower.

Absolute district heating and cooling consumption across the 51 managed assets totaled 47,298 MWh, a like-for-like increase of 25 per cent compared with 2020. This is mainly explained by the need of ventilation and tuned indoor temperature because of

more employees was physically in the office buildings during 2021 compared to 2020. Landlord-obtained consumption amounted to 42,754 MWh.

In 2021 there was one property with fuels consumption of 119 MWh. This is a school building that uses fuels to help heating systems in periods with cold weather, which was the case in the beginning of 2021. There was no use of fuels in 2020. Entra is currently working towards phasing out fossil fuel consumption within its portfolio and will remove all oil boilers.

Building energy intensity across the 64 management properties in our portfolio with like-for-like performance data was 131 kWh per square meter in 2021, up by 6 per cent in comparison with 2020.

Greenhouse gas

Greenhouse gas intensity from building energy across the same assets fell to 3.97 kg CO₂e per square meter, a drop of 5 per cent compared with 2020. This decrease is mainly explained by reduction in emission factor because the Nordic Mix has become greener, and energy efficient new built project now are included in Like-for-Like calculations.

GHG emissions presented in the EPRA table are based on local-based and market-based emission factors for electricity. If calculated using market-based emission factor for electricity, the GHG emission from electricity is about 11,376 tonnes CO₂-e in 2021.

Water

100 per cent of water consumption comes from municipal water supplies sources. Absolute water consumption across the 66 managed assets with available data in 2021 was 153,369 m³ compared with 156,699 m³ in 2020. On a like-for-like basis, total water consumption decreased by 5 per cent. Building water intensity across the 63 assets with like-for-like performance data was 0.15 m³ per square meter in 2021, a 6 per cent decrease from 2020.

Waste

In 2021, Absolute waste creation across the 61 managed assets with available data was 2,543 tons. Compared with 2,501 tons in 2020 this was an increase of 2 per cent. Like-for-like decreased with 3 per cent from 2,378 tons in 2020 to 2,306 tons in 2021. Entra continuously works towards greater coverage of waste created by tenants who have waste groups managed independently of Entra's waste monitoring system.

Entra Headquarters:

Entra's electricity consumption at its headquarters totaled 138,742 kWh in 2021, a 31 per cent increase compared to 106,281 kWh in 2020. In 2020 there was very little activity in the building due to Covid-19 restrictions and there has been some more employees at work in our buildings during 2021 with a direct effect on the amount of lighting and ventilation needed.

Entra's pro-rated share of district heating and cooling increased by 38 per cent from 60,363 kWh in 2020 to 83,569 kWh in 2020.

The property at which Entra is a tenant does not have fuels as an energy source.

Energy intensity for Entra's headquarters was 79 kWh per square meter in 2021, up by 33 per cent in comparison with 2020. Greenhouse gas intensity from energy ended at 2.64 kg CO₂e per square meter in 2021 compared to 2.15 in 2020. This is mainly explained by increased energy consumption.

Entra's proportionate share of water consumption in 2021 was 308 m³ compared with 384 m³ in 2020. This 20 per cent decrease is a directly consequence of home office and Covid-19. Building water intensity was 0.11 m³ per square meter in 2021, compared to 0.14 m³ per square meter in 2020.

Entra's proportionate share of total waste created decreased by 16 per cent from 12,2 tonnes in 2020 to 10,3 tons in 2021. Most of this decrease directly reflects the activity at HQ due to Covid-19 and home office (effect on paper, food waste and waste to incineration).

Performance narrative on social

Diversity-employee gender is calculated as a percentage of female to men. In 2021 Entra made changes in the organizational structure resulting the female shares of Senior executives in 2021 was 29 per cent compared to 43 per cent in 2020. Diversity pay gender ratio is calculated woman to men.

Employee turnover over the past years have been stable. In 2021 Entra completed organizational changes which resulted in somewhat higher turnover. In 2021, 17 people started working in Entra and 26 people left the company. New hire rates are calculated based on people started in Entra divided on the number of employees by the end of 2021. Turnover rate is calculated based on people that left Entra divided on the number of employees by the end of 2021.

There've been zero injury on direct employees involving sick leave absence in our construction projects in 2021, and in 2021 two smaller incidents without sick leave related to management portfolio.

The Injury rate, Lost day rate and Accident severity rate are all calculated per 1,000,000 hours worked.

Location of EPRA Sustainability Performance in companies' reports

Entra reports the entirety of the EPRA Sustainability Performance Measures in its Sustainability Report, including a comprehensive EPRA sBPR table that uses the performance measure codes.

Reporting period

Entra reports both absolute and like-for-like performance measures for the two most recent years but may choose to report performance measures over a longer period in the future should this provide meaningful data.

Materiality

Entra has not conducted a materiality review for the EPRA performance indicators as we consider all the sustainability performance measures in the EPRA table to be material.

1: 1: NA = "Not applicable"

2: GHG Scope 1 emissions from fossil fuels and refrigerants are calculated using Returgass factor.

3: GHG Scope 2 emissions from use of electricity and district heating and cooling are calculated using a location based approach. For electricity, Nordic mix factor (based on calculated emission from the Nordic countries, weighted average from the last two years) is utilized.

4: GHG Scope 2 alternative Electricity emission - Market based method (Guarantee of Origin) according to GHG-Protocol

5: GHG Scope 3 emissions from travel, waste and water consumption are calculated using a location based approach and "Climate accounting for waste management" 2009, Raadal, Modahl and Lyring.

6: Entra's headquarters data is also included in the total portfolio as that Entra is a tenant at one of its own properties.

Definitions

12 months rolling rent	The contractual rent of the management properties of the Group for the next 12 months as of a certain date, adjusted for (i) signed new contracts and contracts expiring during such period, (ii) contract based CPI adjustments based on Independent Appraisers' CPI estimates and (iii) the Independent Appraisers' estimates of letting of current and future vacant areas.
Capital expenditure	Property related capital expenditure, split into four components: (i) Acquisition, (ii) Development, (iii) Like-for-like portfolio and (iv) Other. The components Development and Like-for-like portfolio combined ties to the line item Investment in the property portfolio in the investment properties rollforward, while the two other categories ties to separate line items in the rollforward.
Back-stop of short-term interest bearing debt	Unutilised credit facilities divided by short-term interest bearing debt.
Cash Earnings	Net income from property management less tax payable
Contractual rent	Annual cash rental income being received as of relevant date
EPRA NDV – Net Disposal Value	EPRA NDV is a NAV metric reflecting the IFRS equity including the full extent of the deferred tax liability as per the balance sheet, including fair value of fixed interest rate debt and excluding goodwill as a result of deferred tax.
EPRA NRV – Net Reinstatement Value	EPRA NRV is a NAV metric reflecting the IFRS equity excluding (i) deferred tax liability as per the balance sheet in respect of properties and financial instruments, (ii) fair value of financial instruments and (iii) goodwill as a result of deferred tax.
EPRA NTA – Net Tangible Assets	EPRA NTA is a NAV metric reflecting the IFRS equity including only the estimated real tax liability, and excluding (i) fair value of financial instruments, and (ii) goodwill and intangible assets as per the balance sheet.
Gross yield	12 months rolling rent divided by the market value of the management portfolio
Interest Coverage Ratio ("ICR")	Net income from property management excluding depreciation and amortisation for the Group, divided by net interest on interest bearing nominal debt and fees and commitment fees related to investment activities
Independent Appraisers	Akershus Eiendom / JLL and Newsec
Land and dev. properties	Property / plots of land with planning permission for development
Like-for-like	The percentage change in rental income from one period to another given the same income generating property portfolio in the portfolio. The figure is thus adjusted for acquisition and divestments of properties and active projects
Loan-to-value ("LTV")	Effective leverage, measured by total interest bearing liabilities, including debt, lease liabilities, pension liabilities and seller's credits, divided by total assets.
Management properties	Properties that are actively managed by the company
Market rent	The annualised market rent of the management properties, fully let as of the relevant date, expressed as the average of market rents estimated by the Independent Appraisers
Market value of the property portfolio	The market value of all properties owned by the parent company and subsidiaries. The figure does not include Inventory properties.
Net Asset Value ("NAV")	Net Asset Value the total equity that the company manages for its owners. Entra presents NAV calculations in line with EPRA recommendation, where the difference mainly is explained by the expected turnover of the property portfolio.
Net income from property management	Net income from property management is calculated as Net Income less value changes, tax effects and other income and other costs from residential development in associates and JVs
Net letting	Net letting is calculated as the annualised rent of new lease contracts plus lease-up on renegotiated contracts less terminated contracts
Net nominal interest bearing debt	Nominal interest bearing debt less cash and bank deposits
Net rent	12 months rolling rent less the Independent Appraisers' estimate of ownership costs of the management properties of the Group
Net yield	Net rent divided by the market value of the management properties of the Group
Newbuild	A new building on bare land
Occupancy	Estimated market rent of occupied space of the management properties, divided by the market rent of the total space of the management portfolio.

Outstanding shares	The number of shares registered less the company's own repurchased shares at a given point in time. EPRA Earnings and Cash Earnings per share amounts are calculated using the weighted average number of ordinary shares outstanding during the period. All other per share amounts are calculated using the number of ordinary shares outstanding at period end.
Period-on-period	Comparison between one period and the equivalent period the previous year
Property portfolio	Properties owned by the parent company and subsidiaries, regardless of their classification for accounting purposes. Does not include the market value of properties in associates and jointly controlled entities
Project properties	Properties where it has been decided to start construction of a new building and/or renovation
Redevelopment	Extensive projects such as full knock-down and rebuild, and projects where external walls are being materially impacted (e.g. taking a building back to its core or changing brick facades to glass).
Refurbishment	Projects extensively impacting an existing building, but not knocking it down or materially affecting external walls
Total area	Total area including the area of management properties, project properties and land / development properties
Total net nominal interest bearing debt	Net nominal interest bearing debt and other interest bearing liabilities, including seller's credits and lease liabilities for land and parking lots in connection with the property portfolio
WAULT	Weighted Average Unexpired Lease Term measured as the remaining contractual rent amounts of the current lease contracts of the management properties of the Group, including areas that have been re-let and signed new contracts, adjusted for termination rights and excluding any renewal options, divided by Contractual rent, including renewed and signed new contracts.

This is Entra

Entra is a leading owner, manager and developer of office properties and owns a large portfolio of centrally located, high quality properties in the largest cities in Norway. Our business is characterized by solid tenants on long lease contracts and a high occupancy ratio. Entra's project development portfolio is the key driver for our growth.

Mission

To create lively and sustainable workplaces facilitating job satisfaction and efficiency

Vision

The most satisfied people work in Entra buildings

Business idea

To develop, let and manage flexible, centrally located, environment-friendly buildings

Business strategy

Based on three pillars: profitable growth, high customer satisfaction and environmental leadership

Geographic focus

Oslo and the surrounding area, Bergen, Trondheim and Stavanger

Core values

- Innovative
- Responsible

Highlights in 2020

Q1 2020

In Q1, Entra finalised the new-build project in **Holtermannsveg 1-13 in Trondheim**, the first of three planned buildings on the landplot. The approved zoning allows total construction of approximately 48,000 sqm, where this first building is 11,700 sqm. The property is fully let and we aim for a BREEAM-NOR Excellent classification. The property was developed at a yield on cost of 6.3 per cent.

Due to the Covid-19 pandemic, Norway went into a partial lockdown from 12 March 2020. In this situation, Entra's top priority was to help to reduce the spread of the infection by following the advice of national and local authorities and to protect the health and safety of our community, our tenants and other users of our buildings, as well as our employees. Entra implemented the company's contingency plans, procedures and routines to ensure that the company continued to deliver operations, services and property management without interruption. Entra has sought to find individual solutions that gave tenants that struggled room to return to normal operation after the demanding period. Looking back, Covid-19 had in 2020 very limited impact on our financial figures, and our estimate is around 14 million, or 0.8 per cent of revenues in Q2-Q4 of lost revenues mainly driven by lower turnover based rent from certain tenants within co-working, parking and food&beverage.

During Q2, Entra started up two new redevelopment projects. In Grønland 32, a central riverside location in Drammen outside Oslo, Entra is refurbishing 5,000 sqm in an

Q2 2020

approximately 7,400 sqm office building. The project is expected to be completed in Q2 2021. The property is 100 per cent pre-let and is being developed at a yield on cost of 7.0 per cent.

In Tøyen in Oslo, Entra started refurbishing 10,100 sqm in **Hagegata 22-24**. The office space being refurbished makes up almost half of the building, and occupancy in the project space will remain at about 80 per cent during the construction period. The project is expected to be completed at the end of 2021. The property is 100 per cent pre-let and is being developed at a yield on cost of 5.5 per cent.

The key interest rate in Norway was reduced from 1.5 per cent to 0 per cent from January to April. Lower interest rates contributed to a significant yield compression in the Norwegian market during the second half of 2020, not least in Oslo, where eight of Entra's ten most valuable properties are located. Following the uncertainties from Covid-19, the activity in the transaction market was low during the spring, yields were relatively stable, and the yield gap increased. During the autumn, the activity in the transaction market picked up, and a number of transactions of relevance for the valuation of Entra's portfolio were completed. Prime yield in Oslo thus went from 3.60-3.70 to 3.25-3.30.

During Q4 2020 Entra started up five new development projects. In Bergen Entra started the redevelopment of 14,200 sqm in Møllendalsveien 6-8 in Bergen. Entra acquired this property in

Q3 2020

2019. The property is 44 per cent pre-let on a 10-year contract and is being developed at a yield on cost of 5.2 per cent.

Entra also started the redevelopment of 15,800 sqm in Stenersgata 1. This is the first phase of a redevelopment project comprising the office spaces this large combined office/shopping centre property where Entra owns the office part. The project is expected to be completed in Q2 2023 with a BREEAM-NOR Very Good classification. The project is 57 per cent pre-let and is being developed at a yield on cost of 4.5 per cent.

At St. Olavs plass 5 Entra started redeveloping a 16,500 sqm office property located near Tullinkvartalet in Oslo. The project is scheduled for completion in Q3 2022. The project is planned with a BREEAM-NOR Very Good classification. The project is currently 60 per cent pre let and is being developed at a yield on cost of 4.8 per cent.

In the core of Oslo's central business district, Entra started the redevelopment of 13,000 sqm in Tordenskiolds gate 12 for completion in Q3 2022. The project is currently 92 per cent pre-let and is being developed at a yield on cost of 4.4 per cent.

In Schweigaards gate 15 Entra started redeveloping the 22,900 sqm office building located near Oslo central station. The redevelopment is estimated for completion in Q2 2023. The project is currently 31 per cent pre-let and is being developed at a yield on cost of 4.7 per cent

Q4 2020

Entra also finalised the redevelopment and expansion project involving 4,300 sqm office space in Kristian Augusts gate 13. This has been a pilot pioneer project within circular economy and more than 80 per cent of the input factors in the project came from re-used materials. Occupancy is at 100 per cent and the property is let to the co-working operator IWG/Spaces. The project was developed at a yield on cost of 4.5 per cent.

The fourth quarter was influenced by the strategic interest in Entra resulting in two unsolicited, voluntary offers made by Castellum Aktiebolag and Samhallsbyggnadsbolaget i Norden AB («SBB») for all the shares in Entra ASA. On 29 January 2021, the Board recommended shareholders with a long-term view on their investment not to accept any of the offers as they stood. The conclusion was based on the Board's view of the company's capability to generate competitive returns in the future, the strategic merit of a focused Entra, and supported by the communicated positions of the two largest shareholders, Fastighets AB Balder and the Government Pension Fund Norway. Castellum withdrew their offer on 6 February 2021 and SBB withdrew their offer on 1 March 2021.

Letter from the CEO

A different year

2020 was a very different year where the Covid-19 pandemic influenced our lives in so many ways. The top priority of governments and society, as well as for Entra, has been to safeguard life and health and help to prevent the spread of the virus. As a result, a significant number of working hours were spent at the home office. We have had many discussions both internally and with our customers regarding how this will affect office use and the demand for office space going forward. When we at some point in time can put Covid-19 behind us, many people will continue to work more digital and from other locations than the office. However, a more distributed way of working also means that the office will play an even more important role as the common meeting place that manifests the company's identity and corporate culture. When reviewing the contracts signed in 2020, both ours and in the market in general, Norwegian tenants do not seem to have reduced their requirements for office space.

Also before the pandemic we experienced increased tenant focus on flexibility, digitalisation and the social dimension of the workplace. Now we can clearly see that these trends are accelerating. Through the pandemic we have learnt to appreciate the flexibility of being able to work from different locations and experienced the efficiency of digital collaboration tools. At the same time, the importance of personal, physical meetings and social contact has become very clear. We believe our customers to a greater extent will be looking for more hybrid workplace solutions supporting work from different locations, and also a combination of physical and digital meetings. Understanding and working with our customers on how we can design office solutions, products and services supporting a more flexible way of working will become even more important in the years to come.

In 2020, we marked Entra's 20 years anniversary as an independent company. Whereas we have had to postpone any physical celebration for later, we have had time to reflect on the company's history and development. Entra was separated from Statsbygg with a balance sheet of around 4 billion in 2000, which has grown to almost 60 billion in 2020. Entra's strategy has remained relatively intact over these years. The company has always focused on owning, managing and developing centrally located office properties with good qualities, has had a strong customer focus and was concerned with sustainability and the environment already back in 2000.

With this early focus on the real estate industry's effect on the environment, Entra has over the last 10 years taken the position as the environmental leader within our industry in

Norway. We have worked systematically to reduce carbon emissions, the energy consumption in the management portfolio has been reduced with more than 45 per cent and around 80 per cent of all waste is sorted. Entra also has a long history of developing buildings with high environmental qualities, and as of year-end as much as 58 per cent of our portfolio is, or in process of being, BREEAM certified. Of the projects we have completed during 2020, we are particularly proud of the innovative and circular redevelopment project in Kristian Augusts gate 13 in Oslo, where as much as 80 per cent of the input factors in the project came from reused materials. The real estate industry needs to find new solutions for a more circular economy, and this project has given us valuable experience and amongst other things led to simplification in the recertification of building materials.

Among the most critical success factors for all businesses are the people. Entra has a very robust, flexible and competent organization. We are privileged to have solid expertise in the entire value chain, and we are recognized as an industry leader in Norway. This year we are particularly proud of how the Entra organization, despite a challenging situation following Covid-19, has pulled together as a team, embraced digital collaboration tools and found new ways of working. We have kept our buildings safe and open for our customers throughout the crisis, and we had the technology and solutions in place to do the rapid switch to remote work in March 2020.

As a result, we are also this year able to deliver very satisfactory results. We have let a total of 195,000 sqm resulting in a net letting of 202 million in 2020. As of year-end, our management

Entra's portfolio and high-quality tenant base has proven to be resilient, and our letting activity through 2020 has confirmed the attractiveness of the locations and products we have put to market.

portfolio is close to fully let with an occupancy ratio of 97.9 per cent. We have finalised two and started seven new development projects. As of 31.12.20 our portfolio of ongoing projects contained 147,500 sqm, and we have a development pipeline of some 350,000-400,000 sqm that will provide significant revenue growth in the years to come.

Our income development was relatively flat in 2020 as several large properties were emptied during 2019 and 2020 and prepared to undergo redevelopment. The value of our property portfolio however, increased by 15 per cent from yield compression combined with solid project development and letting activities. For the past years, our sector has been well supported by yield compressions, low interest rates and market rental growth. With low vacancies, particularly in the Central Oslo market, and limited new-build activity, we believe rent levels will continue to grow. The transaction market is very active, and strong demand for Norwegian office properties continues. We have a very solid balance sheet and considerable financial resources to continue developing and growing the portfolio and the revenue base in the years to come.

Entra has a large, high quality property portfolio and a strong market position in an attractive Norwegian market. This resulted in significant strategic interest for Entra at the end of 2020 and beginning of 2021 and it is our impression that investors and the market increasingly have learned to appreciate the qualities in Entra's organization and portfolio.

The past year has been different and full of surprises. It is still too early to fully understand the effects of the pandemic on society, and the way we will work and use the office in the years to come. Entra's portfolio and high-quality tenant base has however proven to be resilient, and our letting activity through 2020 has confirmed the attractiveness of the locations and products we have put to market. The Entra organization has shown stamina and the ability to adapt through this challenging and very different year, and we are confident that Entra is well set to meet whatever the future will bring.

Oslo, 3 March 2021

The business

Entra is the largest investment alternative offering investors Oslo-focused, high quality office exposure. Approximately 75 per cent of the Company's portfolio by value is located in the Greater Oslo region with prime locations in connection with public transportation hubs. Since Entra was taken public in 2014, the portfolio has been refined through divestment of 8.3 billion of non-core assets, acquisitions of 8.2 billion and 9.5 billion of project investments which has resulted in an unparalleled portfolio of modern, efficient and large office assets.

The value of Entra's property portfolio as of 31 December 2020 was 56.7 billion, and the company's EPRA NRV was NOK 189 per share. The net yield on Entra's portfolio is currently estimated to 4.4 per cent. Entra has a strong balance sheet with a loan to value of 37 per cent and Baa1 credit rating with Stable Outlook from Moody's.

Entra offers investors superior cash flow visibility and quality with 58 per cent of rental income from public sector tenants with AAA credit rating and with a weighted average unexpired lease term (WAULT) of around seven years. The management portfolio has had a consistently high occupancy rate, currently at approximately 98 per cent. Entra's operational platform and service organisation has placed the company consistently in the top three in the annual public Norwegian Tenant Index ranking of Norwegian landlords. The Company has proved resilient during Covid-19 with payments in 2020 collected at near normal levels. Entra is exposed to a solid Norwegian economy supported by strong public finances and a property market with low office vacancy rates and expectations for continued rental growth.

Sustainability has been an integrated part of Entra's business model for more than 10 years. Entra is working actively to reduce the CO₂ footprint of its property portfolio and has a

firm ambition to become a net zero carbon company by 2030. Entra has developed several Powerhouses, office buildings producing more energy than they consume over their lifetime. In 2020, the company also redeveloped an office property where more than 80 per cent of the input factors came from reused materials. 23 of Entra's properties are BREEAM certified and another 11 properties are in process. Entra has achieved a Green Star rating with a score of 87 on the Global Real Estate Sustainability Benchmark (GRESB) compared to an average score of 70. Entra established its first green bond in 2016 and currently has around 48 per cent of its debt portfolio in green bonds and bank loans.

Profitable project development has been the Company's major lever for growth, and Entra and its project development organisation has a proven track record of delivering attractive new-build and redevelopment projects. In the period from 2015 to 2020, Entra invested a total of 9.8 billion across 20 projects with an average yield on cost of 6.3 per cent. The value of these projects upon completion was 12.3 billion, representing an increase of 26 per cent.

Entra has during 2020 started up seven and finalised two development projects and the portfolio of ongoing projects

Entra's strategy is built around the following three focus areas.

Profitable
growth

Customer
satisfaction

Environmental
leadership

as of 31 December 2020 consists of 9 properties totalling 147,500 sqm. In addition, Entra has a short-term pipeline of zoned projects totaling 90,000 sqm and a long-term pipeline of 250,000-300,000 sqm. The value potential of these newbuilds and redevelopment projects is only partly reflected in the company's net asset value (NAV).

Since the IPO in 2014, Entra has provided its shareholders with an annual total shareholder return of 21 per cent. Rental income has grown by 6 per cent p.a. and EPRA NRV per share has grown by 16 per cent p.a. (18 per cent if dividends paid in the period are included).

Vision

Entra's vision "The most satisfied people work in Entra buildings" has extended Entra's definition of customers to include all the people working in Entra buildings. Broadening the customer definition from around 700 tenants to the more than 40,000 users of Entra buildings provides new opportunities and has extended our strategic positioning and how we interact with our customers.

Strategy

Profitable growth

Entra has a solid track record of portfolio growth and value creation. During 2020, the value of Entra's property portfolio increased by 15 per cent to 56.7 million resulting from a strong underlying yield compression combined with solid project development and letting activities.

Entra signed new and renegotiated leases with annual rent totalling 508 million (195,000 sqm) in 2020, and the occupancy ratio was 97.9 per cent (97.1 per cent) at year-end.

Rental income was 2,353 million (2,338 million) in 2020. The relatively flat income development was negatively impacted by several large properties being taken out of operations for redevelopment. Net income from property management was 1,451 million (1,471 million). Net value changes was 5,705 million (1,955 million) and profit before tax was 7,274 million (3,735 million) for 2020.

Entra has throughout 2020 again demonstrated its ability to attract external debt capital on attractive terms from multiple sources of funding, and Entra's average interest rate was 2.38 per cent (2.99 per cent) at year-end.

Entra's dividend policy is to distribute approximately 60 per cent of Cash Earnings to its shareholders on a semi-annual basis. Refer to page 194 for a definition of Cash Earnings. The board of Entra proposes to distribute a semi-annual dividend of NOK 2.50 per share for the second half of 2020. Entra's total dividend for 2020 will then be NOK 4.90 per share compared to NOK 4.70 per share for 2019.

Customer satisfaction

One of Entra's goals is to provide the best customer experience. Entra takes full responsibility for property management in its properties and has a dedicated customer service centre to provide consistent and timely follow-up to enquiries. Entra works actively on maintaining good relationships with its

tenants in order to achieve high customer satisfaction and to maximise lease renewal rates. The Norwegian Tenant Index is used to measure customer satisfaction. In 2020, Entra again achieved an exceptionally high customer satisfaction score of 87 versus an industry average of 81. On environmental matters, Entra achieved a customer score of 87 compared with an industry average of 75, showing that our tenants truly value Entra's environmental efforts. The customer centre contributes to increasing customer satisfaction and forms the foundation for efficient management of properties.

Entra targets early engagement with its existing tenants ahead of their lease maturities and works together with its tenants to design workspace that meets their current needs and future requirements. Adopting to and making use of new technology has become a core priority in Entra.

Environmental leadership

Entra continues to implement and seek new environmental initiatives to meet climate-related challenges, to meet stakeholder expectations and to reduce costs. The Group has developed a corporate culture with a strong environmental focus throughout the whole organisation. Entra's environmental awareness and work to combat climate change is built on the precautionary principle. The Group's environment strategy includes goals and measures for the group, for its counterparties, for the property portfolio and for the development projects. The strategy has the following overall objectives:

- Entra shall become a net zero carbon company by 2030
- Entra shall influence and set requirements for its counterparties

- Entra shall be an environmental leader in property management
- Entra's development projects shall have a high degree of quality and flexibility and a low environmental burden

Entra has been a leader in the development of environmentally sustainable buildings and has had high environmental ambitions in all its projects. Entra's target is to achieve a rating of BREEAM-NOR Excellent or better for new and BREEAM-NOR Very Good or better for refurbishment/redevelopment projects. 58 per cent of the rental income and 58 per cent of the property values in the portfolio stem from properties that are or are in process of being BREEAM certified if projects currently under construction are included.

For many years, Entra has had a strong focus on reducing energy consumption in its portfolio. Through a number of measures of varying scope, Entra has managed to reduce the energy consumption of its management properties by 42 per cent since 2011. Energy consumption constitutes some 75 per cent of Entra's CO₂ footprint.

To provide insight for our stakeholders, we submit response to the Global Real Estate Sustainability Benchmark (GRESB) and were proud to achieve Green Star status with a total score of 87 in 2020.

For a further description of Entra's ESG strategy and achievements, see the separate section on ESG which is included in this annual report.

The property portfolio

Geographic exposure

Entra's management properties (i.e. not including the development projects) located in Oslo constitute 64 per cent of the portfolio values whereas the properties located in Trondheim constitute 10 per cent, Bergen 10 per cent, Sandvika 6 per cent, Stavanger 5 per cent and Drammen 5 per cent

As of 31 December 2020, Entra's property portfolio comprised 90 assets, and the market value of the portfolio was 56.7 billion. A full list of the properties can be found on pages 190 to 192.

Portfolio by area

Portfolio by value

Property management

The management portfolio

Entra's management portfolio consists of 73 buildings with a total area of approximately 1.05 million square metres. As of 31 December 2020, the management portfolio had a market value of around 49 billion (45 billion), and the occupancy rate was 97.9 per cent (97.1 per cent). The weighted average unexpired terms for the Group's leases were 6.9 years (6.8) for the management portfolio and 7.1 years (6.9) when the project portfolio is included. Entra focuses the portfolio on the major cities in Norway: Oslo and the surrounding region, Bergen, Stavanger and Trondheim.

Entra's properties are valued by two external appraisers (Akershus Eiendom and Newsec) on a quarterly basis. The market value of the portfolio in Entra's balance sheet is based on the average of the two external appraisers' valuation of each individual property. Valuation of the management portfolio is performed on a property-by-property basis, using individual DCF models and taking into account the property's current characteristics combined with the external appraisers' estimated return requirements and expectations as to future market development. The market value is defined as the external appraisers' estimated transaction value of the individual properties on the valuation date. The project portfolio is valued based on the same principles, but with a deduction for remaining investments and specific project risk on the valuation date. The land and development portfolio is valued based on actually zoned land.

Maturity profile of the management portfolio

(NOKm)

Year-on-year, the portfolio net yield decreased from 4.8 to 4.4 per cent. The 12 months rolling rent increased from 2,318 million to 2,329 million, whereas the portfolio market rent has decreased from 2,500 million to 2,444 million as a number of assets were taken out of the management portfolio for redevelopment during 2020.

	Properties #	Area sqm.	Occupancy %	Wault year	Market value		12 months rolling rent		Net yield	Market rent

Property portfolio	90	1 344 677		7.1	56 746	42 200					

See the section "Definitions". The calculation of net yield is based on the valuers' assumption of ownership costs, which at 31.12.20 corresponds to 7.2 per cent of market rent.

Letting and letting market

The letting market

According to Entra's consensus report for the fourth quarter of 2020, the office vacancy in Oslo has increased from around 5-6 per cent to more normalized levels at around 7 per cent. It is expected to remain at 7-8 per cent for the coming two years mainly driven by lower economic activity combined with some large projects being finalised in the Eastern Oslo fringe area. Overall average market rents have decreased slightly in 2020 but is expected to rise in the years to come. In the city centre of Oslo, the vacancy was only 3-4 per cent prior to the Covid-19 outbreak and is only marginally higher by year end. Rents levels have held up well during 2020. New supply is fairly limited also going forward. The letting activity picked up during the fall and modern and centrally located office premises continue to be attractive and obtain rents on the same levels as before.

In Bergen, the office vacancy is currently around 8 per cent. There is limited supply of modern premises in the city centre

and good demand. Rent levels in the city centre have increased over the last years, while there is a downward pressure on rents in the fringe areas.

In Trondheim, the overall office vacancy is currently around 10 per cent. Vacancy is highest in the fringe areas of the city. As in Bergen, rent levels in the city centre of Trondheim have increased over the last years, while there is a downward pressure on rents in the fringe areas.

The Stavanger area is more challenging due to the volatility in the oil and gas sector on top of the Covid-19 situation, affecting the region as a whole. Vacancy is currently around 11 per cent, and there is downward pressure on rent levels in the main oil and gas intensive areas. In the city centre, the vacancy is low, and there is an increasing demand for modern, flexible and centrally located office premises and rent levels appears to hold up well.

Market data Oslo

	2018	2019	2020e	2021e	2022e	2023e
Vacancy Oslo, incl. Fornebu and Lysaker (%)	6.1	5.5	6.9	7.6	7.2	6.9

Prime yield (%)	3.7	3.7	3.3	3.3	3.4	3.4

Source: Entra Consensus report, January 2021

Letting activity in 2020

For 2020, gross letting including renegotiated contracts was 508 million and lease contracts with a total value of 125 million were terminated. Net letting, defined as new lease contracts plus lease-up on renegotiated contracts less terminated contracts, came in at 202 million.

Quarterly net letting

(NOKm)

The largest contracts in 2020 were:

- New and renegotiated 17-year lease contract with University of South-Eastern Norway for 19,300 sqm at Papirbredden in Drammen
- New 10-year lease contract with Schjødt for 11,200 sqm in Tordenskiolds gate 12 in Oslo
- New 10-year lease contract with Sopra Steria for 10,500 sqm in Stenersgata 1 in Oslo
- New and renegotiated 10-year lease contract with Oslo Municipality for 10,100 sqm in Hagegata 22-24 in Oslo
- New 10-year lease contract with Statsbygg for 9,300 sqm in Biskop Gunnerus' gate 6 in Oslo

- New 10-year lease contract with Knowit for 7,200 sqm in Universitetsgata 7 in Oslo
- Renegotiated 10-year lease contract with Sopra Steria for 7,000 sqm in Biskop Gunnerus' gate 14A in Oslo

Occupancy in Entra's portfolio has remained stable during the year, and the Group had an occupancy level of 97.9 per cent as at 31 December 2020 compared to 97.1 per cent at 31 December 2019. The occupancy level was highest in Sandvika at 99.4 per cent and lowest in Trondheim and Bergen with 97.1 per cent.

Tenants and tenant structure

Entra's tenant base comprises to a large extent of public sector and high-quality private tenants on long-term leases. At year-end 2020, public sector tenants accounted for 58 per cent of total contractual rent. As of 31 December 2020, the management properties had around 700 tenants and the 20 largest tenants' share of Entra's rental income represents 43 per cent.

The following table sets out Entra's 20 largest tenants as of 31 December 2020.

Tenant	Proportion of total contractual rent	Public/private sector
Norwegian Tax Administration	5.4 %	Public
The Norwegian Public Roads Administration	3.3 %	Public
National Library of Norway	3.0 %	Public
University College of Oslo	2.9 %	Public
Oslo Municipality	2.8 %	Public
The Norwegian Armed Forces	2.6 %	Public

The Norwegian Environment Agency	1.2 %	Public
	43.4 %	

Projects and property development

The main growth and value lever for Entra stems from property and project development, and the company normally has 5-10 per cent of the portfolio in project development. The company has considerable expertise and experience in zoning, planning, building and redevelopment of office properties.

Projects completed in 2020

Holtermanns veg 1-13, stage 1

In Holtermanns veg 1-13 in Trondheim, Entra completed construction of a new office building in Q1-20. This is the first of three planned buildings. The approved zoning allows total construction of approximately 48,000 sqm, where this first building is 11,700 sqm. It includes a 2,000 sqm basement with parking facilities. The property is fully let. The property has high environmental ambitions and aims for a BREEAM-NOR Excellent classification.

Kristian August gate 13

Entra redeveloped the 4,300 sqm office property in Kristian Augusts gate 13. The project was a pioneer pilot within circular economy, and it demonstrates Entra's strong commitment to work for sustainable solutions. 80 per cent of the materials were re-used and the CO₂ emission from materials was reduced by 70 per cent. The project in total showed a 45 per cent reduction in CO₂ emissions vs. a standard reference building. The property is fully let to the co-working operator IWG/Spaces. The project was completed in Q4 2020.

Portfolio of ongoing projects

As of 31 December 2020, Entra had nine ongoing development projects exceeding 50 million, with total project area of around 147,500 sqm. These projects are presented below. A full list of the project properties can be found at the back of this report.

	Ownership	Location	Expected completion	Project area	Occupancy	Estimated total project cost ¹⁾	Of which accrued ¹⁾	Yield on cost ²⁾

¹⁾ Total project cost (including book value at date of investment decision/cost of land)

²⁾ Estimated net rent (fully let) at completion/total project cost (including cost of land)

Universitetsgata 7-9, Oslo

In Tullinkvartalet in Oslo, Entra is building a new 21,900 sqm office property in Universitetsgata 7-9 expected to be finalised in Q3 2021. Occupancy currently stands at 86 per cent and Entra has set high environmental ambitions for the project, aiming for a BREEAM-NOR Excellent classification.

Universitetsgata 2 - Rebel, Oslo

Next to Tullinkvartalet, Entra has the redevelopment project Rebel ongoing in Universitetsgata 2. Rebel will be a hub primarily for tech companies to be managed 50/50 by Entra and an external partner. The 28,100 sqm building will consist of office spaces, co-working areas, a conference centre and restaurants. Occupancy is currently 52 per cent, and the project is expected to be completed in Q3 2021.

St Olavs plass 5, Oslo

St. Olavs plass 5 is a 16,500 sqm office property located near Tullinkvartalet in Oslo. It is scheduled for completion in Q3 2022 and it is currently 60 per cent pre-let. The project is planned with a BREEAM-NOR Very Good classification.

Tordenskioldsgate 12, Oslo

In the middle of Oslo's central business district, Entra is redeveloping Tordenskiolds gate 12 for completion in Q3 2022. The property is 13,000 sqm and the project is 92 per cent pre-let.

Stenersgata 1, Oslo

Entra is also redeveloping 15,800 sqm of office space in Stenersgata 1. This is the first phase of a redevelopment project in the asset owned by Entra (offices) and Klepierre/ Steen&Strøm (retail). The project is currently 57 per cent pre-let. The project is expected to be completed in Q2 2023 with a BREEAM-NOR Very Good classification

Schweigaardsgate 15, Oslo

Schweigaards gate 15 is a 22,900 sqm office building located near Oslo central station. Estimated completion is in Q2 2023. The project is 31 per cent pre-let.

Møllendalsveien 6-8, Bergen

In 2019, Entra acquired Møllendalsveien 6-8 in Bergen. The 14,200 sqm property is currently being redeveloped and is 44 per cent pre-let.

Grønland 32, Drammen

In Grønland 32, a central riverside location in Drammen outside Oslo, Entra is refurbishing 5,000 sqm in an approximately 7,400 sqm office building. The project is expected to be completed in Q2 2021. The project if fully let.

Hagegata 22-23, Oslo

In Tøyen in Oslo, Entra is refurbishing 10,100 sqm in Hagegata 22-24. The office space being refurbished makes up almost half of the building area, and occupancy in the project space will remain at about 80 per cent during the construction period. The project is fully let and is expected to be completed towards the end of 2021.

Development sites and project pipeline

Entra's portfolio of development sites contains properties with zoned development potential, but where no project start decision has been made. As of 31 December 2020, Entra had six development sites with a total area of 128,195 sqm. A list of the properties with defined land and development potential can be found at the end of this report. In addition, Entra continuously works to develop and extend the area in its existing portfolio.

Transactions and transaction market

Transaction market

Total transaction volume for Norwegian commercial real estate came in above NOK 100 billion in 2020, of which office normally accounts for almost half. This is the second highest transaction volume ever in the Norwegian market, despite the activity being close to stand-still in the months following the outbreak of the Covid-19 pandemic in March. The current market is active, and both national and international investors report to be net buyers going forward. Property funds, syndicates and private property companies were the most active in 2020. For international investors, Norway is considered robust and low-risk, and the reduced financing costs and a weakened currency has made Norway more attractive.

The financing market continues to be well functioning, particularly for solid counterparties like Entra. Norway's central bank reduced the policy rate by 1.5 per cent to 0 per cent during the spring and as a result yields contracted significantly during the second half of 2020. Prime yield in Oslo is now estimated to be 3.25-3.30 per cent according to Entra's consensus report, and the spread to regional markets has narrowed with prime yield in Bergen reaching all-time low at 3.75 per cent.

Transactions

Entra actively seeks to improve the quality of its property portfolio. Entra focuses on acquisitions of large properties and projects in specific areas within its four core markets: Oslo and the surrounding region, Bergen, Trondheim and Stavanger. Target areas include both areas in the city centers and selected clusters and public transportation hubs outside the city centers, allowing Entra to offer rental opportunities at

a price range that fits its customer base. Entra's experience, financial strength and knowledge of its tenants makes the company well positioned to make acquisitions that meets these acquisition criteria. The acquisition and divestment strategy is flexible, allowing Entra to adapt to feedback from customers and market changes, and to create and respond to market opportunities as they arise.

Partly-owned companies

The vast majority of Entra's assets and development projects are wholly owned. In addition, Entra selectively gains access to properties and development projects through its shareholding in subsidiaries and jointly controlled entities. Entra's ownership interests currently include the following companies:

Papirbredden Eiendom AS (60 per cent)

Entra and Drammen Municipality own Papirbredden Eiendom AS. The company owns six office properties totalling 61,100 sqm and a future development potential of 60,000 sqm in Drammen.

Hinna Park Eiendom AS (50 per cent)

Entra and Camar Eiendom own Hinna Park Eiendom AS. The company owns three office properties totalling 36,000 sqm and development potential for two new office properties of 48,000 sqm. The company is consolidated in the Group's financial statements as Entra has a controlling vote on the Board of Directors.

Entra OPF Utvikling AS (50 per cent)

Entra and Oslo Pensjonsforsikring (OPF) own Entra OPF Utvikling AS. The company owns two office properties totalling 59,800 sqm. The company is consolidated in the Group's financial statements as Entra has a controlling vote on the Board of Directors.

Rebel US AS (50 per cent)

Rebel U2 AS will provide facility management services at Universitetsgata 2 in Oslo – with full-service solutions, flexible and short-term leases, co-working, conferences and events. In the financial accounts, Rebel U2 is classified as an associated company.

Oslo S Utvikling AS "OSU" (33.33 per cent)

OSU is a property development company that is undertaking primarily residential development in the city district Bjørvika, Oslo's CBD East. In the financial accounts, OSU is classified as an associated company.

Financing

The Group's financing is diversified between bank and capital market instruments. The interest-bearing debt of 21,146 million as of year-end has a diversified maturity structure, with an average time to maturity of 5.4 years (4.9 years). As a general principle, Entra's financing is based on a negative pledge of the Group's assets that enables a broad and flexible financing mix. Entra has strong banking relationships, and currently has significant business activities with five of the top six Nordic banks. Further, Entra has a strong presence in the Norwegian debt capital market as it is among the largest issuers in Norwegian kroner.

During the year, Entra's interest-bearing nominal debt increased by 1,245 million to 21,146 million (19,901 million). The increase in interest-bearing debt was mainly due to project investments. The change in interest-bearing debt comprised an increase in bond financing of 2,457 million and a decrease in bank and commercial paper financing of 612 million and 600 million, respectively.

The capital markets funding as at 31 December 2020 consisted of bonds and commercial paper outstanding of 14,057 million (11,600 million) and 1,200 million (1,800 million), respectively, which accounted for 72 per cent of total interest bearing debt. Bank funding of 5,889 million (6,501 million) represents the

remaining part of the financing mix. The Group's bank facilities are mainly revolving credit facilities at the parent company, which enable active liquidity management by adjusting the facilities according to any ongoing cash needs or surplus. The Group's liquid assets amounted to 217 million (317 million) as at 31 December 2020. As of 31 December 2020, net nominal interest bearing debt after deduction of liquid assets was 20,930 million (19,585 million). In addition, the Group had committed, unutilised credit facilities totalling 7,290 million (6,190 million).

Entra is obtaining increasing access to "green financing" from debt investors, banks and other financial institutions, and at 31 December 2020 48 per cent of Entra's funding was "green". Entra is well positioned to utilise this conditional and favourable capital source, as the development and management portfolio consist of many highly environment friendly and BREEAM certified properties. Entra is established as a high-quality Green Bond issuer and has currently issued six Green Bonds with a total outstanding nominal amount of 8,045 million. CICERO (Norway's foremost institute for interdisciplinary climate research) has certified the Green Bond Framework. Entra was awarded the rating Dark Shade of Green, which is the best rating possible.

Maturity profile and composition of interest-bearing debt

Maturity profile	0-1 yrs	1-2 yrs	2-3 yrs	3-4 yrs	4+ yrs	Total	%
Commercial papers (NOKm)	1 200	-	-	-	-	1 200	6
Bonds (NOKm)	812	2 500	2 800	1 195	6 750	14 057	66

Unutilised credit facilities (%)	-	-	21	23	57	100	

Interest rates and maturity structure

The Group's average interest cost as at 31 December 2020 was 2.38 per cent (2.99 per cent), and 50 per cent (59 per cent) of the Group's total interest-bearing debt was subject to fixed interest rates. At the same time, the average remaining term to maturity of the Group's interest rate hedging instruments was 2.4 years (3 years). The change in average interest rate stems mainly from lower Nibor interest rates and an increased exposure to floating rates in the debt portfolio.

The Group manages interest rate risk through floating-to-fixed interest rate swaps and fixed rate bonds. The table below shows the maturity profile and contribution from these fixed rate instruments, as well as the maturity profile for credit margins on debt.

	Fixed rate instruments ²⁾		Average credit margin	
	Amount (NOKm)	Interest rate (%)	Amount (NOKm)	Credit margin (%)
<1 year	1 050	3.4	5 061	1.08
1-2 years	1 350	1.8	2 500	0.74
2-3 years	1 450	2.2	2 800	1.07
3-4 years	1 300	2.4	2 535	0.92
4-5 years	1 700	2.3	1 450	0.75
5-6 years	3 310	2.1	1 200	0.86
6-7 years	1 050	2.1	3 500	0.96

Total	11 710	2.4	21 146	0.92

²⁾ Average reference rate (Nibor) is 0.34 per cent as at the reporting date.

Investment grade

Entra has a strong investment grade credit rating assigned by Moody's at Baa1 with Stable Outlook. According to the latest credit opinion, Entra's Baa1 long-term issuer rating reflects (1) its position as the largest office property company in Norway; (2) its leadership position in office properties in attractive locations on the fringes of the central business district (CBD) in Oslo; (3) its modern, high-quality property portfolio; (4) a clear, well-defined strategy to focus on offices in Norway's four largest cities and government tenants; (5) the large exposure

to highly creditworthy governments and public tenants with very long-dated average lease maturities and consistently high occupancy rates across all cities; and (6) good liquidity and a high unencumbered asset ratio.

The Moody's Baa1 rating contributes to a strong credit availability for Entra in domestic and international debt capital markets and enables Entra to maintain its debt maturity profile.

Financing policy and status

The Group has adopted a conservative financial strategy that secures financial flexibility throughout an economic cycle. In this respect, Entra's financial profile is characterised by a moderate loan-to-value ratio, strong interest coverage ratio, diversified debt maturity and an ample liquidity position. Entra targets a loan-to-value ratio which shall be below 50 per cent over time. The Group's loan-to-value ratio as at 31 December 2020 was 37.0 per cent, a decrease from 40.2 per cent at year-end 2019. The lower loan-to-value ratio is mainly due to positive value changes from both the management and project

portfolio. The interest coverage ratio increased to 3.4 in 2020 from 3.3 in 2019, an increase which mainly stems from a lower interest cost during 2020.

The Group manages financial risk in accordance with a framework included in the financial policy. The main financial risks, in addition to financial leverage referred to above, are interest rate risk, financing and liquidity risk. The Group's financial policy is revised at least on an annual basis.

Financial risk	31.12.2020	Financial policy
<i>Financial leverage</i>		
Loan-to-value (LTV)	37 %	Below 50 per cent over time
<i>Financing risk</i>

Risk management

Through owning, developing and managing properties, Entra is exposed to various risks that may affect the Group's ability to achieve the overall strategic targets and goals. Entra works continuously and in a structured manner to identify, monitor and manage these risks. The Group's risk management takes place through a structured analysis and decision-making process with the aim of creating a balance between the desire to limit uncertainty or risk and the task of creating growth and shareholder value.

Risk management aims to create a balance between the desire to limit risk and achieve defined objectives. To be able to estimate the effect of identified risks, an internal risk matrix is made where each individual risk is assessed, both from the perspective of effect and probability. The following 12 identified risks are viewed as the most important for the company to manage going forward.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Access to and price of financing Responsible: - CFO	A reduction in access to financing could weaken the company's global credit rating from Moody's, refinancing possibilities and ability to finance new investments. In such a situation, the company could be exposed to an increase in financing costs which would weaken the underlying result, debt service ability and dividend capacity. Greater risk aversion in financial markets could limit access to financing and weaken investor interest in the sector.	The development in the company's financing needs, ability and costs are monitored on a continuous basis and reported quarterly in business reviews in order to ensure that the financing operation supports the overall business strategy. We maintain strong relations with five of the top six Nordic banks and participants in the debt capital market. We maintain a diversified financing structure with a balanced maturity profile and financing mix in order to ensure stable and predictable access to capital. Entra has a strong investment grade credit rating assigned by Moody's at Baa1 with Stable Outlook. The rating contributes to a significant increase in credit availability for Entra in domestic and international debt capital markets and has enabled Entra to further extend its debt maturity profile. We have committed, unutilized revolving credit facilities in order to secure financing of debt maturities due in the next 12 months as well as interesting investment opportunities. We limit interest rate risk through interest rate hedges and by issuing fixed rates bonds. We monitor closely, and act upon, any new regulations in the bank and debt capital market with respect to possible implications for the company's future financing.	➡ The market for commercial real estate financing has been open and attractively priced during most of 2020, except for a two-month period during March and April where financial markets entered a state of turbulence and risk aversion amid the outbreak of the Covid-19 pandemic. Market interest rates are on historically low levels and are expected to remain at relatively low levels for an extended period of time. We believe that Entra will be an attractive borrower in the coming period based on the company's predictable cash flow, strong tenant base, low leverage and solid global credit rating.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Health, Safety & Environment Responsible: · EVP Project development	There is an inherent risk that Entra does not fulfill its statutory and ethical HSE responsibilities in its' business in connection with the operation of buildings, in building construction projects and as employer of its own staff. Entra's HSE policy states that «it shall be safe to work, visit and move in and around Entra's properties and building projects».	Entra's employees have the necessary HSE training and the right expertise: · All new employees are given HSE training and an introduction to Entra's HSE management systems · «The Entra School» covers statutory and Entra policy HSE training. Entra has an open, clear and systematic HSE communication, and HSE is a topic at all board, top management, and employee meetings. Entra has HSE control/ management systems to ensure that we comply with HSE requirements and internal routines · Entra has implemented HSE working routines/ instructions to reduce HSE risk, both in construction projects and property management · Entra's HSE management system is accessible by all employees, and by external parties when required · Incidents are reported both on construction sites and in our management portfolio, and HSE reports are used to identify and mitigate areas of risk · Continuous efforts are made to ensure a strong HSE focus with Entra's contract partners · Audits are made of selected construction projects, suppliers and topics · We have during the Covid-19 pandemic systematically taken proactive measures to comply with new legislation and best practice to fulfill Entra's HSE policy Entra continuously focuses on enhancing the safety culture in the organisation. Entra's HSE Manager elected to represent property developers in a steering committee for industry-wide HSE system	 Covid-19 affects all Entra's business areas. Appropriate infection control measures according to legislation and recommendations from the governments are implemented both in connection with the operation of buildings, in building construction projects and for Entra's own employees. Except for the Covid-19-situation, the ordinary HSE work has progressed as normal throughout the year. There is a strong focus on identifying and avoiding unwanted incidents at all levels in Entra. Severe incidents are followed up and investigated to ensure learning and future avoidance.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Development in value of property Responsible: - CFO	The property portfolio of Entra is valued quarterly by two external appraisers. A substantial negative development in the property value will affect both the profit and loss account through unrealized changes in value and through an increase in key figures like the loan to value ratio (LTV). A higher LTV could potentially have negative effects on Entra's cost of capital, access to capital and shareholders' interest and attention. During 2020, significantly decreased return requirements and increased demand for properties with solid tenants and long lease structures, have been the major drivers in the value changes of Entra's properties. Further, Entra have signed several contracts with solid tenants with long contract maturity in a major part of our project portfolio in the second part of 2020. The contract terms have been above or in line with the market expectations, which have led to a substantial value increase of these properties.	We follow up the risk quarterly through active dialogue and continuously monitor the market. We work continuously on portfolio optimization and risk mitigation in relation to geography, letting profile, segment, and «strategic fit». We focus on risk reducing measures in the portfolio, including rent levels, lease lengths, counter party risk, occupancy ratio, and the overall quality of the portfolio. We have an objective to keep LTV below 50 per cent over time, and we regularly simulate different negative scenarios in the market, which could affect the market value of Entra.	➡ The value of Entra's property portfolio has increased substantially in recent years, mainly as a result of lower yield requirements but also as a result of ongoing project completion, market rental growth and signing of new and renegotiated leases. During 2020, market rents has been stable, but lower return requirements especially for properties with long maturity and solid tenants has been a substantial contributor to the positive value changes in the property portfolio. The risk of an increase in the interest levels could make investors seek to other type of assets, which could affect the return requirements and further the value of the properties.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Occupancy ratio Responsible: - EVP Market and commercial real estate development	The occupancy ratio in the management portfolio affects Entra's bottom line through growth in rental income and lower operating costs. The occupancy ratio in the management portfolio relates mainly to lease expiries and to what extent we are able to renegotiate with existing tenants. In addition, projects that are completed with vacant space will affect the occupancy ratio. In the long term, the occupancy ratio is also affected by how flexible our buildings are to changes in customer demand. The occupancy ratio in development projects indicates the level of risk Entra takes when we make investment decision.	The occupancy ratio in the management portfolio and in the development project portfolio are important key figures in all external and internal reporting. Vacancies and market opportunities are monitored regularly and reported quarterly through a detailed overview of all forthcoming lease expiries in the next four years. Expiring lease contracts in the next four years, and the probability of renegotiation, are evaluated continuously. The largest customer accounts are followed up with separate "key account strategies". For all the major leases that expires during the next five years we focus on early involvement and broad contact with the relevant customers to identify future needs, flexibility related to increased/reduced space, and different ways of organizing the workplace. In all ongoing development projects, dedicated letting teams are established, consisting of letting, property and project resources. The letting teams work to ensure an optimized design and solution for the relevant building to attract new tenants. The occupancy ratio in projects is reported and followed up continuously and reported on externally every quarter. In the planning of future development projects, a separate early phase strategy is prepared in order to secure a flexible building and an attractive product independent of longterm workspace trends. Here, we combine markets and customer knowledge with building and operational expertise. In relation to Covid-19 implications, we are in regular contact with potential and existing tenants for direct customer insight, sharing relevant research, experience, analyses to better understand future needs and to reduce uncertainty.	 Following the uncertainty of Covid-19 for many tenants, several offers, negotiations and contracts were postponed, and some stopped. During the last half of 2020, activity picked up again. The occupancy rate in the management portfolio during 2020 has been consistently high and in line with, or better, than historical averages for Entra. In addition, the occupancy rate in the project portfolio was high throughout 2020. Expected decrease in overall market vacancy, particular in Oslo, limits the market risk in Entra's total portfolio. Major leases expiring in the coming years could affect the occupancy ratio. The increased focus from potential tenants on space/cost efficiency and various organizational changes can impact the occupancy ratio negatively on forthcoming renegotiations. Due to increased rent levels in Central Oslo, tenants in the public sector tend to look for alternative locations outside city center.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Customer satisfaction Responsible: - COO	Customer satisfaction affects Entra in different ways. A high score on customer satisfaction over time reduces the risk that tenants will move out of our buildings. A high level of customer satisfaction is an important competitive advantage in any negotiating situation, allowing us to focus on other value drivers than price. Customer satisfaction can also be affected by other factors, such as negative comments about Entra in the media, or other situations that affect the reputation of the company negatively.	Customer satisfaction is measured annually through the Norwegian Tenant Index and is recorded and tracked on individual tenant level. This index is used by a large part of the real estate sector and enables us to benchmark ourselves with our competitors. The survey is a good tool to evaluate and analyze areas for improvement and where we perform better than our competitors. Large customers are followed up through "key account strategies" where we have set out how different parts of Entra work systematically to ensure the best customers experience. Feedback from the customer satisfaction survey is used as a basis for an action plan on how Entra can further improve to meet customer expectations. We carry out regular «customer journeys» together with our large customers to evaluate our customer offering and identify areas of improvement. Entra continuously works to develop our product and service offering based on ongoing dialogue with our customers.	↓ In recent years, Entra's customer satisfaction has increased considerably. At the end of 2020, it was at a record high level of 87 points (area-weighted) two points up from last year. A customer satisfaction score of 80 or higher is considered very satisfactory across all industries. Entra has been above this level for six consecutive years, which supports the view that our systematic work on customer satisfaction is well established in the company's culture. On the other hand, we experience more demanding customers with increased service requirements. We also see both new and existing players in the real estate sector targeting our prime customers offering new concepts and services. This development supports our focus on continuously developing our product and service offering. Through a continually strong customer focus in the entire organization and solid deliveries in our extended service offering, we regard the risk of customer satisfaction moving below the targets we have set as low.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Project profitability Responsible: · EVP Project Development	Entra uses the net present value method to determine if a project is profitable using a discount rate that reflects the individual risk profile of the project. Project profitability is assessed continuously in relation to changes in financial key figures; mainly yield-on-cost and economic occupancy rate. Profitability is measured and reported against assumptions made at the time of the investment decision. Investments are also affected by several external factors that are outside the company's control, such as CPI growth, higher interest rate levels, changes in currency levels, taxes and duties, etc.	A thorough risk assessment exercise is performed before each investment decision. To reduce income risk, it is normally required that at least 50 per cent of the property is pre-let before project start. Working with one main contractor on a fixed price contract on each large project, including extensive use of turnkey construction contracts, reduces the risk of cost and time overruns. Mitigating Covid-19 risk by using local suppliers and materials, contractors, project managers and consultants, and therefore reduce dependence on global sourcing, public transport, as well as working with companies that have a good track record of handling the pandemic. Use of internal project managers to secure proper ownership, strong project management and key risk focus throughout the entire project. Financial parameters, quality and schedule performance are closely monitored and reported on regular basis for all ongoing projects. On all turn-key projects, we establish regularly meetings on business responsible management level with the main contractor with a proactive focus on identifying and mitigating risk and on cooperation climate in the project Letting plans for known vacancies are established before project start and continuously updated during the project development phase. Letting plans also includes Covid-19 measures.	↑ Entra's project management process enables us to mitigate risks and keep project profitability intact, also taking into account the following changes in risk assessment through 2020: · The Covid-19 pandemic has increased uncertainty regarding supply-chain disruptions, worker absences, and tenant demand. · For coming redevelopment projects, we plan for a lower pre-let occupancy rate upon project commencement compared to that in recent years. · In the next two to three years, we have several redevelopment projects, which normally have higher risk than newbuilds · Changes in tenant demand from the traditional office space rent model with long leases to more flexible lease contracts increasing income risk and affecting project profitability. · Several projects are likely to be multi-user buildings giving increased flexibility in respect of future reletting of buildings. Experience indicates that this increases the likelihood of cost and schedule overruns, and lower income in the first years of operation. · Falling construction costs as a result of lower demand for contractors, reduce the cost pressure we have seen in recent years.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Build and retain critical competence Responsible: - EVP HR and organization	The risk that Entra does not manage to maintain the expected personnel quality and capacity on critical deliveries within the company's core business.	The development and management of competence is an integral part of the business strategy. We have initiated measures on recruitment to secure relevant talent and applicants with future-oriented competence. We work systematically with talent development and succession planning. We follow up employees with individual plans to develop competence and career development, including, but limited to, the "Entra School". Our employees participate in professional networks and participate on external courses. We follow up employees with provision for competence and career development. We conduct an annual employee survey to measure the engagement and satisfaction of employees and develop action plans where required. We benchmark and assess compensation and benefits to ensure that we are competitive. Through the Covid-19 pandemic, we have systematically taken proactive measures to ensure the collective and individual experience of safety and support employees to facilitate productivity, motivation and professional development.	➡ Due to the Covid-19 crisis, we experience a higher focus on job safety and a general decrease in voluntary turnover during 2020 There is continued high level of activity in the property sector and a strong competition for talent and attractive candidates. Within certain areas of expertise, such as ICT/ digitalisation, building and environmental technology and technical management, we are experiencing strong competition in the labour market for leading edge competence.
Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Investment strategy Responsible: - CFO	Acquisition and divestments of assets, including portfolio rotation, is an important tool to achieve Entra's objectives. Particular risk factors identified include: - Diversification, including geographic, sector and type - Timing of transactions in relation to economic cycles and the lifecycle of the individual property - Access to development sites and property for development - Technical errors and incorrect assumption in valuations and investment calculations - Matters that are not revealed or overlooked in due diligence - Poor decision-making processes, including a lack of objectivity, an incorrect agenda/incentives, groupthink, the degree of risk appetite, and inadequate expertise	Our key employees have long experience from M&A combined with commercial real estate market knowledge. We evaluate each investment case by reference to strategy, risk and profitability. This is done at several levels, including the CFO unit, Entra's investment committee, executive management, and Board of directors. We review capital return requirement with the board at least annually, but more often if indicated by changes in macro and risk sentiment. We thoroughly scrutinize and verify assumptions in the investment model by different external and internal professionals. Financial models are always reviewed by at least two people. All investments exceeding 100 million must be approved by the Board of directors.	➡ The economic cycle appears to be in a recovery phase after the severe adverse impact from the Covid-19 pandemic outbreak. There is greater competition for sites/ development projects. There is still significant activity in the transaction market, and the buyer interest stemming from both domestic and foreign investors is very strong.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Compliance Responsible: - Chief Compliance Officer	Compliance is a compilation of Entra's specific assessment of risk factors within the compliance area. Entra's key risk factors within compliance are viewed to be the following: - Corruption and financial crime - Ethics - Social responsibility - Personal data protection - Insider rules - Information security	Risk assessment, monitoring, and follow-up is an integral part of Entra's operations on all levels, including the Board of directors, that discuss risk on a regular basis. Entra has a structured plan to follow up each key compliance risk, including, but not limited to, the following: Corruption and financial crime: - E-training program - Purchase and invoice controls - External and internal whistle blower channel Ethics: - Dilemma training - External and internal whistle blower channel Social responsibility: - Socially responsible purchasing - Procurement policy - Supplier controls Personal data protection: - Data processing agreements - Establishment/ follow-up of internal routines - E-training program - Focus on GDPR	➡ The overall compliance risk is perceived to be unchanged during 2020. The introduction of GDPR lead to, as expected, a potentially higher impact on risk through fines on companies that are not compliant with the regulations. Management has, however, worked diligently during 2018-2020 to ensure that the company is compliant regarding GDPR.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Information security Responsible: · EVP Digitalisation and Business Development	Information security risk includes the threats that an external or internal attacker exploits vulnerability in Entra's ICT systems, processes, building technology systems or applications in order to cause harm to the company and/or users of the company's systems. Information security risk deals with the requirement for reliability and security in relation to the transfer and storage of information, including, but not limited to: · Cyber security that covers securing information values that are vulnerable via access from ICT systems · ICT security that covers securing information and communications technology in relation to confidentiality, integrity and availability.	We focus on security and employees' knowledge and attitudes, including training of all of Entra's employees. To increase focus and improve understanding of ICT threats, Nanolearning (short, internet-based learning sessions) are implemented for all employees. We use suppliers with certifications that focus on security. Relevant vendors are reviewed for focus on security. We have outsourced the operational part of ICT security to one of Norway's top-class companies. We regularly carry out analyses of critical systems related to operation of our buildings and the company, and major systems are connected to the external ICT security company's platform and fire wall. We use a third party to carry out audits and testing of actual security on systems and users. We continuously close identified security gaps. A strategy and action plan for the next three years has been updated and the plan is being executed upon. As part of the plan, an information security management system is being implemented, and the role CISO (chief information security officer) is established. Entra has acquired a cyber security insurance with a global insurance company, in order to have the ability to use all recourse necessary if a serious incident occurs and to reduce financial risk.	 Increased cyber crime during Covid-19 pandemic. National Cyber Security Center (NCSC) reports an increase in specifically ransomware towards Norwegian companies. A new trend is that company data is threatened to be auctioned off unless ransom is paid. Increased and more sophisticated use of phishing and CxO fraud is a trend and is also noticeable in Entra; this requires more competent end users. Increased use of home office has escalated challenge to protect Entra users and Entra information. Entra's buildings are becoming more technologically sophisticated, and new technology also constitutes a possible increased security risk.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Climate related risk Responsible: - CFO	We consider short, medium- and long-term time horizons to be 0-3, 3-10 and 10+ years, respectively. Herein, we recognise that climate-related issues tend to manifest themselves over the medium to long term and that our properties have a lifetime of many decades. Regulatory changes imposed resulting from climate related risks are highly relevant and are monitored closely by Entra. Increased severity of extreme weather events such as storms and floods is a long-term risk. Property values constitutes most of Entra's balance sheet, and potential damage to property values could potentially be severe. Lagging behind with regards to new technology is a risk facing every company today on many levels, also climate related. Failure to comply and adapt to climate related matters is also a significant reputation risk which could result in e.g., lack of tenant interest, higher cost of capital in the financial market, and lack of ability to attract or retain talent. Also, not handling the company's corporate social responsibilities in an informed and good matter is a reputation risk, whereas the opposite is an opportunity. See also page 56-59 for a broader description of climate related risks facing Entra.	Entra's buildings are well maintained, and we build and refurbish buildings to higher standards than current regulation demand. All newbuilds and major refurbishment projects are certified according to BREEAM-NOR, and and we are well underway in certifying our management portfolio according to BREEAM-In-Use. We observe that green buildings get higher valuations, slightly higher letting price per sqm (believed to be a stronger trend going forward), and green financing is more favourable than traditional financing. We invest in new technology and methods for producing more energy of our own, and we actively seek to use technology to make our buildings smarter and greener. Technology is driving changes in how we work and has an impact on the space we occupy. Entra has a separate digital and technology department seeking to harmonise initiatives and drive the development. We actively work to reduce the CO₂ footprint, waste disposal, and energy consumption in our portfolio, and KPIs within energy efficiency and waste disposal are included in the scorecard for determining variable pay for all employees in Entra. The location of Entra's properties is not seen as particularly exposed to flooding. Damage to property from e.g. heavy rain is an integral part of risk management on individual asset level. When establishing outdoor façade scaffolding and weather protection superstructure for buildings, we focus on safe and "extreme weather" robust solutions. We engage in industry campaigns to build internal competence and enhance qualification processes for suppliers.	➡ During 2020, the main initiatives within the climate related risk area in Entra have been to do inspections and improvements on the facades and roof surfaces of several of the buildings. We have also done risk assessments regarding natural hazards on 16 buildings as part of the BREEAM in-use certifications. While the gross risk related to climate has increased, Entra has invested significantly in process improvements and technologies to reduce this risk. As such, we find that the overall risk is unchanged during 2020.

Risk factors	Description/definition	How we monitor and manage the risk	Changes in risk assessment during 2020
Changed use of, and demand for, offices Responsible: · CFO	The overall demand for office space is primarily driven by the number of office workers in the economy, the space required per office worker, and the time each spend at the office The number of office workers in general, at least over the medium and long run, follows the state of the macro economy within a country Space per employee has in the last decades been reduced following the introduction of open spaces and activity based working The extent that each office worker spends time, and thus requires a separate desk, varies greatly from tenant to tenant. Work-from-home has in the last decades increased in popularity but it has not, until Covid-19, been a significant part of the daily life for most Norwegian office workers	We closely monitor key macro variables, e.g., economic activity, investments levels, employment participation ratios and unemployment, interest rates, asset prices, etc, to be prepared for major changes affecting Entra's business Entra's property portfolio has during the last six years been focused on the largest cities in Norway where we assess that the growth potential of office activity is the largest and thus with lowest residual risk. Further, we have streamlined the portfolio towards office clusters in the central parts of these cities with excellent commute opportunities In all renegotiations, we work closely with our tenants to provide optimal solutions for them. During the last decade, the public sector tenants have taken steps towards reducing the office space per employee significantly, and we now see limited risk of further reducing the required space per employee in our portfolio consisting of approximately 58 per cent public tenants Increased co-operation with prospective and existing tenant through Entra's new in-house tenant advisory team During the Covid-19 pandemic, almost all office workers have worked at least part of the time from home. Whilst all of Entra's buildings have been kept open and available for our tenants, we closely monitor the usage of our assets and assist our tenants in easing their use of the office	↑ Whilst Covid-19 has reduced the economic activity in Norway during 2020, the underlying fundamentals for the Norwegian economy remain strong Covid-19 has also greatly increased the use of work-from-home, and there is a clear trend that the flexibility introduced with work-from-home is appreciated both by employers and employees. We believe, though, that the negative effects are not significant and thus fully manageable, as evidenced in a number of recent renegotiations in the Norwegian market during the summer/autumn where the new volumes required in most cases are equal to the volumes used prior to renegotiations. Thus, whilst work-from-home is clearly a negative contributor to the overall officed demand, the negative effect will at least be partly offset for the following reasons: · Employers / management have experienced that employees working in the office together with their co-workers are more proactive and creative. · The office has an important function with regards to organizational development and installing and maintaining the company's culture amongst the company's employees. This is particularly important with regards to the new hires · The costs of renting offices are normally a very small part of a company's cost base, estimated to around 5 + % of salaries and social costs for employees · Whilst most employees appreciate the flexibility by work-from-home, and particularly in the beginning of the pandemic, the trend is very clear that almost all employees prefer to spend at least a large majority of their working time at the office with their colleagues · In Norway, the typical day of working from home is Friday (and thereafter Monday). During mid-week, most employees are in the office, and the office design and volume must thus anyway be designed to fit almost 100 per cent of the employees · With Covid-19, and possible later pandemics in the coming years, the office designs need to take social distancing into account with desks further apart. In addition, it is our experience that most business require a significant increase in small meeting rooms (as it is difficult to do video meetings in open landscapes), which require more space · Time spent on commuting is limited for the majority of Norwegian employees seeing that we have smaller cities and well developed transportation infrastructure

Summary risk-matrix

^{*)} Both financial and/or non-financial effects

ESG in Entra

To operate our business in a sustainable manner is of key strategic importance to Entra and is seen as a prerequisite for the company's long-term results and value creation. Entra has a systematic approach towards understanding and managing the company's impact on society, as well as stakeholder requirements and expectations. This report highlights our 2020 activities in greater detail and outlines what we have planned for 2021.

Reporting standards and responses

To enable our stakeholders to compare and evaluate our reporting, we compile and align the ESG reporting for 2020 with three reporting frameworks: the European Public Real estate Association Sustainability Best Practices Recommendations on Sustainability Reporting (EPRA BPR), the Global Reporting Initiative Standards (GRI) and the Task Force on Climate-related Financial Disclosures (TCFD).

The EPRA BPR Guidelines provide a consistent way of measuring sustainability performance for real estate companies and cover environmental, social and corporate governance categories. The GRI Standards, applicable to all industries, include both relevant disclosures for a range of economic, environmental and social topics as well as reporting principles related to the reporting process. This report has been

developed in accordance with the GRI Core option. The TCFD framework provides for consistent climate-related financial risk disclosures. The EPRA, GRI and TCFD tables and references are included at the back of the annual report.

In this report we have also set out a review of our Environmental, Social and Governance (ESG) strategy relative to the UN Sustainable Development Goals (SDG).

We achieved the EPRA Sustainability Gold Level also in 2020 and the Global Real Estate Sustainability Benchmark (GRESB) Green Star status with a total score of 87, up from 84 in 2019.

Third party verification

Entra has engaged Deloitte to conduct a review and provide a limited level of assurance on Entra's ESG reporting. The review and assurance are carried out in accordance with the assurance standard ISAE 3000 "Assurance Engagements other than Audits or Reviews of Historical Financial Information" established by the International Auditing and Assurance Standards Board. The auditor's conclusion and scope of work is presented in the Auditor's report, included at the back of this Annual report.

Management approach

Sustainability is fundamental to Entra's strategy and has been so for more than a decade. The Board of Directors determine the sustainability strategy and review performance. This includes responding to climate related opportunities such as investment in renewables, improvements in energy efficiency and investment in low-carbon solutions. The Board also review and determine how to respond to different climate-related risks including policy, regulatory and legal risks, as well as the physical risks to our assets.

Entra's business units present business reviews to the Board of Directors at least on an annual basis. These reviews also include ESG targets and KPIs. Targets are then aggregated into company KPIs which are followed up on a regular basis.

The CEO is responsible for following up the implementation of the ESG strategy in Entra. Entra's risk management framework is structured to enable effective identification, evaluation and management of climate-related risk. Ownership and management of all risks is assigned to members of the corporate management, who are responsible for ensuring the operating effectiveness of the internal control systems and for implementing key risk mitigation plans. Implementation is mostly handled by the individual business units and is reported to the CEO/CFO through quarterly business reviews and in corporate management meetings.

Entra also has an ESG Committee with a separate responsibility to evaluate, follow-up and implement the ESG strategy as well as new initiatives. This Committee reports to corporate management on a regular basis.

Stakeholder dialogue

It is important for Entra to maintain an open and honest dialogue with its main stakeholders. Such dialogue provides valuable feedback and enables Entra to continue to improve, to build trust and to enhance its reputation.

A structured process towards selecting the report's content and confirming its validity is undertaken with various groups and individuals, in order to understand specific opportunities and concerns about our business and its impact. Such engagement is, amongst others, based on dialogue, meetings and feedback from business partners, shareholders, customers, investors, authorities and employees. Other sources of

information include an assessment of media and industry reports. In 2020, the materiality analysis and focus areas have been revisited and the validity confirmed by Entra's Board and management.

Entra's stakeholders are particularly concerned about how we handle environmental matters, governance, ethics and anti-corruption measures, our corporate culture and employee satisfaction and our role as a major owner and developer of properties in the largest cities in Norway.

Materiality analysis and focus areas:

Entra believes that a systematic approach towards understanding and managing the company's external factors is a prerequisite for future value creation. The main steps in selecting the focus areas involve identifying and understanding topics that are important to our business strategy and to our stakeholders.

The focus areas and priorities are based on a broader materiality analysis of areas where Entra and its stakeholders believe the company can make an important and sustainable impact. The topics are believed to be important for future progress and long-term value creation. The outcome of the analysis is in all material aspects similar to previous years and is illustrated on the next page.

Entra's main stakeholders

Materiality analysis

Focus areas

Based on the materiality analysis the following five areas continue to be seen as core to Entra. The work within each field is further described in this report.

Climate and the environment

Urban development

Motivated employees

Ethics and anti-corruption measures

Health and safety

Supporting the UN Sustainable Development Goals

As a major participant in the Norwegian property market, we believe that we have an important role to play in supporting Norway's response to the 17 Sustainable Development Goals (SDGs). To do this we have reviewed our sustainability strategy and program against the SDGs to highlight where we align.

We see the following goals as particularly significant to our business and how we operate: SDG 9 Industry, Innovation and Infrastructure, SDG 11 Sustainable cities and communities, SDG 12 Responsible consumption and production, and SDG 13 Climate action.

Goal 9: Industry, innovation and infrastructure

Entra focuses on innovation and actively seeks innovative environmental solutions for its properties and building projects. Entra focuses primarily on low energy consumption and renewable energy in the existing asset portfolio and in all of its projects, with an overall ambition that new and totally renovated buildings will have an energy consumption of less than 40 kWh per sqm. (close to zero energy buildings). Entra also seeks solutions for increased production, storage and exchange of renewable energy.

Goal 11: Sustainable cities and communities

Entra seeks to contribute to cities and communities that are sustainable, attractive, inclusive and accessible for residents and others that work or visit the area. We take an active role in developing the areas and public spaces around our buildings, and we ensure they are accessible to those with disabilities. We seek to use environment friendly materials and solutions when developing and operating our buildings. We seek solutions for re-use of furniture and materials, and we focus on making and maintaining our buildings climate resilient.

Goal 12: Responsible consumption and production

Entra sets performance requirements in its development projects which focus on the efficient use of natural resources, lifecycle efficiency and high levels of waste reduction and recycling. This is reflected in our management of our buildings where we set targets for waste sorting and place focus on re-use of materials in our projects.

Goal 13: Climate action

We have set science-based targets which are set towards not exceeding a 1.5 degrees Celsius rise in global temperature, in line with the Paris agreement. This means we are committed to reducing our carbon emissions and making sure our portfolio is climate-resilient. For a more comprehensive description of our work on taking climate action, please see the section on Environment below.

Environment

Environmental leadership is one of Entra's three strategic pillars and Entra has over many years developed a corporate culture with a strong environmental focus throughout the entire company. Entra's work to prevent climate change is built on the precautionary principle. Entra's environmental leadership has become well-known among its stakeholders, and the environmental commitment contributes to its ability to attract the best and most competent resources.

Environment strategy

Entra is currently working to develop and renew its environmental strategy and to set new short and long-term environmental targets. Entra is deeply committed to contribute to the transition towards a low carbon society. The revised environmental strategy will be finalised during 2021.

The revised strategy will build on the principles in the 2018-2020 strategy, but will amongst other initiatives involve a target to become Net Zero Carbon within 2030 according to the definitions and targets set out by World Green Building Council. Our continuous efforts to reduce energy consumption along with initiatives to produce green energy will continue to be a core element in the environment strategy in order to reduce emissions from the buildings in its operational phase.

Our focus on reducing emissions in our construction projects will be enhanced. For redevelopment projects a stronger focus will be put on retaining and upgrading existing buildings rather than demolishing and building new. It will be greater focus on which building parts can be reused in accordance with Entra's strategy for circular economy. CO₂ accounting will be applied for all construction projects in order to better evaluate and make use of low emission materials. Our long-term goal is to

have CO₂ emissions in our construction projects that are 50 per cent below the industry average, in accordance with the criteria's set in Futurebuilt Zero ¹⁾.

Entra will seek to make its property portfolio and construction projects in compliance with the requirements that will be set in the EU Taxonomy and is believed to be well under way.

During 2020, Norway's foremost institute for interdisciplinary climate research CICERO Center for Climate Research and CICERO Shades of Green ("CICERO") expanded the Shades of Green methodology for evaluating green bonds to also include companies, and made an analysis of Entra. The CICERO methodology was based on a solid quantitative and qualitative analysis of a company's entire business, where both revenues and investments were classified with a shade of green (or brown) depending on how they aligned with a carbon-neutral future. CICERO also evaluated the company's sustainability strategy, governance structure and climate risk adaptation. The report published in June 2020 showed that more than half of Entra's revenues and more than half of Entra's asset values achieved green color shades. All of Entra's new-build projects were considered dark green, which means that new investments are in line with a future low-emission society. According to the CICERO report, Entra achieves the best score on climate-related governance structure and on reporting routines and standards.

Entra's environment strategy 2018-2020

Entra's environment strategy for the period 2018-2020 has a 360° approach and includes strategies and targets for 1) own organisation 2) the property portfolio and property management 3) the development projects and 4) counterparties, hereunder suppliers and customers. The strategy and targets

Entra's portfolio by revenue and investments in 2019 as assessed by CICERO Green

Our environment strategy

are summed up in the figure above and further outlined in the following text.

Entra's business shall be climate neutral

Entra has a corporate culture where environmental awareness is strongly embedded at all levels in the organization. This is something that Entra will maintain and and further enhance and use as a lever in implementing an even broader environmental focus. Entra strives for a culture in which every one of the company's employees seeks to influence suppliers, customers and partners to make wise environmental choices. This means that Entra will work actively with concepts for increased environmental engagement and responsibility among its employees, customers and suppliers. Entra still has much to gain from reinforcing its focus on a circular economy and concepts that contribute to reduced consumption, reuse and recycling of building materials and waste handling.

Entra has an ambition to act as an example in relation to a lessee's environmental focus. As a consequence, Entra's head office in Oslo was in 2017 environmentally certified in accordance with the requirements set out in "Miljøfyrtårn" (Environment Lighthouse). The certification will be renewed in 2021. As an extension of this, Entra will work on influencing attitudes and

seek to lift everyone's awareness so that the company also is regarded as an environmental leader as an office user.

Entra's ambition is that operation of its buildings is climate neutral. Today, energy consumption amounts to approximately 75 per cent of Entra's direct CO₂ emissions in the management portfolio thus the most important single source in impacting our operational carbon footprint. From 2019 to 2020, Entra reduced its GHG intensity from 4.53 kg CO₂e/sqm to 4.45 kg CO₂e/sqm, mainly as a result of reduced energy consumption and greener electricity mix with lower CO₂ emissions. For several years Entra has communicated a target to reduce its direct CO₂ footprint by at least 70 per cent from 2015-2030 (Scope 1 and 2). This will be achieved through, among other things, reducing the energy consumption, replacing energy bought with green energy we have produced ourselves, phasing out environmentally harmful cooling media, reducing the quantity of waste, and focusing on green transport. The rapid developments taking place within solar and battery technology contribute to our optimism in this regard. The revised environmental strategy that will be finalised in 2021 will as stated above build on the principles in the 2018-2020 strategy. It will amongst other initiatives involve a target to become Net Zero Carbon within 2030 according to the definitions and targets set out by World Green Building Council.

The calculation and projection was made by CEMAsys.com and Entra in 2017, and the CO₂ factor for electricity used in the calculation is based on Electricity Nordic mix.

Entra scenario; Minimum reduction to comply with the Paris agreement

In order to compensate for emissions from electricity used in our buildings and make Entra's business close to climate neutral Entra buys guarantees of origin ("green power") corresponding to the electricity consumption of its buildings. Entra will also gradually produce more and more renewable energy through new development and refurbishment projects.

Entra has also carried out a number of green measures in its buildings, and this has been an important contributor to succeeding in reducing energy consumption. These measures have, amongst others, been financed through green benefit agreements under which lessees have contributed to the financing through part of the reduced energy costs being used to finance the measure. Entra sees continued possibilities for implementing green measures, for example by using roof and wall surfaces for producing solar power. This type of investment usually has a long payback period, and Entra has adopted a slightly lower return requirement in relation to environment investments and innovation that protects the environment.

Entra shall influence and set requirements for its counterparties

Entra will work actively to influence and set requirements for its suppliers, customers and other interested parties to contribute to the "green transition". Specifically, this means that Entra prefers partners that also have a clear environmental profile and will put the environment on the agenda in meetings with their counterparties. Entra sets environmental requirements on its suppliers and partners through conditions on purchasing and social responsibility. Entra has imposed a total prohibition on the use of materials hazardous to health and the environment that are on the Substance of Very High Concern (SVHC) list and works towards fossil-free construction sites.

Entra seeks to increase awareness of the environment among users of its buildings. Not only its customers, the tenants of the

FOCUS AREAS AND TARGETS PURSUANT TO THE ABOVE ARE SUMMARISED BELOW:

Focus areas	Targets and measures
Environmental awareness is part of our corporate culture	• Work to improve expertise and increase environmental awareness and responsibility among the employees • Encourage employees to choose environmentally friendly transport
Climate neutral operations and property management	• Work actively to reduce the CO₂ footprint, target to reduce this by at least 70 per cent from 2015 to 2030 • Gradually replace energy bought with renewable energy produced by ourselves • Climate compensate for ongoing CO₂ emissions by: • Buying guarantees of origin for all electricity used in our buildings • Phasing out all cooling media that are not climate-friendly • Focus on innovation, consider lower return requirements for environmental investments
Environmental leadership is an important part of our social responsibility and reputation	• Attract the most competent and innovative people and partners • Make our environmental commitment known to our counterparties • Continue to issue green bonds and secure green bank financing where applicable
Environmental certification and reporting targets	• Organisation and head office certified in accordance with "Miljøfyrtårn" (Environment Lighthouse) process • Retain GRESB "Green Star" • Retain EPRA Gold • Retain CICERO rating "Dark shade of Green" • Ownership and follow-up of environmental targets in the regions and project development

FOCUS AREAS AND TARGETS PURSUANT TO THE ABOVE ARE SUMMARISED BELOW:

Focus areas	Targets and measures
Set environmental requirements for our suppliers	• Environmental requirements in Entra's conditions for purchasing and social responsibility • Requirements for reduced waste quantities, reuse and recycling • Require a prohibition on the use of materials hazardous to health and environment • Put the environment on the agenda in meetings and contracts with suppliers
Increased environmental awareness among users of Entra's buildings	• Carry out environmental measures that are visible and inspiring for people that work in and visit our buildings • Facilitate for customers to carry out own environmental initiatives such as energy and waste management • Enter into "green benefit agreements" with our customers
Share our expertise and experience	• Hold lectures, contribute to technical bodies, industry cooperation, industry organisations etc.
Contribute to sustainable and good urban development	• Contribute to relevant environmental solutions in property and urban development, with good transport and energy solutions, climate adaptation and greater biological diversity

buildings, but also their employees and visitors are included in this definition.

Entra seeks to implement environmental measures that are visible and inspiring for the people that work in our buildings. We will also create conditions for our tenants that enable the implementation of environmental measures, both by tenants individually and in cooperation with Entra through other initiatives. An example is waste sorting where Entra has developed waste sorting stations and supporting material/information brochures. This initiative also underpins Entra's ambition to achieve at least 70 per cent waste sorting on its operations of properties.

Green Benefit Agreements

These agreements are Entra's own scheme for working with customers on environmental measures. Entra's role is to identify the potential together with customers and then implement and finance the measures. Customers refund the cost through an increased rent for a set period of time on the basis that the customer's share of operating costs is reduced by more than the increase in rent. Once the initial investment has been paid down, the customer receives the benefit through lower common costs. Since 2011, Entra has signed more than 100 Green Benefit Agreements with its tenants.

In addition, Entra will continue to focus on reduction, reuse and recycling when making tenant alterations and furnishing premises and common areas, and will seek to influence customers and suppliers to make the right environmental choices.

Entra has been successful in making its environmental commitment known to its counterparties, and has shared, and will continue to share, its expertise and experience with the industry.

Membership of associations

Entra participates actively in various technical bodies, industry cooperation and industry organisations such as Powerhouse collaboration, Næring for Klima, Norwegian Green Building

Council, Norsk Eiendom and Norges Bygg og Eiendomsforening (NBEF). Entra has signed up for Oslo European Green Capital Industry Challenges and participates in R&D projects such as "Svalent" together with Sintef and in a cooperation project with Obos, Norsk Gjenvinning and CSR Consulting regarding industrial solutions for upcycling of materials.

Entra shall be an environmental leader within property management

Entra shall have a continuous focus on environmental measures in the management portfolio.

Entra uses an environment management system to compare, follow-up and control the various buildings' environmental qualities with a focus on the consumption of energy and water, as well as waste and waste sorting. Entra has BREEAM-in-use certified the asset performance and management of 15 buildings in the portfolio of which 11 are certified Excellent and four Very Good. Entra has another seven Breeam-in-use certifications ongoing as of year-end 2020. In addition Entra has BREEAM NOR certified 15 of its newbuild and redevelopment projects.

Over time Entra has built a culture in which energy management is an integrated part of its operating organisation. Entra has worked diligently to reduce energy consumption in its portfolio (from 202 kWh/sqm. in 2011 to 118 kWh/sqm. in 2020). Energy consumption in 2020 was particularly low as activity in the buildings was significantly reduced during periods of lock down resulting from the Covid-19 pandemic. An important reason why Entra has succeeded in this work is focused and systematic work and technical upgrades over time, supported by an energy management system which has made it possible to measure, compare and follow up various initiatives. Entra has operational staff with high technical competence who have a daily focus on deviations and energy use. Entra is now at a level where continued reductions in consumption must primarily be driven through technological development and continuous upgrading of the management portfolio to green buildings.

Energy consumption in the portfolio 2011-2020

kWh/sqm.

Internal measurement method used, deviates from EPRA methodology as corrected for differences in e.g. outside temperature.

Entra will maintain its focus on reducing energy consumption in its management portfolio and has a target to get below 127 kWh per sqm. in 2021. Entra works to reduce load on the energy grid and lower costs in relation to energy intensity in the portfolio.

Entra will continue to drive a culture where all Entra employees work systematically on all aspects of a circular economy – i.e. reducing, reusing and recycling. This means that Entra will focus on reducing the quantity of waste in buildings as well as looking at solutions for multi-use and reuse. Examples of this are paperless offices, a reduction in food waste in canteens, as well as a focus on reuse in relation to tenant alterations. Entra has set specific ambitions in relation to residual waste, the degree of sorting and water consumption.

In 2019 Entra did a pilot project and implemented solar panels on the roof and facades of Professor Olav Hanssens vei 10 in

Stavanger. In 2020 Entra started an investigation of all its roof surfaces in order to plan for potential implementation of solar panels, solutions for surface water and biological diversity and also to consider the climate risk.

Part of Entra's strategy is to own properties close to public transportation hubs. Entra thus encourages its tenants' employees to use public transport, to cycle or to walk when commuting. All Entra's buildings will have provision for bicycle parking.

Entra's new-build and renovation projects shall be characterised by high quality, flexibility and a low environmental burden

Entra is a leader in developing environmentally sustainable buildings and has for many years had high environmental ambitions on all its development projects. In cooperation with the Powerhouse collaboration, Entra has redeveloped five older buildings to "Plus buildings/Powerhouses" at Kjørbo in Sandvika and at Brattørkaia in Trondheim a new-built Powerhouse was finalised and opened during 2019. A Powerhouse produces more energy than it uses over its lifetime, including the materials used for construction. In practice, the buildings therefore act as local power stations that deliver environmentally-friendly energy. Entra has thus contributed to increased focus of the entire industry to consider "virtually zero use of energy" on both new buildings and redevelopment projects.

Entra's new buildings are BREEAM-NOR certified, with a goal of obtaining, as a minimum, BREEAM-NOR Excellent, while for redevelopment projects the objective is a minimum of BREEAM-NOR Very Good. This requires, among other things, analysis of life-cycle costs, low energy consumption, a good internal climate and innovative measures. On completion of buildings currently under construction and ongoing certification processes Entra will have BREEAM-NOR built/redeveloped 19 buildings and BREEAM In-Use certified 22 buildings.

FOCUS AREAS AND MEASURES PURSUANT TO THE ABOVE ARE SUMMARISED BELOW:

Focus areas	Goals and measures
Good environmental leadership	• Use environment leadership system for control, comparison and follow-up of individual buildings (Optima)
Reduced energy consumption and intensity	• Target 140 kWh/sqm. 2019, 135 kWh/sqm. in 2020 and 127 kWh/sqm. in 2021 • Increase proportion of self-produced green energy
Reduce peak load	• Focus on load control in order to reduce energy demand during peak usage times
Reduce and recycle waste and water	• Target 70 per cent waste sorting in property management and 80 per cent in development projects • Reduce water consumption
Environmental measures	• Strategy for roof surfaces and facades • Make provision for bicycle transport • Actively seek innovative and environmentally friendly solutions

At Tullinløkka in Oslo, Entra has completed the first full-scale reuse project in Norway involving redevelopment of 4,300 sqm in Kristian Augusts gate 13, of which 900 sqm was added as new volume to the original building.

The real estate industry needs to find new solutions for a more circular economy and reuse building materials and inventory at a completely different level than today. Through this project Entra has proven that reuse is possible and has documented significant environmental benefits.

In this project 80 % of all the input factors came from re-used materials, both from the existing building itself and from external parties and projects. Windows, toilets, fancoils and ceiling tiles were taken from buildings ready for demolition around the city. Hollow core slabs from the Government quarter were used as new

floor separators and stairs were taken from a public pool being renovated in Oslo. It has been challenging to find all the pieces of the puzzle and to get necessary certifications to comply with regulatory requirements, but the environmental benefits are significant. The reduction in CO₂ emissions from materials used was 70 % and the CO₂ accounts showed a 45 % reduction in CO₂ emissions compared to a standard reference building.

In Entra we are very proud of this project. It is a pioneer pilot project within circular economy that the entire industry as well as regulators both in Norway and across Europe has their eyes on. Following this project there has been simplifications to regulatory requirements for recertification of materials. This is an innovation project developed as part of the municipality of Oslo's Future Built program and the key learnings including the CO₂ accounts for the project has been documented and made available for the public.

BY RENTAL INCOME

BY VALUE

Entra's new buildings and redevelopment projects shall be planned and built in accordance with Entra's specifications - the "Entra building". This is to ensure high quality and lower costs. In the "Entra building", focus is placed on standardisation that will give reduced costs in a life cycle cost perspective (LCC) and operating synergies. Standardised technological systems in the buildings will also simplify integration with new "smart building" technology. Entra is working with requirements for materials with low CO₂ emissions and low life-cycle costs. Planning will provide for flexible solutions, and multi-use and reuse of materials will be a focus area. Entra also plans to develop a

standard delivery description for tenants where these factors are taken into account.

Entra applies for and receives financial support from Enova for individual environmental measures taken in its development projects. Entra received NOK 28 million in support for its development projects in 2020.

FOCUS AREAS AND MEASURES PURSUANT TO THE ABOVE ARE SUMMARISED BELOW:

Focus areas	Goals and measures
Standardisation and environmental requirements in projects	- Continuously develop and update the standard specification for projects (the "Entra building") - Develop a standard specification for tenant requirements - Set requirements for fossil-free construction sites and request fossil-free transport - Establish a strategy for all development projects in Entra with the following objectives: - request and facilitate flexible solutions and multi-use premises - requirements for reuse of materials, reduction of waste quantities and degree of sorting - more materials with low CO₂ emissions (documented through Environmental Product Declaration (EPD)) - choice of building products with low life cycle costs (LCC) - The environment strategy for the project is to be presented as part of the investment decision and reported in Business Reviews
Certification	- Objective of a minimum of BREEAM-NOR Excellent on all new development projects - Objective of a minimum of BREEAM-NOR Very good on major redevelopment projects
Focus on renewable energy and low energy consumption	- Ambition of close to zero energy buildings (energy consumption less than 40 kWh/sqm.) - Plan solutions for increased production, storage and exchange of renewable energy
Innovation	Actively seek innovative and environmentally friendly solutions

THE ROADMAP TOWARDS 2050 BY THE GREEN BUILDING COUNCIL ("GRØNN BYGGALLIANSE")

Entra has signed up to "The Roadmap towards 2050 for the Property Sector" by Grønn Byggallianse and Norsk Eiendom. Entra complies with and follows the 10 immediate measures set out in the Roadmap and listed below:

Measure	Status
Certify the organization	Entra's headquarter was certified as Miljøfyrtårn in 2017 and will be re-certified in 2021
Remove fossil heating in buildings	Completed on all Entra's properties except of four buildings where it is used bio-oil on peak-load.
Only buy building products that do not contain hazardous substances	Covered by Entra's sustainable purchasing procedures
Introduce BREEAM In-Use as a management system for the entire portfolio	22 properties certified or in process of being BREEAM In-Use certified.
Conduct a study of what the roofs can and should be used for	Study will be completed in 2021
Demand and reward innovative environmental solutions	Request and demand innovative solutions in new-build development projects.
Require architects to make plans for re-use of materials and minimize waste.	Implemented in several of our projects. Possibilities investigated on a project by project basis
Order energy budgets to calculate real energy use	Implemented in Entra's standard technical requirements
Demand and prioritize building products with low CO ₂ emissions	Implemented in several of our projects. Possibilities investigated on a project by project basis
Demand fossil free construction sites	Implemented in several of our projects. Possibilities investigated on a project by project basis

Green Bonds

Entra has issued six Green Bonds, capitalizing on the environmental qualities in a selection of its portfolio. CICERO Center for International Climate Research (Norway's foremost institute for interdisciplinary climate research) has provided a second opinion to Entra's Green Bond Framework where Entra was awarded the rating Dark Green, which is the best rating possible, for its future Green Bonds issues.

The rating Dark Green is given to projects and solutions that realise the long-term vision of a low-carbon and climate-resilient future already today. Typically, this will entail zero-emission solutions and governance structures that integrate environment concerns into all activities. Example projects include renewable energy projects such as solar or wind.

Climate risks and scenario analysis

Climate change and environmental damage are two of the most dramatic challenges facing the world today, and many countries are already feeling the effects of climate change. In our part of the world, the changes in the Arctic region are particularly dramatic and worrying.

"Based on the overall assessment of the project types that will be financed as well as governance, reporting and transparency considerations, Entra's Green Bond Framework gets a *Dark Green shading*.

No significant weaknesses perceived."

– CICERO, Second opinion

Climate change means climate risk, not only physical risk but also transition risk – the risk associated with economic impacts of the transition to a low carbon economy. Future social developments, climate policy developments and technology developments are subject to significant uncertainty, and these

factors have a major impact on greenhouse gas emissions. There is also uncertainty on how much the temperature will rise and which climate scenario we will face in the years to come.

The analysis of economic implications of climate change is fraught with difficulty, and it is impossible to survey all potential impacts of climate change as no existing scenario or model can fully describe the workings of the entire physical world and how all physical, chemical, geological and biological processes influence each other. Current societies and ecosystems have taken many millennia to adapt to the world in which they exist, and it is impossible to predict how people and societies will respond when faced with rapid and large changes in their surroundings. Impacts of climate changes will thus depend on how rapidly they occur, how large the changes are, as well as the adaptability of societies and ecosystems. As such, many analyses are based on factors that lend themselves to some degree of quantification, but climate change will also have effects which are difficult to quantify, or which cannot meaningfully be quantified.

In the Official Norwegian Reports (NOU) 2018: 17 “Climate risk and the Norwegian economy”, a report from a commission appointed by Royal Decree to assess climate-related risk factors and their significance for the Norwegian economy, three stylised future scenarios shed light on a wide range of potential outcomes:

1. *“Successful climate policy scenario”* involves a successful climate policy that delivers a swift transition to a low-emission society. No significant self-reinforcing mechanisms in the climate system are triggered, thus implying that the climate changes are moderate, and the worldwide economic implications are relatively minor. However, the transition to a low-emission society may be challenging for various stakeholders.
2. *“Late transition scenario”* involves late climate policy tightening – following a period of further warming. We are, at the same time, «lucky» – and no self-reinforcing mechanisms in the climate system are triggered. The climate changes and economic implications are considerably more pronounced than in the above scenario. There is a higher risk that the Norwegian economy will be indirectly affected by climate changes in other countries as the result of conflict escalation, diminished international cooperation and changes in global migration patterns. In addition, belated and more severe policy tightening will increase the risk of financial instability.
3. *“Dramatic climate change scenario”* is involving political failure and/or the triggering of self-reinforcing mechanisms in the climate system. The economic implications of such catastrophic climate changes cannot be meaningfully quantified. Risk management advice would be of minor use, and the relevant measure is quite simply an effective climate policy that reduces the probability of ending up in this scenario.

As such, a catastrophic climate change cannot be excluded. If critical tipping points are crossed, it may trigger self-reinforcing processes that entail major changes. The IPCC special report on 1.5°C warming indicates that some tipping points may be crossed between 1.5 and 2°C global warming.

As investments in commercial real estate, at least in the longer term, is very closely linked to macro development, understanding the environmental impact on Norwegian macro is also key for Entra.

The considerable uncertainty with regard to international developments means that the range of potential outcomes for the Norwegian economy is very wide. Over the long time horizon, the risk outlook will be dominated by the indirect physical risk associated with how the climate change affects other countries. However, direct physical risk and transition risk may also become important, especially the direct and indirect effects of changes in the value of the petroleum wealth.

A moderate level of global warming and climate change will have both negative and positive effects on the Norwegian economy. Countries in the Northern Hemisphere are generally less exposed to direct negative effects of climate change than are poorer countries in the South. Moreover, rich countries like Norway will by and large have more well-functioning institutions, a higher level of education and a more diversified industrial structure. Higher income levels and flexible labour markets imply a greater capacity for absorbing transition costs whilst transitioning to a low-emission society. Norway seems less vulnerable to climate change than most other countries and is also held to be one of the best placed countries with regard to adaptability.

However, the Norwegian economy is highly integrated into the global economy and directly exposed to developments elsewhere. If already vulnerable states experience major negative effects from climate change, there will be an increased risk of political instability, humanitarian disaster and violent conflict in and between states. Increased migration flows, unstable food prices, supply disruption and changing production and trading patterns will affect both the global and the Norwegian economy.

An overall assessment of the key risk factors nonetheless indicates that the Norwegian economy can, all in all, be considered relatively resilient. The ND-GAIN Country Index, a program of the University of Notre Dame’s Environmental Change Initiative, uses two decades of data across 45 indicators to rank 181 countries annually based upon their vulnerability and their readiness to successfully adapt to climate change. The graph for 2018 is shown below where Norway is indicated in green (Source: <https://gain.nd.edu/our-work/country-index/matrix/>)

Entra has an active approach to assessing, monitoring, and following up on climate related risk, and climate risk is, together with other risks, a topic at the Board of Directors meetings at least two times per year. Actions and follow-ups from the assessments is being acted upon by the organization, including, but not limited to, ensuring that Entra’s portfolio of assets are prepared to the extent possible for the possible challenges ahead.

In assessing the specific climate risk facing Entra, we have grouped the risks in two; (i) physical climate risk, and (ii) transition risk.

Norway and other countries vulnerability and readiness for climate change

Source: University of Notre Dame: Global Adaption Index

Physical climate risk

- (i) Physical climate risk is risk associated with the implications of physical changes in the environment. The climate in Norway has changed significantly over the last decades and will continue to change, as in the rest of the world. The Norwegian climate is expected to become wilder, warmer and wetter, and torrential rain episodes may become more intense and frequent. This may result in altered flooding patterns, earth slides, changed snow patterns and shrinking glaciers. The oceans are likely to become warmer and more acidic. Rising sea levels will worsen the impact of storm surges. Climate change in the Arctic will also affect weather systems in our latitudes. Continued melting of Arctic sea ice could affect the polar jet stream that largely determines the weather patterns over Norway.
- (ii) Commonly used benchmarks are the current climate or the pre-industrial climate situation. Norway will probably experience increased precipitation, more flooding, more

frequent landslips and rising sea level, and these physical changes and the uncertainty associated therewith constitute risk factors. Many of the physical processes happen very slowly, from a human perspective. Even if net global emissions were to be reduced to zero within a short space of time, it may therefore take a very long time for the climate system to arrive at a new equilibrium.

The expected rising sea level is, however, in the Nordic countries expected to be at least partly offset by the rising of the land with the largest effect in the northern part of the Baltic Sea but with still significant effects across the Nordic countries. During the most recent ice age, the Nordic countries were pressed down by the weight of glaciers, which sat on top of the countries for about 100,000 years. The land is still rebounding, 10,000 years after the glacial ice melted away, and the gross rising for example in Oslo is around 5mm per year and Trondheim and Bergen of 4 and 2mm, respectively (source: www.kartverket.no and www.geoforskning.no).

Physical climate risks and opportunities for Entra

Area	Group	Type of risk	Probability	Consequence: ¹⁾	Time horizon: ²⁾	Action	Opportunities	Implications for strategy
Physical risk	Acute	Stronger winds and storms	High	Medium	Short	Is experienced already. Entra must ensure that the buildings are dense and can withstand increased impact from strong wind gusts. Entra already has good maintenance programs for its buildings, including roofs and facades. This means that the buildings are already well equipped for large amounts of rain and heavy winds. Work on establishing a plan of measures for roofs and facades to withstand even greater quantities of water and more extreme weather has begun and is planned to be completed early 2021. When doing the inspections small repairs have been carried out. The plan of measures will also assess which roofs are suitable for water distortion and solar cells. This is also something that is considered in all of Entra's newbuilding projects. One measure for water retardation is sedum roofing, something Entra has already established on some roofs. Entra has established a program for periodically inspections of the facades where the frequency of inspections of the the different buildings is based on a risk assessment. The aim for the inspections is to safeguard against fallout.	Entra's properties are built to high building standards and are considered to be safe and able to withstand considerable winds and storms.	Continue as is in terms of building planning and construction. Enhance focus on solid facades.
	Acute	Extreme rainfall	High	Medium	Short	May be required that buildings in cities must contribute to water depletion. For example, water retardant roofs, opening of streams, etc. A water retardation measure is sedum roofing, which Entra has already installed on some roofs. Sedum roofs also provide extra Breeam-in-use points.		There is a trade-off between using roofs for energy production or collecting water. Doing both can be problematic. Must also be considered if the roofs are solid enough to apply sedum rooms. For all new construction and redevelopment project water management is a priority
	Chronic	Flooding	Medium	Medium	Long	Some of Entra's buildings may be exposed to flooding. A portfolio assessment must be made in this respect in order to reveal such potential i the property portfolio.		Evaluation of locations exposed to flooding will be a key element in all transaction processes
	Chronic	Rising sea levels	Medium	Medium	Long	Some of Entra's buildings may be exposed to potentially rising sea levels. A portfolio assessment must be made in this respect in order to reveal such potential i the property portfolio.	The vast majority of Entra's buildings are located so that rising sea levels is not a direct problem. This could potentially increase the attractiveness of these locations in the future	Evaluation of locations exposed to rising sea levels will be a key element in all transaction processes

¹⁾ Consequence / Financial impact. Lav < 10 mill, Medium 10-100 mill, Høy > 100 mill

²⁾ Time horizon. Short: 0-3 years, Medium: 3-10 years, Long: more than 10 years

Transition risks and opportunities for Entra

Area	Group	Type of risk	Probability	Consequence: ¹⁾	Time horizon: ²⁾	Action	Opportunities	Implications for strategy
Transition risk	Politics and regulations	More stringent regulations and climate requirements	High	High	Medium	The requirements in the EU taxonomy will be finalised in 2021. A new technical regulation is being prepared (TEK 21). When this is launched, a transition period is usually in place so that it is most likely to become fully applicable to projects that are initiated from 2022. The EU taxonomy and the new technical regulations is expected to contain stricter sustainability requirements, including stricter demands on energy consumption. Entra is well positioned for this development from our work on passive and plus houses. The higher standards will result in increased costs in some projects, but we are familiar with the solutions and are close to meeting the requirements of several of our projects today.	Entra seeks to stay ahead of laws and regulations in all projects as well as in ordinary operations.	Continue current strategy
	Politics and regulations	Stricter regulations and climate requirements - Paris Agreement	High	High	Medium	Sudden implementation of new and stringent regulation of environmental qualities and emission in buildings may for the real estate industry in general, and thus also Entra, entail a risk that the portfolio that has not been built or upgraded in the last 10 years could have to low environmental qualities. Entra are calculating greenhouse gas emissions on all the new building projects. The aim of these calculations is to use solutions and materials with low emissions.	Entra's focus on high environmental qualities in its construction and redevelopment projects means that a steadily increasing part of the portfolio contributes directly to the ambitions of the Paris Agreement. Entra's portfolio is on average 7 years since new-built or fully redeveloped. In addition, we will continue to push for good and efficient operation in relation to energy savings.	Continue "as is"
	Politics and regulations	Requirements for increased reuse in construction projects	High	High	Medium	Other regulation that is in the pipeline is related to reuse. The requirement in the EU Waste Framework Directive, which Norway is bound to follow through the EEA Agreement, is that 70 per cent (by weight) of non-hazardous building and construction waste should go to material recycling. Entra has over 90 per cent waste sorting rate in its projects and will have no trouble sorting into the fractions needed to facilitate material recycling. Entra has for the last two years participated in a project together with Obos and Norsk Gjening with ambitions to challenge the manufacturer industry to use recycled tree and concrete into their production. The result is that two industry partners have plans on developing these solutions. We expect that products with recycled materials will be in the market within two years. Entra is also in dialogue with a partner to test their recycled products within wood. To facilitate recycling products within wood, one of the solutions may be to establish a new wood fraction on the construction site so that wood products you do not want are sorted out. It will be easy for Entra to facilitate this.	In Entras pilot project in Kristian Augusts gate 13 which was completed in Q4 2020, Entra achieved 80 per cent reused materials.	Work to influence the authorities, suppliers and the industry in general with the aim of increasing reuse in all projects and thus reduce embodied carbon in properties and projects

¹⁾ Consequence / Financial impact. Lav < 10 mill, Medium 10-100 mill, Høy > 100 mill

²⁾ Time horizon. Short: 0-3 years, Medium: 3-10 years, Long: more than 10 years

Area	Group	Type of risk	Probability	Consequence: ¹⁾	Time horizon: ²⁾	Action	Opportunities	Implications for strategy
Transition risk	Technology	Solar and wind technology outperform current energy sources	High	Medium	Medium	Implementing solar and wind technology measures on buildings may impose significant costs		
	Market	Valuation of office properties	High	High	Medium	It is to be expected that valuation of property in the future will increasingly take into account the climate when assessing risk and determining return requirements. It is already seen that buildings with low environmental qualities achieve reduced interest and lower valuation.	Entra's portfolio, where environment has been a leading variable in all major construction projects over the last 10 years, is becoming increasingly attractive	Continue to have the environment and environmental qualities as a guideline in all projects
	Market	Tenant requirements	High	High	Medium	For the time being, there are few good examples of explicit environmental requirements from tenants. However, we do see a trend of increasing interest from tenants, and we believe that this will further expand in the future. Not being able to offer buildings with good environmental qualities and risk-reducing qualities can reduce the interest in the company's products / properties and in the worst case, make them difficult or impossible to rent. Entra have over several years reduced the energy consumption on our property portfolio. We also have a program where we are issuing BREEAM certificates on our buildings.	Also on older buildings in Entra's portfolio, energy consumption is on average significantly lower than the industry, which in turn increase the attractiveness of our buildings when attracting tenants.	Continue "as is"
	Market	Financial market requirements	High	High	Short	The financial market has taken on the importance of a sustainable business model and the degree to which the business is exposed to climate risk, and the introduction of the EU Taxonomy will further propel this trend. These assessments already have a major impact on access to capital and valuation of companies' equity and debt. This is only expected to be reinforced in the future as more and more investors take this into account in their investment decisions.	Entra's green financing started in 2016, and we now have almost half of our funding in green bonds and bank loans. This will be further strengthened in the future.	Continue the projects with high environmental quality requirements, which can form the basis for an increasing degree of green funding
	Reputation	Ability to attract the best workforce, confidence from other stakeholders	High	High	Short	A sustainable and responsible business model that responds and actively works to combat climate change is already very important for attracting talent. This is to be assumed that this will only be strengthened in the future and that the opposite will significantly reduce access to the best heads. Furthermore, the company's reputation deteriorates and confidence among the company's other stakeholders is reduced.	One concrete result of environmental strategy is that Entra is already attracting talent in various functional areas that want a purpose with their professional life	

.....

¹⁾ Consequence / Financial impact. Lav < 10 mill, Medium 10-100 mill, Høy > 100 mill

Area	Group	Type of risk	Probability	Consequence: ¹⁾	Time horizon: ²⁾	Action	Opportunities	Implications for strategy
Responsibility risk	Responsibility risk	Lack of climate risk reporting	Low	High	Medium	A sustainable and responsible business model that responds and actively works to combat climate change is already very important for attracting talent. This is to be assumed that this will only be strengthened in the future and that the opposite will significantly reduce access to the best heads. Furthermore, the company's reputation deteriorates and confidence among the company's other stakeholders is reduced.	Entra seeks to be at the forefront in its reporting on the climate and on potential climate risks	Entra is deeply committed to contribute to the transition towards a low carbon society

Transition and responsibility risk

Transition risk is risk associated with the implications of climate policy and technological developments upon transition to a low-emission society. An ambitious climate policy is likely to result in carbon-intensive energy sources such as coal and oil being largely replaced by renewable sources such as sun, water and wind, and globally there is a shift towards more use of renewable energy sources, especially sun. This has major implications not only for energy producers such as Norway, but for large parts of society and the economy worldwide in coming years.

¹⁾ Consequence / Financial impact. Lav < 10 mill, Medium 10-100 mill, Høy > 100 mill

²⁾ Time horizon. Short: 0-3 years, Medium: 3-10 years, Long: more than 10 years

Social

Entra is a sustainable and socially responsible company, has a high focus on social sustainability and has included several initiatives in its daily operations. Entra's focus areas includes its employees and working environment, HSE, urban development, human rights and community engagement.

Community engagement, initiatives within social sustainability and new initiatives that can contribute and support the employment of the new generation and disadvantaged groups currently not participating in the labour market will be focus areas in our social strategy in the years to come.

Entra will also initiate requirements in its own operations similar to requirements made to our suppliers and partners. When evaluating new initiatives, Entra will seek partners and suppliers with common objectives and targets. We will seek to clarify purposes and prioritise activities with the various sponsors to ensure desired targets and relevant KPIs.

Motivated employees

Entra strives to develop a value-based culture characterized by the company's core values; Innovative, responsible, Hands-on and One team. The core values and the company's principles for leadership are closely connected to how we act and how we follow up and develop our employees. Emphasis is put on employee motivation, which is considered to form the basis for an individual's desire and willingness to perform and thus to the development of the company. Employees are offered opportunities for personal and professional development through close dialogue with, and follow-up by, their immediate superior. It is fundamental that employees consider Entra to be a good and attractive place to work. At the end of 2020, the Group had 186 employees, of which four are temporary employees and six employees work part-time.

Health and working environment

Entra aims to be a health-promoting workplace and carries out a number of measures to contribute to the health and wellbeing of its employees. All employees are offered annual health checks and a broad range of health services through Entra's occupational health service and health insurance. Entra also has an internal sports club where employees on a voluntary basis engage in social activities and a number of sports such as hiking, golf, running, squash, skiing and yoga. During 2020, the internal sports club has facilitated interactive training sessions, so employees have been able to attend from home. Sick leave in Entra in 2020 was 3.1 per cent. This is low compared to a country average of 6.2 per cent¹⁾. The objective is a continued low level of sick leave.

Workers' rights

Entra complies with established standards and employment legislation. Entra is a member of the Confederation of Norwegian Enterprise, and tariff agreements have been established with employee organisations. Entra is covered by collective bargaining and the agreements are made applicable to all employees. Negotiations and follow-up in the event of operational changes or restructurings follow Norwegian law.

Safety officer, working environment committee and Board representation

Entra has a safety officer and working environment committee. Employees are represented on Entra's Board with two employee-elected directors.

The safety officer's main function is to take care of employee's interests in matters that relate to the working environment. The safety officer is elected for two years among employees with experience and knowledge of working conditions in the company.

Entra's working environment committee is a decision-making and advisory body. The committee's most important function is to work for a safe working environment. The committee covers issues on its own initiative and at the request of the safety officer. All employees can contact the committee.

Employees in Entra are free to organise themselves and are organised in several different labour associations. Entra has established an accord with the Norwegian Engineers and Managers Association (FLT).

Employee relationship and employee engagement

Each year, Entra carries out an employee job engagement survey. In recent years including 2020, Entra used the survey from Ennova for this purpose. The survey is standardised and gives a score both for the level of motivation and satisfaction of employees and the factors that drives their behaviours and attitudes. Entra's score is compared against a representative national benchmark (GELx) and a benchmark "top in class" of the 25 per cent best in Ennova's client database. In 2020, Entra had an employee motivation and engagement score of 82. Even with a decrease of three points from 2019's score, the score is significantly above the national benchmark GELx score of 72 and above the "top in class" score of 78. The past year has been characterised by new ways of working, due to Covid-19 and social distancing. Many employees have been working from home most of the year and just rarely attended physical meetings. These changes may have affected the score in 2020.

¹⁾ Source: Statistics Norway, Q3 2020

Equality and diversity

Different expertise and experience contribute positively to Entra's development and to a broader and better basis for decision-making. Equal opportunities and diversity are an integral part of Entra's standards. Entra believes in the benefits of diversity, and this goal is incorporated into Entra's recruitment procedures and is reflected in the composition of senior management. Entra strives for diversity on a broad basis, including gender, age, background, education, and nationality.

The Board of Directors consists of four women and three men, whereof the Chair is a woman. The senior management team in Entra consist of three women and four men, whereof the CEO is a woman. Of all other managers in Entra, 44 per cent are women and 56 per cent are men.

At the end of 2020, Entra had 116 men and 70 women employed, of which two men and one woman were employed in Hinna Park AS. 50 per cent of the temporary employees are women. 67 per cent of the employees working part-time are men and 33 per cent are women and all have voluntarily decided to work part-time as part of Entra's policy for seniors and early retirement.

Average parental leave in 2020 was fourteen and eighteen weeks for men and women, respectively.

Our work for equality and diversity

Entra seeks to have an organisation that reflects the diversity of a modern society, and have a particular focus on gender, age and ethnicity balance. Diversity is an important part of Entra's social responsibility work. In general, social responsibility is an important reputation factor when it comes to attract the new generation of competent employees. Entra has worked actively with diversity for many years and has had a particular focus on;

- Achieving a more balanced gender distribution in property management (which historically has consisted almost exclusively of men), and
- increasing the proportion of women in our defined group of talents and key personnel.

The work with diversity and gender equality in Entra is structured through;

- **HR reporting:** Annual reporting from HR to senior management and the Board, hereunder status on achievement of HR targets and plans and targets for the year to come.
- **ESG Committee:** Entra's ESG Committee is an interdisciplinary group working on all different aspects of ESG. In line with the adjusted commitment to social sustainability, the committee has been expanded with additional and dedicated resources, covering all ESG initiatives in Entra. The Committee works with the strategic focus areas for ESG, identifying objectives and KPIs in cooperation with the responsible in both business units and group functions.

GENDER EQUALITY IN ENTRA ASA – KEY METRICS

	2020	2019
Gender distribution among employees (women/men)	69/114	66/108
Employee level 1 gender distribution (women/men)	3/4	3/4
Employee level 2 gender distribution (women/men)	24/31	22/27
Employee level 3 gender distribution (women/men)	42/79	41/77
Women's average earnings in relation to men's (all employees)	96 %	101 %
Women's average salary in relation to men's at employee level 1	101 %	77 %
Women's average salary in relation to men's at employee level 2	89 %	87 %
Women's average salary in relation to men's at employee level 3	91 %	-
Women's average bonus in relation to men's (all employees)	110 %	101 %
Women's average bonus in relation to men's at employee level 1	125 %	69 %
Women's average bonus in relation to men's at employee level 2	82 %	87 %
Women's average bonus in relation to men's at employee level 3	105 %	-
Sick leave % (woman/men)	5.4 %/1.8 %	4.5 %/1.5 %
Absence for sick children, number of days total (women/men)	34/24	43/35
Average weeks of parental leave taken (women/men)	18/14	25/8
Number of employees working part-time (women/men)	2/4	2/3
Number of employees involuntarily working part-time (women/men)	0/0	0/0
Number of employees in temporarily positions (women/men)	2/2	2/1

Employee level 1 = top management

Employee level 2 = managerial positions

Employee level 3 = other employees

- **Practice and policy:** All practices that address diversity are anchored with group management and the Board. Entra's ethical guidelines covers diversity, discrimination, and harassment, including procedures for whistleblowing both internally and through an external law firm.

Entra's work for diversity is also given weight through procurement of products and services. Requirements for diversity are set for purchasing of external legal services and for providers of facility management services.

The company has structured and professional HR procedures that ensures follow-up of employees through the various phases of employment as well as safeguarding against discrimination.

Recruitment

Entra has professional recruitment processes that ensure transparency and equal opportunities. Most recruitments are handled using internal resources and is managed by the HR department. A recruitment process in Entra is a structured process which includes an analysis of the job description with the purpose of choosing the preferred tone of voice in the announcements to attract the right candidates, a relevant and position-adapted case for the candidate to solve, and a final interview with both the direct manager and their superior manager.

During a recruitment process Entra aims to be open-minded, and all announcements are written in a general language inviting everyone with the right competence to apply for a position.

When recruiting for senior or key positions in Entra, both sexes should be represented in the final interview round. This applies for both internal and external recruitments and, if needed, targeted recruitment processes are used to fulfil this goal. If this for some reason is not achieved, it has to be justified. Furthermore, we have strived to attract younger employees within property management to secure continuity and transfer of experience. During 2020, Entra recruited 15 new employees, of which seven women and eight men.

Developing competence and engagement

Entra has HR processes where performance review, talent and succession planning and development plans are closely linked together. This includes a dedicated development plan in accordance with each employee's ambitions and potential.

Employees are evaluated based on achievements, ambitions, and potential by individual managers on specific criteria, including achievement of specific goals and compliance with Entra's values. This evaluation is part of a process where Entra builds its talent pool and secures succession planning.

Entra has also developed a training and competency policy for all positions in the Group. Some courses and training are offered to all or most of the employees, others are more specifically related to roles within property management.

Entra's value chain is broad and imposes significant requirements regarding relevant experience and expertise. Entra therefore acknowledges individual employee's needs for ongoing professional training suited to his/her area of work.

and has developed the Entra School to provide education and training programmes for all levels of the organisation. The Entra School includes an introduction course for new employees, which is intended to enable employees to view their role in the company in a wider context and an internal management and key talent development programme that runs for 1.5 years and focuses on the responsibilities and challenges of a management role. Ethics training occupies a central position in the introduction course and through annual dilemma training programmes.

Work-Life balance

Entra seeks to facilitate for a good work-life balance based on the ambitions, life phases and family situation of our employees. We act in compliance with the laws and collective agreements that regulate the various leave schemes and have implemented solutions that are easy to use if applying for a leave or time-off. Employee benefits, such as flexible working hours and full pay during illness and parental leave regardless of the National Insurance scheme limits, are important measures in the efforts to ensure equal opportunities.

Regular working hours are 37.5 per week, with the core time from 09:00 to 15:00. Some employees in senior positions or in special independent positions have exemptions from the rules of the Working Environment Act § 10.2. Entra seeks to minimize the amount of overtime, but extra work is expected to be done during hectic periods. We experience that there is a mutual understanding of this in the company and that flexible working hours or a day-off can be during less intense periods.

Facilitation

As far as practically possible Entra seeks to facilitate for the different needs of all employees. The premises are universally designed with sufficient space and accessibility for potential users of wheelchair. Our workplaces are designed in accordance with the Workplace Regulations 4-2: § 2-4. This statutory provision ensures that the workplace design takes disability into account.

Wages and working conditions

Entra has developed a policy for compensation and benefits that ensures that employees with a similar position and at the same level are assessed according to specific and similar criteria to ensure equality. There is equality in the remuneration of men and women and all employees are included in a collective bonus scheme. All employees are included in the same insurance schemes and there is an equal pension scheme based on the salary level. Entra has no employees working part-time involuntarily.

Annual salary and tariff settlement in Entra follow a standardised process. It is based on central negotiations with the union representatives and involves individual evaluation of the employee from their immediate superior based on standardised criteria's. This process ensures consistent and performance-based salary adjustments.

Evaluation and salary adjustments are anchored with HR and the CEO.

Targets

Entra seeks to maintain high employee engagement and targets a continued high score in the employee job engagement survey.

Entra actively seeks to increase the share of women within property management year on year. The challenge has historically been that there has been lower interest from women and required expertise within technical building operations and management. During the last years we have adjusted the tone of voice in announcements, definition of the roles and targeted search processes to attract more female candidates whilst maintaining the quality of applicants.

It will be difficult to achieve a 50 per cent share of women as the property management department contains almost one third of our employees and as the pool of applicants for new positions still has a majority of men. Our ambition is to have a relatively equal share of women and men in the rest of the company, and among our talents and strategic successors to leading roles. In 2020, 44 per cent of the company's talents and strategic successors were women, and we had 44 per cent women in senior positions (Level 2).

To achieve the targets the administration has defined concrete measures on how to hire and develop employees. Such measures include, amongst others, a requirement to include both sexes in the final interview round for key positions, talent development giving deliberate priority to women and leadership development and coaching to promote female talent.

Identified focus areas

Entra is in the process of further developing our recruitment strategy, with a desire to increase employment for young people or groups that are out of work.

One of the focus areas is recruitment of people from different employment programmes that are currently out of work for various reasons. These programmes consider the employer's need for manpower and helps finding potential candidates. Schemes allow for a shorter free practice period without employer liability where the goal is permanent employment. Entra has good experience with recruiting from such programmes, and is evaluating which departments' future recruitment needs that can be filled through these employment programmes.

The apprenticeship scheme is part of the Norwegian public education system. The public apprenticeship is a two-year program, and the employer must be approved by the county municipality. Entra plans to start the process for being approved during 2021.

Most departments in Entra already work with educational institutions or directly with students as examiners, supervisors or conducting lectures.

An internship is a temporary employment for students, where the candidate gets relevant work experience, and will be a benefit for both parties. Entra will further assess the opportunity with relevant universities or business schools.

Potential risks of discrimination

The main risk of discrimination in Entra is unconscious discrimination. This is a risk that never can be eliminated, but which will be assessed and acted upon if it occurs. When starting up new initiatives, Entra will also initiate training of managers on how to succeed with inclusion. Entra currently has no reports from employees, safety representative or union representatives that discrimination has been experienced as part of our work processes.

Measures implemented to counter discrimination and contribute to increased equality and diversity

We are working to further develop our understanding of diversity, while implementing measures related to our strategy for social sustainability. These concepts will have additional focus through 2021, where we will investigate how we can express this into more concrete targets.

Identified initiatives:

- Cooperation has been initiated with third parties to collect data related to diversity, which will also contribute to our work with diversity in Entra.
- A diversity policy will be developed that includes already incorporated procedures related to recruitment and development of employees.
- Courses in diversity and inclusion will be conducted with the aim of maintaining and increasing awareness on unconscious discrimination.
- Equality and discrimination will become a permanent agenda point in the working environment committee (AMU) to include input from union representatives and safety representatives where they receive an overview of areas of discrimination and current HR processes.
- To implement the strategies of young people's ability to enter the labour market, and the employment for vulnerable groups currently out of work.
- Continued focus on increasing the share of women in the property management department.

Evaluation of the work with diversity

Entra's efforts to increase the proportion of female employees have given results. Entra has an organisation characterised by equality, with an increasing proportion of women in the property management department. As diversity is an important part of Entra's social responsibility work, we will in future reports provide an evaluation of the results of the measures implemented to contribute to increased equality and diversity.

Human rights

Entra seeks to contribute to diversity and equal opportunities for all and will promote and respect internationally recognised human rights and work to prevent breaches of those.

Entra does not accept discrimination or bullying in the workplace. Everyone is to be treated with respect, irrespective of gender, religion, age, ethnicity, nationality, any disability or sexual orientation. In order to secure compliance, human rights are included in guidelines and management tools, including those dealing with fundamental values, ethical guidelines, socially responsible procurement, the focus on HSE and the working environment.

Entra provides its employees with opportunities for professional and personal development and facilitates training to ensure that employees have the right competence and are able to use their expertise and assume responsibility. Entra demonstrates respect for its employees' private life and take into account requirements for personal data protection (GDPR) through secure IT and HR systems.

Health, Safety and Environment (HSE)

HSE work is central to Entra in all parts of the value chain. It shall be safe to visit and work in our properties and projects. HSE is well established as a natural part of day-to-day operations, including being part of the bonus scheme for all employees, and is a focus area at all levels of the organisation and thus recognised widely in the organisation as a personal responsibility of all employees. Entra's HSE strategy involves systematic work with:

- HSE in the daily operation of the buildings
- HSE in development projects
- HSE for our employees

The internal HSE policy in Entra has the following targets:

- It should be safe to work, visit and travel in and around Entra's properties and construction projects
- For our own employees, we will have a health-promoting work environment where no one will be injured or sick as a result of their work
- All HSE related legal requirements must be met

Members of the senior management are involved in practical HSE work and are expected to take the lead through behaviour and leadership. As part of this, a review of the latest HSE report is regularly on the agenda at management meetings and Board meetings. HSE status is also an important item on the agenda at all employee meetings. After the outbreak of the Covid-19 pandemic, Entra's top priority has been to ensure that we are taking the necessary measures to protect the health and safety of our employees, our tenants and other users of our buildings. During 2020, a particular focus has also been on the safeguarding of Entra's parking facilities against fire.

Entra works actively to increase awareness with regard to the registration of all types of incidents (including accidents, near misses). The reporting of incidents is important in order to improve, and at the same time increase awareness internally among Entra's employees, suppliers and customers.

Targets and status

HSE targets are also aggregated into group KPI's with a main focus on avoiding serious accidents. The HSE targets for 2020 were:

- There shall be no injuries involving sick leave absence that are due to Entra in and around our buildings, and
- there shall be no injuries in our construction projects involving more than 16 days' sick leave.

Incidents are reported to the CEO and to the Board of Directors. The incidents are investigated to see what lessons can be learned and are an important element in further strengthening the HSE work.

There were no injuries involving sick leave absence that was due to Entra in and around our buildings in 2020, but there were two injuries involving sick leave absence in our construction projects that involved more than 16 days sick leave.

Entra performs regular HSE audits of both development projects and management properties. In 2020, Entra performed three HSE audits of which of one development project and two management properties.

Urban development

Entra's strategic core areas are the four main cities Oslo and the surrounding area, Bergen, Stavanger and Trondheim. Entra's goal in its core areas is to contribute to urban clusters that are attractive, inclusive and accessible for residents and other relevant parties. A part of Entra's environment strategy is to be located close to major public transportation hubs, thus contributing to less use of private cars to the benefit of public transport and environmentally-friendly alternatives such as bicycles.

For Entra, urban development includes creating good atmosphere and secure surroundings in and around its buildings for the benefit of tenants, visitors and others who pass through the area. Entra ensures that the space around its buildings and building sites is neat, clean, and attractive. Entra considers tenant composition in order to create life and variation among visitors and users of its buildings. Where applicable, Entra considers how to activate the ground floors of our buildings to contribute to city life at street level.

Entra emphasises the importance of a good dialogue with partners, competitors and other stakeholders in its work on urban development. Entra involves neighbours, local politicians and others who live or work in the group's urban development districts in connection with new buildings and refurbishments. Involvement may constitute meetings and correspondence with neighbours, open meetings, information to the local press and a one-on-one dialogue with selected target groups.

Examples of areas and buildings where Entra has contributed to positive urban development are Papirbredden in Drammen, Brattørkaia in Trondheim, Tullinkvartalet, Sundtkvartalet and Tøyen in Oslo, and Hinna Park in Stavanger. In the years to come, Entra will also be involved in the urban development of Bryn in Oslo.

Community engagement

Community engagement has been an important part of Entra's ESG work for many years.

Entra has been a sponsor of the Church City Mission ("Kirkens bymisjon") in Norway since 2014. Entra's financial support to, and dialogue with, the Church City Mission strengthens the constructive measures that the Church City Mission is carrying out in connection with social challenges in the cities covered by the agreement. In Oslo, Entra is involved, among other things, in the "Neighbour cooperation" project, which involves several companies located in the Oslo city centre, working to create a safer and better local environment for all those passing through the area, and contributes to increased employment to disadvantaged groups that are currently out of work. Entra is actively involved in Christmas campaigns to collect money to provide Christmas dinners for the homeless and Entra employees have been contributing to the campaign "Support someone who dreads Christmas".

Most planned community arrangements for 2020 was cancelled due to Covid-19, but some new or adjusted arrangements took place. The Pstereo festival in Trondheim was conducted as a digital concert from the rooftop of Rockheim, one of Entra's assets. At Hinna Park, they managed to arrange outdoor drive-in cinema at one of Entra's buildings, in accordance with applicable infection control rules. During autumn, both in Oslo and Drammen, there were activities with the purpose of the distribution of reflexes to visitors and employees at our facilities. In total Entra has contributed with community engagement in and around 44 per cent of its portfolio (77 assets) in 2020.

For 20 consecutive years, Entra has also been a key sponsor of Ridderrennet. Due to Covid-19 the annual competitions for disabled skiers from different countries was cancelled in 2020. To ensure the financial situation of the organisation and future competitions at Beitostølen, Entra's monetary support remained at the same level even though the competitions was cancelled.

In 2021, Entra will look into how the sponsorships with the Church City Mission can be further developed with activities that also can contribute to increased employment for disadvantaged groups that are currently out of work.

Governance

Board's Corporate Governance statement

Entra's Board ("the Board") actively adheres to good corporate governance standards and will at all times seek to ensure that Entra complies with the requirements of section 3-3 b of the Norwegian Accounting Act and the Norwegian Code of Practice for Corporate Governance of October 2018, issued by the Norwegian Corporate Governance Board (NUES). This is done by ensuring that good governance is an integral part of the decision-making process in matters dealt with by the Board. Moreover, Entra's corporate governance standards are subject to at least annual assessment and discussion by the Board.

¹⁾ Minor deviation, cf. section 6 below

Roles and responsibilities

Board of Directors

- Responsible for the long term success of Entra
- Sets the overall strategy and oversee its implementation
- Provides leadership and direction to the Group on its values and ethics
- Responsible for corporate governance
- Sets risk appetite and investment strategies
- Determines significant investments, acquisitions and disposals
- Responsible for risk management
- Responsible for financial performance, financial management and financial reporting
- Appoints core executive management positions

Audit committee

- Preparatory body supporting the Board on the exercise of its responsibilities relating to
 - Financial reporting
 - Internal controls and financial reporting processes
 - Compliance with ethical guidelines
 - Overall risk management
 - Review of the performance and independence of the auditor

Remuneration Committee

- Preparatory body to the Board's considerations on compensation issues
- Prepares principles for remuneration packages and employment terms of the CEO and other Senior Executives
- Oversight of remuneration practices for all employees

Nomination Committee

- Reviews structure, size and composition of the Board and its Committees
- Leads Board appointment processes
- Ensures shareholders' views are taken into account
- Recommends appointments to the Board

CEO

- Leads the executive team and responsible for the overall management of Entra
- Articulate vision, values and purpose
- Develops and implements strategy
- Responsible for the overall performance of the business

Executive management

- Supports the CEO on the implementation of strategy, financial performance and management of the group

Management committees

- Investment committee
- Sustainability committee
- Compliance

Board activity

The Board attends 8 regular board meetings each year. Additional meetings are held on an ad hoc basis. 30 Board meetings were held in 2020 as a number of extraordinary board meetings were held in November and December following the strategic interest in acquiring the company. The calendar below sets out the main topics discussed at each regular board Meeting.

BOARD REPRESENTATION AND PARTICIPATION IN BOARD

February	March	April	June
- Financial and operational performance - HSE report - Transactions and investments - Annual results and the Q4 report - Portfolio valuation - Management remuneration, STI and LTI - Portfolio investments	- Financial and operational performance - HSE report - Transactions and investments - Annual results and Annual report - Going concern and viability statement - ESG strategy and reporting - Technology and Innovation Review - IT and cyber security update	- Financial and operational performance - HSE report - Transactions and investments - Q1 report - Portfolio valuation - CEO and Board Committees instructions - Compliance - Procurement and vendor Review - HR Review - General remuneration principles - Covid 19 implications, risks and contingency plans	- Financial and operational performance - HSE report - Transactions and investments - Property site visits - Board meeting calendar - Project Development Review - Portfolio strategy - Customer strategy - Macro economic update
July	September	October	December
- Financial and operational performance - HSE report - Transactions and investments - Half year report - Portfolio valuation	- Financial and operational performance - HSE report - Transactions and investments - Property site visits - IT and cyber security Review - Strategic insight - mobility trends and implications on real estate	- Financial and operational performance - HSE report - Transactions and investments - Q3 report - Portfolio valuation - Strategy session - Environmental strategi - Social sustainability strategy - Competence development - KPI - Board evaluation	- Financial and operational performance - HSE report - Transactions and investments - Budget scenarios / financial model - Financing plan and policy - Investment policy - Risk review - Customer satisfaction survey - Employer satisfaction survey - KPIs 2021 - ESG strategy and reporting - CEO Review - Strategic interest in Entra

Board composition and independence

The Board consists of the following seven members: Siri Hatlen (Chair), Kjell Bjordal (Vice Chair), Widar Salbuviik, Camilla AC Tepfers, Benedicte Schilbred Fasmer, Marit Rasmussen and Erling Nedkvitne.

The shareholders elect between five and eight shareholder-elected members to the Board, including the Chair, for a period of two years. Entra has established a group scheme for the election of two employees to the Board of Entra.

Emphasis is placed on the combined Board being able to safeguard the interests of the shareholders as a whole and the Group's need for expertise within the Group's main business

and board work. In addition, the Board shall have the capacity to carry out its tasks. Consideration shall be given to the Board being able to function well in a collegiate manner. Participants in the Group management shall not be members of the Board.

The Board is composed so that it can act independently of special interests. All the shareholder-elected members are independent of the Senior Executives, the Group's main shareholders, and significant business connections.

Information regarding the Board members' expertise is provided on page 84-85. All board members except the employee representatives are independent. Board members are encouraged to own shares in the Group.

¹⁾ Since AGM April 2020

The Board's work

The Chair of the Board chairs board meetings. The Board has a Vice Chair who chairs meetings when the Chair cannot or should not lead the work of the Board. All directors receive regular information about the Group's operational and financial progress in advance of the Board meetings. The Company's business plan, strategy and risk are regularly reviewed and evaluated by the Board. The Board draws up and adopts an annual plan, including topics for the Board meetings. Ordinarily, the CEO proposes the agenda for each individual Board meeting. The final agenda is decided in consultation between the CEO and the Chair of the Board. In addition to the directors, Board meetings are attended by the CEO, CFO, other EVPs as needed, and the Chief Legal Officer (secretary of the Board). Other participants are called in on an ad-hoc basis. The Board decides on matters of material importance to the Group. These include, but are not limited to, approval of the annual and quarterly accounts, strategies and strategic plans, the approval of significant investments, the approval of significant contracts and the approval of substantial business acquisitions and disposals.

The Board receives quarterly reports and presentations on the Group's operational and financial status. The reports describe progress and status in the Group's operative and administrative functions during the reporting period. The individual business units hold meetings with the CEO and CFO to review operating activities prior to and in connection with such reporting. The reports form the basis for internal control, communication on status and necessary measures. The quarterly reports are

reviewed at Board meetings, and also form the basis for the external financial reporting.

Each year the Board and its committees assess their own work and way of working as a basis for reviewing the need for changes and other measures. This assessment includes an evaluation of the Board's expertise, collectively and for each member, and how well the Board works as a team.

Monitoring and control of financial reporting

Procedures have been established for financial reporting that involve carrying out a review of significant estimates, provisions and accruals in conjunction with preparation of the quarterly and annual financial statements. Separate memorandums are prepared for significant accounting assessments and non-routine transactions and are discussed with the Audit Committee. The valuation of the Group's properties is subject to a separate review and assessment at management level at the close of each quarter. This involves, among other things, holding meetings with the external appraisers conducting quarterly valuations of Entra's investment properties, with a particular emphasis on discussing perceptions of the market, risk premiums and documentation.

The Group reconciles and documents all balance sheet items in the group companies each quarter. Balance sheet items such as bank deposits, receivables, non-current assets and liabilities are subject to special reviews. Bank loans, interest rates and interest rate hedging are subject to manual reconciliation each month. Ongoing projects are reviewed on a quarterly basis

by the Project Development department. Rental income and other significant profit and loss items are subject to reconciliation each quarter. All reconciliations are reviewed and quality assured, as well as being analysed against the Group's forecasts and previous accounting periods.

Management reports significant operational and financial matters to the Board at the Group's Board meetings. Any significant matters and situations that arise outside Board meetings are discussed with the Chair of the Board and if necessary additional Board meetings are held.

In connection with the quarterly reporting, the Group's external auditor performs a review of the financial reporting, without issuing a review report.

The Group's quarterly and annual financial statements are reviewed by the Audit Committee before they are considered by the Board. As part of this process, management prepares a memorandum for the Audit Committee that describes significant accounting and financial assessments made during the quarter. The Audit Committee annually reviews the external auditor's audit report, as well as the findings and assessments of reviews and audits in conjunction with interim and annual reports, if applicable. Key audit matters and significant issues in the auditor's report are presented to the whole Board.

Financial management

The Group is managed by means of financial and operational targets linked to results and development, the return on equity and the weighted average cost of capital, the management of the debt portfolio and the return on the property portfolio. Risk assessments and profitability calculations are performed in connection with acquiring property and commencement of development projects, in accordance with the Group's calculation model and required rate of return. The expected net present value and other key financial metrics of development projects are monitored throughout the course of each project. Long-term projections are made of expected financial developments as a component of the Group's risk management, using a model with detailed assumptions concerning the business's results, cash flow and balance sheet. The projections take into account cyclical developments in the economy, financial parameters and the property market. Scenarios and simulations are prepared for various developments. The simulations provide insightful information for the Board and management in their monitoring of developments in key balance sheet figures and cash flow.

Allocation of capital and the attitude towards risk are important parameters for guiding financial operations. Entra's finance policy contains a framework for the day-to-day management of the Group's financial risk. Principles have been defined for borrowing, management of liquidity risk and interest rate risk, and credit and counterparty risk. The Group's model for financial projections is updated on a continuous basis. Quarterly reports are made in accordance with the management guidelines for the financial operations, and to the Board through the quarterly business report.

Systematic monitoring of the general economic situation and its impact on the Group's financial risk is carried out. Based

on expected developments in the economy and analysis of the Group's financial position, expected developments in both short-term and long-term interest rates, the strategy for interest rate positioning, capital requirements and planned financing activities are discussed, as well as opportunities in the financing market.

Financial reporting and communication

The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as approved by the EU. Entra's reporting fulfils statutory requirements and provides sufficient information to allow the company's stakeholders to form as accurate a picture of the business as possible. Entra reports in accordance with the rules in the Norwegian Securities Trading Act, as well as with the requirements specified by the Oslo Stock Exchange for companies with listed shares and bonds.

Entra provides its shareholders, the Oslo Stock Exchange and the financial market in general with timely, consistent and precise information. Such information is given in the form of annual reports, quarterly reports, stock exchange notices and investor presentations and meetings. The Board has set an IR policy for Entra's reporting of financial and other information.

The Group considers it important to inform shareholders about the Group's development and economic and financial status. Management members (CEO, CFO and Investor Relations Manager) are available for discussions with shareholders in order to develop a balanced understanding of such shareholders' situation and focus, subject however to the provisions in legislation and regulations. Management and the Chair of the Board ensures that shareholders' viewpoints are communicated to the whole Board.

The Board has approved insider regulations relating to the handling of inside information and trading in the company's shares. Primary insiders require internal clearance by the Chief Legal Officer before they buy or sell Entra shares.

Risk management

The Board is responsible for ensuring that the Group's business, financial reporting and asset management are subject to adequate control and in accordance with applicable law. Entra's risk management is to support the Group's strategic and financial goals and help the Group avoid events that may have an adverse impact on the Group's operations, financial situation and reputation. This is further elaborated on pages 28-39 and 56-59 in the Annual Report.

Internal control and compliance

The Board reviews at least twice per year the Group's risk and internal control activities. This, combined with the management's risk assessments and information on ongoing measures, put the Board in a good position to judge whether the Group's risk management procedures are satisfactory. Risk management and internal controls are also considered by the Board's Audit Committee.

Entra works systematically to ensure continuous improvement of its internal controls linked to financial reporting and efficient

operations. The Group has a proactive approach towards risk management, and potential risks are identified, assessed, quantified and managed. This is further elaborated in the section on Risk Management.

In consultation with the Audit Committee, management defines areas where the Group conducts review of internal controls. Both internal and external resources are used on these reviews. The results of the most important reviews related to internal control are presented to the Audit Committee and the Board on at least an annual basis. An internal control plan is presented to the Board.

The Group follows up issues relating to ethical guidelines and corporate social responsibility. The environmental perspective is an integral part of the assessments made in connection with the Group's potential investments. Special requirements have been defined for the Group's suppliers in the document "Socially Responsible Procurement", and a supplier verification process is conducted each year to ensure that the Group's suppliers are familiar with and adhere to the contractual conditions. This is further elaborated under the section "Ethics and anti-corruption".

The Group's Chief Compliance Officer (CCO) is responsible for ensuring that the company has implemented a compliance program that will ensure that Entra is compliant with regulatory and legal requirements as well as internal policies and bylaws. The CCO performs an annual review of the Group's governing documents, including guidelines for ethical conduct, procurement, sustainability, anti-corruption, data protection and privacy, and supports the Board and the CEO in ensuring that these guidelines are implemented and enforced. The CCO is further responsible for the Group's whistleblowing channels. The Board of Directors are provided at least semi-annual reports on compliance related matters.

Board committees

The Board has established an Audit Committee and a Remuneration Committee. The Board has established mandates for the work of the committees, which are subject to annual revision. In accordance with their respective mandates, the Audit Committee and the Remuneration Committee shall have two or three qualified shareholder representatives from the current Board. The representatives are in general elected by the Board for two years at a time. In case of Board changes during the election period affecting members of the Audit Committee or Remuneration Committee, the period lasts until the representative is up for next election as a Board member. The committees assist the Board with preparing its work, but decisions are taken by the whole Board.

Audit Committee

The Audit Committee acts as a preparatory body and supports the Board in assessing the integrity of Entra's financial reporting, internal controls and financial reporting processes, compliance with ethical guidelines, overall risk management and review of the performance and independence of the auditor. The CFO, the Head of Group Accounting, the Group Controller and the Head of Accounting (secretary of the Audit Committee) attend as representatives of the management. The Group's auditor also participates in all meetings. The CEO and other members

of the management attend as required. The chair of the Audit Committee reports on the significant assessments discussed in an Audit Committee meeting in the first following board meeting. The Board further has access to the minutes from each Audit Committee meeting. The Audit Committee has an established calendar of meetings. 6 (7) meetings were held in 2020.

Remuneration Committee

The purpose of the Remuneration Committee is to act as a preparatory body for the Board's consideration of compensation issues. The Remuneration Committee's main task is to prepare the Board's consideration of matters relating to the salary and employment terms of the CEO and Senior Executives, as well as changes to them. In addition, the Remuneration Committee prepares the Board's consideration of principle issues relating to salary levels, result-related pay schemes (including share schemes), the pension scheme/conditions, employment contracts and similar for the Senior Executives of Entra, as well as other matters relating to compensation that are of particular importance for the Group's competitive position, profile, ability to recruit, reputation etc. The CEO discusses the handling of individual conditions of Senior Executives with the Remuneration Committee. The Remuneration Committee furthermore discusses and presents proposals to the Board on guidelines for the remuneration of Senior Executives, prepares the Board's statement on the determination of salaries and other remuneration of Senior Executives in accordance with section 6-16a of the Norwegian Public Companies Act, and deals with other statutory reporting requirements.

The Remuneration Committee is composed of the Chair of the Board and one or two members of the Board and shall be independent of Senior Executives. The CEO and EVP HR & communication attends as the representative of the management. The CEO does not participate in discussions on issues that affect the CEO personally or matters that relate to the Senior Executives as a whole. The Group's Chief Legal Officer acts as the committee's secretary. 3 meetings were held in 2020.

Salaries and remuneration of Board and senior executives

Remuneration of the Board

The general meeting determines each year the remuneration of the Board based on the Nomination Committee's proposal. The Board's remuneration shall reflect the Board's responsibilities, expertise, and use of time and the complexity of the business. Remuneration shall not be dependent on results and no share options shall be issued to Board members.

Board members or companies to which they are connected shall not normally undertake separate assignments for the Group in addition to the Board appointment. If they nevertheless do, the whole Board is to be informed, and the fees for such assignments are to be approved by the Board. If remuneration is paid above the normal Board fee, this is to be specified in the annual report.

Remuneration of Senior Executives

Board statement regarding Senior Executives' remuneration

Pursuant to section 6-16a in the Norwegian Public Limited Companies Act, the Board will present the following statement

BOARD REMUNERATION IN 2020

All amounts in NOK thousand	Board fees	Committee fees	Total remuneration 2020 ¹⁾
Siri Hatlen, Chair	476	51	526

¹⁾ The overview of the remuneration of the Board of Directors shows remuneration earned in the financial year.

²⁾ Does not include ordinary salary.

The Board and committee members received no other compensation than what is set out in the table.

regarding remuneration of the Chief Executive Officer (CEO) and other senior executives (hereafter "Senior Executives") to the 2021 annual general meeting.

Guidelines for management remuneration

Remuneration of Senior Executives is based on the following general principles:

- Entra shall be a professional organisation that attracts and retains skilled personnel and develops the competence of its staff. Entra thus needs to use remuneration, including competitive salaries, in order to ensure that the Group can recruit and retain competent and attractive expertise
- Moderation in the level of salaries of the Group's employees
- Management remuneration shall be competitive, but not leading
- The fixed salary shall be the main element of the remuneration, but all remuneration elements shall be considered in total
- The targets for any performance-related pay scheme shall be objective, measurable and definable, and there should be a clear correlation between the Group's business goals and the targets in such performance-related pay scheme
- Senior Executive remuneration shall be transparent and in line with the principles of good corporate governance

Process for determination of remuneration

The Board has established a separate Remuneration Committee. The Remuneration Committee functions as an advisory body for the Board and the CEO and is responsible primarily for:

- Making recommendations to the Board based on the committee's evaluation of the principles and systems underlying the remuneration of the CEO and other Senior Executives
- Making recommendations to the Board based on the committee's evaluation of the overall remuneration of the CEO, including the annual basis for bonus payments and bonus payments actually made

- Assisting the CEO in determining the remuneration of the other Senior Executives
- Advising the Board and the CEO in compensation matters which the committee finds to be of material or principle importance for Entra

Determination of remuneration in 2021

The guidelines for management remuneration set forth above form the basis for all remuneration of Senior Executives. The Board of Directors furthermore proposes that the following principles shall apply for 2021 and up until the annual shareholders' meeting in 2022.

The total remuneration of the CEO and other Senior Executives consists of a fixed package of salary and benefits supplemented by performance-based bonuses, share-based long-term incentive plans, employee share plans, pension and insurance arrangements.

Fixed remuneration

The fixed remuneration provided to Senior Executives includes a base salary (which is the main element of remuneration) and benefits in kind such as a car allowance, mileage agreements and telephone. The Senior Executives also have insurance coverage and other benefits in line with what is offered to the other employees in accordance with collective agreements, legislation and normal practice in Norwegian companies.

Performance-related pay

The Group operates performance-related pay schemes for Senior Executives. For the Group's Senior Executives, performance-related pay in 2021 includes a performance-related pay scheme ("STI") and a long-term performance based share incentive program ("LTI").

STI scheme

The STI scheme is based on set targets at Group level in accordance with Board approved scorecards for 2021, as well

as predefined personal targets. The scorecard for 2021 consist of the following KPIs and topics:

- NOI margin (net operating income less administrative cost/ rental income)
- Customer satisfaction score
- Energy consumption and waste management in the property portfolio
- HSE (health, safety and the environment)
- Employee satisfaction
- Compliance

For the CEO and the deputy CEO the STI scheme has a maximum limit of 50 per cent of base salary and for other Senior Executives the maximum limit is 30 per cent of base salary.

LTI scheme

The LTI scheme is based on two Key Performance Indicators (KPIs); Return on Equity before tax (RoE) and Total Shareholder Return (TSR), each weighting 50 per cent. The Board believes that these KPIs align the interest of Senior Executives and shareholders in a beneficial manner, even though both KPIs are also influenced by external factors beyond the control of management.

Actual performance is determined on a linear target scale between a hurdle at 100 per cent and a cap at 120 per cent for both KPIs.

1. Return on Equity: three-year average RoE before tax compared to a target determined by the Board of Directors
2. Total Shareholder Return: three-year Entra TSR performance compared to the performance of the FTSE EPRA/NAREIT index.

Overview of remuneration scale LTI scheme 2021

			Maximum LTI result CEO and Deputy CEO (%) ¹⁾	Maximum LTI result Senior Executives (%) ¹⁾
Target achieved	100	120		
RoE	5.5	6.6	30	20
TSR	100 % of index	120 % of index	30	20
Result LTI	-	100	60	40

¹⁾ Calculated as actual achieved RoE & TSR divided by target RoE & TSR ("Result"). This Result is compared to the applicable target scale and if between 100 and 120 per cent, the linear percentage achievement is multiplied with the maximum 2021 result. I.e., if the Result is 110 per cent on the target scale, 2021 remuneration is calculated by 50 per cent multiplied by maximum 2021 result of 40 per cent and 60 per cent for Senior Executives and CEO/Deputy CEO, respectively.

The LTI remuneration will be distributed in shares which will have a vesting period of five years, whereof 1/3 matures after three years, new 1/3 after four years and the remaining 1/3 after five years. LTI remuneration is not included in the basis for pensionable salary and there is a cap on share price increase under the LTI scheme at 200 per cent share price increase.

Share purchase scheme

The CEO and other Senior Executives are eligible to participate fully in Entra's discounted employee share purchase plan on the same terms as all other employees.

OVERVIEW OF TOTAL REMUNERATION TO SENIOR EXECUTIVES IN 2020

All amounts in NOK thousand	Salary	Performance related pay (STI) ¹⁾	LTI ²⁾	Benefits in kind	Pension costs	Total remuneration 2020
Sonja Horn, CEO	3 728	1 385	738	140	110	6 100
Anders Oistad, CFO and Deputy CEO	3 262	1 257	669	140	110	5 438
Kjetil Hoff, COO	2 047	415	179	140	110	2 892
Per Ola Ulseth, EVP Project Development	2 027	416	255	140	110	2 948
Tore Bakken, EVP Market and Commercial Real Estate Development	2 084	426	226	140	110	2 985
Åse Lunde, EVP Digitalisation and Business Development	1 757	312	251	140	110	2 570
Kristine Marie Hilberg, EVP HR and Organisation	1 634	334	120	141	110	2 339
Total	16 540	4 544	2 437	981	770	25 271

¹⁾ STI reflects the provision based on targets met in 2020, which will be paid out in 2021.

²⁾ The LTI scheme has a vesting period of three years and a lock-up period of three to five years. LTI is reported on expensed basis. As such, the earned LTI for 2020 also includes a portion of LTI earned in previous years.

The above amounts are subject to National Insurance contributions of 14.1 per cent. No loans were given by Entra to senior executives at 31 December 2020.

Pension benefits

The CEO and other Senior Executives has a contribution-based service pension on the same terms as other employees. The contributions are 5 per cent of salaries between 0 G and 7.1 G and 15 per cent of salaries from 7.1 G to 12 G.

Board compensation for company management and other employees

The CEO and certain other Senior Executives have a number of internal directorships in subsidiaries and partly-owned companies. They do not receive any remuneration for these directorships.

Employee-elected members of the Board of Entra ASA receive fees in line with shareholder-elected Board members.

Severance package arrangements

The CEO has the right to six months' severance pay based on the base salary in cases where the Board takes the initiative to terminate the employment. No other Senior Executives have pre-agreed severance pay agreements.

Remuneration in 2020

Determination of remuneration of Senior executives for 2020 has been carried out in accordance with the statement presented to the AGM on 30 April 2020. The base salary of the Senior Executives remained flat in 2020. Performance-related pay for 2019 was determined and paid in 2020 on the basis of the principles determined in 2019. Performance-related pay for 2020 is determined and paid in 2021 on the basis of the principles determined in 2020.

Equity and shareholders

Entra has only one share class. Each share carries one vote and otherwise has equal rights including the right to participate in general meetings.

Free transferability

The shares are freely negotiable, with the exception of shares purchased by employees at a discount, and shares allocated in connection with the company's long-term incentive (LTI) scheme, see the section on Salaries and remuneration of Board and senior executives above. The Articles of Association place no restrictions on voting, ownership or negotiability in the shares.

Equity and dividend

At 31 December 2020, the Group's book equity was NOK 29,205 million (NOK 24,517 million), representing an equity ratio of 49 per cent (48 per cent). The Board considers this to be satisfactory by reference to the Group's goals, strategy and risk profile. At any given time, the company's financial strength and exposure is considered in the light of its objectives, strategy and risk profile.

The Board of Entra targets to pay out dividends corresponding to approximately 60 per cent of Cash Earnings on a semi-annual basis. Cash Earnings is defined as net income from property management less tax payable.

Board authorisations*Capital increase*

The Board has been authorised to increase the share capital by up to NOK 18,213,205, equivalent to 10 per cent of the company's share capital. The authorisation may be used for the purpose to strengthen the company's equity and to cover capital need in connection with business opportunities. The authorization shall be valid until the annual general meeting in 2021, and will in all cases expire on 30 June 2021.

Purchase of own shares

The Board has been authorised on behalf of the company to acquire Entra shares in the market with an aggregated par value of up to NOK 3,642,641, equivalent to approximately 2 per cent of the company's share capital, for a maximum purchase price of up to NOK 910,660,250. Treasury shares acquired under this authorisation may only be disposed of by way of a subsequent cancellation in connection with a share capital decrease, cf. section 12-1 (1) no. 2 of the Companies Act. The lowest and highest price to be paid per share is NOK 50 and NOK 250, respectively. The company's acquisition and divestment of own shares shall be carried out on a stock exchange or otherwise at a trading price and in accordance with generally accepted principles for equal treatment of shareholders. This authorisation shall be valid until the annual general meeting in 2021 and will in all cases expire on 30 June 2021.

The Board has also been authorised on behalf of the company to acquire up to 500,000 shares in Entra ASA on behalf of the company with an aggregated par value of up to NOK 500,000, equivalent to approximately 0.27 per cent of the company's share capital, for a maximum purchase price of up to NOK 125,000,000. Shares may be acquired for the purpose of carrying out the company's share scheme for all employees in the Entra group and the long-term share incentive scheme for members of the senior management in the Entra group. The lowest and highest price to be paid per share is NOK 50 and NOK 250, respectively. The company's acquisition of own shares shall be carried out on a stock exchange or otherwise at a trading price and in accordance with generally accepted principles for equal treatment of shareholders. Divestment shall be carried out in accordance with the purposes set out above, or on a stock exchange or otherwise at a trading price and in accordance with generally accepted principles for equal treatment of shareholders. This authorisation shall be valid until the annual general meeting in 2021 and will in all cases expire on 30 June 2021.

Equal treatment of shareholders and transactions with related parties

In the case of not immaterial transactions between Entra and a shareholder, a shareholder's parent company, a Board member, a Senior Executive or persons related to them, the Board is to ensure that a valuation is in place from an independent third party. This does not apply when the general meeting is to consider the matter in accordance with the rules in the Norwegian Public Companies Act. An independent valuation shall also be provided in the case of transactions between companies in the

same group where there are minority shareholders in such companies.

The Board is not aware of any transactions in 2020 between the company and shareholders, directors, executive personnel or parties closely related to such individuals that could be described as material transactions.

Information and communication

The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as approved by the EU. Reporting fulfils statutory requirements and provides sufficient information to allow Entra's stakeholders to form as accurate a picture of the business as possible. Entra reports in accordance with the rules in the Norwegian Securities Trading Act, as well as with the requirements specified by the Oslo Stock Exchange for companies with listed shares and bonds.

Entra provides its shareholders, the Oslo Stock Exchange and the financial market in general with timely, consistent and precise information. Such information is given in the form of annual reports, quarterly reports, stock exchange notices and investor presentations. The Group's report on corporate social responsibility is integrated in the annual report. The Board has set an IR policy for Entra's reporting of financial and other information.

The Board has approved insider regulations relating to the handling of inside information and trading in the company's shares. Primary insiders require internal clearance by the Chief Legal Officer before they can buy or sell Entra shares.

The Group considers it important to inform shareholders about the Group's development and economic and financial status. Management members (CEO, CFO and Investor Relations Manager) are available for discussions with shareholders in order to develop a balanced understanding of such shareholders' situation and focus, subject however to the provisions in legislation and regulations. The Chair of the Board ensures that shareholders' viewpoints are communicated to the whole Board.

Information to the Group's shareholders is published on Entra's website at the same time as it is sent to the shareholders. The Board has determined an IR policy for Entra's contact with shareholders outside the general meeting.

Takeover bids

The Board has an approved set of guidelines for takeover bids and will handle such situations in accordance with Norwegian law and the Norwegian Code of Practice for Corporate Governance. In a bid situation, Entra's Board and Senior Executives have a responsibility to help ensure that shareholders are treated equally, and that the Group's business activities are not disrupted unnecessarily. The Board will not hinder or obstruct takeover bids for Entra's activities or shares. The Board will ensure that shareholders are given sufficient information and time to form an opinion on an offer. If a takeover

offer is received, the Board will issue a statement making a recommendation as to whether shareholders should or should not accept the offer. The guidelines have been followed during the recent strategic interest in Entra.

General meeting

The Board shall arrange for as many shareholders as possible to be able to exercise their rights to participate in Entra's general meeting, and for the general meeting to be an effective meeting place for shareholders and the Board, through, among other things, ensuring that:

- agenda documents are sufficiently detailed for shareholders to be able to take a position on all matters that are to be considered;
- the deadline for notice of attendance is set as close to the meeting as practically possible and in accordance with the provisions in the Articles of Association;
- the Board and chair of the Nomination Committee attend the general meeting
- routines are in place to ensure that the general meeting can elect an independent person to chair the general meeting; and
- the Board and the person chairing the meeting shall ensure that the general meeting is able to vote on each item, hereunder for individual candidates for appointment to the Group's governing bodies.

Shareholders who are not able to be present at the general meeting shall be given the opportunity to vote through a proxy or through electronic participation. Entra shall:

- give information on the procedure for attending by proxy;
- appoint a person who can vote for shareholders as proxy; and
- prepare a proxy form, which as far as possible is laid out in such a way that votes can be given for each matter that is to be considered and candidates who are to be elected.

The entire Board has not usually attended the General Meeting as the items on the agenda of the General Meeting have not required this. The Chair of the Board is always present, and other Board members participate on an ad-hoc basis. From the Group's perspective, this is considered to be sufficient.

Nomination Committee

Article 6 of the Group's Articles of Association states that the company shall have a Nomination Committee composed of up to five members.

The members of the Nomination Committee, including the chair, are elected by the general meeting for a period of up to two years. Members of the Nomination Committee shall be shareholders or representatives of shareholders and the committee should be composed so that broad shareholder interests are represented. Each gender shall be sought represented in the Nomination Committee.

The Nomination Committee shall give its recommendation to the general meeting regarding election of shareholder-elected members to the Board of Directors and members of the Nomination Committee, as well as remuneration to members of the Board of Directors and the Nomination Committee. The remuneration to members of the Nomination Committee is determined by the general meeting, and the general meeting may adopt instructions for the Nomination Committee. The Nomination Committee ensures that shareholders' views are taken into account when qualified members are nominated to the governing bodies of Entra, and shareholders are invited to provide input to the Nomination Committee.

None of the Committee's members represents Entra's management or Board, and they are all considered to be independent. The Nomination Committee is considered to have a composition that reflects the common interests of the community of shareholders.

See www.entra.no for more information on the members of the Group's Nomination Committee and the Nomination Committee's contact details.

Ethics and anti-corruption

Entra has zero tolerance for corruption in all parts of the group's business. Ethical behaviour is a necessary condition for a sustainable business. Entra conducts its business in an ethical and transparent manner, acts within the law and its ethical guidelines and behaves in line with its fundamental values of being responsible, innovative, hands-on, and one team.

Ethical Guidelines

Entra's ethical guidelines are built on principles of equal opportunities for all, concern for the environment and a society view that emphasizes ethics, transparency, honesty and sincerity. The long-term success of the Group is based on trust. To maintain this trust Entra must ensure that its behaviour is consistent with its corporate values. The Group's ethical guidelines describe the way Entra is to treat its stakeholders and the behaviour which is expected of its employees. The ethical guidelines provide guidance and support to the Group and its employees in decision making and problem-solving processes.

The ethical guidelines are incorporated in the management development programme and are evaluated by the Board on an annual basis. Entra creates ethical awareness through training programmes, including an e-learning programme, and all employees and the Board of Directors are required to sign the ethical guidelines annually.

Entra has established whistle-blowing routines. Internal and external questions about ethics, harassment, whistleblowing etc. can be directed to the Group's Compliance Officer, or anonymously to an independent, experienced law firm with a duty of confidentiality in order to lower the threshold for an employee compared with having to contact a member of staff in Entra. The Compliance Officer reports on any matters to the board twice a year. A direct point of contact on such matters to

an external law firm is available on www.entra.no and on Entra's intranet. There have been no reported incidents in 2020.

Entra's fundamental procurement principle is to achieve the best possible total result through competition and supplier management. Procurement is also to take advantage of economies of scale.

Entra aims to be a responsible purchaser in all parts of the value chain and has established a set of processes and routines for procurement that include requirements on documentation, role/work division (dualism) and equal treatment of suppliers through competition. The routines are set to counter conflicts of interest and corruption.

New employees participate in procurement training covering processes, guidelines and tools for implementing best practice and fair procurement processes. Anti-corruption measures is an item on these training courses.

In 2017, Entra implemented dilemma training in ethics for its employees. The dilemma training is part of the introduction course for new employees and there is an annual target that all employees should complete such online training each year. 100 per cent of the employees as well as the Board of Directors completed online training course in 2020.

Entra continuously monitors the suppliers within its supplier base to ensure that the company only does business with serious counterparties.

Entra's supply chain

Entra spends approximately NOK 1.5-2 bn per year on external suppliers. The main suppliers are the largest construction companies in Norway and their sub-contractors. In property management, the largest suppliers deliver maintenance works within building/refurbishment, electrical, HVAC and plumbing. Entra also uses large facility services suppliers for facility operations. Entra has signed framework agreements with its largest suppliers to minimize risk and follow up suppliers.

Sustainability in the supply chain

The construction and real estate industry in which Entra operates faces serious challenges related to Corporate Social Responsibility (CSR), business crime and labour rights. Entra has established procedures to ensure that Entra only uses qualified suppliers.

Entra performs risk assessments for its entire value chain and facilitates action plans to reduce any identified risk. Entra has identified suppliers that perform work on Entra's construction sites and facility services vendors as high-risk suppliers within social responsibility and follow-up this sector accordingly.

There is considered to be limited risk associated with rights to e.g. exercise freedom of association and collective bargaining, child labor or forced and compulsory labor in Entra's direct supply chain. But Entra has identified higher risk among

sub-suppliers at construction sites in regards to violation of labour rights. Entra has therefore increased the supplier management focus towards these sub-contractors.

Supplier qualification requirements

Entra has set "Socially Responsible Purchasing Guidelines" that must be followed by both suppliers and their sub-suppliers in its supplier qualification requirements.

The document covers themes such as:

- Sustainable development and environmental considerations in the choice of materials
- External environment and focus on energy and environmental footprint savings
- HSE on construction sites
- Well-functioning work conditions and labour rights
- Economy and solidity
- Business ethics and relations

The guidelines are set to ensure that there are good working conditions in the suppliers' and in their sub-suppliers' businesses. The guidelines states that it is only allowed with two levels of sub suppliers for large suppliers and one for others.

Suppliers and sub-suppliers are to be registered in the Registry of Business Enterprises and are obliged to provide an corporate identity code.

Entra is against all forms of discrimination. All employees and hired staff who are engaged in working on contracts must have salary and working conditions that fulfil the statutory requirements in accordance with the applicable collective agreements at the relevant time. Entra may require a supplier to produce documentation that shows the salary terms and working conditions for employees and hired staff at the supplier and their sub-suppliers.

Supplier audits

Entra performs audits of its operations on an annual basis. The audits seek to assure that all operations follow Norwegian legislation and that principles stated in Entra's Socially Responsible Procurement Guidelines are followed. Risk factors in the supply chain as well as HSE risks are the main focus issues for the audits. An annual audit plan for Entra's operations and especially the property portfolio is prepared based on risks evaluated on the following:

- Project/property/supplier size and complexity
- Contract conditions, contract model and vendor selection
- The results of changes, previously conducted audits and controls
- Project organisation
- Start and life-time of the project

There are no set criteria for the number of audits to be performed each year, although there is typically a correlation with the number of projects in the portfolio.

During 2020 seven (7) supplier audits were carried out. The audits were undertaken by a combination of internal personnel and external audit companies, and the reports were thoroughly evaluated together with the handling of deviations, observations and suggestions for improvement.

The findings of violation of labor rights in one audit was so severe, that the contract with the sub- contractor was immediately cancelled.

Supplier reviews and verification

In addition to supplier audits, Entra performs bi-annual reviews of "high-risk suppliers", with annual sales to Entra exceeding NOK 0.2 million. The review emphasizes supplier adherence to Entra's supplier qualification requirements. It includes;

- Checks that the latest version of "Socially Responsible Purchasing Guidelines" is adhered to
- Credit checks to ensure suppliers' financial stability
- Checks to ensure suppliers have reported tax/vat submissions (last six months)
- Checks whether construction suppliers are registered in the "StartBank" qualification system
- Checks to determine if cleaning vendors are listed in the regulatory register for cleaning companies

Supplier Management Programme

Since 2015, Entra has invited master agreement suppliers to annual meetings to discuss developing a common approach to the challenges faced by the industry (including HSE).

The main purpose is to have an established arena for dialogue and cooperation that, in addition to resolving commercial issues, will focus on contributing to meeting the sector's challenges relating to working conditions, corruption and business crime.

In 2020, Entra reviewed its ethical guidelines together with master agreement suppliers in order to ensure that the guidelines are being followed. The goal is closer involvement, increased awareness levels and better reporting.

Auditor

The Audit Committee evaluates and makes a recommendation to the Board and the general meeting regarding the choice of external auditor. When evaluating the auditor, emphasis is placed on the firm's qualifications, capacity and the auditor's fee. The general meeting elects the Group's auditor. Since 2012, Entra's auditor has been Deloitte. Eivind Skaug has been the responsible partner of the audit team since 2014.

Plan for the auditor's work

Each year the auditor presents a plan for the execution of the auditor's work to the Audit Committee that in turn informs the Board of its most important aspects.

Auditor's relationship to the Board

The auditor attends all meetings of the Audit Committee, as well as the Board meeting in which the annual report and financial statements are considered and adopted. At the meetings, the auditor goes through any significant changes in the Group's accounting principles, the evaluation of material accounting estimates and any material matters where there has been disagreement between the auditor and the management. There is one annual meeting with the Audit Committee and the auditor, and one meeting with the whole Board and the auditor, which is not attended by representatives from the management.

Auditor's review of the Group's internal controls and financial reporting

When presenting the results of the interim audit to the Audit Committee, the auditor focuses on the Group's internal controls, identified weaknesses and proposals for improvements. The auditor summarises the findings and assessments of the annual audit for Group management and the Audit Committee. Material issues if applicable are summarised for the Board.

Auditor's independence

Each year the auditor's independence is assessed by the Audit Committee. The Board has drawn up guidelines on the engagement of the external auditor, governing what work the auditor can do for the Group in view of the requirement for independence. Any major assignments other than statutory audits are approved by the Audit Committee in advance. Management informs the Audit Committee of all additional services supplied by the external auditor at each Audit Committee meeting.

General meeting

The auditor attends the annual general meeting for consideration of the annual financial statements. The auditor's fee for the statutory audit and other services is approved by the general meeting.

To the Board of Directors of Entra ASA

INDEPENDENT AUDITOR'S ASSURANCE REPORT ON ENTRA'S ESG REPORT FOR 2020

We have been engaged by the Board of Directors of Entra to provide limited assurance in respect of the environmental, social and governance information presented in the Entra – Annual Report 2020, the sections ESG in Entra, pages 42 – 81, GRI and TCFD tables, pages 177 – 182, and EPRA Sustainability Performance Measures, pages 183 - 189, in total referred to as “the Report”. Our responsibility is to provide a limited level of assurance on the subject matters concluded on below.

Responsibilities of the Board of Directors

The Board of Directors are responsible for the preparation and presentation of the Report and that it has been prepared in accordance with the reporting criteria described in the Report, including the GRI Standards, level Core, and the Norwegian Code of Practice for Corporate Governance. The Board of Directors are also responsible for establishing such internal controls that they determine are necessary to ensure that the information is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities

Our responsibility is to express a limited assurance conclusion on the information in the Report. We have conducted our work in accordance with ISAE 3000 (Revised) Assurance Engagements other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board.

Deloitte AS is subject to International Standard on Quality Control 1 and, accordingly, applies a comprehensive quality control system, including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Considering the risk of material misstatement, our work included analytical procedures and inquiries with management and individuals responsible for the preparation of the Report and for sustainability management at corporate level, as well as a review on a sample basis of evidence supporting the information in the Report.

We believe that our work provides an appropriate basis for us to provide a conclusion with a limited level of assurance on the subject matters.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited (“DTTL”), its global network of member firms, and their related entities (collectively, the “Deloitte organization”). DTTL (also referred to as “Deloitte Global”) and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients. Please see www.deloitte.no to learn more.

*Conclusions*

Based on our work, nothing has come to our attention causing us not to believe that:

- Entra has applied procedures to identify, collect, compile and validate ESG information for 2020 to be included in the Report, as described in the Report.
- ESG information presented for 2020 is consistent with data accumulated as a result of these procedures and appropriately presented in the Report.
- Entra applies a reporting practice for its corporate governance reporting aligned with the Norwegian Code of Practice for Corporate Governance.
- Entra applies a reporting practice for its sustainability reporting aligned with the Global Reporting Initiative (GRI) Standards reporting principles and the reporting fulfils level Core according to the GRI Standards. Entra's GRI index presented in the Report appropriately reflects where information on each of the disclosures of the GRI Standards is to be found within the Entra - Annual Report 2020.

Report of the Board of Directors

Despite an eventful year starting with the Covid-19 pandemic in March, Entra continued to deliver strongly in 2020 on its three strategic pillars: Profitable growth, customer satisfaction and environmental leadership. Entra's operations and financials has only to a limited extent been impacted by the pandemic. Net asset value grew during 2020 by 23 per cent, primarily driven by compressed yields following the Norwegian central bank's reduction of the key policy rate from 1.5 per cent to 0 per cent, increasing both national and international investors' interest in Norwegian commercial real estate. Rental income grew by 1 per cent and net income from property management was down by 1 per cent. The Board proposes to pay a semi-annual dividend of NOK 2.50 per share for the second half of 2020 and thus NOK 4.90 per share for the full year, up from NOK 4.70 per share in 2019.

Entra is one of Norway's leading real estate companies and number one in the office segment, focusing on large, high quality, flexible and environment friendly office properties with central locations in the largest cities in Norway. Entra has its head office in Oslo.

Entra's rental income and results from property management has only to a limited extent been impacted by the Covid-19 situation in 2020. The Norwegian government implemented extensive support packages to ensure the survival of businesses, including a targeted cash support initiative to cover fixed costs for affected businesses. With solid infrastructure and a strong public funding, including the Government Pension Fund Global, Norway has proven to have the fundamentals in place for a recovery post-crisis.

Entra had rental income of 2,353 million (2,338 million) in 2020. Net operating income was 2,142 million (2,149 million) and net income from property management was 1,451 million (1,471 million). Net positive value changes were 5,705 million (1,955 million) and profit before tax was 7,274 million (3,735 million).

Entra's tenant base is robust with a WAULT of 7.1 and a solid backbone of public tenants, comprising 58 per cent of revenues, as well as limited exposure to industries most affected by the Covid-19 situation.

Due to solid letting activity, especially towards the end of the year, Entra signed new and renegotiated leases with an annual rent totalling 508 million. Net letting for the year was 202 million.

The most important lever for securing profitable growth for Entra is through project development, and Entra normally has 5-10 per cent of the portfolio in project development. In 2020, Entra started the redevelopment projects St. Olavs plass 5 in Oslo, Tordenskiolds gate 12 in Oslo and Møllendalsveien 6-8 in Bergen. Further, Entra started the refurbishment projects Hagegata 22-24 in Oslo and Grønland 32 in Drammen. In addition, Entra finished a new office building Holtermanns veg 1-13 in Trondheim.

After the outbreak of the Covid-19 pandemic, the Board's top priority has been to ensure that we are taking the necessary measures to protect the health and safety of our employees, our tenants and other users of our buildings. The Board has further supervised management and monitored the Group's business in accordance with good corporate governance. This includes a focus on organisational development, business strategy, hereunder new and ongoing development projects, active portfolio management (acquisitions and divestments), HSE, business and technology development, climate risk, sustainability and compliance.

In addition to planned activities, the Board has worked closely with management and the company's advisors to ensure the interests of all of Entra's shareholders following the strategic interest in Entra resulting in two unsolicited, voluntary offers made by Castellum Aktiebolag and Samhallsbygggnadsbolaget i Norden AB («SBB») for all the shares in Entra. The Board treated and evaluated both bids equally and published a combined statement regarding the bids on 29 January 2021. In addition,

the Board has also considered alternative strategic options available to Entra. Castellum withdrew their offer on 6 February 2021 and the SBB offer expired on 26 February.

Statement of comprehensive income, balance sheet and statement of cash flows

Results

Rental income was up by 1 per cent from 2,338 million in 2019 to 2,353 million in 2020. The increased rental income is explained in the table below.

All amounts in NOK million

Rental income in 2019	2 338
Development projects	-22
Acquisitions	19
Divestments	-26
CPI growth	33
Like-for-like growth above CPI	19
Other	-9
Rental income in 2020	2 353

The increase in rental income in 2020 is mainly driven by an underlying like-for-like growth of 2.5 per cent (52 million), of which the underlying CPI adjustment was 1.6 per cent. Projects affected rental income by -22 million as the completion of the newbuild projects Brattørkaia 12 and Holtermanns veg 1-13 stage 1 and full year effect of Brattørkaia 17A and the redevelopment project at Tullinkvartalet finalised in 2019, is offset by the vacating of Tordenskiolds gate 12, Schweigaards gate 15, Kongens gate 87 and part of Stenersgata 1, scheduled for redevelopment.

Nearly all Entra's lease contracts are 100 per cent linked to positive changes in CPI. The annual adjustment is mostly made on a November to November basis.

The occupancy rate was 97.9 per cent (97.1 per cent) as of 31 December 2020. The rental value of vacant space was approximately 48 million (69 million) on an annualised basis.

Operating costs amounted to 211 million (189 million) and are split as follows:

All amounts in NOK million	2020	2019
Maintenance	33	33
Tax, leasehold and insurance	57	58
Letting and property administration	70	57
Direct property costs	51	40
Operating costs	211	189

The increase in letting and property administration costs is mainly driven by technology initiatives and credit losses on trade receivables due to Covid-19. Direct property costs was up in 2020 mainly due to properties vacated to undergo redevelopment.

Rent (12m rolling) per sqm. and occupancy rate

As a consequence of the effects explained above, net operating income came in at 2,142 million (2,149 million) in 2020.

Other revenue totalled 113 million (300 million) and other costs amounted to 79 million (260 million) in 2020.

Other revenue includes 8 million from final settlement of the sale of Tollbugata 1A in Oslo, which was refurbished and delivered to the buyer in the fourth quarter of 2019. In 2019, Entra recognised other revenue of 185 million and other costs of 166 million from the refurbishment.

Other costs includes an impairment of intangible assets of 8 million. Other revenue and other costs further consists of services provided to tenants and income and costs related to inventory properties (properties in a portfolio which is expected to be zoned for residential development and subsequently sold to a third party at a predetermined price).

Administrative expenses amounted to 186 million (171 million) in 2020. The increase in 2020 is primarily driven by advisory fees due to the strategic interest in Entra, in addition to the company's technology and digitalisation initiatives.

Entra's share of profit from associates and JVs was 120 million (312 million) in 2020. The profit mainly relates to the gains from OSU's completion and delivery of residential apartments and commercial assets in Bjørvika.

Net realised financials amounted to -541 million (-551 million) and are composed as follows:

All amounts in NOK million	2020	2019
Interest and other finance income	11	10
Interest and other finance expense	-551	-561
Net realised financials	-541	-551

Net income from property management per share

Annualised, rolling 4 quarters

Net income came in at 1,569 million (1,780 million). When including only the income from property management in the results from JVs, the net income from property management was 1,451 million (1,471 million) for 2020. Reference is made to the alternative performance measures section of this report for calculation of the net income from property management.

Net value changes amounted to 5,705 million (1,955 million) for 2020.

The valuation of the property portfolio resulted in a net positive value change of 5,980 million (1,909 million) for the financial year 2020, of which about 4,180 million is attributable to compressed market yields.

Lower interest rates have contributed to a significant yield compression in the Norwegian market, particularly in Oslo, where eight of Entra's ten most valuable properties are located. Following the uncertainties from Covid-19, the activity in the transaction market was low during the spring, yields were relatively stable, and the yield gap increased. During the autumn, the activity in the transaction market picked up, and a number of transactions of relevance for Entra's portfolio were completed at yield levels significantly lower than observed in the first half of 2020. Prime yield in Oslo has fallen from around 3.60-3.70 at the end of 2019 to 3.25-3.30 percent in fourth quarter of 2020.

About 890 million of the value changes stems from development in the project portfolio, mainly explained by new lease contracts signed in 2020 and reduced risk as each project moves towards completion. In addition, 440 million is related to the net effect from strong letting activities in the portfolio and 240 million is due to increased market rents. The remaining is a result of realised value changes from the Munchs gate 4/Keyzers gate 13 transaction and other effects from property related changes.

Net changes in the value of financial instruments totalled -275 million (46 million) in 2020. The negative value change is mainly due to a sharp reduction in market interest rates.

EPRA NRV

Per share

Tax payable is 26 million (11 million) in 2020, of which the Group's wholly-owned subsidiaries accounts for 12 million. The remaining tax payable is related to the partly owned entity Papirbredden in Drammen. The change in deferred tax was -1,552 million (-498 million)

Profit before tax was 7,274 million (3,735 million) whereas profit after tax was 5,696 million (3,225 million). Total comprehensive income for the period was 5,677 million (3,229 million).

Balance sheet

The Group's assets amounted to 59,141 million (51,160 million) as at 31.12.20. Of this, investment properties amounted to 56,834 million (49,095 million). The property Tollbodallmenningen 2A in Bergen is classified as held for sale as at 31.12.20.

Inventory properties of 461 million (413 million) relates to the properties in the Bryn portfolio expected to be zoned for residential development and subsequently sold to a third party at a predetermined price. The increase in 2020 is mainly related to the acquisition of the property Østensjøveien 29, a property adjacent to Entra's other inventory properties.

Book equity totalled 29,205 million (24,517 million). As at 31.12.20, EPRA NRV per share was 189 (154) and EPRA NTA 187 (153). Refer to pages 170-171 for further details.

Cash flow

Net cash flow from operating activities came to 1,521 million (1,352 million) in 2020. The increase mainly relates to working capital movements.

The net cash flow from investment activities was -1,868 million (-1,005 million) for 2020. Purchase of investment properties of -194 million (-1,241 million) includes the settlement regarding the purchase option for Munchs gate 4/Keyzers gate 13, and the acquisitions of a part of Kristian Augusts gate 11 and a parking facility at Hagegata 27 in Oslo.

The cash effect from investment in and upgrades of investment properties amounted -1,683 million (-1,427 million) in 2020.

Investment in property for sale and inventory properties of -48 million (-192 million) in 2020 mainly relates to the acquisition of Østensjøveien 29 in Oslo, which is expected to be zoned for residential development and subsequently sold to a third party at a predetermined price.

Net payment on financial assets of 73 million is mainly related to the repayment of a sellers' credit structured as a bond in relation to a divestment of a property in 2017.

Net cash flow from financing activities was 246 million (-260 million) in 2020.

Net proceeds of interest bearing debt was 1,245 million (731 million) in 2020. During 2020, Entra had a net increase in bond loans of 2,457 million, and a net decrease in bank loans and commercial papers of 612 and 600 million, respectively.

Dividends paid amount to 874 million (840 million) in 2020. For 2020, Entra paid dividends of NOK 2.40 per share to the shareholders for the first six months and has proposed NOK 2.50 per share for the second half year. For the financial year 2020 Entra will thus have paid out NOK 4.90 per share compared to NOK 4.70 per share in 2019.

Dividends paid to non-controlling interests was 114 million (75 million) in 2020. The dividends was paid to the non-controlling interests in Entra OPF Utvikling AS and Papirbredden Eiendom AS.

The net change in cash and cash equivalents was -100 million (87 million) for 2020.

Going concern

The financial statements have been prepared based on the going concern assumption, and the Board confirms that this assumption is valid. The company is in a healthy financial position and has good liquidity.

Financial structure and exposure

The Group has a well staggered debt maturity profile and a diversified financial structure comprising of both bank credit facilities and capital markets instruments.

We have strong relationships and continuous dialogues with five of the top six Nordic banks, and we assess that the bank market is open and supportive to our funding needs. Entra has a strong presence in the Norwegian debt capital market as it is among the largest issuers in Norwegian kroner. Entra has a Moody's investment grade rating Baa1 with Stable Outlook. The Moody's Baa1 rating contributes to an increased credit availability and enables Entra to further extend its debt maturity profile.

The Group has adopted a conservative financial strategy that secures financial flexibility throughout an economic cycle. This is reflected in the financial policy through a set of financial risk parameters limiting risks related to financial leverage, interest

rates, financing and liquidity. Consequently, Entra's financial profile is characterised by a moderate loan-to-value ratio, strong interest coverage ratio, diversified debt maturity and an ample liquidity position. As a general principle, Entra's financing is based on a negative pledge of the Group's assets that enables a broad and flexible financing mix.

"Green financing" has been well established within real estate finance. The real estate sector is responsible for about 40 per cent of global greenhouse gas emissions. This fact has spurred increasing awareness among investors and financial institutions that a conditional capital supply represents a key factor in accelerating the green shift within the sector. Entra, with its environment friendly development projects and BREEAM certified investment properties, is well positioned for capitalizing on this favourable supply of green financing and currently 48 per cent of Entra's financing is "green".

The debt capital markets funding accounted for 72 per cent (67 per cent) of the total interest bearing debt, with bank funding representing the remaining part of the financing mix. The Group's liquid assets amounted to 217 million (317 million) as at 31 December 2020. In addition, the Group had committed, unutilised credit facilities totalling 7,290 million (6,190 million). The Group's average interest rate as at 31 December 2020 was 2.38 per cent (2.99 per cent), and 50 per cent (59 per cent) of the Group's total interest bearing debt was subject to fixed interest rates. Entra's loan-to-value ratio decreased to 37 per cent (40.2 per cent) at year-end 2020 and the interest coverage ratio increased to 3.4 (3.3).

Corporate governance

Entra's Board has approved guidelines for good corporate governance in accordance with the Norwegian Code of Practice for Corporate Governance issued by the Norwegian Corporate Governance Board (NUES).

The corporate governance section of this annual report on pages 68-80 provides a more detailed description of the corporate governance principles and reporting pursuant to Section 3-3b of the Norwegian Accounting Act.

Health, safety & environment

It should be safe to work, visit and live in and around Entra's properties and development projects. Entra's goal of being a zero-harm workplace for people, the environment and society underpins all the Group's health, safety and environmental work. HSE is an important focus area for the Board. The Board is satisfied with the dedicated HSE work in the organisation and the initiatives taken to prevent serious incidents.

In 2020, Entra had no injuries involving sick leave absence that was due to Entra in one of its buildings and two injuries involving sick leave absence in its construction projects that involved more than 16 days sick leave. Absence due to illness in Entra was 3.1 per cent in 2020, compared to 2.6 per cent in 2019. This is low compared to a country average of 6.2¹⁾. Cooperation with the employee organisations is good and constructive and yields a positive contribution to the operation of the Group.

¹⁾ Source: Statistics Norway: Sickness absence Q3 2020

To operate its business in a sustainable manner is of key strategic importance to Entra. Entra's ESG report can be found on pages 42-80. The outputs are compiled and aligned using three reporting frameworks: The EPRA Best Practices Recommendations on Sustainability Reporting, the Global Reporting Initiative Standards (GRI) Core option and the Task Force of Climate-related Financial Disclosures (TCFD). Entra has also reviewed the UN Sustainable Development Goals for its business.

Equality and diversity

At 31 December 2020, 38 per cent (38 per cent) of the Group's 186 employees were women and 62 per cent (62 per cent) were men. Three out of seven of the Senior Executives were women. Four of seven of the Board members were women. The Group believes in the benefits of diversity, and this goal is incorporated into Entra's recruitment procedures and is reflected in the composition of senior management. Entra strives for diversity on a broad basis, including gender, age, ethnicity, personal beliefs, background, education, sexual orientation and nationality. Key metrics regarding diversity and information on Entra's efforts to increase diversity is included the ESG report.

Risks associated with the business

The Board assesses risk on an ongoing basis, primarily through a semi-annually comprehensive review of the groups risk maps, which includes assessments of all risk factors in collaboration with all levels of the organization. Each risk factor is described and presented with the possible negative outcome given an increased probability of a situation to occur. The risk assessment also includes a broad description on how we monitor and work to minimize the risks, as well as a statement on how we assess the changes in the last period on each risk factor.

Entra's main risk factors, both financial and non-financial, are described on pages 28-39.

Shareholder information

Entra's share capital is NOK 182,132,055 divided into 182,132,055 shares, with each share having a nominal value of NOK 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra.

Outstanding shares at 31 December 2020 totalled 182,129,247 (182,109,045) as Entra held 2,808 (23,010) treasury shares.

As of 31 December 2020, Entra had 5,660 shareholders. Norwegian investors held 29 per cent of the share capital. The 10 largest shareholders as of 31 December 2020 were as follows:

Shareholder	Shareholding %
Folketrygdfondet	11.8
Skandinaviska Enskilda Banken	9.6
Carnegie Investment Bank (Nominee)	8.2
Danske Bank (Nominee)	4.1
Credit Suisse (Nominee)	4.1
State Street Bank and Trust (Nominee)	3.6
The Bank of New York Mellon (Nominee)	3.0
JPMorgan Chase Bank, London (Nominee)	1.6
J.P. Morgan Bank, Luxembourg (Nominee)	1.5
Danske Invest Norske	1.5
Total 10 largest shareholders	49.0

Profit for the year and allocations

In 2020, the parent company Entra ASA made a profit after tax of 428 million (1,134 million), as set out in the financial statements prepared in accordance with the Norwegian Accounting Act and Norwegian generally accepted accounting principles.

In accordance with the defined dividend policy of paying out approximately 60 per cent of cash earnings, defined as net income from property management less tax payable, the Board proposes that Entra ASA distributes a dividend of 455 million (437 million) corresponding to 2.50 per share (2.40 per share) for the last six months of 2020. The proposed dividend exceeds profit after tax for the year, and the variance is deducted from retained earnings.

The Board confirms that the company has sufficient equity and liquidity following payment of the proposed dividend.

Outlook

Despite an eventful year starting with the Covid-19 pandemic in March, Entra continued to deliver strongly in 2020 on its three strategic pillars: Profitable growth, customer satisfaction and environmental leadership.

The recent months has been influenced by the strategic interest in Entra resulting in two unsolicited, voluntary offers made by Castellum Aktiebolag and Samhallsbyggnadsbolaget i Norden AB («SBB») for all the shares in Entra ASA.

On 29 January, the Board recommended shareholders with a long-term view on their investment not to accept any of the offers as they stood. The conclusion was based on the Board's view of the company's capability to generate competitive returns in the future, the strategic merit of a focused Entra, and supported by the communicated positions of the two largest shareholders, Fastighets AB Balder and the Government Pension Fund Norway. Castellum withdrew their offer on 6 February and the SBB offer expired on 26 February.

Entra is the largest investment alternative offering investors Oslo-focused and high-quality office exposure. Over 70 per cent of the Company's portfolio by value is located in the Greater Oslo region with prime locations in connection with public transportation hubs. Since Entra was taken public in 2014, the portfolio has been refined through divestment of

8.3 billion of non-core assets, 8.2 billion on acquisitions and 9.5 billion of project investments which has resulted in an unparalleled portfolio of modern, efficient and large office assets.

Entra has a strong balance sheet with a loan to value of 37 per cent and Baa1 credit rating with stable outlook. The debt maturity profile is well staggered and the financing mix is diversified with cash and unutilized credit facilities of 7.3 billion, over three times all short term debt.

Entra offers investors superior cash flow visibility and quality with approximately 58 per cent of rental income from public sector tenants with AAA credit rating. The weighted average unexpired lease term (WAULT) is around seven years and the occupancy rate is approximately 98 per cent. Entra's operational platform and organisation has placed the company consistently amongst the top three performers in the annual Norwegian Tenant Index ranking of Norwegian landlords. The company has proved resilient during Covid-19 with payments collected at near normal levels. Entra is well positioned in a solid Norwegian economy supported by strong public finances and a property market with low office vacancy rates and expectations for continued rental growth.

Sustainability has been an integrated part of Entra's business model for more than 10 years. Entra is working actively to reduce the CO2 footprint of its property portfolio and has a firm ambition to become a net zero carbon company by 2030. We have developed several Powerhouses that produce more energy than they consume over their lifetime. In 2020, we also redeveloped a property where more than 80 per cent of the input factors came from re-used materials, thereby reducing the CO2 emissions by 45 per cent. Assets representing 57 per cent of the value of the management portfolio are, or in the process of being, BREAM certified. Entra issued its first green bond in 2016 and currently has 48 per cent of its debt portfolio in green bonds and bank loans.

Profitable project development has historically been the company's major lever for growth, and Entra has a track record

of delivering attractive new-build and redevelopment projects. During 2015-2020, Entra invested a total of 9.5 billion in 19 projects with an average yield on cost of 6.4 per cent. The value of these projects upon completion was 12 billion, representing an increase of 27 per cent.

During 2019 and 2020, several large assets were taken out of the management portfolio for redevelopment and, as a result, top line growth has recently been lower than in previous years. Entra has during the fourth quarter started up five new development projects, and the portfolio of ongoing projects now consists of 9 assets totalling 147,500 sqm. Fully let, the ongoing development projects will add rental income of around 450 million phased in during 2021-2024. In addition, Entra has a short-term pipeline of zoned projects totalling around 90,000 sqm and a long-term pipeline of around 250,000-300,000 sqm. The value potential of these newbuilds and redevelopment projects is only partly reflected in the NAV.

The Norwegian society and office market are currently less affected by Covid-19 than most other countries. Going forward, the office market is expected to experience changes in workplace strategies and office layouts to accommodate a more mobile and digital way of working. We expect higher tenants' demand for more flexibility and somewhat changed modus operandi for many office users. This could also provide opportunities benefitting large and professional landlords.

Entra manages modern, flexible and environmentally friendly assets located in clusters near public transportation hubs. Combined with a solid tenant base with long lease contracts, a strong financial position, and an extensive project pipeline for future growth, Entra has a proven and resilient business profile that is well positioned for the future. The Board believes that the company's growth profile in the coming years is attractive supported by a strong capital structure and balance sheet. The Board is strongly committed to continue its work to create further shareholder values in an independent Entra.

Notes

NOTE 1 GENERAL INFORMATION

Entra ASA ("the Company") is listed on Oslo Stock Exchange with the ticker ENTRA. The Company and its subsidiaries (together "Entra" or "the Group") is one of Norway's leading real estate companies, focusing on high quality, flexible office buildings with central locations. The Group owns and manages 90 (89) buildings with a total area of approximately 1.3 million (1.3 million) square metres. As of 31 December 2020 the real estate portfolio had a market value of

around 57 billion (49 billion). The public sector represents approximately 58 per cent (60 per cent) of the total customer portfolio. Entra's strategic areas are Oslo, Trondheim, Bergen, Sandvika, Stavanger and Drammen. Entra has its head office in Oslo.

The consolidated financial statements were adopted by the Company's Board on 3 March 2021.

NOTE 2 ACCOUNTING PRINCIPLES

ACCOUNTING PRINCIPLES

The most important accounting principles applied in the preparation of the annual financial statements are described below. These principles are applied in the same way for all periods presented, unless otherwise indicated in the description.

BASIC PRINCIPLES

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations by the IFRS Interpretation Committee (IFRIC), as adopted by the EU, as well as additional Norwegian reporting requirements pursuant to the Norwegian Accounting Act.

The consolidated financial statements have been prepared on the basis of the historical cost principle, with the following modifications: investment properties as well as certain financial assets and financial liabilities have been measured at fair value. Financial instruments measured at fair value include the Group's derivatives.

Presenting the accounts in accordance with IFRS requires the management to make certain assessments and assumptions. The application of the Group's accounting principles also requires management to exercise judgement. Estimates and subjective judgements are based on past experience and other factors that are considered appropriate. Actual results may deviate from these estimates.

Estimates and underlying assumptions are continuously reassessed. Changes in accounting estimates are recognised in the period in which the changes occur if they apply only to that period. If the changes also apply to future periods, the impact is distributed over the current and future periods. Note 3 details items in the accounts that are based on a significant amount of subjective judgement.

The consolidated financial statements have been presented on the assumption of the business being a going concern.

Application of new and revised International Financial Reporting Standards (IFRSs) in 2020

New and amended standards adopted by the Group

The accounting policies adopted and methods of computation followed are consistent with those of the previous financial year, except for items disclosed below.

Amendments to IFRS 3: Definition of a Business

The amendments to IFRS 3 Business Combinations clarify that to be considered a business, an integrated set of activities and assets must include, at a minimum, an input and a substantive process that, together, significantly contribute to the ability to create output. Furthermore, they clarify that a business can exist without including all of the inputs and processes needed to create outputs.

The other key amendments include:

- Removal of the assessment of whether market participants are capable of replacing any missing outputs or processes and continuing to produce outputs
- Adding guidance and illustrative examples to help entities assess whether a substantive process has been acquired
- Narrowing the definitions of business and outputs by focusing on goods or services provided to customers and by removing the reference to an ability to reduce costs
- Adding an optional concentration test that permits a simplified assessment of whether an acquired set of activities and assets is not a business

The amendments must be applied to transactions that are either business combinations or asset acquisitions for which the acquisition date is on or after the first annual reporting period beginning on or after 1 January 2020. These amendments had no impact on the consolidated financial statements of the Group for 2020. The majority of acquisitions of subsidiaries entered into by the Group have in recent years were accounted for as asset acquisitions. As such, the Group expects that the amendments will have limited effect on the accounting treatment of future transactions.

There are several other new and amendments to standards and interpretations which are applicable for the first time in 2020, but either not relevant or do not have an impact on the consolidated financial statements of the Group.

New standards and interpretations not yet adopted by the Group

A number of new IFRS standards and IFRIC interpretations are effective for annual reporting periods beginning after 1 January 2020, and have not been applied in preparing these consolidated financial statements. None of the new accounting standards or interpretations that have not yet come into effect are expected to have a significant impact on the Group's consolidated financial statements.

CONSOLIDATION PRINCIPLES

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. The Group reassesses whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether the Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- Potential voting rights held by the Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including vote patterns at previous shareholder's meetings.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method is used to account for purchases of subsidiaries that constitute a business. The consideration given is measured at the fair value of the transferred assets, the equity instruments that have been issued, liabilities assumed on the transfer of control and direct costs relating to the actual purchase. The cost of acquisition also includes the fair value of all assets or liabilities that are the result of an agreement on contingent consideration.

Identifiable purchased assets, assumed liabilities and contingent liabilities are recognised at fair value on the date of acquisition. The costs associated with the business combination are expensed when they are incurred.

If the aggregate of the consideration, the carrying amount of non-controlling interests and the fair value on the acquisition date of any previously held ownership interests exceeds the fair value of the acquired entity's identifiable net assets, the difference is capitalised as goodwill. If the aggregate is less than the company's net assets, the difference is immediately recognised in profit or loss.

Contingent consideration is recognised at fair value on the date of acquisition. Subsequent changes in the fair value of the contingent consideration are recognised in profit or loss or recognised as a change in other comprehensive income (OCI), if the contingent consideration is classified as an asset or a liability. Contingent consideration classified as equity is not remeasured, and subsequent settlement is recognised in equity.

For accounting purposes, acquisitions of subsidiaries that do not constitute a business as defined in IFRS 3, such as subsidiaries that only consist of a property, are treated as asset acquisitions. The cost of acquisition is then attributed to the individual identifiable assets and liabilities based on their relative fair values on the acquisition date. Expenses associated with the transaction are capitalized under the investment property. In such cases no provision is made for deferred tax in accordance with the exceptions in IAS 12.

Intra-group transactions, balances and unrealised gains are eliminated. Unrealised losses are eliminated, but are considered evidence of impairment in terms of writing down the value of the transferred asset. If necessary, the accounting policies at subsidiaries are changed in order to bring them into line with the Group's accounting policies.

Transactions with non-controlling interests

Transactions with non-controlling interests in subsidiaries are treated as equity transactions. If shares are acquired from a non-controlling interest, the difference between the payment and the proportion of the carrying amount of the subsidiary's net assets attributable to the shares is recognised in the equity of the parent company's owners. Gains and losses arising from the sale of shares to non-controlling interests are similarly recognised in equity.

If the Group loses control, any residual holding is remeasured at fair value through profit or loss (FVTPL). Thereafter, the fair value is used as the acquisition cost for accounting purposes, and the holding is treated as an investment in an associate, in a jointly controlled entity or in a financial asset. Amounts previously included in OCI that relate to the company are treated as if the Group had disposed the underlying asset and liability. This may result in amounts that were previously included in OCI being reclassified to the income statement.

Joint arrangements

Under IFRS 11, investments in joint arrangements are classified as either joint operations or joint ventures. In a joint arrangement, no single party controls the arrangement on its own. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant

activities require the unanimous consent of the parties sharing control.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

Entra classifies its investments based on an analysis of the degree of control and the underlying facts. This includes an assessment of voting rights, ownership structure and the relative strength, purchase and sale rights controlled by Entra and other shareholders. Each individual investment is assessed. Upon changes in underlying facts and circumstances, a new assessment must be made as to whether this is still a joint venture. Changes in contractual rights and obligations relating to the underlying asset or debt and changes in the shareholders agreement might lead to a shift in the accounting method.

In joint ventures, the Group's share of the companies' profit/loss after tax, adjusted for amortisation of excess value and any deviations from accounting policies, are presented on a separate line in the consolidated income statement. Joint ventures are recognised in the consolidated accounts using the equity method and presented as non-current assets.

A transaction that entails a change of control from an investment in a joint venture to an investment in a subsidiary is treated as a realisation and require that a gain/loss at the time of derecognition of the joint venture has to be calculated and recognised in the income statement as results from associates and JVs according to the equity method. Equity transactions in a joint venture is presented as an equity transaction in the Group's statement of changes in equity.

Associates

Associates are companies over which the Group has significant influence but not control or joint control. Significant influence normally exists where the Group's investment represents between 20 and 50 per cent of the capital with voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost. Investments in associates include any excess values and goodwill identified at the time of acquisition, less any subsequent impairment losses.

The Group's share of the profit and loss of associates is recognised and added to the carrying amount of the investments. The Group's share of the comprehensive income of associates is recognised in the Group's comprehensive income and added to the carrying amount of the investments. The Group does not recognise its share of a loss if this would result in a negative carrying amount for the investment (including the entity's unsecured receivables), unless the Group has taken over obligations or made payments on behalf of the associate.

The Group's share of unrealised gains on transactions between the Group and its associates is eliminated. This also applies to unrealized losses, unless there is a permanent loss of value. Where necessary, the accounts of associates have been brought into line with the Group's accounting policies. Gains and losses arising from the dilution of ownership interests in associates are recognised in profit or loss.

If the Group no longer has significant influence, any residual holding is remeasured at FVTPL. Thereafter, the fair value is used as the acquisition cost for accounting purposes, and the holding is treated as a financial asset. Amounts relating to the company that were previously recognised in comprehensive income are treated as if the associate had disposed of the underlying assets and liabilities. This may result in amounts that were previously included in comprehensive income being reclassified to the income statement. If the Group reduces its shareholding but retains significant influence, a proportionate share of the amounts previously recognised in comprehensive income is reclassified to the income statement.

INVESTMENT PROPERTY

Investment properties are owned with the aim of achieving a long-term return from rental income and increase in value. Investment properties are recognised at fair value, based on market values estimated by independent appraisers.

Initial measurement also takes into consideration the property's cost price, which includes direct transaction costs such as document duty and other public duties, legal fees and due diligence costs. Transaction costs associated with properties acquired through business combinations (as defined in IFRS 3) are expensed.

Subsequent expenditure is added to the investment property's carrying amount, if it is probable that future financial benefits associated with the expenditure will flow to the Group and the expense can be measured reliably. Other maintenance costs are recorded through the income statement in the period in which they are incurred. When investment properties are disposed of, the difference between the net sales proceeds and carrying amount is recognised as change in value from investment properties.

Investment properties are valued at each reporting date. The values are estimated by independent appraisers. The valuation is based on the individual property's assumed future cash flows, and property values are arrived at by discounting cash flows with an individual risk-adjusted required rate of return.

The required rate of return for each property is defined as being a long-term risk-free interest rate plus a property-specific risk supplement. The latter is defined on the basis of the property segment to which the property belongs, its location, standard, occupancy rate, tenants' financial reliability and remaining lease term. Known market transactions with similar properties in the same geographical area are also taken into consideration.

Changes in fair value, including gains and losses on sale of investment properties, are recognised as "Changes in value of investment properties".

Investment properties held for sale

Investment properties are classified as held for sale if their carrying amount will be recovered through a sales transaction rather than through their continuing use. This condition is regarded as met if the sale is highly probable and the investment property is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets. For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the investment property, and an active programme to locate a buyer and complete the plan must have been initiated. Further, the investment property must be actively marketed for sale at a price that is reasonable in relation to its current fair value. In addition, the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification. Investment properties classified as held for sale are measured at fair value in the same way as other investment properties.

Borrowing costs

Borrowing costs for capital used to finance investment properties under construction are capitalised under the asset in question. When calculating the capitalised borrowing costs, the average interest rate on the company's debt portfolio over the course of the year is used, unless there is separate financing for the specific project. In such cases the specific borrowing cost for the loan in question is used. When calculating the average interest rate to be used for the capitalisation of borrowing costs, loans taken out for specific projects are not included.

REVENUE RECOGNITION**Revenue from lease contracts**

The Group enters into lease agreements as a lessor with respect to its investment properties. Lease contracts where a significant proportion of the risks and benefits of ownership remain with Entra are classified as operating leases. Revenue recognition under a lease commences at the inception of the lease. Rent payments for the leases are recognised in a straight line over the duration of the lease.

In negotiating a new or renewed operating lease, Entra may provide incentives for the lessee to enter into the agreement. Examples of such incentives are rent exemptions, up-front payments to the lessee or the reimbursement or assumption by the lessor of costs of the lessee (such as relocation costs, leasehold improvement and costs associated with a pre-existing lease commitment of the lessee). Entra recognises the aggregate benefit of incentives as a reduction of rental income over the lease on a straight-line basis. The accrued loss of rent or costs is presented under other receivables. Payments relating to the termination of contracts are recognised in the period from the contract being entered into until the date of its termination. Rental income encompasses the fair value of the payments received for services that fall within the ordinary activities of the company. Rental income is presented net of VAT, rebates and discounts.

Rental income from letting of inventory properties is presented as "Other revenue".

Costs for shared services provided to the tenants by external parties do not affect the result beyond an administrative premium recognised as rental income. Shared costs are charged to tenants

and recognised in the balance sheet together with payments on account of tenants. Shared costs are settled after the balance sheet date.

Revenue from contracts with customers

In determining the basis for revenue recognition from contracts with customers, the Group identifies the distinct performance obligations under the contracts, allocate the transaction price to each identified performance obligation and account for revenue as each performance obligation is met.

Revenue from development of commercial properties, including transactions that are structured as sale of shares, are recognised over time according to the stage of completion if the buyer does not have the right to cancel a contract, and the Group as a seller can require a buyer to pay the consideration agreed in the contract even if the buyer acts to terminate a contract. A project's stage of completion is measured by reference to the contract costs incurred up to the end of the reporting period as percentage of total estimated costs. Contract assets related to non-invoiced revenue from such construction contracts are included in "Other receivables and other current assets".

Revenue from development of inventory properties for sale is recognised when the properties are handed over to the customer as the Group does not have an enforceable right to collect payment for the benefits performed to date.

Service income for extra services to tenants is recognised in the period the service is performed.

FINANCIAL INSTRUMENTS

A financial instrument is defined as being any contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity. Financial instruments are recognised on the transaction date, i.e. the date on which the Group commits to buying or selling the asset. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them.

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through OCI, and FVTPL. For a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are "solely payments of principal and interest (SPPI)" on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Further, the financial assets shall be held within a business model whose objective is to hold the financial assets in order to collect contractual cash flows. The majority of the Group's financial assets are classified as measured at amortised cost.

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. The Group's financial assets at amortised cost includes trade and other current receivables, cash and cash equivalents and other financial assets.

Financial assets at FVTPL include financial assets held for trading, financial assets designated upon initial recognition at FVTPL, and financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVTPL. The Group's financial assets at FVTPL includes financial derivatives and shares held for trading.

The Group recognises an allowance for expected credit losses on all debt instruments not held at FVTPL. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

Financial liabilities are classified upon initial recognition as financial liabilities at FVTPL and financial liabilities at amortised cost. Financial liabilities at FVTPL comprise loans designated at fair value upon initial recognition and derivatives. Financial liabilities at amortised cost consist of liabilities that do not fall under the category at FVTPL.

Trade receivables, contract assets and other financial assets

Trade receivables, contract assets and other financial assets are classified as financial assets measured at amortised cost. Interest is ignored if it is insignificant. The Group applies the simplified approach in IFRS 9 to measure the loss allowance at lifetime expected credit losses. A provision for bad debt are determined by estimating expected credit losses with reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. There has been no change in the estimation techniques or significant assumptions made during the current reporting period. Any subsequent payments received against accounts for which a provision has previously been made are recognised in the income statement. Trade receivables, contract assets and other financial assets are classified as current assets, unless they are due more than twelve months after the balance sheet date. If so, they are classified as non-current assets.

Cash and cash equivalents

Cash and cash equivalents consist of bank deposits and other short-term, highly liquid investments with an original term to maturity of no more than three months.

Financial derivatives

The Group uses derivatives to manage its interest rate risk. Derivatives are initially recognised at fair value on the date on which the contract was signed, and subsequently at fair value. Gains or losses on remeasurement at fair value are recognised in the income statement. Regular payments are presented as interest and other finance expenses. Changes in the value of the derivatives are presented under "Changes in value of financial instruments".

The fair value of interest rate swaps is the estimated amount the Group would receive or pay to redeem the contracts on the balance sheet date. This amount will depend on interest rates and the contracts' remaining term to maturity. The derivatives are classified on the balance sheet as current or non-current, depending on whether they are expected to be redeemed under or over 12 months from the balance sheet date.

Trade payables and other non-interest bearing financial liabilities

Trade payables and other non-interest bearing liabilities are classified as financial liabilities at amortised cost, and are measured at fair value upon initial recognition, and subsequently at amortised cost using the effective interest rate method. Interest is ignored if it is insignificant.

Interest bearing liabilities

Interest bearing liabilities are classified as financial liabilities at amortised cost, and are measured at fair value upon initial recognition, and subsequently at amortised cost using the effective interest rate method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included as net realised financials in the statement of profit or loss. The liabilities are measured at their nominal value when the effect of discounting is immaterial.

Interest bearing liabilities are classified as current liabilities where the debt is due for repayment less than 12 months from the balance sheet date.

LEASE CONTRACTS (THE GROUP AS A LESSEE)

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease contracts in which it is the lessee, except for leases with a lease term of 12 months or less, and leases of low value assets (such as vehicles and technical and office equipment), for which the Group applies the "short-term lease" and "lease of low-value assets" recognition exemptions. For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the lease term.

Only fixed payments are included in the initial measurement of the lease liability, and the lease term corresponds to the non-terminable period. The discount rate used to calculate the lease liability is determined, for each asset, based on the Group's incremental borrowing rate for leases with under 15 years until maturity. For leases with over 15 years until maturity, the discount rate is based on the properties' net yields, adjusted for features that affect Entra's incremental borrowing rate, such as tenant-specific factors and the length of the lease. The lease liability is presented as part of other liabilities in the balance sheet.

For lease contracts where the leased properties meet the definition of investment properties in IAS 40, Entra applies the fair value model to the associated right-of-use assets. The right-of-use assets are measured by discounting the assumed future cash flows under the lease contracts. The discount rate used to calculate the right-of-use asset may be different from the discount rate used to calculate the lease liability. The right-of-use assets are presented as part of investment properties in the balance sheet.

INTANGIBLE ASSETS

Goodwill

Goodwill is the difference between the cost and the fair value of the Group's share of net identifiable assets in the entity on the acquisition date. Goodwill arising from the acquisition of subsidiaries that constitute a business as defined in IFRS 3, is classified as an intangible asset. For the purposes of impairment testing, goodwill is allocated to the relevant cash-generating units. Goodwill is allocated to the cash-generating units or groups of cash-generating units that are expected to benefit from the acquisition from which the goodwill arose. Goodwill is tested for impairment annually and is recognised at cost less any impairment losses. Impairment of goodwill is not reversed. Gains and losses on the sale of an operation include the carrying amount of goodwill relating to the sold operation.

Goodwill arising from the purchase of shares in associates and jointly controlled entities is included under the investment in the associate or jointly controlled entity, and is tested for impairment as part of the carrying amount of the investment.

Impairment of intangible assets

Intangible assets with an uncertain useful life are not depreciated and are instead tested annually for impairment. Intangible assets that are depreciated are also tested for impairment if there is any indication to suggest that future cash flows cannot justify the carrying amount of the asset. Write-downs are recorded through the income statement as the difference between the carrying amount and the recoverable amount. The recoverable amount is the value in use or fair value, whichever is the higher, less selling costs. When testing for impairment, intangible assets are grouped at the lowest possible level at which it is possible to identify independent cash flows (cash-generating units). In conjunction with each financial report, the company assesses whether it is possible to reverse past write-downs of non-financial assets (except goodwill).

PENSIONS

The Group has both defined benefit and defined contribution pension schemes. A defined benefit pension scheme is a pension arrangement that defines the pension payment an employee will receive on retirement. The pension benefit payable is dependent on a number of factors, such as the employee's age, number of years of membership of the Norwegian Public Service Pension Fund and salary.

The recognised pension obligation relating to defined benefit plans is the present value of the defined benefit on the balance sheet date less the fair value of the plan assets. The gross pension obligation is calculated annually by an independent actuary using the projected credit unit method. The gross pension obligation is discounted using a discount rate based on bonds with preference rights, which mature around the same time as the related pension obligations.

Changes to benefits payable under the pension plan are recognised in the income statement as they arise. Actuarial gains/losses resulting from new information or changes to actuarial assumptions are recognised against equity via comprehensive income in the period they arise.

Contributions to defined contributions plans are recognised in the income statement in the period in which they accrue.

SHARE BASED PAYMENTS

The Group has a share-based incentive program for executives ("LTI"). The LTI scheme is reported in accordance with IFRS 2. LTI remuneration is share-based and has a vesting period of one year and a lock-up period of three to five years. The fair value at the grant date is measured applying Black-Scholes (BS) based on the market price. The fair value of the shares allocated through the LTI is calculated on the basis of the share price at grant date, taking into account the likelihood of the employee still being employed after the lock-up period. The amount is recognised as payroll expenses at grant date and accrued for the period from grant date to the date when the shares are without any restrictions.

SHARE DISCOUNTS

Sales of shares to employees in the share saving scheme are reported in accordance with IFRS 2. The recognised discount is calculated as the difference between market price and purchase price at the time of purchase, taking into account the agreed lock-in period for the shares. The effect of the agreed lock-in period is calculated as the value of a put option using the BS model. The assumptions relating to volatility are based on the actual fluctuations in the price of Entra's shares. The share of the discount that represents the difference between the calculated BS value and the market value of the shares is recognised against equity and the remaining discount, that represents the difference between the paid amount for the shares by the employees and the BS value, is recognised as payroll expenses at the time of allocation.

TAX

The tax expense consists of tax payable and deferred tax. Tax is charged to the income statement, except where it relates to items that are recognised in OCI or directly in equity. In such cases, the tax is either recognised in OCI or directly in equity.

Deferred tax is calculated using the liability method for all temporary differences between the tax values and consolidated accounting values of assets and liabilities. Deferred tax liabilities are not calculated and recognised upon initial recognition of assets or liabilities obtained through an acquisition of a subsidiary not classified as a business combination. Deferred tax is defined using tax rates and laws which are enacted or likely to be enacted on the balance sheet date, and which are expected to be used when the deferred tax asset is realised or when the deferred tax is utilised.

Deferred tax is calculated and provided or reduced in the event of adjustments to the value of investment properties at a nominal tax rate of 22 per cent. A deferred tax asset is recognised to the extent that it is likely that future taxable profit will be available against which the temporary differences can be offset.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in jointly controlled entities, except where the Group is able to control the reversal of the temporary differences and it is probable that the temporary difference will not reverse in the foreseeable future.

PROVISIONS

The Group recognises provisions for legal claims when a legal or self-imposed obligation exists as a result of past events, when it is likely that an outflow of resources will be required to settle the

obligation and its amount can be estimated with a sufficient degree of reliability.

In cases where there are several obligations of the same nature, the likelihood of settlement is determined by assessing the Group as a whole. A provision for the Group is recognised even if there is little likelihood of settlement of the Group's individual elements.

Provisions are measured at the present value of expected payments to settle an obligation. A discount rate before tax is used which reflects the present market situation. Any increase in an obligation as a result of a changed time value is reported as a financial expense.

A provision for onerous contracts is recognised when the expected benefits to be derived by Entra from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract and taking into consideration any reasonably obtainable subleases.

INVENTORY PROPERTIES

The Group's residential projects involve zoning, development and construction. Where the Group constructs the residential projects, the individual units are handed over to the purchaser when they are completed. Properties under zoning for residential purposes may be handed over to other residential developers. The residential projects are intended for sale in the ordinary course of business or which is in the process of construction or development for such sale. Inventory property thus comprise properties held for resale, property under development and construction, and completed units which are not sold. Inventories are measured at the lower of cost and net realisable value.

OTHER OPERATING ASSETS (EQUIPMENT)

Other operating assets are recognised at acquisition cost, less depreciation. The acquisition cost includes costs directly related to the acquisition of the asset. Other operating assets are depreciated in a straight line over their anticipated remaining useful life.

The assets' remaining useful life and residual value are reassessed on each balance sheet date and changed if necessary. If the carrying amount of an asset is higher than its recoverable amount, the value of the asset is written down to the recoverable amount.

Gains and losses on disposals are recognised through profit or loss, and are calculated as the difference between the sales price and the carrying amount at the time of disposal.

CURRENCY

The Group's presentation currency is NOK. This is also the functional currency of the parent company and all its subsidiaries.

Foreign currency transactions are translated at the exchange rate on the date of the transaction. Monetary foreign currency items are translated to NOK at the exchange rate on the balance sheet date. Non-monetary items that are measured at cost in a foreign currency are translated to NOK using the exchange rate on the transaction date. Non-monetary items that are measured at fair value in a foreign currency are translated to NOK using the

exchange rate on the balance sheet date. Exchange rate fluctuations are recognised in profit or loss as they arise.

SEGMENT INFORMATION

Operating segments are reported in the same way as in internal reports to the Group's highest decision-making authority. The Group's highest decision-making authority, which is responsible for allocating resources and assessing the profitability of the operating segments, has been identified as the Board of Directors and the CEO.

STATEMENT OF CASH FLOWS

The statement of cash flows is prepared using the indirect method. This means that the statement is based on the Group's profit before tax in order to present cash flows from operating, investing and financing activities respectively. Interest on leases and net interest and fees paid on loans are presented as operating cash flows. Dividends paid to shareholders and non-controlling interests are presented under financing activities.

DIVIDENDS

Entra pays semi-annual dividends. Dividend payments to the company's shareholders for the first half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Board of Directors. Dividend payments to the company's shareholders for the second half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Annual General Meeting.

NOTE 3 CRITICAL ACCOUNTING ESTIMATES AND SUBJECTIVE JUDGEMENTS

Fair value of investment properties

Investment properties are measured at their fair value based on external, independent valuations.

Each quarter, all the properties are valued by two independent, external appraisers. The valuations at 31 December 2020 were obtained from Akershus Eiendom/JLL and Newsec. The valuations are mainly based on the discounted cash flow method, which involves discounting future cash flows over a specified period using an estimated discount rate and then adding a residual value at the end of the period. Future cash flows are calculated on the basis of cash flows from signed leases, as well as future cash flows based on an expected market rent at the end of the lease terms. The fair value of investment properties is therefore mainly affected by expected market rents, discount rates and inflation. The market rent for each property takes into account the property's situation, standard and leases signed for comparable properties in the area. For the duration of existing lease terms, the discount rate is mainly based on an assessment of the individual tenants' financial solidity and classification. After the end of the lease term, cash flows are discounted using a discount rate that takes into account the risk relating to letting and location. Inflation is estimated using the consensus of a selection of banks and official statistics.

When carrying out their valuations, the appraisers receive comprehensive details of the leases for the properties, floor space and details of any vacant premises, and up-to-date information about all ongoing projects. Any uncertainties relating to the properties/projects and leases are also clarified verbally and in writing as and when required. The Group management performs internal controls to ensure that all relevant information is included in the valuations.

The appraisers perform their valuations on the basis of the information they have received, and estimate future market rents, yields, inflation and other relevant parameters. Each individual property is assessed in terms of its market position, rental income (contractual rents versus market rents) and ownership costs, with estimates being made for anticipated vacancy levels and the need for alterations and upgrades. The remaining term of the leases is also assessed for risk, along with any special clauses in the contracts. Each property is also compared with recently sold properties in the same segment (location, type of property, mix of tenants, etc).

Market transactions serve as important reference points for the appraisers and the number of transactions thus influence the level of uncertainty in the valuations. Total transaction volume in the Norwegian market in 2020 came in above NOK 100 billion. This is the second highest transaction volume ever in the Norwegian market, despite the activity being close to stand-still during the outbreak of the Covid-19 pandemic in March 2020. During the autumn, the activity in the transaction market picked up, and a number of transactions of relevance for Entra's portfolio were completed, providing the appraisers with relevant reference transactions for the valuation of Entra's portfolio at year-end.

The table below shows to what extent the value of the management property portfolio is affected by market rents and exit yields (market yields), assuming that all other factors are equal. However, there are interrelationships between these variables, and it is expected that a change in one variable may influence one or more of the other variables.

Value change
(NOK million)¹⁾

		% Δ Yield				
		-0.50 %	-0.25 %	0.00 %	0.25 %	0.50 %
% Δ Market rent	-10.0 %	2 812	-1 537	-5 315	-8 629	-11 559

¹⁾ Estimates by Newsec in conjunction with valuations at 31 December 2020.

Consolidation of entities in which the Group holds less than a majority of shares

Entra considers that it controls Entra OPF Utvikling AS and Hinna Park Eiendom AS even though it owns 50 per cent of the shares in the companies. In this assessment, Entra has considered all relevant facts and circumstances in assessing whether the voting rights are sufficient to give Entra power over the two companies. A key consideration is whether Entra has the practical ability to unilaterally direct the relevant activities that affect the amount of Entra's return. The relevant activities, including property management, ongoing maintenance and minor redevelopment projects, are directed by the Board of Directors in the two companies. The shareholder agreements include certain provisions that restricts Entra from making significant changes to the business of the two companies. These

provisions are not considered to give the co-investors power over the companies, and are only considered to be protective rights. As Entra shall appoint the Chairman of the two companies and the Chairman has a double vote in the Board of Directors of the companies, Entra has concluded it controls these companies.

Fair value of financial derivatives

The Group uses interest rate derivatives and fixed rate loans to manage the interest rate risk. The financial derivatives are valued at fair value in the Group's balance sheet. See note 8 for further information on the valuation of the Group's financial derivatives.

NOTE 4 FINANCIAL RISK MANAGEMENT

All amounts in NOK million

Governance structure, exposure and reporting

The Board of Entra ASA has defined limits for the financial exposure of the Group through the financial policy. The financial policy regulates the following:

- Allocation of responsibility for financial management
- Overall limits and principles for management of financial exposure
- Principles for borrowing
- Definitions of financial risk parameters and key controls that must be in place to ensure adequate risk management
- Requirements for reporting and monitoring. The Group's overall financial risk exposure is reported regularly to the Board.

There is a responsibility and authority matrix for the Finance department, which defines authority for the day-to-day management of financial transactions within the overall framework of financial management.

The Group must ensure that there is adequate operational risk management and internal control through clear areas of responsibility and allocation of duties. The procedures relate in particular to the management of financial exposure and the division of responsibility between the various roles in the Finance department and the department's financial systems. There are guidelines for managing financial exposure, which include checklists related to the control of current transactions.

The finance department is continuously assessing the Group's financial risks and opportunities. Projections and simulations are made in the corporate financial model based on detailed assumptions on macroeconomic development, financial parameters and the property market. The simulations are intended to provide information for the Board and management in their monitoring of key financial figures for the Group.

The Group's finance strategy shall ensure that the Group has financial flexibility and that it achieves competitive financial terms. The Group is exposed to financial risk and has defined the following relevant risk areas:

- Financing risk
- Capital management and solvency
- Interest rate risk
- Credit/counterparty risk
- Currency risk

Financing risk

Financing risk is the risk that the Group will be unable to meet its financial obligations when they are due and that financing will not be available at a reasonable price.

The Group seeks to limit financing risk through:

- minimum level of committed capital to cover refinancing requirements
- average time to maturity requirements for the group's financing
- the use of various credit markets and counterparties
- diversified maturity structure for the Group's financing

Capital management and solvency

The main purpose of the Group's capital management is to maintain a good balance between debt and equity, in order to maximise the value of the shares in the Group, while also maintaining a good credit rating and obtaining loan terms with lenders that reflect the risk profile of the Group. The Group has defined a target for the Loan-To-Value ratio which shall not exceed 50 per cent over a time period. There are covenants in the Group's loan agreements that specify requirements in relation to the company's financial strength.

Interest rate risk

Interest rate risk arises from the interest-bearing debt being affected by changes in market rates. Interest rate risk affects the Group's cash flows and the market value of the Group's liabilities. The main purpose of the Group's interest rate strategy is to ensure that the Group achieves the desired balance between the interest expense and interest rate risk. The Group's interest rate risk is managed within the following financial policy requirements:

- minimum 40 per cent of the interest-bearing debt to be hedged at fixed interest rate.
- average remaining time to maturity for interest rate hedges in the interval 2-6 years.
- diversification of the maturity structure for fixed interest rates.

Credit and counterparty risk

Stable, predictable and long-term access to capital is critical for Entra. Entra considers that the ability of creditors to behave predictably over the long term is often dependent on their creditworthiness. For this reason, Entra wants the Group's creditors to be of a good credit quality and has established credit rating limits for the Group's creditors. The credit ratings of the Group's financial counterparties are continuously monitored. The fair value of all financial derivative assets was 347 million (274 million).

Trade receivables at 31 December 2020 was 64 million (43 million), contract assets was 11 million (nil), external loans was 69 million (143 million) and other long-term receivables was 89 million (91 million). The concentration of credit risk with respect to trade debtors is assessed to be low, as the majority of Entra's customers are paying their rent in advance. The creditworthiness of counterparties in construction contracts that give rise to contract assets and contracts with debtors that give rise to other receivables are thoroughly evaluated before entering into the contracts.

Cash and bank deposits at 31 December 2020 amounted to 217 million (317 million). The deposits were placed with financial institutions with A-/A3 or better credit ratings.

Currency risk

The Group shall not incur any currency risk. The Group did not have any currency exposure at 31 December 2020.

Financial covenants

There are covenants in the Group's bank loan agreements relating to interest cover ratio (ICR) and the loan-to-value of property (LTV). At 31 December 2020, the Group was not in breach of any covenants.

There are no covenants in relation to the Group's bond or commercial paper loans.

The table is based on undiscounted contractual cash flows. The maturity analysis is based on the earliest possible redemption for instruments where the counterparty has a choice as to when to redeem the instrument. Estimated interest is based on the interest rate on the individual loan/ instrument on the balance sheet date. In order to manage its liquidity risk, the Group has available, unused credit facilities with Norwegian and international banks, as well as available liquid assets.

UNUSED CREDIT FACILITIES

31.12.2020	TERM TO MATURITY								Total
	Under 3 months	4-12 months	1-2 years	2-4 years	4-6 years	6-8 years	8-10 years	Over 10 years

Total unused credit facilities	-	-	750	3 440	2 000	-	-	-	6 190

At 31 December 2020, the Group had 206 (283) million of available liquid assets. See Note 22.

Interest rate risk

The Group's liabilities are subject to fixed interest rates (50 per cent of liabilities at 31 December 2020 compared to 59 per cent at 31 December 2019). The Group uses a variety of derivatives to adapt its portfolio to the chosen fixed rate structure. The choice of fixed interest profile is based on an evaluation of the Group's financial strength and ability to generate long-term, stable cash flow.

At 31 December 2020, the weighted average remaining term to maturity was 2.4 years (3.0 years). The average interest rate was 2.38 per cent (2.99 per cent) at 31 December 2020.

The table below shows the nominal value of outstanding current and non-current interest-bearing debt including derivatives.

MATURITY STRUCTURE OF THE GROUP'S EXPOSURE TO NOMINAL INTEREST RATE RISK

As at 31.12.2020	31.12.2021	31.12.2022	31.12.2024	31.12.2026	31.12.2028	31.12.2030	31.12.2030+	Total
Term to maturity	Up to 1 year	1-2 years	2-4 years	4-6 years	6-8 years	8-10 years	Over 10 years

KEY FIGURES FOR THE GROUP'S FINANCIAL INSTRUMENTS

	2020	2019
Nominal value of interest rate derivatives on the balance sheet date ¹⁾	12 210	12 010
of which		
- Fixed-to-variable swaps ¹⁾	3 300	3 000
- Variable-to-Fixed swaps	8 910	9 010
Range of fixed interest rates	From 1.1050 % to 5.6450 %	From 1.1050 % to 5.6450 %
Variable rate basis	NIBOR	NIBOR
Average fixed rate excl. forward starting swaps	2.37 %	2.41 %
Average fixed rate incl. forward starting swaps	2.37 %	2.07 %
Fair value of derivatives on the balance sheet date (NOKm)	-343	-68
Change in fair value of interest rate derivatives over the year	-275	46

¹⁾ 3,300 million (3,000 million) of swaps linked to the fixed-interest bonds issued by the Group are included in the volume of interest rate swaps. These bonds are swapped to a variable rate in order to ensure that the Group is in a position to manage its interest rate fixing independently of the bonds. The real volume used for interest rate fixing is therefore 8,910 million (9,010 million). At 31 December 2020 the Group has no interest rate options or option-related products.

NOTE 5 RISK LEASE MANAGEMENT

All amounts in NOK million

The Group mainly enters into lease contracts with fixed rent for the lease of property. Lease payments for the majority of the contracts include CPI increases.

THE GROUP'S FUTURE ACCUMULATED RENT FROM NON-TERMINABLE OPERATIONAL LEASE CONTRACTS AT 31.12.

	2020	2019
≤ 1 year	2 450	2 073
1 year < 2 years	2 286	2 443
2 year < 3 years	2 157	2 271
3 year < 4 years	1 918	2 109
4 year < 5 years	1 702	1 855
≥ 5 years	7 887	6 127
Total¹⁾	18 401	16 878

THE GROUP'S LEASE CONTRACTS AT 31.12 HAVE THE FOLLOWING MATURITY STRUCTURE MEASURED IN ANNUAL RENT ¹⁾

Remaining term	2020			2019		
	No. of contracts	Contract rent	Contract rent, %	No. of contracts	Contract rent	Contract rent, %
≤ 1 year	232	173	7	238	250	10
1 year < 5 years	245	883	34	267	1 015	41
5 years < 10 years	105	896	35	101	847	35
≥ 10 years	46	626	24	26	343	14
Total	628	2 578	100	632	2 456	100

The table above shows the remaining non-terminable contractual rent for current leases without taking into account the impact of any options.

¹⁾ The rent is stated as the annualised contractual rent, and is therefore not reconcilable with the rental income for the year for accounting purposes.

OTHER PARAMETERS RELATING TO THE GROUP'S LEASE PORTFOLIO

	2020				2019			
	Area (sqm.)	Occupancy (%)	Wault (yrs)	Share of public sector tenants (%)	Area (sqm.)	Occupancy (%)	Wault (yrs)	Share of public sector tenants (%)
Oslo	550 010	98.0	6.9	58	583 428	97.0	6.7	58
Trondheim	158 940	97.1	7.1	77	154 776	95.4	7.2	67
Bergen	105 045	97.1	5.4	55	119 533	96.1	6.0	59
Sandvika	98 988	99.4	7.5	57	98 961	99.8	8.4	57
Stavanger	78 607	99.0	6.3	51	78 607	99.4	7.2	50
Drammen	62 107	97.6	9.5	84	70 422	98.1	6.2	81
Total management portfolio	1 053 697	97.9	6.9	61	1 105 727	97.1	6.8	60
Project portfolio	162 785		9.7	23	107 201		9.6	76
Regulated development sites	128 195		5.3	-	114 859		0.3	-
Total property portfolio	1 344 677		7.1	58	1 327 787		6.9	61

On account of the high occupancy rate, the high proportion of public sector tenants and the relatively long average remaining contract term, the risk to the Group's cash flow is considered low. The main effect of the Covid-19 pandemic on rental income in 2020 is a reduction in turnover based rents of approximately 14 million from 2019.

NOTE 6 SEGMENT INFORMATION

All amounts in NOK million

The Group has one main operational unit, led by the COO. The property portfolio is divided into six different geographic areas in Oslo, Sandvika, Drammen, Stavanger, Bergen and Trondheim, with management teams monitoring and following upon each area. The geographic units are supported by a Market and Property Development division, Project Development division and a Digitalisation and Business Development division. In addition, Entra has group and support functions within accounting and finance, legal, investment, procurement, communication and HR.

The geographic areas do not have their own profit responsibility. The geographical areas are instead followed up on economical and non-economical key figures ("key performance indicators"). These key figures are analysed and reported by geographic area to the chief operating decision maker, that is the board and CEO, for the purpose of resource allocation and assessment of segment performance. Hence, the Group report the segment information based upon these six geographic areas.

	No. of properties	Area	Occupancy	Wault	Market value		12 month rolling rent		Net yield	Market rent

NOTE 8 INFORMATION ABOUT FAIR VALUE

All amounts in NOK million

Investment properties are valued at fair value based on independent external valuations.

Financial derivatives are measured at fair value using valuation methods where the significant parameters are obtained from quoted market data.

The Group uses the following hierarchy to classify assets and liabilities, based on the valuation methods used to measure and disclose their fair value.

Level 1: Quoted (unadjusted) prices in active markets for identical assets and liabilities.

Level 2: Other techniques where all of the parameters that have a significant impact on measuring fair value are either directly or indirectly observable.

Level 3: Valuation techniques that use parameters that significantly affect the valuation, but which are not observable.

ASSETS MEASURED AT FAIR VALUE

	31.12.2020	Level 1	Level 2	Level 3
Assets at fair value through profit or loss				
· Investment properties	56 834			56 834

INFORMATION ABOUT THE FAIR VALUE OF FINANCIAL ASSETS MEASURED AT AMORTISED COST

	2020		2019	
	Fair value	Carrying amount	Fair value	Carrying amount
Loans to associates and jointly controlled entities	1	1	-	-
Other financial assets	158	158	168	168
Trade receivables	64	64	43	43
Total	222	222	211	211

INFORMATION ABOUT THE FAIR VALUE OF FINANCIAL LIABILITIES MEASURED AT AMORTISED COST

	2020		2019	
	Fair value	Carrying amount	Fair value	Carrying amount
Seller's credit and withheld purchase price	84	84	81	81
Subordinated loans	18	18	18	18
Total	102	102	100	100

The difference between the fair value and the amortised cost of interest-bearing liabilities is described in note 24. Other financial liabilities, except for the amounts above, are short term and the difference between the fair value and the amortised cost is marginal.

NOTE 9 OPERATING COSTS

All amounts in NOK million

	2020	2019
Operating costs		
Maintenance	33	33
Tax, leasehold, insurance	57	58
Letting and property administration	70	57
Direct property costs	51	40
Total operating costs	211	189

NOTE 10 OTHER REVENUE

All amounts in NOK million

	2020	2019
Other revenue		
Sales of services provided to tenants	82	86
Rental income from inventory properties	21	22
Construction contract revenue	8	186
Other revenue	2	7
Total other revenue	113	300

In 2018, the Group entered into a property swap transaction with Aberdeen Eiendomsfond Norge I regarding certain properties in Oslo, including Tollbugata 1A, which was under refurbishment. Revenue from the construction contract and related costs were recognised over time according to the stage of completion. The refurbishment was completed and delivered in 2019, with final settlement recognised as construction contract revenue in 2020.

NOTE 11 OTHER COSTS

All amounts in NOK million

	2020	2019
Other costs		
Costs related to services provided to tenants	58	68
Costs related to inventory properties	12	9
Construction contract costs	-	167
Other costs	9	16

Office expenses, furnishings and equipment	42	27
Consultancy fees	29	23
Other administrative owner costs	10	17
Total administrative costs	186	171

NOTE 13 PERSONNEL COSTS

All amounts in NOK million

PERSONNEL COSTS

	2020	2019
Salaries, performance-related pay and other taxable benefits ¹⁾	191	174
Employers' National Insurance contributions	26	27
Pension expenses	14	15
Other personnel costs	9	14
Total personnel costs	241	229
Of which capitalised as projects under development	-49	-45
Of which shared costs distributed amongst tenants	-45	-40
Total salary and personnel costs	147	144
Number of full-time equivalents	184	175
Number of employees at 31.12.	186	177

¹⁾ Salaries, performance-related pay and other taxable benefits includes a 15 million (10 million) provision for performance-related pay for all employees in 2020, which has not yet been paid out.

REMUNERATION OF SENIOR EXECUTIVES

The total remuneration of the CEO and other Senior Executives consists of a fixed package of salary and benefits supplemented by performance related bonuses (short-term incentive - STI), share-based long-term incentive plans (LTI), employee share plans, pension and insurance arrangements. For further details on Entra's compensation policy and practice, please refer to pages 73 to 76 in the corporate governance section of this annual report.

OVERVIEW OF TOTAL REMUNERATION OF SENIOR EXECUTIVES IN 2020

All amounts in NOK thousand	Salary	Performance related bonus (STI) ¹⁾	LTI ²⁾	Benefits in kind	Pension costs	Total remuneration 2020
Sonja Horn, CEO	3 728	1 385	738	140	110	6 100
Anders Oistad, CFO and Deputy CEO	3 262	1 257	669	140	110	5 438
Kjetil Hoff, COO	2 047	415	179	140	110	2 892
Per Ola Ulseth, EVP Project Development	2 027	416	255	140	110	2 948
Tore Bakken, EVP Market and Commercial Real Estate Development	2 084	426	226	140	110	2 985
Åse Lunde, EVP Digitalisation and Business Development	1 757	312	251	140	110	2 570
Kristine Marie Hilberg, EVP HR and Organisation	1 634	334	120	141	110	2 339
Total	16 540	4 544	2 437	981	770	25 271

¹⁾ STI reflects the provision based on targets met in 2020, which will be paid out in 2021.

²⁾ The LTI scheme has a vesting period of one year and a lock-up period of three to five years. LTI is reported on expensed basis. As such, the earned LTI for 2020 also includes a portion of LTI earned in previous years.

The above amounts are subject to National Insurance contributions of 14.1 per cent.

No loans were given by Entra to senior executives at 31 December 2020.

OVERVIEW OF TOTAL REMUNERATION OF SENIOR EXECUTIVES IN 2019

All amounts in NOK thousand	Salary	Performance related pay (STI) ¹⁾	LTI ²⁾	Benefits in kind	Pension costs	Total remuneration 2019
Sonja Horn, EVP Property Management until 30.06.19, CEO from 01.07.19	3 090	950	456	155	108	4 759
Anders Olstad, CFO	2 808	581	469	155	108	4 120

Investment properties	56 834	49 095

The property Tollbodallmenningen 2A in Bergen is held for sale on 31 December 2020.

Investment properties are valued at fair value based on independent external valuations. The valuation method is included at level 3 in the valuation hierarchy. Reference is made to note 8.

For information about valuations and fair value calculations for investment properties, see Note 3 "Critical accounting estimates and subjective judgements".

Certain of the Group's properties are subject to purchase options, as described on next page.

Pursuant to the lease agreements entered into between Entra and the Norwegian Ministry of Culture on 22 April 2005, 15 October 2003 and 30 June 2005, respectively, the tenant has an option to acquire the three buildings comprising the National Library in Henrik Ibsens gate 110/Observatoriegaten 1 in Oslo (the refurbished buildings "Magasinet" and "Halvbroren"). The tenant has the right to acquire the refurbished buildings at expiry of each 25 year lease period (expiring on 6 June 2030 and 31 December 2029, respectively). The leases include an unlimited number of 25-year extension periods, at market rents. Further, the tenant has the right, upon six months' notice, to acquire "Halvbroren" if the tenant itself leases and uses more than 50 per cent of the building. As of 31 December 2020, the tenant leased and used 66 per cent (66 per cent) of the building. The purchase price for all three buildings shall equal the market value of the buildings based on the capitalised future rental income based on the assumption that the lease agreements are continuously prolonged in accordance with the renewal clause in the lease agreements.

Pursuant to the lease agreement entered into between Entra and Bærum municipality on 23 June 2005, which expires on 27 January

2027, the tenant has an option to acquire Vøyenenga School in Bærum municipality. The option is exercisable in 2022 at a purchase price of 86.9 million; and in 2027 at a purchase price of 63.3 million.

Pursuant to the ground lease agreement entered into between Entra and Oslo Havn KF on 4 October 1979 relating to the Langkaia properties, the ground lessor has an option to acquire the buildings without any compensation and free of any encumbrances upon expiry of the ground lease agreement on 1 January 2031. As the property is valued based on the cash flow until expiry of the ground lease agreement (i.e. no residual value), there will be an ongoing decrease in the balance sheet value until 2030.

Pursuant to the lease agreement entered into between Entra and University of Oslo ("UiO") on 16 June 2016, the tenant has an option to acquire the property Kristian Augusts gate 15-21 (building and land) in 2034 and in 2044. The purchase price shall be based on a gross market yield at time of calling the option and valued at a remaining wault of fifteen years of the lease agreement. The gross yield has a cap at 5.25 percent (gross yield < 5.25 per cent). The option to acquire must be called twelve months ahead of the two points in time at the latest. If the option to acquire is called at the first possible point in time (after 15 years), the remaining rent compensation paid by UiO to Entra regarding St. Olavs Plass 5 (previous lease agreement), must be paid in full together with the purchase price for the property.

Pursuant to the lease agreement and option agreement entered into between Entra and BI Norwegian Business School ("BI") on 15 February 2016, the tenant has an option to acquire the company which owns the building Brattørkaia 16 in year 2023, 2028, 2033 and 2038. The purchase price shall be based on a pre-agreed net yield. The net rent at the time of exercising the option, includes value added tax (vat) compensation. The option to acquire must be called twelve months ahead of the four points in time at the latest.

of which attributable to non-controlling interest	87	88

RECONCILIATION OF CARRYING AMOUNT

	Shareholding (%)	2020	2019
Net assets attributable to equity holders of OSU	100.00	1 420	1 053
Group's shareholding in the company	33.33	473	351
Excess value	33.33	20	21
Carrying amount of Group's shareholding	33.33	493	372

CONTRACTUAL OBLIGATIONS

All contractual obligations on the balance sheet date that have not been capitalised are included in the table below.

	2020	2019
Project development	172	649
Total contractual obligations	172	649

NOTE 18 LONG-TERM RECEIVABLES AND OTHER ASSETS

All amounts in NOK million

	2020	2019
External loans	69	77
Other long-term receivables	89	91
Financial assets at FVTPL	37	36
Purchase option	3	3
Other assets	55	49
Total long-term receivables and other assets	252	256

The purchase option is for the property Lagårdsveien 6 in Stavanger. The option had expiration date in 2022, but was called in January 2021. Refer to note 36 for further information.

NOTE 19 INVENTORY PROPERTIES

Entra owns a development site at Bryn in Oslo. As part of the acquisition of the site, JM Norge AS agreed to acquire land expected to be zoned for residential development subject to detailed plan. The properties expected to be zoned for residential development are Østensjøveien 29 and Brynsveien 1, 2-4, 3, 6, 8 and 12. See notes 10 and 11 for information on rental income from letting of the properties and the related property costs.

NOTE 20 TRADE RECEIVABLES

All amounts in NOK million

TRADE RECEIVABLES

	2020	2019
Trade receivables	76	50
Provision for bad debts	-12	-8
Net trade receivables	64	43

There is no concentration of credit risk with respect to trade debtors as the majority of Entra's customers are paying their rent in advance. The provision for bad debt has increased in 2020 due to Covid-19.

The age analysis of these trade receivables is as follows:

	2020	2019
Up to 3 months	21	19
Over 3 months	14	12
Total overdue	34	31

NOTE 21 OTHER RECEIVABLES AND OTHER CURRENT ASSETS

All amounts in NOK million

OTHER RECEIVABLES

	2020	2019
Accrued interest	38	57
Accrued income, not invoiced	24	12
Contract assets	11	-
Advance payments and accruals	36	45
Current external loans	-	66
Other current receivables	171	46
Total other receivables and other current assets	279	226

NOTE 22 CASH AND BANK DEPOSITS

All amounts in NOK million

	2020	2019
Bank deposits	181	283
Restricted bank deposits	35	34
Total bank deposits	217	317

Restricted bank deposits relate to the withholding tax account and guarantees for loans.

NOTE 23 SHARE CAPITAL AND SHAREHOLDER INFORMATION

Entra's share capital is 182,132,055 divided into 182,132,055 shares, with each share having a par value of 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra. At 31 December 2020, Entra owns 2,808 (23,010) of its own shares and has a total of 182,129,247 (182,109,045) shares outstanding.

As at 31 December 2020, Entra had 5,660 shareholders (5,846 shareholders). Norwegian investors held 29 per cent (35 per cent) of the share capital and foreign investors 71 per cent (65 per cent).

	Number of shares	Par value (NOK)	Share capital (NOK million)
31 December 2019	182 132 055	1	182
31 December 2020	182 132 055	1	182

Paid-in capital amounts to 3,706 million (3,705 million) and consists of 182 million (182 million) in share capital, of which nil (nil million) is related to treasury shares, and 3,524 million (3,523 million) in other paid-in capital.

Entra ASA has a share purchase scheme, offering all employees, including management, the opportunity to purchase shares in Entra ASA at a 20 per cent discount. The shares are subject to two-year lock-in period. The purchase price in the employee offering was calculated as the volume weighted average share price the last 30 days (VWAP) until and including 29 April 2020 less a 20 per cent discount. A total of 102,699 (92,123) shares were acquired and sold to the employees in connection with the share purchase scheme in May 2020. In addition, a total of 12,503 (11,201) shares were awarded to senior executives in March 2020.

For other changes in shareholders' equity, see the consolidated statements of changes in equity.

The 20 largest shareholders as registered in the VPS as of 31 December 2020 were as follows:

Shareholder	No of shares per 31.12.2020	Shareholding %	Country
Folketrygdfondet	21 410 459	11.8	Norway

MORTGAGES

In general the Group's financing is based on the parent company borrowing from external parties using negative pledge clauses. Wholly-owned subsidiaries are generally financed using intra-group loans.

For projects/properties with special characteristics, separate mortgage-based financing can be arranged. At 31 December 2020, there are one bond loan that is secured with pledge on assets. The bond of 1,100 million (1,100 million) is secured against the National Library and associated buildings, located at Henrik Ibsens gate 110 in Oslo. The lender also has a mortgage on the rental income from the property.

For subsidiaries that are not wholly-owned by Entra ASA, separate financing is generally arranged without any guarantee from the shareholders. This kind of financing is generally secured through a mortgage.

	2020	2019
Carrying amount of liabilities secured through mortgages	2 529	2 541
Carrying amount of mortgaged assets		
Investment properties	5 794	5 056

NOTE 25 TAX

All amounts in NOK million

INCOME TAX EXPENSE

	2020	2019
Tax payable	26	11
Change in deferred tax on profit and loss	1 552	498
Change in deferred tax on comprehensive income	-5	1
Income tax expense	1 572	510

INCOME TAX PAYABLE IS CALCULATED AS FOLLOWS

	2020	2019
Profit before tax	7 274	3 735
Share of profit/loss at associates and jointly controlled entities	-120	-312
Other permanent differences	18	-1 107
Changes in temporary differences	-6 965	-1 982
Changes in loss carry-forwards	-90	-282
Profit for tax purposes	117	51
Tax payable on the balance sheet	26	11
Tax payable on the balance sheet	26	11

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits of the consolidated entities as follows:

	2020	%	2019	%
Profit for accounting purposes multiplied by nominal tax rate	1 600	22.0	822	22.0
Tax on share of profit/loss at associates and jointly controlled entities	-26	-0.4	-69	-1.8
Tax on permanent differences	4	0.1	-244	-6.5
Tax expense for accounting purposes	1 578	21.7	509	13.6

DEFERRED INCOME TAX

The Group has offset deferred tax assets and deferred tax liabilities on the balance sheet as the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority. The following net value was recognised:

	2020	2019
Deferred tax liability	7 191	5 626
Deferred tax assets	278	259
Net deferred tax	6 914	5 367

CHANGE IN DEFERRED TAX (+)/DEFERRED TAX ASSETS (-)

	Non-current assets	Financial instruments	Current assets	Gains/ losses account	Provisions	Loss carried forward	Total
01.01.2019	5 104	-24	69	22	-72	-240	4 858
Recognised in profit and loss	426	13	-3	-1	1	62	498
Recognised in comprehensive income	-	-	-	-	1	-	1
Acquisition of subsidiaries	10	-	-	-	-	-	10
31.12.2019	5 540	-11	66	20	-70	-178	5 367
Recognised in profit and loss	1 584	-57	-17	-2	24	20	1 552
Recognised in comprehensive income	-	-	-	-	-5	-	-5
31.12.2020	7 124	-68	49	19	-52	-158	6 914

NOTE 26 PENSIONS

All amounts in NOK million

The Group's pension scheme for new employees is a defined contribution scheme. The defined contribution scheme includes 169 (161) employees in the Group. The defined benefit pension scheme for the group cover a total of 15 (15) current employees and 70 (70) pensioners.

The Group also has a contractual early-retirement scheme (AFP) from the age 62. At 31 December 2020, 6 (9) former employees had chosen to make use of the AFP scheme. The net pension liabilities associated with the AFP scheme amounted to 18 million (21 million), which is included under total pension liabilities in the table below.

The Group's pension scheme satisfies the requirements of the Norwegian Act on Compulsory Occupational Pensions.

The cost for the accounting period shows the employees' pension entitlement of the agreed future pension in the financial year.

THE BALANCE SHEET LIABILITIES HAVE BEEN CALCULATED AS FOLLOWS

	2020	2019
Present value of accrued pension liabilities in defined benefit schemes in unit trusts	206	185
Fair value of pension scheme assets	-130	-131
Employers' NICs accrued	10	8
Net pension liabilities on the balance sheet at 31.12	86	62

CHANGE IN DEFINED-BENEFIT PENSION LIABILITIES OVER THE YEAR

	2020	2019
Pension liabilities at 01.01	185	193
Present value of pensions earned this year	2	2
Interest expense	4	5
Pension benefits paid	-6	-7
Plan amendment	-	-2
Actuarial losses (+)/gains (-)	21	-6
Pension liabilities at 31.12	206	185

CHANGE IN FAIR VALUE OF PENSION SCHEME ASSETS

	2020	2019
Pension scheme assets at 01.01	131	130
Anticipated return on pension scheme assets	3	3
Contributions from employer	3	7
Pension benefits paid	-6	-7
Actuarial losses (-)/gains (+)	-1	-3
Pension scheme funds at 31.12	130	131

TOTAL COST RECOGNISED IN THE INCOME STATEMENT

	2020	2019
Cost of pension benefits accrued during current period	2	-
Employers' National Insurance contributions	-	-
Contribution scheme	13	14
Total pension benefits accrued during the period	15	15
Net interest expense	1	1
Total pension benefits accrued in income statement	16	16
Actuarial losses (-)/gains (+) accrued in comprehensive income	25	-5
Total pension benefits accrued in total comprehensive income	41	12

The actual return on pension scheme assets was 2 million (1 million).

THE FOLLOWING ECONOMIC ASSUMPTIONS HAVE BEEN USED

	2020	2019
Discount rate	1.70 %	2.30 %
Anticipated return on pension scheme assets	1.70 %	2.30 %
Annual wage growth	2.00 %	2.25 %
Annual adjustment to the National Insurance Scheme's basic amount ("G")	2.00 %	2.00 %
Annual adjustment of pensions	1.25 %	1.25 %
Mortality rates	K2013	K2013
Disability rates	200 % * K63	200 % * K63
Proportion of entitled employees making use of AFP	20 %	20 %

The actuarial assumptions are based on generally accepted assumptions in the insurance industry with regard to demographic factors.
The pension scheme assets are invested in government bonds.

AMOUNTS FOR THE CURRENT YEAR AND FOR THE FOUR PREVIOUS YEARS

	2020	2019	2018	2017	2016
Gross defined-benefit pension liabilities	206	185	193	187	198
Fair value pension funds 31.12	-130	-131	-130	-130	-141
Net defined-benefit pension liabilities	76	54	64	57	56

Expected payments to the defined contribution plan for the period 1 January 2021 - 31 December 2021 are 13 million (12 million) and for the defined benefit pension plan 5 million (7 million).

SENSITIVITY ANALYSIS

The present value of pension obligations is dependent on several different factors that are determined by a number of actuarial assumptions.

The assumptions used to calculate net pension costs (revenue) include the discount rate. Any changes to these assumptions will affect the carrying amount of the pension obligations.

The Group determines the relevant discount rate at the end of each year. This is the interest rate used to calculate the present value of the future estimated outgoing cash flows required to fulfil the pension obligations. When determining the relevant discount rate, the Group looks at the interest rate for high-quality corporate bonds or bonds with preference rights, which mature around the same time as the related pension obligations. At 31 December 2020, the discount rate was determined on the basis of bonds with preference rights.

The table below sets out a sensitivity analysis for the assumptions used to calculate pension assets and liabilities.

DISCOUNT RATE

		Impact on liabilities (NOKm)	Impact as a percentage
0.5 percentage point reduction	1.20 %	20	9.9
Discount rate at 31.12.2020	1.70 %	-	-
0.5 percentage point increase	2.20 %	-17	-7.9

ADJUSTMENT OF G

		Impact on liabilities (NOKm)	Impact as a percentage
0.5 percentage point reduction	1.50 %	-17	-8.5
Expected wage growth at 31.12.2020	2.00 %	-	-
0.5 percentage point increase	2.50 %	19	10.5

NOTE 27 LEASES

THE GROUP AS A LESSEE

The Group has entered into certain operating leases of ground, parking lots and buildings classified as investment properties, with remaining lease terms between 8 and 60 years. The Group applies the fair value model to right-of-use assets associated with the property lease contracts. Leased assets included in investment properties at 31 December 2020 was 934 million (966 million).

The majority of the lease payments for the Langkaia properties, where the lease agreement expires on 1 January 2031, are based on the turnover of the property. Only the fixed parts of the lease payments are included in the lease liability. Variable, turnover based lease payments for the property is included in Operating costs.

See note 24 for details on the movements in lease liabilities during the period.

Set out below are the amounts recognised in profit or loss:

	2020	2019
Interest expense on lease liabilities	11	12
Expense relating to leases of low-value assets and short-term leases	1	1
Variable lease payments	9	9
Total amount recognised in profit or loss	22	22

The Group had total cash outflows for leases of 31 million in 2020 (31 million).

Refer to note 4 for maturity profile of the Group's lease liabilities based on contractual undiscounted payments as at 31 December 2020.

THE GROUP AS A LESSOR

The Group has entered into operating leases on its investment property portfolio. Refer to note 5 for the Group's future accumulated rent from non-terminable operational lease contracts, maturity structure and further details relating to the Group's lease portfolio.

NOTE 28 OTHER NON-CURRENT LIABILITIES

Tax advice	177	195
Other services not related to auditing	101	39
Other assurance services	374	717
Total auditor's fee (excl. VAT)	3 882	3 879

NOTE 33 EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the net profit attributable to shareholders by the weighted average number of ordinary shares outstanding during the year.

Entra has not issued options or other financial instruments which have a dilutive effect on outstanding shares.

	2020	2019
Total comprehensive income for the year attributable to equity holders of the Company (NOKm)	5 440	2 949
Average number of outstanding shares	182 120 760	182 354 790
Basic earnings per share (NOK)	30	16

NOTE 34 DIVIDEND PER SHARE AND DIVIDEND POLICY

Entra targets a dividend pay-out ratio of approximately 60 per cent of cash earnings. Refer to the alternative performance measures section of the annual report for calculation of cash earnings.

Entra's dividend policy is based on semi-annual dividend payments. In line with the dividend policy, the board of Entra will propose to distribute a semi-annual dividend of 2.50 (2.40) per share for the second half of 2020. In October 2020, Entra paid out 2.40 per share (2.30 per share) for the first six months of 2020. For the financial year 2020 Entra will thus have paid out 4.90 per share (4.70 per share).

Dividend payments to the company's shareholders for the second half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Annual General Meeting.

NOTE 35 LEGAL DISPUTES

Entra was in 2016 in zoning processes regarding two of the Groups properties in Oslo. Oslo municipality claimed Entra for a contribution for unrelated projects, of which 16 million was paid in 2017. Entra was of the opinion that the claim was unlawful and applied for a ruling by Oslo District Court, which ruled in favour of Entra in June 2019. Oslo municipality appealed the ruling, and Borgarting Court of Appeal ruled in favour of Oslo municipality in January 2021. Entra disagrees with, and has appealed, the ruling to the Supreme Court. Entra's claim is regarded as a contingent asset and is not recognised in the balance sheet.

The Norwegian Ministry of Local Government and Modernisation has had an option to buy the property Munchs gate 4/Keyzers gate 13, which is let to the Norwegian Ministry of Justice and Public Security. Entra has been of the opinion that the purchase option was voided in 2014. The Ministry of Local Government and Modernisation had a conflicting view and applied for a ruling by the Oslo District Court, which ruled in favour of the Ministry of Local Government and Modernisation in September 2019. Entra appealed the ruling. In June 2020, the parties entered into a settlement where it was agreed that the option is lapsed. Entra further agreed to pay a compensation to the Norwegian Ministry of Local Government and Modernisation and reset the rent for the property to the current market.

NOTE 36 SUBSEQUENT EVENTS

Entra has called an option to acquire the property Lagårdsveien 6 in Stavanger. The property was acquired for 126 million, while Newsec, one of Entra's external appraisers, has estimated the fair market value at 313 million. The transaction closed in January 2021 and is not reflected in the financial statements for the fourth quarter of 2020. The excess value of the purchase is however reflected in all EPRA NAV metrics at as at 31 December 2020.

Furthermore, Entra has acquired Møllendalsveien 1A in Bergen for a property value of 208 million. The property is 5,800 sqm and located next to Møllendalsveien 6-8, which Entra acquired in 2019. The transaction is expected to close in March/April 2021.

Entra has also sold Tollbodallmenningen 2A in Bergen for 40 million.

NOTE 1 GENERAL INFORMATION

Entra ASA ("the Company") is listed on Oslo Stock Exchange with the ticker ENTRA. Entra ASA and its subsidiaries (together "Entra" or "the Group") is one of Norway's leading real estate companies, focusing on high quality, flexible office buildings with central locations. The Group owns and manages 90 (89) buildings with a total area of approximately 1.3 million (1.3 million) square metres. As of 31 December 2020 the real estate portfolio had a market value of

around 57 billion (49 billion). The public sector represents approximately 58 per cent (60 per cent) of the total customer portfolio. Entra's strategic areas are Oslo, Trondheim, Bergen, Sandvika, Stavanger and Drammen. Entra has its head office in Oslo.

The financial statements were adopted by the Company's Board on 3 March 2021.

NOTE 2 ACCOUNTING PRINCIPLES

ACCOUNTING PRINCIPLES

The most important accounting principles applied in the preparation of the annual financial statements are described below. These principles are applied in the same way for all periods presented, unless otherwise indicated in the description.

Basic principles

The annual financial statements have been prepared in accordance with Norwegian Accounting Act of 1998 and good accounting practice (NGAAP).

The annual financial statements have been prepared on the basis of the historical cost principle.

Presenting the accounts in accordance with NGAAP requires the management to make certain assessments and assumptions. The application of the company's accounting principles also requires management to exercise judgement. Estimates and subjective judgements are based on past experience and other factors that are considered appropriate. Actual results may deviate from these estimates.

Estimates and underlying assumptions are continuously reassessed. Changes in accounting estimates are recognised in the period in which the changes occur if they apply only to that period. If the changes also apply to future periods, the impact is distributed over the current and future periods.

The annual financial statements have been presented on the assumption of the business being a going concern.

General principles for measurement and classification of assets and liabilities

Assets intended for long-term ownership or use are classified as non-current assets. Other assets are classified as current assets. Receivables that are repayable within a year are classified as current assets. When classifying non-current and current liabilities, equivalent criteria have been applied.

Current assets are valued at the lower of the acquisition cost and fair value.

Income recognition

Revenue is recognised when it is earned, i.e. when the claim to remuneration arises. This occurs when the service is performed, as the work is being done. The revenue is recognised with the value of the remuneration at the time of transaction.

Costs

Costs are normally reported in the same period as the related income. Where there is no clear link between expenditure and the income, allocation is determined on the basis of assessment criteria.

Currency

The presentation currency is NOK. This is also the functional currency of the company.

Foreign currency transactions are translated at the exchange rate on the date of the transaction. Monetary foreign currency items on the balance sheet are translated at the exchange rate on the balance sheet date.

Property and equipment

Property and equipment are recognised at acquisition cost on the balance sheet and are depreciated to a schedule over the anticipated useful life of the assets. The acquisition cost includes costs directly related to the acquisition of the asset. Direct maintenance of property and equipment is recognised in the income statement on an ongoing basis. Additions or improvements are added to the asset's cost price and are depreciated in line with the asset.

Subsidiaries

Investments in subsidiaries are included in the company accounts using the cost method. Investments are written down to their fair value if the reduction in value is other than temporary and the write-down appears to be necessary in accordance with generally accepted accounting principles.

Dividends and Group contributions from subsidiaries are recognised as income from the investment in the subsidiary in the year that the allocation is made by the subsidiary. Dividends and group contributions from subsidiaries that exceed the retained earnings

over the period of ownership are considered as repayments of the acquisition cost.

Jointly controlled entities and associates

Jointly controlled entities are entities where the company shares control with other parties, and where an agreement between the parties ensures that strategic decisions on financial and operating policies are unanimous. This applies to companies where a shareholder agreement ensures joint control of the business.

Associates are entities over which the company has significant influence but not control. Significant influence normally exists where the company's investment represents between 20 and 50 per cent of the capital with voting rights.

Investments in jointly controlled entities and associates are included in the company accounts using the cost method. Investments are written down to their fair value if the reduction in value is other than temporary and the write-down appears to be necessary in accordance with generally accepted accounting principles.

Trade receivables

Trade receivables and other receivables are reported at nominal value after deduction of loss provisions. Loss provisions are made on the basis of an individual assessment of each receivables.

Cash and cash equivalents

Cash and cash equivalents consist of bank deposits and other short-term, highly liquid investments with an original term to maturity of no more than three months.

The company has an account in a group cash pooling arrangement and finances its subsidiaries' liquidity requirements.

Non-current liabilities

Non-current liabilities are shown on the balance sheet at nominal value on the initial date. Premiums and discounts in connection with taking on non-current liabilities, as well as arrangement fees, are accrued over the period of the loan. Similarly, in the event of the repurchase of bonds, premiums and discounts are accrued over the remaining term to maturity for the relevant liabilities.

All of the company's debt is subject to variable rates (including fixed rate bonds, which are swapped to a variable rate). The company has then used interest rate swaps to convert its debt to fixed rate loans with varying maturities. The company accrues these interest-rate swaps in such a way that the fixed rate is expensed in the income statement. On the termination of interest rate swap agreements, the profit or loss is accrued over the remaining term to maturity of the agreement in question.

The company has chosen to apply accounting principles which mean that changes in the value of the company's interest rate swaps are not recognised in the income statement. Hedged items are carried at their nominal value.

In general, the Group's financing is based on negative pledge clauses.

Pension

The company has both a defined-benefit pension scheme and a defined contribution pension-scheme. A defined benefit pension scheme is a pension arrangement that defines the pension payment an employee will receive on retirement. The guarantee means that employees will receive at least 66 per cent of their pension qualifying salary. Any income over and above 12 times the National Insurance Scheme's basic amount is not included in the qualifying salary. The pension benefit payable is based on the employee's salary, average percentage of full-time equivalents and length of service (30 years' service qualifies for a full pension).

The recognised pension obligation relating to defined-benefit plans is the present value of the defined-benefit on the balance sheet date less the fair value of the plan assets. The gross pension obligation is calculated annually by an independent actuary using the projected credit unit method. The gross obligation is discounted using a discount rate based on bonds with preference rights, which mature around the same time as the related pension obligations.

Changes to benefits payable under the pension plan are recognised in the income statement as they arise.

Actuarial gains/losses resulting from new information or changes to actuarial assumptions are recognised against equity.

Defined contribution schemes comprise arrangements whereby the company makes annual contributions to the employees' pension plans, and where the future pension is determined by the amount of the contributions and the return on the pension plan assets. In the defined contribution schemes, the cost is equal to the contributions to the employees' pension savings in the accounting period and are recognised in the income statement in the period in which they accrue.

Tax

The tax expense consists of tax payable and deferred tax. Tax is charged to the income statement, except where it relates to items that are recognised directly in equity. In such cases, the tax is recognised directly in the balance.

Deferred tax is calculated using the liability method for all temporary differences between the tax values and accounting values of assets and liabilities. Deferred tax is defined using tax rates and laws which are enacted or likely to be enacted on the balance sheet date, and which are expected to be used when the deferred tax asset is realised or when the deferred tax is utilised.

A deferred tax asset is recognised to the extent that it is likely that future taxable profit will be available against which the temporary differences can be offset.

In principle, deferred tax is not calculated on temporary differences arising from investments in subsidiaries. This does not apply in cases where the company is not in control of when the temporary differences will be reversed, and it is probable that they will be reversed in the foreseeable future.

STATEMENT OF CASH FLOWS

The statement of cash flows is prepared using the indirect method. This means that the statement is based on the company's profit before tax in order to present cash flows from operating, investing and financing activities respectively. Dividends paid to shareholders are presented under financing activities.

DIVIDENDS

Dividend payments to the company's shareholders for the fiscal year are classified as debt at the balance sheet date.

GROUP

Entra ASA is the parent company of a group of companies. The consolidated financial statements can be obtained from Entra ASA, Postboks 52, Økern NO-0508 Oslo.

NOTE 3 REVENUE

Sales revenue consists of property management services, project development services and administrative services provided to subsidiaries, associates and jointly controlled entities. All services are delivered in Norway.

Fees and premiums	25	12
Termination cost	6	42
Write-downs of financial assets	-	78
Other financial costs	1	3
Total other financial costs	32	135

NOTE 8 TAX

All amounts in NOK million

	2020	2019
Tax expense		
Tax payable	10	-
Change in deferred tax recognised in profit and loss	97	-17
Total tax expense	108	-17

Income tax payable is calculated as follows

Profit before tax	536	1 117
Dividend received	-49	-353
Other permanent differences	3	-841
Change in temporary differences	8	39
Change in loss carry-forwards	-40	37
Group contribution	-410	-
Profit for tax purposes	48	-
Tax payable (22 %)	10	0

CHANGE IN DEFERRED TAX (+)/DEFERRED TAX ASSETS (-)

	Non-current assets	Financial instruments	Gains/losses account	Provisions	Loss carried forward	Total
31.12.2018	-7	5	34	-21	-1	10
Recognised in profit and loss	-	-3	-7	-	-8	-17
Recognised in equity	-	-	-	1	-	1
31.12.2019	-6	2	27	-20	-9	-6
Recognised in profit and loss	1	4	-5	-7	9	1
Recognised in equity	-	-	-	1	-	1
31.12.2020	-5	6	22	-26	-	-4

The tax on profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits as follows:

	2020	%	2019	%
Profit for accounting purposes multiplied by nominal tax rate	118	22.0 %	246	22.0 %
Tax on dividend	-11	-2.0 %	-78	-6.9 %
Tax on permanent differences	1	0.1 %	-185	-16.6 %
Tax expenses for accounting purposes	108	20.1 %	-17	-1.5 %

NOTE 9 PROPERTY AND EQUIPMENT

NOTE 13 SHARE CAPITAL AND SHAREHOLDER INFORMATION

Entra's share capital is 182,132,055 divided into 182,132,055 shares, with each share having a par value of 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra. At 31 December, Entra owns 2,808 (23,010) of its own shares and has a total of 182,129,247 (182,109,045) shares outstanding.

As of 31 December 2020 Entra had 5,660 shareholders (5,846 shareholders). Norwegian investors held 29 per cent (35 per cent) of the share capital and foreign investors 71 per cent (65 per cent) at 31 December 2020.

	No. of shares	Share capital (NOKm)	Share premium (NOKm)	Par value (NOK)
End of year 31.12.2019	182 132 055	182	2 595	1
End of year 31.12.2020	182 132 055	182	2 595	1

Entra ASA has a share purchase scheme, offering all employees, including management, the opportunity to purchase shares in Entra ASA at a 20 per cent discount. The shares are subject to two-year lock-in period. The purchase price in the employee offering was calculated as the volume weighted average share price the last 30 days (VWAP) until and including 29 April 2020 less a 20 per cent discount. A total of 102,699 (92,123) shares were acquired and sold to the employees in connection with the share purchase scheme in May 2020. In addition, a total of 12,503 (11,201) shares were awarded to senior executives in March 2020.

The 20 largest shareholders as registered in the VPS as of 31 December 2020 were as follows:

Total	7 290	6 190

SPECIAL TERMS AND CONDITIONS IN ENTRA ASA'S LOAN AGREEMENTS

In general, the financing is based on negative pledge clauses.

LOANS AND INTEREST RATE HEDGES

Interest rate hedging at Entra ASA is part of the Group's overall risk management, and must be viewed in that context. Interest-rate positions should support the company's strategic development, risk profile and anticipated future market interest rates based on the Group's interest rate view. The Group's guidelines on managing interest rate risk are expressed as a preferred interest rate structure (standard portfolio).

At 31 December 2020 the weighted average remaining term to maturity was 2,6 years (3,4 years). The company's average interest rate was 2,4 per cent (2,9 per cent) at 31 December 2020.

ENTRA ASA PORTFOLIO OF LOANS AND INTEREST RATE HEDGES HAVE THE FOLLOWING INTEREST RATE MATURITY PROFILE

	%	Fixed interest 2020
Up to 1 year	45	8 317
1-2 years	6	1 100
2-4 years	15	2 750
4-6 years	26	4 900
6-8 years	6	1 050
Over 8 years	3	500
Total	100	18 617

The effect of interest rate hedges is shown in the income statement. The fair value of the company's portfolio of interest rate hedges is not shown on the balance sheet.

INTEREST BEARING DEBT ASSOCIATED WITH HEDGING ACTIVITIES

Entra ASA uses interest rate derivatives and fixed rate loans to manage the interest rate risk associated with the company's interest bearing debt financing.

The company's debt financing consists of bank loans, as well as commercial paper and bonds. The bank loans are subject to variable interest rates. Commercial paper is subject to variable interest rates. The company has issued both fixed-rate and variable-rate bonds. Outstanding fixed-rate bonds are hedged using fixed-to-variable interest rate swaps. As a result, the hedged bonds are classified as part of the company's portfolio of variable rate loans. Fixed rate bonds without hedging amounted per 31 December 2020 to 2.800 million. These bonds are fixed rate and is included as part of the company's cash flow hedges.

NOT VALUE HEDGED FIXED RATE BONDS IN 2020

	Maturity	Nominal value	Market value
ISIN NO0010740061	13.06.2022	800	817
ISIN NO0010766389	02.06.2023	1 100	1 134
ISIN NO0010852684	22.05.2026	900	947
Total		2 800	2 898

The company's exposure to variable interest rates is hedged for cash flow risk using variable-to-fixed interest rate swaps.

CASH FLOW HEDGING

Entra ASA's debt are directly or indirectly subject to variable interest rates. Entra ASA uses variable-to-fixed interest rate derivatives to manage the company's interest rate risk. Cash flows are hedged by matching the terms and volumes of the interest rate derivatives with the expected maturity profile of the company's interest bearing debt. The expected maturity profile of Entra ASA's interest-bearing debt is based on an assessment of the need to refinance existing debt and to obtain additional financing.

The table below shows that after taking into account cash flow hedges, 55 per cent (64 per cent) of the company's interest bearing liabilities are effectively subject to fixed interest rates.

Changes in NIBOR rates will therefore affect the interest expense on 45 per cent (36 per cent) of the company's interest bearing debt.

CASH FLOW HEDGING

	2020	2019
Hedged item		
Variable interest rate liabilities	18 617	17 360
Hedge		
Interest rate swaps (variable-to-fixed)	10 300	11 150
Hedge ratio (unhedged position)	8 317	6 210
Hedge ratio (% hedged)	55 %	64 %

Changes in the cash flow hedges over the financial year:

CHANGE IN VALUE

	2020	2019
Opening balance - market value of liability	289	407
Change in value	337	-119
Closing balance - market value of liability	625	289

The fair value of the company's interest rate swaps used as cash flow hedges specifies the present value of the contractual fixed-interest rate agreements. The present value represents the market value of the company's liabilities to the counterparty of the interest rate swaps. The change in value over the financial year represents the change in the market value of liabilities. The reason for the increase in the company's market value of liabilities for financial year 2020 is mainly due to lower interest rate.

FAIR VALUE HEDGING

Entra ASA has the following fair value hedges for the company's outstanding fixed-rate bonds:

FAIR VALUE HEDGING 2020

	Total	Maturity structure up to 1 year	Maturity structure 1-5 years	Maturity structure > 5 years
Hedged item				
Fixed interest rate liabilities	5 000	-	2 800	2 200
Hedge				
Interest rate swaps (fixed-to-variable)	2 200	-	900	1 300
Hedge ratio (unhedged position)	56 %	-	68 %	41 %
Hedge ratio (% hedged)	44 %	-	32 %	59 %

FAIR VALUE HEDGING 2019

	Total	Maturity structure up to 1 year	Maturity structure 1-5 years	Maturity structure > 5 years
Hedged item				
Fixed interest rate liabilities	4 700	700	2 800	1 200
Hedge				
Interest rate swaps (fixed-to-variable)	1 900	700	900	300
Hedge ratio (unhedged position)	60 %	-	68 %	75 %
Hedge ratio (% hedged)	40 %	100 %	32 %	25 %

Changes in the value of fair value hedges over the financial year:

CHANGE IN VALUE

	2020	2019
Opening balance - market value of liabilities (+) /receivables (-)	-27	-67
Change in value	-	41
Closing balance - market value of liabilities (+) /receivables (-)	-26	-27

At 31 December 2020, the market value of the company's fair value hedges represented a receivable for the company.

NOTE 15 PENSION

All amounts in NOK million

The company's pension scheme for new employees is a defined contribution scheme. The defined contribution scheme includes 168 (160) employees. The defined benefit pension scheme cover a total of 13 (13) current employees and 70 (70) pensioners.

The company also has a contractual early-retirement scheme (AFP) from the age of 62. At 31 December 2020, 6 (9) former employees had chosen to make use of the AFP scheme. The net pension liabilities associated with the AFP scheme amounted to NOK 18 million (NOK 21 million), which is included under total pension liabilities in the table below.

The company's pension scheme satisfies the requirements of the Norwegian Act on Compulsory Occupational Pensions.

THE BALANCE SHEET LIABILITIES HAVE BEEN CALCULATED AS FOLLOWS

	2020	2019
Present value of accrued pension liabilities in defined-benefit schemes in unit trusts	201	182
Fair value of pension scheme assets	-127	-128
Employers' NICs accrued	11	8
Net pension liabilities on the balance sheet at 31.12	85	61

CHANGE IN DEFINED-BENEFIT PENSION LIABILITIES OVER THE YEAR

	2020	2019
Pension liabilities at 01.01	182	190
Present value of pensions earned this year	1	2
Interest expense	4	5
Pension benefits paid	-6	-7
Plan amendment	-	-2
Actuarial losses/(gains)	21	-6
Pension liabilities at 31.12	201	182

CHANGE IN FAIR VALUE OF PENSION SCHEME ASSETS

	2020	2019
Pension scheme assets at 01.01	128	127
Anticipated return on pension scheme assets	3	3
Contributions from employer	3	7
Pension benefits paid	-6	-7
Actuarial (gains)/losses	-1	-2
Pension scheme funds at 31.12	127	128

TOTAL COST RECOGNISED IN THE INCOME STATEMENT

	2020	2019
Cost of pension benefits accrued during current period	1	2
Plan amendment	-	-2
Employers' National Insurance contributions	-	-
Contribution scheme and contractual early-retirement scheme	13	13
Total pension benefits accrued during the period	14	13
Net interest expense	1	2
Total pension benefits accrued in income statement	16	15
Actuarial losses (-)/gains (+) accrued in equity	25	-5
Total pension benefits accrued	40	9

The actual return on pension scheme assets was NOK 2 million (NOK 1 million).

THE FOLLOWING ECONOMIC ASSUMPTIONS HAVE BEEN USED

	2020	2019
Discount rate	1.70 %	2.30 %
Anticipated return on pension scheme assets	1.70 %	2.30 %
Annual wage growth	2.00 %	2.25 %
Annual adjustment to the National Insurance Scheme's basic amount ("G")	2.00 %	2.00 %
Annual adjustment of pensions	1.25 %	1.25 %
Mortality rates	K2013	K2013
Disability rates	200 % * K63	200 % * K63
Proportion of entitled employees making use of AFP	20 %	20 %

The actuarial assumptions are based on generally accepted assumptions in the insurance industry with regard to demographic factors.

The pension scheme assets are invested in government bonds.

	2020	2019
Gross defined-benefit pension liabilities	201	182
Fair value pension funds	-127	-128
Net defined-benefit pension liabilities	75	53

Expected payments to the defined contribution plan for the period 1 January to 31 December 2021 are 12 million and for the defined benefit pension plan 4 million.

NOTE 16 RELATED PARTY TRANSACTIONS AND INTRA-GROUP BALANCES

Responsibility statement

We declare to the best of our knowledge that

- the Entra ASA consolidated financial statements for 2020 have been prepared in accordance with IFRS and IFRICs as adopted by the European Union, and additional Norwegian disclosure requirements in the Norwegian Accounting Act, and that
- the financial statements for the parent company, Entra ASA, for 2020 have been prepared in accordance with the Norwegian Accounting Act and generally accepted accounting practice in Norway, and that
- the information presented in the financial statements gives a true and fair view of the assets, liabilities, financial position and results for Entra ASA and the Entra Group for period as a whole, and that
- the Board of Directors' Report includes a true and fair review of the development, performance and financial position of Entra ASA and the Entra Group, together with a description of the principal risks and uncertainties that they face.

To the General Meeting of Entra ASA

INDEPENDENT AUDITOR'S REPORT

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Entra ASA, which comprise:

- The financial statements of the parent company, which comprise the balance sheet as at 31 December 2020, the income statement and cash flow statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and
- The financial statements of the Group, which comprise the balance sheet as at 31 December 2020, the income statement, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion:

- The financial statements are prepared in accordance with the law and regulations.
- The accompanying financial statements give a true and fair view of the financial position of the parent company as at 31 December 2020, and its financial performance and its cash flows for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.
- The accompanying financial statements give a true and fair view of the financial position of the Group as at 31 December 2020, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

Basis for Opinion

We conducted our audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company and the Group as required by laws and regulations, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of investment property

Key audit matter	How the matter was addressed in our audit
The majority of the Group's assets consist of Investment property. Investment property is recognised at fair value, based on fair values from third party valuers.	The Group has established internal control to ensure that relevant property information is included in the external valuations. We have assessed the design of the control and tested if it has operated effectively in the reporting period.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited ("DTTL"), its global network of member firms, and their related entities (collectively, the "Deloitte organization"). DTTL (also referred to as "Deloitte Global") and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients. Please see www.deloitte.no to learn more.

Page 2
Independent Auditor's Report -
Entra ASA

Each quarter, all properties are valued by two third party valuers. Market transactions serve as important reference points for the third party valuers and the level of transactions thus influence the level of uncertainty in the assumptions used by the third party valuers. We refer to note 3 "Critical accounting estimates and subjective judgments" for further information.

The fair value is based on assumptions and estimates as well as property specific information. These assumptions and estimates require significant judgment and therefore valuation of investment property is a key audit matter.

For a sample of the investment properties, we reconciled the property information regarding annual rent and square meters in third party valuers' reports to the Group's own records.

We met with the third party valuers and discussed and challenged their judgements and estimates used in the valuation for a sample of investment properties, particularly in light of the market development during the second half of 2020. We assessed their qualifications and expertise and reviewed their terms of engagement in order to determine whether there were any matters that might have affected their objectivity. We assessed the valuation methods used against generally accepted valuation standards and practices.

For a sample of investment properties, we obtained the third party valuers' valuation reports and reconciled the values used in the financial statements to the valuation reports.

For a sample of investment properties, we obtained and assessed the Group's analysis and rationale for the changes in fair value from quarter to quarter.

In carrying out the procedures related to valuation of investment property, we used our internal valuation specialists.

We assessed whether the disclosures in note 3 and 8 regarding valuation of investment properties were adequate.

Other information

Management is responsible for the other information. The other information comprises information in the annual report, except the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and the Managing Director for the Financial Statements

The Board of Directors and the Managing Director (Management) are responsible for the preparation in accordance with law and regulations, including a true and fair view of the financial statements of the Company in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for the preparation and true and fair view of the consolidated financial statements of the Group in accordance with International Financial Reporting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements of the Company use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations. The consolidated financial statements of the Group use the going concern basis of accounting

unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's or the Group's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Independent Auditor's Report -
Entra ASA

Report on Other Legal and Regulatory Requirements*Opinion on the Board of Directors' report*

Based on our audit of the financial statements as described above, it is our opinion that the information presented in the Board of Directors' report and in the statements on Corporate Governance and Corporate Social Responsibility concerning the financial statements, the going concern assumption and the proposed allocation of the result is consistent with the financial statements and complies with the law and regulations.

Opinion on Registration and Documentation

Based on our audit of the financial statements as described above, and control procedures we have considered necessary in accordance with the International Standard on Assurance Engagements (ISAE) 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, it is our opinion that management has fulfilled its duty to produce a proper and clearly set out registration and documentation of the Company's accounting information in accordance with the law and bookkeeping standards and practices generally accepted in Norway.

Alternative performance measures

Entra's financial information is prepared in accordance with the international financial reporting standards (IFRS). In addition, the company reports alternative performance measures (APMs) that are regularly reviewed by management to enhance the understanding of Entra's performance as a supplement, but not as a substitute, to the financial statements prepared in accordance with IFRS. Financial APMs are intended to enhance comparability of the results and cash flows from period to period, and it is Entra's experience that these are frequently used by analysts, investors and other parties. The financial APMs reported by Entra are the APMs that, in management's view, provide the most relevant supplemental information of a real estate company's financial position and performance. These measures are adjusted IFRS measures defined, calculated and used in a consistent and transparent manner over the years. Operational measures such as, but not limited to, net letting, vacancy and WAULT are not defined as financial APMs according to ESMA's guidelines.

ENTRA'S FINANCIAL APMS:

- Net Income from property management
- Cash earnings
- Market value of the property portfolio
- Net nominal interest bearing debt
- Debt ratio – Loan-to-value (LTV)
- Interest coverage ratio (ICR)
- EPRA Earnings
- EPRA Net Asset Value metrics – EPRA NRV, EPRA NTA, EPRA NDV, EPRA NAV and EPRA NNNAV
- EPRA net initial yield
- EPRA cost ratio

EPRA reporting

The following performance indicators have been prepared in accordance with best practices as defined by EPRA (European Public Real Estate Association) in its Best Practices Recommendations guide. The EPRA Best Practices Recommendations Guidelines focus on making the financial statements of public real estate companies clearer and more comparable across Europe. For further information about EPRA, go to www.epra.com.

SUMMARY EPRA PERFORMANCE MEASURES

		Unit	2020 / 31.12.2020	2019 / 31.12.2019
A	EPRA earnings per share (EPS)	NOK	5.73	5.81
B	EPRA NRV per share	NOK	189	154
	EPRA NTA per share	NOK	187	153

Conversion from accrual to cash basis	70	-19
Total Capital Expenditure on cash basis	1 877	2 668

¹⁾ Also includes tenant alterations and maintenance capex when this is done as a part of asset redevelopment

A. EPRA EARNINGS

EPRA Earnings is a measure of the operational performance of the property portfolio. EPRA Earnings is calculated based on the income statement, adjusted for non-controlling interests, value changes on investment properties, changes in the market value of financial instruments and gains/losses on the sale of properties and the associated tax effects.

All amounts in NOK million	IFRS reported 2020	EPRA adjustments 2020	Non- controlling interests 2020 ¹⁾	EPRA Earnings 2020	IFRS reported 2019	EPRA adjustments 2019	Non- controlling interests 2019 ¹⁾	EPRA Earnings 2019

Average outstanding shares (million)				182.1				182.1
EPRA Earnings per share (NOK)				5.73				5.81

¹⁾ Excluding non-controlling interests in relation to EPRA adjustments..

B. EPRA NET ASSET VALUE METRICS

Net Asset Value (NAV) is the total equity that the company manages for its owners. Net asset value can be calculated in different ways, where the difference mainly is explained by the expected turnover of the property portfolio. In 2003, EPRA introduced the two NAV metrics EPRA NAV and EPRA NNNAV. Since the introduction of these metrics, real estate companies have evolved into actively managed entities, including non-property operating activities, and balance sheet financing has shifted from traditional bank lending into capital markets. In the BPR guidelines released in October 2019, EPRA introduced three new Net Asset Value metrics: EPRA Net Reinstatement Value (NRV), EPRA Net Tangible Assets (NTA) and EPRA Net Disposal Value (NDV). As EPRA NAV and EPRA NNNAV are key performance measures widely used by Entra's stakeholders, Entra presents all five Net Asset Value metrics for 2020 and also bridges between the new NAV metrics and the EPRA NAV metrics calculated in line with the EPRA November 2016 BPR.

EPRA NET REINSTATEMENT VALUE (NRV)

The objective of the EPRA NRV measure is to highlight the value of net assets on a long-term basis and assumes that no selling of assets takes place. Assets and liabilities that are not expected to crystallise in normal circumstances such as the fair value movements on financial derivatives and deferred taxes on property valuation surpluses are therefore excluded. Real estate transfer taxes are generally not levied on property transactions in Norway, and such taxes are accordingly not included in Entra's valuation certificates. Consequently, no adjustment is done for real estate transfer taxes in Entra's calculation of EPRA NRV.

	31.12.2020	31.12.2020	31.12.2020	31.12.2019	31.12.2019	31.12.2019
All amounts in NOK million	Total	Attributable to non-controlling interests	Attributable to shareholders (EPRA NRV)	Total	Attributable to non-controlling interests	Attributable to shareholders (EPRA NRV)

EPRA Net Reinstatement Value (NRV)	36 919	-2 411	34 508	30 314	-2 234	28 080
Outstanding shares at period end (million)			182.1			182.1
EPRA NRV per share (NOK)			189			154

¹⁾ In January 2021, Entra acquired the property Lagårdsveien 6 for an option price of 126 million. Newsec, one of Entra's external appraisers, has estimated the fair market value of the property to 313 million. The difference between the option price and the fair market value is included in NAV at fair value, adjusted for transaction fees and the carrying amount of the option.

EPRA NET TANGIBLE ASSETS (NTA)

The EPRA NTA metric reflects a company's tangible assets and assumes that entities buy and sell assets, thereby crystallising certain levels of unavoidable deferred tax liability. Entra has adopted second option in the EPRA BPR guidelines to adjust for deferred tax, estimating the real tax liability based how the company has completed property transactions in recent years.

	31.12.2020	31.12.2020	31.12.2020	31.12.2019	31.12.2019	31.12.2019

Outstanding shares at period end (million)			182.1			182.1
EPRA NTA per share (NOK)			187			153

Estimated real tax liability

The Group's estimated real deferred tax liability related to temporary differences of properties has been calculated to 1.2 per cent of the based on a discount rate of 5.0 per cent and the assumption that 50 per cent of the property portfolio are realized in 50 years in transactions structured as sale of companies in which the tax discount is 6.5 per cent. Further, the real tax liability related to the gains/losses account is estimated by assuming an amortisation of 20 per cent annually and a discount rate of 5.0 per cent.

	31.12.2020	31.12.2020	31.12.2019	31.12.2019
All amounts in NOK million	Nom. tax liability	Real tax liability	Nom. tax liability	Real tax liability
Non-current assets	7 124	384	5 540	299
Financial instruments	-68	-	-11	-
Current assets	49	49	66	66
Gains/losses account	19	15	20	16
Provisions	-52	-52	-70	-70
Loss carried forward	-158	-158	-178	-178
Deferred tax liability	6 914	238	5 367	133

EPRA NET DISPOSAL VALUE (NDV)

The EPRA NDV measure provides readers of financial reports with a scenario where deferred tax, financial instruments, and certain other adjustments are calculated as to the full extent of their liability. This enables readers of financial reports to understand the full extent of liabilities and resulting shareholder value under an orderly sale of business and/or if liabilities are not held until maturity. The measure should not be viewed as a "liquidation NAV" for Entra, as fair values may not represent liquidation values, and as an immediate realization of Entra's assets may be structured as sale of property-owning companies, resulting in the deferred tax liabilities only partially crystallising.

	31.12.2020	31.12.2020	31.12.2020	31.12.2019	31.12.2019	31.12.2019

EPRA NAV AND EPRA NNNAV

The objective with EPRA NAV is to demonstrate the fair value of net assets given a long-term investment horizon. EPRA NAV is calculated as net asset value adjusted to include market value of all properties in the portfolio, and to exclude certain items not expected to crystallise in a long-term investment property business model such as e.g. financial derivatives and deferred tax on the market value of investment properties.

The objective with EPRA NNNAV is to report the fair value of net assets in the Group on the basis that these are immediately realised.

All amounts in NOK million	31.12.2020	31.12.2019
IFRS equity attributable to shareholders	27 136	22 570
Add: Adjustment to property portfolio	-	-

C. EPRA NET INITIAL YIELD

EPRA Net initial yield measures the annualised rental income based on the cash rents passing at the balance sheet date, less non-recoverable property operating expenses, divided by the market value of the property, increased with (estimated) purchasers' costs.

EPRA "topped-up" net initial yield incorporates an adjustment to the EPRA NIY in respect of the expiration of rent-free periods (or other unexpired lease incentives such as discounted rent periods and step rents).

All amounts in NOK million except ratio	Oslo	Trondheim	Sandvika	Stavanger	Drammen	Bergen	Total

417-1 Requirements for product and service information and labeling Entra certify new-build and rehabilitation projects in accordance with the BREEAM standard. The BREEAM standard is a third party certification of the assessment of an asset's environmental, social and economic sustainability performance, using standards developed by BRE

417-2 Incidents of non-compliance concerning product and service information and labeling There has been no such incidents in 2020

417-3 Incidents of non-compliance concerning marketing communications There has been no such incidents in 2020

GRI Standard: Customer Privacy

418-1 Substantiated complaints concerning breaches of customer privacy and losses of customer data There has been no such incidents in 2020

GRI Standard: Socioeconomic Compliance

419-1 Non-compliance with laws and regulations in the social and economic area There has been no such incidents in 2020

Reporting according to the Task Force on Climate-Related Financial Disclosures (TCFD)

Entra has started a process to adapt the company's reporting in accordance with the recommendations in the TCFD framework to describe how we work strategically with climate related risks and opportunities. Entra's approach to meet climate risk and opportunities is discussed in the ESG work description on pages 42-82, and as part of the overall risk analysis on pages 28- 39. The table below describes the scope of the reporting and page references are made for the respective areas.

Governance Recommended disclosures	Strategy Recommended disclosures	Risk Management Recommended disclosures	Indicators and goals Recommended disclosures
A. The Board's monitoring of climate-related risks and opportunities -> pages 42-43 and 72-73	A. Climate-related risks and opportunities the organisation has identified -> pages 53-59	A. The organization's process for identifying climate-related risks -> pages 37, and 53-59	A. The organisations indicators for evaluating climate-related risks and opportunities -> pages 37, and 53-59
B. Management's role regarding assessing and managing climate-related risks and opportunities -> pages 42-43	B. Impact from risks and opportunities on the organisations operations, strategy and financial planning -> pages 37, and 53-59	B. The organizations' processes for managing climate-related risks -> pages 37, and 53-59	B. Emissions of Scope 1, 2 and 3 under the Greenhouse Gas Protocol -> 183-186
	C. Preparation of the organisation's strategy in consideration of various climate-related scenarios -> pages 46-59	C. Integration of the above processes in the organizations general risk management -> pages 37, and 53-59	C. Goals for managing climate-related risks and opportunities -> pages 53-59

EPRA Sustainability Performance Measures

Entra reports on its energy, GHG emissions, water, waste and social governance impacts in accordance with the EPRA Sustainability Best Practice Recommendations (SBPR). This common reporting standard is a framework developed by property companies to promote transparency in sustainability reporting. To give our stakeholders greater confidence, this report has been independently assured by Deloitte based on the international standard ISAE 3000 "Assurance Engagements other than Audits or Reviews of Historical Financial Information".

ORGANIZATIONAL BOUNDARY

Entra reports on asset-level sustainability impacts for assets within the management portfolio over which it has full operational control. This boundary coincides with the Group organizational structure as determined for financial reporting purposes and excludes assets under construction or in redevelopment. We do not report data for single-let properties as we have no management control of these properties and are unable to collect utilities data. For the reporting year 2020 this is only one property. The environmental reporting period corresponds to the period from 1 January to 31 December.

DATA COVERAGE

For each asset-level performance measure, Entra discloses the number of properties reported on out of the total number of management properties in the Group portfolio. Entra does not presently have data collection on each asset-level performance measure for every asset within the organizational boundary but aims to increase the data coverage going forward as it creates conditions for proper efficient technical management in our buildings.

Like-for-like performance measures include properties consistently in operation during the two most recent full reporting years and exclude asset acquisitions, disposals, major refurbishments and developments as well as fully vacant properties. Like-for-like performance measures also exclude assets with changes in the level of data coverage between the two reporting periods where the missing data cannot be reliably estimated.

ESTIMATION

In general estimation of missing data for partially unavailable or unreliable utility consumption for asset-level performance measures is carried out to a very small extent. In these cases, data for missing periods is estimated using known consumption from other periods for the metered supply in question. The proportion of estimated data is disclosed as a percentage of the total data provided for the relevant performance measure. The same method of estimation is used for all performance measures and for all assets. For 2020 there was no estimation except for HQ as described below.

Note that while there is limited estimation of waste data itself, the percentage of waste per disposal route is calculated by multiplying actual waste created by the proportion of waste solutions for each waste group. This information on waste processing is provided directly by our waste management supplier.

As information is unavailable for Entra's HQ office space only, all performance measures for Entra's headquarters (excluding electricity) are calculated based on Entra's proportionate share of actual utility data for the property where Entra is a tenant.

Entra does not carry out data adjustment based on climate or occupancy rates. Variations in asset-level performance attributed to fluctuations in these factors are instead commented directly in the performance narrative, if relevant. As of 31 December 2020, the portfolio occupancy was 97.9 per cent.

THIRD PARTY ASSURANCE

Entra has obtained third party assurance of its sustainability data for this reporting period. Statement from our auditors can be found on page 82-83.

LANDLORD/TENANT BOUNDARY

Entra is responsible, as landlord, for obtaining a portion of the overall utilities consumed at the assets level. Total landlord-obtained consumption includes both utilities for common areas as well as tenant consumption sub-metered from the landlord. The remaining consumption is obtained and paid directly by the tenants. Entra has access to tenant-obtained consumption data and reports on whole building consumption for all asset-level environmental performance measures. Utilities purchased by Entra as the landlord (landlord-obtained) and those directly purchased by tenants (tenant-obtained) are presented separately under total consumption.

NORMALIZATION

As a majority of Entra's management portfolio is utilized as office space, floor area is deemed the most appropriate denominator for asset-level performance measures. Whole building consumption is divided by Gross Leasable Area (GLA). The denominator GLA is closely aligned with the numerator as total consumption includes tenant-obtained utilities and is also consistent with the areas disclosed in Entra's financial reporting.

For absolute intensities, Entra either includes pre-existing data or pro-rates consumption up to the full year for properties entering or exiting the management portfolio during the reporting period. This removes the mismatch between the collected consumption data in the numerator and GLA as the denominator for more comparable absolute intensities.

Number of hours/days worked is used as the denominator when calculating health and safety performance measures.

SEGMENTAL ANALYSIS

Segmental reporting and analysis by geography or property type does not grant significantly greater insight into asset-level performance measures. As presented in its financial reports, Entra's management portfolio contains mainly office properties within Oslo, Norway and other regional cities, of which Oslo represents the majority location of portfolio value.

DISCLOSURE ON OWN OFFICES

Entra discloses the environmental impact of its own occupation separately within its ESG reporting. As Entra is a tenant at a property within its own management portfolio, this data is also included in the total portfolio consumption. Please refer to the paragraph on estimation for a note concerning the calculation of data for Entra's headquarters.

COVID-19 SITUATION

2020 was a challenging year due to the outbreak of the Covid-19 pandemic. The Norwegian government acted swiftly at the outset of the crisis in March and implemented actions to safeguard the population. From 12th of March 2020 everyone who can was encouraged to work from home and avoid using public transportation - especially in the biggest cities. We have no concrete measures on how many people that have worked from an Entra office building in 2020 as we do not count people entering security gates. Nevertheless, we know that utilizations are directly correlated with the number of people in the building, and that activity in the office buildings throughout the year has been considerably reduced.

PERFORMANCE NARRATIVE ON SOCIAL PERFORMANCE

Diversity-employee gender is calculated as a percentage of female to men. The female share of Group employees is unchanged from 2019 to 2020. Diversity pay gender ratio is calculated woman to men. In June 2019 Entra hired a female CEO which has affected the gender pay ratio on senior management level from 2019 to 2020. The Chairman in Entra since 2012 is a woman.

Employee turnover is stable. In 2020, 15 people started working in Entra and 6 people left the company. Over a two to three-year period Entra has focused on new technology, increased environmental activities, and staffed up with a new digitalization department. New hire rates are calculated based on people started in Entra divided on the number of employees by the end of 2020. Turnover rate is calculated based on people that left Entra divided on the number of employees by the end of 2020.

There have been no serious incidents involving direct employees in Entra in 2019, but in 2020 there have been 1 injury involving sick leave absence in our construction projects.

The Injury rate, Lost day rate and Accident severity rate (all calculated per 1,000,000 hours worked) were zero or close to zero in both 2019 and 2020.

PERFORMANCE NARRATIVE ON OUR MANAGED ASSETS

The following provides a short commentary on the asset-level performance indicators for Entra's management portfolio and headquarters for 2020. For an outline on our plans for managing future performance please refer to the ESG report, pages 42-59.

MANAGEMENT PORTFOLIO

Energy

Entra's focus on improving energy efficiency has given results over the past 10 years, not only through concrete measures such as replacing central environment operation control systems and improving the zoning control of outdoor environments but also by generally optimizing the management of its properties. In 2020, absolute electricity consumption across the 63 managed assets with available data, totaled 81,692 MWh, an 8 per cent decrease from 2019. Measured as like-for-like, the decrease was 4 per cent. Landlord-obtained absolute consumption amounted to 56,969 of which 2 per cent came from renewable resources. Entra aims to increase this proportion by extending its green energy consumption through solar panels, wind and hydropower.

Absolute district heating and cooling consumption across the 47 managed assets totaled 37,750 MWh, a decrease of 16 per cent compared with 2019. Landlord-obtained consumption amounted to 32,457 MWh.

There was no use of fuels in 2020, compared to 0,6 MWh in 2019. Entra is currently working towards phasing out fossil fuel consumption within its portfolio and has in 2020 removed all oil boilers.

Building energy intensity across the 60 management properties in our portfolio with like-for-like performance data was 124 kWh per square meter in 2020, down by 10 per cent in comparison with 2019.

Greenhouse gas

In 2020 Entra changed system for calculation of GHG emission. Entra has used Optima EOS system for monitoring energy, water and waste for several years. We have connected this system directly to an environmental module, automatically calculating Scope 1-3 based on consumption of energy, water and waste. This method gives a more detailed calculation than the previous calculation method. Combined with a different use of CO₂ factor on waste and a more detailed breakdown of the guarantee of origin for all electricity purchased by Entra, the outcome for 2020 is not directly comparable with 2019. Greenhouse gas intensity from building energy across the same assets fell to 4.18 kg CO₂e per square meter, a drop of 9 per cent compared with 2019. This decrease is mainly explained by less energy consumption.

GHG emissions presented in the EPRA table are based on local-based and market-based emission factors for electricity. If calculated using a market-based emission factor for electricity, the GHG emission from electricity is about 10,503 tonnes CO₂e in 2020. Due to the changes in system and methodology, as described above, GHG data is not comparable with 2019 where GHG emission from electricity was 1,933. In 2019 and 2020 Entra has purchased guarantees of origin for all electricity purchased by Entra (landlord obtained electricity consumption).

Water

100 per cent of water consumption comes from municipal water supplies sources. Absolute water consumption across the 64 managed assets with available data in 2020 was 156,699 m³ compared with 277,800 m³ in 2019. On a like-for-like basis, total water consumption decreased by 31 per cent primarily due to Covid-19. Building water intensity across the 60 assets with like-for-like performance data was 0.16 m³ per square meter in 2020, a 36 per cent decrease from 2019.

Waste

In 2020, Absolute waste creation across the 60 managed assets with available data was 2,501 tons. Compared with 3,383 tons in 2019 this was a decrease of 26 per cent. Like-for-like decreased with 25 per cent from 3,189 tons in 2019 to 2,378 tons in 2020. This is mainly explained by reduced activity as a result of Covid-19. Entra continuously works towards greater coverage of waste created by tenants who have waste groups managed independently of Entra's waste monitoring system.

Entra Headquarters

Entra's electricity consumption at its headquarters totaled 106,281 kWh in 2020, a 7 per cent decrease compared to 114,097 kWh in 2019. This decrease is explained by less activity in the building due to Covid-19, with a direct effect on the amount of lighting and ventilation needed.

Entra's pro-rata share of district heating and cooling decreased by 33 per cent from 89,785 kWh in 2019 to 60,363 kWh in 2020.

The property at which Entra is a tenant does not have fuels as an energy source.

Energy intensity for Entra's headquarters was 59 kWh per square meter in 2020, down by 18 per cent in comparison with 2019. Greenhouse gas intensity from energy ended at 2.15 kg CO₂e per square meter compared to 2.05 in 2019. This is mainly explained by the change in calculation method and factors on waste.

Entra's proportionate share of water consumption in 2020 was 384 m³ compared with 751 m³ in 2019. This 49 per cent decrease is a directly consequence of home office and Covid-19. Building water intensity was 0.14 m³ per square meter in 2020, compared to 0.27 m³ per square meter in 2019.

Entra's proportionate share of total waste decreased by 43 per cent from 21,5 tonnes in 2019 to 12,2 tons in 2020. Most of this decrease directly reflects the activity at HQ due to Covid-19 and home office (effect on paper and food waste).

Location of EPRA Sustainability Performance in companies' reports

Entra reports the entirety of the EPRA Sustainability Performance Measures in its Annual Report, including a comprehensive EPRA sBPR table that use the performance measure codes.

Reporting period

Entra reports both absolute and like-for-like performance measures for the two most recent years, but may choose to report performance measures over a longer period in the future should this provide meaningful data.

Materiality

Entra has not conducted a materiality review for the EPRA performance indicators as we consider all the sustainability performance measures in the EPRA table to be material.

EPRA Sustainability Performance Measures

Data Qualifying Note

1. NA = "Not applicable"
2. GHG Scope 1 emissions from fossil fuels and refrigerants are calculated using Return factor.
3. GHG Scope 2 emissions from use of electricity and district heating and cooling are calculated using a location based approach. For electricity, a three-year rolling average of the Nordic mix factor from IEA energy statistics reports is utilized.
4. GHG Scope 2 alternative Electricity emission - Market based method (REC's, GoO)
5. GHG Scope 3 emissions from travel, waste and water consumption are calculated using a location based approach and "Climate accounting for waste management" 2009, Røedal, Modahl and Lyring.
6. Entra's headquarters data is also included in the total portfolio as that Entra is a tenant at one of its own properties.

Definitions

12 months rolling rent	The contractual rent of the management properties of the Group for the next 12 months as of a certain date, adjusted for (i) signed new contracts and contracts expiring during such period, (ii) contract based CPI adjustments based on Independent Appraisers' CPI estimates and (iii) the Independent Appraisers' estimates of letting of current and future vacant areas.
Capital expenditure	Property related capital expenditure, split into four components: (i) Acquisition, (ii) Development, (iii) Like-for-like portfolio and (iv) Other. The components Development and Like-for-like portfolio combined ties to the line item Investment in the property portfolio in the investment properties rollforward, while the two other categories ties to separate line items in the rollforward.
Back-stop of short-term interest bearing debt	Unutilised credit facilities divided by short-term interest bearing debt.
Cash Earnings	Net income from property management less tax payable
Contractual rent	Annual cash rental income being received as of relevant date
EPRA NDV – Net Disposal Value	The IFRS equity including the full extent of the deferred tax liability as per the balance sheet, including fair value of fixed interest rate debt and excluding goodwill as a result of deferred tax.
EPRA NRV – Net Reinstatement Value	The IFRS equity excluding (i) deferred tax liability as per the balance sheet in respect of properties and financial instruments, (ii) fair value of financial instruments and (iii) goodwill as a result of deferred tax.
EPRA NTA – Net Tangible Assets	The IFRS equity including only the estimated real tax liability, and excluding (i) fair value of financial instruments, and (ii) goodwill and intangible assets as per the balance sheet.
Gross yield	12 months rolling rent divided by the market value of the management portfolio
Interest Coverage Ratio ("ICR")	Net income from property management excluding depreciation and amortisation for the Group, divided by net interest on interest bearing nominal debt and fees and commitment fees related to investment activities
Independent Appraisers	Akershus Eiendom/JLL and Newsec
Land and dev. properties	Property / plots of land with planning permission for development
Like-for-like	The percentage change in rental income from one period to another given the same income generating property portfolio in the portfolio. The figure is thus adjusted for purchases and divestments of properties and active projects
Loan-to-value ("LTV")	Total net nominal value of interest bearing debt divided by the total market value of the property portfolio.
Management properties	Properties that are actively managed by the company
Market rent	The annualised market rent of the management properties, fully let as of the relevant date, expressed as the average of market rents estimated by the Independent Appraisers
Market value of the property portfolio	The market value of all properties owned by the parent company and subsidiaries. The figure does not include Inventory properties.
Net Asset Value ("NAV")	Net Asset Value the total equity that the company manages for its owners. Entra presents NAV calculations in line with EPRA recommendation, where the difference mainly is explained by the expected turnover of the property portfolio.
Net income from property management	Net income from property management is calculated as Net Income less value changes, tax effects and other income and other cost from associates and JVs
Net letting	Net letting is calculated as the annualised rent of new lease contracts plus lease-up on renegotiated contracts less terminated contracts
Net nominal interest bearing debt	Nominal interest bearing debt less cash and bank deposits
Net rent	12 months rolling rent less the Independent Appraisers' estimate of ownership costs of the management properties of the Group
Net yield	Net rent divided by the market value of the management properties of the Group
Newbuild	A new building on bare land
Occupancy	Estimated market rent of occupied space of the management properties, divided by the market rent of the total space of the management portfolio.
Outstanding shares	The number of shares registered less the company's own repurchased shares at a given point in time. EPRA Earnings and Cash Earnings per share amounts are calculated using the weighted average number of ordinary shares outstanding during the period. All other per share amounts are calculated using the number of ordinary shares outstanding at period end.

Period-on-period	Comparison between one period and the equivalent period the previous year
Property portfolio	Properties owned by the parent company and subsidiaries, regardless of their classification for accounting purposes. Does not include the market value of properties in associates and jointly controlled entities
Project properties	Properties where it has been decided to start construction of a new building and/or renovation
Redevelopment	Extensive projects such as full knock-down and rebuild, and projects where external walls are being materially impacted (e.g. taking a building back to its core or changing brick facades to glass).
Refurbishment	Projects extensively impacting an existing building, but not knocking it down or materially affecting external walls
Total area	Total area including the area of management properties, project properties and land / development properties
Total net nominal interest bearing debt	Net nominal interest bearing debt and other interest bearing liabilities, including seller's credits and lease liabilities for land and parking lots in connection with the property portfolio
WAULT	Weighted Average Unexpired Lease Term measured as the remaining contractual rent amounts of the current lease contracts of the management properties of the Group, including areas that have been re-let and signed new contracts, adjusted for termination rights and excluding any renewal options, divided by Contractual rent, including renewed and signed new contracts.

Highlights in 2019

Q1 2019

In March 2019, Entra completed the new-build project Powerhouse Brattørkaia at Brattørkaia 17 in Trondheim. This is an energy positive and environment friendly office building of approximately 18,200 sqm., including a 2,500 sqm. parking basement. Powerhouse Brattørkaia utilises sun and sea water for heating and cooling. The building is covered by 3,500 sqm. of solar panels and thus produce around 500,000 kWh of renewable energy annually. This is more than twice as much as the building consumes for heating, cooling, ventilation and lighting. It means that the building has a positive energy balance in its lifetime also when all the energy that goes into building processes, materials and finally demolition is included. The property is certified BREEAM-NOR Outstanding and Energy class A. The project was developed at a yield-on-cost of 6.2 per cent.

Q2 2019

Entra started up the redevelopment project Rebel U2 in Universitetsgata 2, in central Oslo. Rebel U2 will be a technology and knowledge hub for large and small tech companies and will be managed 50/50 by Entra and an external partner. The 28,100 sqm. building will consist of office space, co-working areas a conference center and a variation of restaurants. Rebel U2 will offer a full-service concept through short term contracts with access to meeting rooms, complimentary beverages, wi-fi etc. through memberships. The project is expected to be completed in Q3 2021.

Q3 2019

During the quarter, Entra started redeveloping the 4,300 sqm office property in Kristian Augusts gate 13. The project demonstrates Entra's strong commitment to work for more sustainable solutions by incorporating a target of more than 60 per cent re-use of building materials. Occupancy is at 100 per cent as the property will be let to the co-working operator IWG/Spaces.

Entra sold the property Kristian Augusts gate 23 in Oslo for NOK 450 million, representing a premium of 26 per cent to book values as of 31 March 2019. The transaction was structured as a sale of shares and the buyer was The National Museum "Stiftelsen Nasjonalmuseet for Kunst". The National Museum was the current tenant of the property and had an option in their lease agreement to buy the property at pre-determined and contracted terms on which they decided to call. Closing took place 1 October 2019.

Q4 2019

In Tullinkvartalet in Oslo, Entra completed construction of a new 21,200 sqm. campus building for the University of Oslo's Faculty of Law. In addition, 1,800 sqm. next to the campus building will be redeveloped. The campus building is 100 per cent let of which the main tenant is the University on a 25-year lease. The smaller asset will be used as a project office for the nearby projects and thereafter be redeveloped. Thus, the reported occupancy for the two assets combined was 95 per cent as of 31.12.19. The project has high environmental ambitions and aims for a BREEAM-NOR Excellent classification. The property was developed at a yield on cost of 6.0 per cent.

Entra also finalised the redevelopment of Tollbugata 1A in Oslo. The property consists of two buildings totalling 9,000 sqm. adjacent to Oslo Central Station. The property was forward sold as part of the property swap transaction announced in December 2018, and the transaction closed in October 2019. The project was developed at a yield-on-cost of 5.3 per cent.

At Brattørkaia 12 in Trondheim, Entra finalised a 2,000 sqm. new office property which is fully let to The Norwegian State Educational Loan Fund ("Lånekassen"). The project aims for Energy class A. The property was developed at a yield on cost of 5.4 per cent.

In December, Entra acquired the 14,500 sqm office property Møllendalsveien 6-8, located in Entra's existing property cluster in Bergen.

Letter from the CEO

Delivering on our strategic priorities

2019 has been another solid and exciting year for Entra. We have finalized several large and extraordinary projects such as the first phase of Tullinkvartalet in Oslo and Powerhouse Brattørkaia in Trondheim. We have progressed the development pipeline and started two new redevelopment projects in 2019, and we have at least three major projects that we expect to start in 2020. We have again achieved an exceptionally high customer satisfaction score and throughout the year we have let a total of 160,000 sqm. As of year-end the occupancy in our management portfolio was 97.1 per cent. As several of our large properties in Central Oslo have been emptied and are in the process of being redeveloped our top line growth has been lower than normal this year. The underlying value growth has however continued, and our net asset values are up by 7 per cent.

Stepping up as CEO in July 2019 has been exciting and I am grateful for the confidence given to me by the Board of Directors. Having been a part of the corporate management team since 2013, I am committed towards Entra's strategic priorities of providing profitable growth, delivering the best customer experience and being an environmental leader within our industry. Also, the focus on owning, managing and developing office properties in clusters located on central transportation hubs in the four largest cities in Norway remains intact. We will continue to adapt the content of what we deliver but the strategy and direction remain firm.

Long-term perspective on value creation

We have a long-term perspective on everything we do in Entra. We seek to create enduring value in a sustainable way, and we want to contribute to urban development in our property clusters to also benefit our customers and the local communities.

We have a strong balance sheet and will continue to allocate capital in a responsible way for optimal value creation. Our growth stems mainly from property development, but we will also continue to make acquisitions which deliver value and progress our long-term strategy within our selected property clusters. Our property development projects has shown strong value contribution with an average valuation gain of 28 per cent upon completion for the 18 projects completed since 2015. We

have continued to build our land bank and we currently have a project pipeline that can provide solid growth for at least 7-8 more years.

Having a green portfolio is becoming a prerequisite for the future. Both from a climate risk perspective, but also as this is becoming increasingly important for our customers. Further, we observe that certified properties have a better value development and obtain more favorable financing. Operating our business in a sustainable manner has been a core priority for Entra through many years. As of year-end, 54 per cent of our properties either are, or are in process of being certified BREEAM Very Good or better. In one of our ongoing redevelopment projects we target that at least 60 per cent of the building materials shall be reused, thus significantly reducing the carbon emissions associated with the construction. Entra is well positioned to answer to future demand for green and sustainable office solutions.

Developing the value chain

It is a clear trend that our customers and their employees expect more and more from the office premises, and we seek to adopt to the surge for more flexibility and value-added services. We will continue to selectively establish different types of office concepts as an integral part of our property portfolio to respond to these trends.

We remain focused on delivering operationally and being commercial in what we do every day, while at the same time progressing our long-term strategic goals.

For the past years our sector has been well supported by yield compressions, low interest rates and market rent growth. Going forward we believe that how you operate your core business will be a stronger differentiator. We have thus insourced strategic IT and accelerated our focus on technology and digitalization to better understand and leverage how technology development can strengthen and improve our core business.

We work with digitalization along three axes; to use technology as an enabler for reduced costs in our property management and project development, to improve the value proposition to our customers and to build an IT architecture that enables data driven optimizations.

The quality and competence of the employees in Entra is very high, and we are privileged to have such solid expertise in the entire value chain. We are recognized in the industry as a leader with strong interdisciplinary teams across the organization and we will continue to invest in our employees to meet the rapid changes and landscapes we are faced with.

Outlook

With very low vacancies, particularly in the Central Oslo market, and limited new-build activity we believe in continued rental growth in the near term. We expect the transaction market

to remain active as demand for Norwegian office properties continue to be firm. Our business is well positioned, we have a strong balance sheet and considerable financial resources to continue developing and growing the portfolio in the years to come. We remain focused on delivering operationally and being commercial in what we do every day, while at the same time progressing towards our long-term strategic goals. In the short term our focus is to retain our high portfolio occupancy and continue to deliver attractive and profitable projects. In the longer term we continuously work to understand new customer trends and to be in the forefront on developing our product and services.

The business

Entra is a leading owner, manager and developer of office properties in Norway. Entra is focused on centrally located, high quality, environment friendly properties in Oslo, Bergen, Stavanger and Trondheim. The headquarter is located in Oslo.

The property portfolio is characterised by solid tenants on long leases with a high occupancy ratio. As of 31 December 2019, Entra owned and managed approximately 1.3 million sqm. in 89 properties. At the end of the year, the real estate portfolio had a market value of 49 billion and the average remaining lease period was 6.9 years. Entra has particular expertise in letting to the public sector, which represented approximately 60 per cent of the customer portfolio. Approximately 70 per cent of the management portfolio is located in Oslo (including Sandvika).

The company is a professional owner and manager of its own property portfolio. Through a high level of technical competence, integrated maintenance and control systems and on-site presence, the company's operational staff ensure that Entra's buildings function optimally for its customers every day. Entra creates additional value in its portfolio through property and project development and the company normally has 5-10 per cent of the portfolio in project development. The company has considerable expertise and experience in zoning, planning, building and renovation of office properties.

Approximately 90 per cent of Entra's portfolio consists of office properties. In addition, Entra owns some cultural buildings such as the National Library and Rockheim, as well as some buildings that are used for education.

Entra's values - Responsible, Innovative, Hands-on and One team - characterise all activities in the Group. Entra's business concept is to develop, let and manage attractive and

environmentally-leading buildings. The Group's business strategy has three focus areas: Profitable growth, High customer satisfaction and Environmental leadership. Operating the business in a sustainable manner is fundamental to the business strategy and operations.

Vision

Entra's vision "The most satisfied people work in Entra buildings" has extended Entra's definition of customers to include all the people working in Entra buildings. Broadening the customer definition from around 500 tenants to the more than 40,000 users of Entra buildings provides new opportunities and extends our strategic positioning and how we interact with our customers going forward.

Strategy

Profitable growth

Entra has a solid track record of portfolio growth and value creation. In 2019, rental income increased by four per cent to NOK 2,238 million resulting from CPI adjustment of leases, completed property projects and solid letting activities.

Entra signed new and renegotiated leases with annual rent totaling NOK 371 million (160,000 sqm.) in 2019 and the occupancy ratio was 97.1 per cent (96.5 per cent) at year end. Net income from property management increased by three per cent to NOK 1,471 million. Entra's net asset value increased by 1.8 bn, as a result of solid project development, letting activities and strong underlying growth in market rents. In addition Entra paid out a

Entra's strategy is built around the following three focus areas.

Profitable
growth

Customer
satisfaction

Environmental
leadership

total of 840 million in dividends in 2019. At year-end 2019, Entra had total assets worth NOK 51.1 billion vs NOK 47.7 billion as of year-end 2018. Entra has throughout 2019 again demonstrated its ability to attract external debt capital on attractive terms from multiple sources of funding, and Entra's average interest rate was 2.99 per cent (2.85 per cent) at year end.

Cash earnings increased by 11 per cent in 2019. Entra's dividend policy is to distribute approximately 60 per cent of cash earnings to its shareholders. The term Cash Earnings is defined as net income from property management less payable tax. The board of Entra proposes to distribute a semi-annual dividend of NOK 2.40 per share for the second half of 2019. Entra's total dividend for 2019 will then be NOK 4.70 per share compared to NOK 4.50 per share for 2018.

Customer satisfaction

One of Entra's goals is to be the best in the industry in terms of customer satisfaction. Entra takes full responsibility for property management in its properties and has a dedicated customer service centre to provide consistent and timely follow-up to enquiries. Entra works actively on maintaining good relationships with its tenants in order to achieve high customer satisfaction and to maximise lease renewal rates. The Norwegian Tenant Index is used to measure customer satisfaction. In 2019, Entra again achieved an exceptionally high customer satisfaction score of 86 versus an industry average of 80. On environmental matters, Entra achieved a score of 85 compared with a industry average of 73, showing that customers truly value Entra's environmental efforts. Entra's overall service score was 89 compared

to an industry average of 81. The customer centre contributes to increasing customer satisfaction and forms the foundation for efficient management of properties.

Entra targets early engagement with its existing tenants ahead of their lease maturities and works together with its tenants to design workspace that meets their current needs and future requirements. Adopting to and making use of new technology has become a core priority in Entra. Entra has, amongst other initiatives, launched an app providing services to the office users.

Environmental leadership

Entra continues to implement and seek new environmental initiatives to meet climate-related challenges, to meet stakeholder expectations and to reduce costs. The Group has developed a corporate culture with a strong environmental focus. Entra's environmental awareness and work to combat climate change is built on the precautionary principle. The Group's environment strategy includes goals and measures for the group, for its counterparties, for the property portfolio and for the development projects. The strategy has the following overall objectives:

- Entra's property portfolio shall be climate neutral
- Entra shall influence and set requirements for its counterparties
- Entra shall be an environmental leader in property management
- Entra's projects shall have a high degree of quality and flexibility and a low environmental burden.

Entra has been a leader in the development of environmentally sustainable buildings and has had high environmental ambitions on all its projects. Entra's target is to achieve a rating of BREEAM-NOR Excellent or better for new and BREEAM-NOR Very Good or better for refurbishment/redevelopment projects. On completion of buildings currently under construction, approximately 48 per cent of the rental income and 54 per cent of the property values in the portfolio stem from properties that are environmentally certified BREEAM Very Good or better.

For many years, Entra has had a strong focus on reducing energy consumption in its portfolio. Through a multiplicity of measures of varying scope Entra has managed to reduce the

energy consumption of its management properties by 50 per cent since 2011. Energy consumption constitutes some 80 per cent of Entra's CO₂ footprint. Entra has a goal to reduce its current CO₂ footprint by at least 70 per cent from 2015-2030.

To provide insight for our stakeholders, we respond to the Global Real Estate Sustainability Benchmark (GRESB) and were proud to achieve Green Star status with a total score of 84 in 2019.

For a further description of Entra's ESG strategy and achievements, see the ESG report which is included in this annual report.

The property portfolio

Geographic exposure

Entra's management properties located in Oslo constitute 63 per cent of the portfolio values whereas the properties located in Bergen constitute 11 per cent, Trondheim 10 per cent, Sandvika 7 per cent, Stavanger 5 per cent and Drammen 5 per cent

As of 31 December 2019, Entra's property portfolio comprised 89 properties, and the market value of the portfolio was 49 billion. A full list of the properties can be found at the end of this report.

The property portfolio consists primarily of management properties, with a significant concentration in the Oslo area.

Portfolio by area

Portfolio by value

Property management

The management portfolio

Entra's management portfolio consists of 89 buildings with a total area of approximately 1.1 million sqm. As of 31 December 2019, the management portfolio had a market value of around 45 billion (42 billion), and the occupancy rate was 97.1 per cent per cent (96.5 per cent). The weighted average unexpired terms for the Group's leases were 6.8 years (6.7) for the management portfolio and 6.9 years (7.4) when the project portfolio is included. Entra focuses the portfolio on the major cities in Norway: Oslo and the surrounding region, Bergen, Stavanger and Trondheim.

Entra's properties are valued by two external appraisers (Akershus Eiendom and Cushman & Wakefield Realkapital) on a quarterly basis. The market value of the portfolio in Entra's balance sheet is based on the average of the two external appraiser's valuation of each individual property. Valuation of the management portfolio is performed on a property-by-property basis, using individual DCF models and taking into account the property's current characteristics combined with the external appraisers' estimated return requirements and expectations as to future market development. The market value is defined as the external appraisers' estimated transaction value of the individual properties on the valuation date. The project portfolio is valued based on the same principles, but with a deduction for remaining investments and specific

Maturity profile of the management portfolio (NOKm)

project risk on the valuation date. The land and development portfolio is valued based on actually zoned land.

Year-on-year, the portfolio net yield decreased from 5.1 to 4.8 per cent. The 12 months rolling rent increased from 2,302 million to 2,318 million, whereas the portfolio market rent has increased from 2,370 million to 2,500 million.

See the section "Definitions". The calculation of net yield is based on the valuers' assumption of ownership costs, which at 31.12.19 corresponds to 7.6 per cent of market rent.

Letting and letting market

The letting market

According to Entra's consensus report, the office vacancy in the Oslo area has continued to decrease and has levelled out around 5.6 per cent. The vacancy level is primarily driven by increasing employment and moderate net new capacity to the market, stemming from limited construction activity and continued office-to-residential conversion. Vacancy is lowest in the city centre. Consequently, the uplift in rent levels is expected to continue. Modern, centrally located office premises are especially attractive and are expected to see the strongest growth.

In Bergen, the office vacancy has decreased to about 8 per cent due to low construction activity, office-to-residential conversion, and increased employment and new optimism in the oil and gas industry. Rents in the city centre of Bergen has increased due to high demand for centrally located premises, and low supply of modern, centrally located office premises.

The Stavanger area is experiencing increasing employment and optimism due to higher activity in the oil and gas sector. As a result of this, combined with low construction activity, office vacancies have fallen to about 11 per cent. Rents have levelled out in the main oil and gas intensive areas. In Stavanger city centre, the vacancy is low, there is an increasing demand for modern, flexible and centrally located office premises and rent levels appears to increase slightly.

In Trondheim, the overall office vacancy is currently around 12 per cent. Vacancy is highest in the fringe areas of the city. The market has shown ability to absorb the new capacity and most of the premises completed in 2019. The construction volume of new office space will increase in 2020. Rent levels in the city centre have increased, while there is a downward pressure on rents in the fringe areas.

Letting activity in 2019

For 2019, gross letting including re-negotiated contracts was 371 million, and lease contracts with a total value of NOK 86 million were terminated. Net letting, defined as new lease contracts plus lease-up on renegotiated contracts less terminated contracts, came in at NOK 62 million.

Quarterly net letting

(NOKm)

The largest contracts signed in 2019 were:

- New 10-year lease contract for 5,600 sqm. in Langkaia 1 in Oslo
- New 6-year lease contract for 3,000 sqm. in Verkstedveien 3 in Oslo with Codan Insurance
- New 10-year lease contract for 2,700 sqm. in Universitetsgata 7-9 in Oslo with the law firm Bull & Co
- New 10-year lease contract for 2,700 sqm. in Prinsens gate 1 in Trondheim with The County Governor of Trøndelag
- New 9-year lease contract for 1,700 sqm. and renegotiated lease contract for 7 years and 1,600 sqm. in Fredrik Selmers vei 4 at Helsfyr in Oslo, both with the Norwegian Tax Administration
- Renegotiated lease contract for 5 years and 7,600 sqm. in Stenersgata 1 in Oslo with the Immigration Appeals Board

- Renegotiated lease contract for 10 years and 4,100 sqm. in Tvetenveien 22 1 in Oslo with the Norwegian Government
- Renegotiated lease contract for 5 years and 5,100 sqm. in Dronningens gate 2 in Trondheim with The Norwegian Courts Administration
- Renegotiated lease contract for 5 years and 1,200 sqm. in Verkstedveien 1 in Oslo with PA Consulting

Occupancy in Entra's portfolio has remained stable during the year, and the Group had an occupancy level of 97.1 per cent as at 31 December 2019 compared to 96.5 per cent at 31 December 2018. The occupancy level was highest in Sandvika at 99.4 per cent and lowest in Trondheim with 95.3 per cent.

Tenants and tenant structure

Entra's tenant base comprises to a large extent public sector tenants with long-term leases, and as of 31 December 2019, public sector tenants accounted for approximately 60 per cent of rental income. Entra's public sector tenants are, or are wholly owned by, governmental, county or municipal bodies. As of 31 December 2019 the management properties had around

700 tenants, and the 20 largest tenants' share of Entra's rental income represents 40 per cent.

The following table sets out the 20 largest tenants in Entra's management properties as of 31 December 2019.

Tenant	Proportion of total contractual rent	Public/private sector
Norwegian Tax Administration	5.6 %	Public
The Norwegian Public Roads Administration	3.4 %	Public

Projects and property development

Entra creates additional value in its portfolio through property and project development, and the company normally has 5-10 per cent of the portfolio in project development. The company has considerable expertise and experience in zoning, planning, building and redeveloping of office properties.

Projects completed in 2019

Powerhouse Brattørkaia

In Q1, Entra finalised the new-build project Powerhouse Brattørkaia in Trondheim. The property is an energy positive and environment friendly office building of 18,200 sqm., including a 2,500 sqm. parking basement. Powerhouse Brattørkaia utilises sun and sea water for heating and cooling. The building is covered by 3,500 sqm. of solar panels and thus produce around 500,000 kWh of renewable energy annually. This is more than twice as much as the building consumes for heating, cooling, ventilation and lighting. It means that the building has a positive energy balance in its lifetime also when all the energy that goes into building processes, materials and finally demolition is included. The property has extraordinarily high environmental qualities and has a BREEAM-NOR Outstanding classification.

Tullinkvartalet UiO

In Q4, Entra completed construction of a new 21,200 sqm. campus building for the University of Oslo's Faculty of Law in Tullinkvartalet in Oslo. In addition, 1,800 sqm. next to the campus building will be redeveloped. The campus building is fully let of which the main tenant is the university on a 25-year lease. The smaller asset will be used as a project office for the nearby projects and thereafter redeveloped. Thus, the reported occupancy for the two assets combined is currently 95 per cent. The project development has high environmental ambitions and aims for a BREEAM-NOR Excellent classification.

Tollbugata 1 A

In Q4, Entra has also finalised the redevelopment of Tollbugata 1A in Oslo. The property consisted of two buildings totalling 9,000 sqm. adjacent to Oslo Central Station. The property was forward sold as part of the property swap transaction announced in December 2018. The transaction closed in Q4 2019.

Brattørkaia 12

In Q4, Entra also finalised Brattørkaia 12 in Trondheim, a 2,000 sqm. new office property which is fully let to The Norwegian State Educational Loan Fund ("Lånekassen"). The project aims for Energy class A.

Portfolio of ongoing projects

As of 31 December 2019, Entra had a portfolio of ongoing projects with a total investment exceeding NOK 50 million of around 66,000 sqm. A full list of the project properties can be found at the back of this report. The portfolio of these projects is presented below.

	Ownership	Location	Expected completion	Project area	Occupancy	Estimated total project cost ¹⁾	Of which accrued ¹⁾	Yield on cost ²⁾
	%			sqm	%	NOKm	NOKm	%
Holtermanns veg 1-13	100	Trondheim	Jan-20	11 700	91	352	302	6.1

Total				66 000		3 541	1 962	

¹⁾ Total project cost (Including book value at date of investment decision/cost of land)

²⁾ Estimated net rent (fully let) at completion/total project cost (including cost of land)

Universitetsgata 7-9

In Tullinkvartalet in Oslo, Entra is building a new 21,900 sqm. office property in Universitetsgata 7-9 in Oslo. Occupancy is currently 49 per cent. The property is expected to be finalised in Q3 2021 with high environmental ambitions and aims for a BREEAM-NOR Excellent classification.

Universitetsgata 2 - Rebel

Next to Tullinkvartalet, Entra has the redevelopment project Rebel ongoing in Universitetsgata 2. Rebel will be a technology and knowledge hub for large and small tech companies and will be managed 50/50 by Entra and an external partner. The 28,100 sqm. building will consist of office space, co-working areas, conference centre and restaurants. Occupancy is currently 18 per cent. Rebel will offer a full-service concept through flexible short-term contracts with access to meeting rooms, wi-fi and more through memberships. The project is expected to be completed in Q3 2021.

Holtermanns veg 1-13

In Holtermanns veg 1-13 in Trondheim, Entra completed construction of a new office building Q1-20. This is the first of three planned buildings. The approved zoning allows total construction of approximately 48,000 sqm., where the first building is 11,700 sqm. This new-build includes a 2,000 sqm. basement with parking facilities. Expected completion is in the first quarter of 2020. The property is currently 91 per cent let. The project has high environmental ambitions and aims for a BREEAM-NOR Excellent classification.

Kristian Augusts gate 13

Entra is redeveloping the 4,300 sqm. office property in Kristian Augusts gate 13. The project will demonstrate Entra's strong commitment to work for more sustainable solutions by incorporating a target of more than 60 per cent re-use of building materials. Occupancy is at 100 per cent as the property will be let to the co-working operator IWG/Spaces. The construction project is expected to be completed in the second half of 2020.

Development sites and project pipeline

Entra's portfolio of development sites contains properties with zoned development potential but where no investment decision has been made. As of 31 December 2019, Entra had seven development sites with a total area of around 115,000 sqm. A list of the properties with defined land and development potential can be found at the end of this report. In addition, Entra continuously works with possibilities to develop and extend the area in its existing portfolio.

Transactions and transaction market

Transaction market

The solid pace observed in the transaction market over the last three years has continued. Transaction volume for 2019 ended up around 92 billion according to Entra consensus report vs. around 90 billion in 2018. The market remains active with strong demand from both national and international investors. The financing market continues to be well functioning, and the outlook for the Norwegian economy is solid. The overall high demand for Norwegian real estate has caused prime yield to remain stable at around 3.7 per cent and is expected to remain stable for the coming years according to Entra consensus report.

Transactions

Entra actively seeks to improve the quality of its property portfolio through a disciplined strategy of acquisitions and divestments. Entra focuses on the acquisition of large properties and projects in specific areas within its four core markets: Oslo and the surrounding area, Bergen, Trondheim and Stavanger. Target areas include areas in the city centres and selected clusters and communication hubs outside the city centres, allowing Entra to offer rental opportunities at a price range that fits its customer base. Entra's experience, financial

strength and knowledge of its tenants make the company well positioned to make acquisitions that meet these criteria.

Also, Entra actively divests smaller properties and properties outside its core markets. The acquisition and divestment strategy is flexible, allowing Entra to respond to market opportunities as they arise. The table on the next page outlines the property transactions Entra has done in 2018 and 2019.

Partly-owned companies

The vast majority of Entra's assets and development projects are wholly owned. In addition, Entra selectively gains access to properties and development projects through its shareholding in subsidiaries and jointly controlled entities. Entra's ownership interests currently include the following companies:

Papirbredden Eiendom AS (60 per cent)

Entra and Drammen Municipality own Papirbredden Eiendom AS. The company owns six office properties totalling 59,000 sqm. and a development potential of 60,000 sqm. in Drammen.

Hinna Park Eiendom AS (50 per cent)

Entra and Camar Eiendom own Hinna Park Eiendom AS. The company owns three office properties totalling 28,000 sqm. and development potential for two new office properties of 37,000 sqm. The company is consolidated in the Group's financial statements as Entra has a controlling vote on the Board of Directors.

Entra OPF Utvikling AS (50 per cent)

Entra and Oslo Pensjonsforsikring (OPF) own Entra OPF Utvikling AS. The company owns two properties in Bergen; Lars Hilles gate 30 (Media City Bergen) and Allehelgens gate 6. Entra OPF Utvikling AS is consolidated in the Group's financial statements as Entra has a controlling vote on the Board of Directors.

Oslo S Utvikling AS "OSU" (33.33 per cent)

OSU is a property development company that is undertaking primarily residential development in Bjørvika, Oslo's CBD East.

Rebel US AS (50 per cent)

Rebel U2 AS will provide facility management services in Universitetsgata 2 in Oslo with full-service solutions, flexible and short-term leases, co-working, conferences and events.

The following chart sets out the Entra's overall legal structure:

¹⁾ Recognised as Share of profit from associates and JVs

²⁾ Entra's share of profit of OSU is in 2019 adjusted for realisation of excess value of 8 million

³⁾ From 2019, earnings from the associated company OSU are excluded from EPRA Earnings as the business of this company is development of properties for sale and is not considered relevant for measurement of the operating performance of the underlying property portfolio under management.

Financing

The Group's financing is diversified between capital market instruments and bank loans. At year-end 2019, the nominal interest-bearing debt was NOK 19,901 million (NOK 19,171 million). The interest-bearing debt has a diversified maturity structure, with an average time to maturity of 4.9 years (4.1 years). As a general principle, Entra's financing is based on a negative pledge of the Group's assets that enables a broad and flexible financing mix. Entra has strong banking relationships and currently has significant business activities with five of the top six Nordic banks. Further, Entra has a strong presence in the Norwegian debt capital market as it is among the largest issuers in Norwegian kroner.

During the year, Entra's interest-bearing nominal debt increased by NOK 730 million to NOK 19,901 million (NOK 19,171 million). The increase in interest-bearing debt was mainly due to project investments and acquisition of a property in Bergen. The change in interest-bearing debt comprised a decrease in commercial paper financing of NOK 700 million and an increase in bank and bond financing of NOK 730 million and NOK 700 million, respectively. As of 31.12.19, net nominal interest bearing debt after deduction of liquid assets of 317 million (230 million) was 19,585 million (18,941 million).

The capital markets funding as at 31 December 2019 consisted of bonds and commercial paper outstanding of NOK 11,600 million (NOK 10,900 million) and NOK 1,800 million (NOK 2,500 million), respectively, which accounted for 67 per cent of total interest-bearing debt. Bank funding of NOK 6,501 million (NOK 5,771 million) represents the remaining part of the financing mix. The Group's bank facilities are mainly revolving credit facilities, which enable active liquidity management by adjusting the facilities according to any ongoing cash needs or surplus. The Group's liquid assets amounted to NOK 317 million (NOK 230 million) as at 31 December 2019. In addition, the Group had committed, unutilised credit facilities totalling NOK 6,190 million (NOK 5,210 million).

Entra is obtaining increasing access to "green financing" from debt investors, banks and other financial institutions. Entra is well positioned to utilise this conditional and favourable capital source as the development and management portfolio consist of many highly environment friendly and BREEAM certified properties. Entra is established as a high-quality Green Bond issuer and has currently issued four Green Bonds with a total outstanding nominal amount of NOK 4,400 million. CICERO (Norway's foremost institute for interdisciplinary climate research) has certified the Green Bond Framework. Entra was awarded the rating Dark Green, which is the best rating possible.

Maturity profile and composition of interest bearing debt

Maturity profile	0-1 yrs	1-2 yrs	2-3 yrs	3-4 yrs	4+ yrs	Total

Interest rates and maturity structure

The Group's average interest cost as at 31 December 2019 was 2.99 per cent (2.85 per cent), and 59 per cent (57 per cent) of the Group's total interest-bearing debt was subject to fixed interest rates. At the same time, the average remaining term to maturity of the Group's interest rate hedging instruments was 3 years (3.4 years). The change in average interest rate stems mainly from higher Nibor interest rates and increased share of fixed interest rates in the debt portfolio, as part of the forward start swap portfolio has become fixed rate payer swaps.

The Group manages interest rate risk through floating-to-fixed interest rate swaps and fixed rate bonds. The table below shows the maturity profile and contribution from these fixed rate instruments, as well as the maturity profile for credit margins on debt.

	Fixed rate instruments ²⁾		Forward starting swaps ³⁾			Average credit margin	
	Amount (NOKm)	Interest rate (%)	Amount	Interest rate (%)	Tenor (years)	Amount (NOKm)	Credit margin (%)
<1 year	100	2.32	1 650	2.14	6.4	5 441	0.93
1-2 years	1 050	3.39				1 300	0.96

>10 years	500	4.85				1 100	0.39
Total	10 160	2.41	1 650	2.14	6.4	19 901	0.88

¹⁾ Average reference rate (Nibor) is 1.78 per cent as of the reporting date.

²⁾ Excluding forward starting swaps and credit margins on fixed rate bonds (credit margins are displayed in the table to the right).

³⁾ The table displays future starting point, notional principal amount, average fixed rate and tenor for forward starting swaps.

Investment grade

Entra has a strong investment grade credit rating assigned by Moody's at Baa1 with Stable Outlook. According to the latest credit opinion, issued in December 2019, Entra's Baa1 long-term issuer rating reflects (1) its position as the largest office property company in Norway; (2) its leadership position in office properties in attractive locations on the fringes of the central business district (CBD) in Oslo; (3) its modern, high-quality property portfolio; (4) a clear, well-defined strategy to focus on offices in Norway's four largest cities and government tenants;

(5) the large exposure to highly creditworthy governments and public tenants with very long-dated average lease maturities and consistently high occupancy rates across all cities; and (6) good liquidity and a high unencumbered asset ratio.

The Moody's Baa1 rating will contribute to a significant increase in credit availability for Entra in domestic and international debt capital markets and enables Entra to further extend its debt maturity profile.

Financing policy and status

The Group has adopted a conservative financial strategy that secures financial flexibility throughout an economic cycle. In this respect, Entra's financial profile is characterised by a moderate loan-to-value ratio, strong interest coverage ratio, diversified debt maturity and an ample liquidity position. Entra targets a loan-to-value ratio which shall be below 50 per cent over time. The Group's loan-to-value ratio as at 31 December 2019 was 40.2 per cent, a decrease from 41.3 per cent at year-end 2018. The lower loan-to-value ratio is mainly due to positive value changes from both the project and management

portfolio. The interest coverage ratio decreased to 3.3 as at 31 December 2019 from 3.6 at the end of 2018, a decrease which mainly stems from a higher interest cost during 2019.

The Group manages financial risk in accordance with a framework included in the financial policy. The main financial risks, in addition to financial leverage referred to above, are interest rate risk, financing and liquidity risk. The Group's financial policy is revised at least on an annual basis.

Financial risk	31.12.2019	Financial policy
Financial leverage		
Loan-to-value (LTV)	40.2 %	Below 50 per cent over time
Financing risk		
Back-stop of short-term interest bearing debt ¹⁾	248 %	Min. 100 %

Risk management

Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Access to and price of financing Responsible: - CFO	A reduction in access to capital could weaken the company's global credit rating from Moody's, refinancing possibilities and ability to finance new investments. In such a situation, the company could be exposed to an increase in financing costs which would weaken the underlying result, debt service ability and dividend capacity. Greater risk aversion in financial markets could limit access to financing and weaken investor interest in the sector.	The development in the company's financing needs, ability and costs is monitored on a continuous basis and reported quarterly in business reviews in order to ensure that the financing operation supports the overall business strategy. We maintain strong relations with all of the top six Nordic banks and participants in the debt capital market. We maintain a diversified financing structure with a balanced maturity profile and financing mix in order to ensure stable and predictable access to capital. Entra has a strong investment grade credit rating assigned by Moody's at Baa1 with Stable Outlook. The rating contributes to a significant increase in credit availability for Entra in domestic and international debt capital markets and has enabled Entra to further extend its debt maturity profile. We have committed, unutilized revolving credit facilities in order to secure financing of debt maturities due in the next 12 months as well as investment opportunities. We limit interest rate risk through interest rate hedges and by issuing fixed rates bonds. We monitor closely, and act upon, any new regulations in the bank and debt capital market with respect to possible implications for the company's future financing.	➡ The market for commercial real estate financing has been open and attractively priced during most of 2019. Market interest rates have stabilized on relative low levels and are expected to remain at historically low levels for an extended period of time. We believe that Entra will be an attractive borrower in the coming period based on the company's predictable cash flow, strong tenant base, low leverage and solid global credit rating.
Development in value of property Responsible: - CFO	The property portfolio is valued quarterly by two external appraisers. A substantial negative development in the property values will affect both the profit and loss account through unrealized changes in value and through an increase in key figures like the loan to value ratio (LTV). A higher LTV could potentially have negative effects on Entra's cost of capital, access to capital and shareholders' interest and attention. Increasing market rents, and expectations that Entra is able to renegotiate on terms in line with increased market rents, have been the major driver in the value changes of Entra's properties in 2019.	We follow up the risk quarterly through active dialogue with the external appraisers and continuously monitor the market. We work continuously on portfolio optimization and risk mitigation in relation to geography, letting profile, segment, and «strategic fit». We focus on risk reducing measures in the portfolio, including rent levels, lease lengths, counter party risk, occupancy ratio, and the overall quality of the portfolio. We have an objective to keep LTV below 50 per cent over time, and we regularly simulate different negative scenarios in the market, which could affect the market value of Entra.	➡ Entra's property portfolio has increased in value substantially in recent years, mainly as a result of lower yield requirements but also as a result of ongoing project completion and the signing of new and renegotiated leases. During 2019, the trend of rising market rents was more pronounced and has been a substantial part of the positive value changes in the property portfolio. The risk of an increase in long-term market interest rates, which then could affect investors' yield requirements and the market value of the portfolio, is still present. However, expectations of higher market rents, primarily in Oslo, will most likely offset this risk in the coming period.

Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Customer satisfaction Responsible: · COO	Customer satisfaction affects Entra in different ways. A high score on customer satisfaction over time reduces the risk that tenants will move out of our buildings. A high level of customer satisfaction is an important competitive advantage in any negotiating situation, allowing us to focus on other value drivers than price. Customer satisfaction can also be affected by other factors, such as negative comments about Entra in the media, or other situations that affect the reputation of the company negatively.	Customer satisfaction is measured annually through the Norwegian Tenant Index and is recorded and tracked on individual tenant level. This index is used by a large part of the real estate sector and enables us to benchmark ourselves with our competitors. The survey is a good tool to evaluate and analyze areas for improvement and where we perform better than our competitors. Large customers are followed up through key account strategies where we have set out how different parts of Entra work to ensure the best customers experience. Feedback from the customer satisfaction survey is used as a basis for an action plan on how Entra can further improve to meet customer expectations. We carry out regular «customer journeys» together with our large customers to evaluate our customer offering and identify areas of improvement. Entra continuously works to develop our product and service offering based on ongoing dialogue with our customers.	↓ In recent years, Entra's customer satisfaction has increased considerably. At the end of 2019 it was at a record high level of 85 points (area-weighted) two points up from last year. A customer satisfaction score of 80 or higher is considered very satisfactory across all industries. Entra has been above this level for five consecutive years, which supports the view that our systematic work on customer satisfaction is well established in the company's culture and processes. We therefore consider the risk related to customer satisfaction as reduced compared to previous year. Through a continually strong customer focus in the entire organization, and securing solid deliveries in our extended service offering, we regard the risk of customer satisfaction moving below the targets we have set as low.
Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Build and retain critical competence Responsible: · EVP HR and organization	The risk that Entra does not manage to maintain the expected personnel quality and capacity on critical deliveries within the company's core business.	The development and management of competence is an integral part of the business strategy. We have initiated measures on recruitment to secure relevant talent and applicants with future needed competence. We have internal courses and measures to raise competence through the "Entra School". Our employees participate in professional networks and participate on external courses. We follow up employees with provision for competence and career development. We work systematically with talent development and succession planning. We conduct an annual employee survey to measure the engagement and satisfaction of employees and develop action plans where required. We benchmark and assess compensation and benefits to ensure that we are competitive.	↑ There is continued high level of activity in the property sector and a strong competition for talent and attractive candidates. Voluntary turnover in Entra has increased in the period 2018-2019 from previous years, albeit we are still experiencing a low turnover relative to comparable companies. Within certain areas of expertise, such as ICT/ digitalisation, building and environmental technology and technical management, we are experiencing strong competition in the labour market for leading edge competence.

Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Health, Safety & Environment Responsible: · EVP Project development	There is an inherent risk that Entra does not fulfil its statutory and ethical HSE responsibilities in its' business in connection with the operation of buildings, in building construction projects and as employer of its own staff. Entra's HSE policy states that «it shall be safe to work, visit and move in and around Entra's properties and building projects».	Entra's employees have the necessary HSE training and the right expertise: · All new employees are given HSE training and an introduction to Entra's HSE management systems · «The Entra School» covers statutory and Entra policy HSE training. Entra has an open, clear and systematic HSE-communication, and HSE is a topic at all board, top management, and employee meetings. Entra has HSE control/ management systems to ensure that we comply with HSE requirements and internal routines · Entra has implemented HSE working routines/ instructions to reduce HSE risk, both in construction projects and property management · Entra's HSE management system is accessible by all employees, and by external parties when required · Incidents are reported both on construction sites and in our management portfolio, and HSE-reports are used to identify and mitigate areas of risk · Continuous efforts are made to ensure a strong HSE focus with Entra's contract partners · Audits are made of selected construction projects, suppliers and topics. Entra continuously focuses on enhancing the safety culture in the organisation.	➡ We consider the risk factor to be unchanged in 2019. There is a strong focus on identifying and avoiding unwanted incidents at all levels in Entra. Severe incidents are followed up and investigated to ensure learning and future avoidance.
Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Project profitability Responsible: · EVP Project Development	Entra uses net present value as one of the parameters for assessing profitability in project investments with a yield requirement that reflects the individual project's risk profile. Project profitability is assessed continuously in relation to changes in financial key figures; mainly the direct return – «yield on cost» – and economic occupancy ratio. Profitability is measured and reported against assumptions made at the time of the investment decision. Project investments are also affected by a number of external factors that are outside the company's control, such as development in the consumer price index, higher interest rate levels, changes in currency levels, taxes and duties, etc.	A thorough risk assessment exercise is performed before each investment decision. To reduce income risk, it is normally required that at least 50 per cent of the property is pre-let before project start. Working with one main contractor on a fixed price contract on each large project, including extensive use of turnkey construction contracts, reduces the cost risk. Internal project managers to secure proper ownership, strong project management and keen risk focus throughout the entire project. Financial parameters, quality and progress are closely monitored and reported on regularly for all ongoing projects. Letting plans for coming vacancies are established before project start and continuously updated during the project development phase.	⬆ Entra has experienced increased project profitability risk during 2019, mainly caused by the following factors: · Rising project costs as a result of a tighter contractor market, particularly in the Oslo area where Entra has several projects under development · In the next two years, a high degree of redevelopment projects, which normally have higher risk than newbuilds · For coming redevelopment projects, we might allow for a lower occupancy ratio upon project start than what has been the case in recent years. · New office and workplace concepts, such as co-working, providing more services and greater flexibility might involve innovative solutions that are untested. · Deviating from the traditional office space rent model, including cooperative solutions, turnover-based rent and other business concepts, might involve a greater risk compared to the traditional letting models. · Several projects are likely to be multi-user buildings giving increased flexibility in respect of future reletting of buildings. Experience indicates somewhat that this increases the likelihood of delays, increased costs and lower income in the first year of operation.

Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Information security Responsible: - EVP Digitalisation and Business Development	Information security risk includes the threats that an external or internal attacker exploits vulnerability in Entra's processes, buildingsystems or applications in order to cause harm to the company and/or users of the company's systems. Information security risk deals with the requirement for reliability and security in relation to the transfer and storage of information, including, but not limited to: - Cyber security that covers securing information values that are vulnerable via access from ICT-systems (Information and Communications Technology) - ICT security that covers securing information and communications technology in relation to confidentiality, integrity and availability.	We focus on security and employees' knowledge and attitudes, including training of all of Entra's employees. To increase focus and improve understanding of ICT threats, Nanolearning (short, internet-based learning sessions) are carried out by all employees. We use suppliers with certifications that focus on security. We have outsourced the operational part of ICT security to one of Norway's top-class companies. We regularly carry out analyses of critical systems related to operation of our buildings and the company, and major systems are connected to the external ICT security company's platform and fire wall. We use a third party to carry out audits and testing of actual security on systems and users. A strategy and action plan for the next three years has been updated and the plan is being executed. The new security law of 01.01.19 has impact on several of Entra's customers. To be a trusted advisor and partner, Entra is working systematically in order to mitigate the risk of losing existing and potential customers.	 Industry analyses points to increased risk for corporates overall. In addition, Entra's buildings are becoming more technologically sophisticated, and new technology also constitutes a possible increased security risk.
Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Compliance Responsible: - Chief Compliance Officer	Compliance is a compilation of Entra's specific assessment of risk factors within the compliance area. Entra's key risk factors within compliance are viewed to be the following: - Corruption and financial crime - Ethics - Social responsibility - Personal data protection - Insider rules	Risk assessment, monitoring, and follow-up is an integral part of Entra's operations on all levels, including the Board of directors, that discuss risk on a regular basis. Entra has a structured plan to follow up each key compliance risk, including, but not limited to, the following: Corruption and financial crime: - E-training program - Purchase and invoice controls - External and internal whistle blower channel - Supplier audits Ethics: - Dilemma training - External and internal whistle blower channel Social responsibility: - Socially responsible purchasing - Procurement policy - Supplier controls and audits Personal data protection: - Data processing agreements - Establishment/ follow-up of internal routines - Focus on GDPR Insider rules: - Training and follow-up of insider rules and regulations.	 The overall compliance risk is perceived to be unchanged during 2018. The introduction of GDPR lead to, as expected, a potentially higher impact on risk through fines on companies that are not compliant with the regulations. Management has, however, worked diligently during 2019 to ensure that the company is compliant regarding GDPR.

Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Investment strategy Responsible: - CFO	Acquisition and divestments of assets, including portfolio rotation, is an important tool to achieve Entra's objectives. Particular risk factors identified include: - Diversification, including geographic, sector and type - Timing of transactions in relation to economic cycles and the lifecycle of the individual property - Access to development sites and property for development - Technical errors and incorrect assumption in valuations and investment calculations - Matters that are not revealed or overlooked in due diligence - Poor decision-making processes, including a lack of objectivity, an incorrect agenda/incentives, "group thinking", the degree of risk appetite, and inadequate expertise	Our key employees have long experience from M&A combined with commercial real estate market knowledge. We evaluate each investment case by reference to strategy, risk and profitability. This is done at several levels, including the CFO unit, Entra's investment committee, top management, and Board of directors. We review capital return requirement with the board at least annually, but more often if indicated by changes in macro and risk. We thoroughly scrutinize and verify assumptions in the investment model by different external and internal professionals. Financial models are always reviewed by at least two people. All investments exceeding NOK 100 million must be approved by the Board of directors.	➡ The economic cycle appears to be stagnating/levelling out. There is greater competition for sites/development projects. There is still significant activity in the transaction market, and the buyer interest stemming from both domestic and foreign investors is very strong.
Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Occupancy ratio Responsible: - EVP Market and Commercial Real Estate Development	The occupancy ratio in the management portfolio affects Entra's bottom line through growth in rental income and lower operating costs. The occupancy ratio in the management portfolio relates mainly to lease expiries and to what extent we are able to renegotiate with existing tenants. In addition, projects that are completed with vacant space will affect the occupancy ratio. In the long term, the occupancy ratio is also affected by how flexible our buildings and lease agreements are to changes in customer demand. The occupancy ratio in development projects indicates the level of risk Entra takes when we make investment decision.	The occupancy ratio in the management portfolio and in the development project portfolio are important key figures in all external and internal reporting. Vacancies and market opportunities are monitored regularly and reported quarterly through a detailed overview of all forthcoming lease expiries in the next four years. Expiring lease contracts, and the probability of renegotiation, are evaluated continuously. The largest customer accounts are followed up with separate "key account strategies". For all the major leases that expires during the next five years, we focus on early involvement and broad contact with the relevant customers to identify future needs. This applies both to the flexibility related to increased/reduced space and different ways of organizing the workplace. In all ongoing development projects, dedicated letting teams are established, consisting of letting, property and project resources. The letting teams work to ensure an optimized solution for the relevant building in relation to requirements and expectations from potential new tenants. The occupancy ratio in projects is reported and followed up internally continuously during the project and externally quarterly in connection with external reporting. In the planning of future development projects, a separate early phase strategy is prepared in order to secure a flexible building and an attractive product independent of long-term workspace trends. Here, we combine markets and customer knowledge with building and operational expertise.	➡ The occupancy ratio in recent periods has been between 96 and 97 percent and was at the end of 2019 97.1 percent in the management portfolio. In addition, the occupancy rate in the project portfolio was high throughout 2019. Expected decrease in overall market vacancy, particular in Oslo, limits the market risk in Entra's total portfolio. There are several major leases expiring in the coming years that could affect the occupancy ratio significantly. The increased focus from potential tenants on space/cost efficiency and various organizational changes can impact the occupancy ratio negatively on forthcoming renegotiations. Due to increased rent levels in Central Oslo, certain tenants in the public sector tend to look for alternative locations outside city center.

Risk factors	Description/definition	How we monitor and minimize the risk	Changes in risk assessment during 2019
Climate related risk Responsible: - CFO	We consider short, medium and long term time horizons to be 0-3, 3-10 and 10+ years, respectively. Herein, we recognise that climate-related issues tend to manifest themselves over the medium to long term and that our properties have a life-time of many decades. Regulatory changes imposed resulting from climate related risks are highly relevant and are monitored closely by Entra. Increased severity of extreme weather events such as storms and floods is a long term risk. Property values constitutes most of Entra's balance sheet, and potential damage to property values could potentially be severe. Lagging behind with regards to new technology is a risk facing every company today on many levels, also climate related. Failure to comply and adapt to climate related matters is also a significant reputation risk which could result in e.g. lack of tenant interest, higher cost of capital in the financial market, and lack of ability to attract or retain talent. Also, not handling the company's corporate social responsibilities in an informed and good matter is a reputation risk, whereas the opposite is an opportunity.	Entra's buildings are well maintained, and we build and refurbish buildings to higher standards than current regulation demand. All newbuilds and major redevelopment projects are certified according to BREEAM-NOR, and we have started certifying our management portfolio according to BREEAM-In-Use. We observe that green buildings get higher valuations, slightly higher letting price per sqm. (believed to be a stronger trend going forward), and green financing is more favourable than traditional financing. We invest in new technology and methods for producing more energy of our own, and we actively seek to use technology to make our buildings smarter and greener. Technology is driving changes in how we work and has an impact on the space we occupy. Entra has a separate digital and technology department seeking to harmonise initiatives and drive the development. We actively work to reduce the CO₂ footprint, waste disposal, and energy consumption in our portfolio. The location of Entra's properties is not seen as particularly exposed to flooding. Damage to property from e.g. heavy rain is an integral part of risk management on individual asset level.	➡ While the gross risk related to climate has increased, Entra has invested significantly in process improvements and technologies to reduce this risk. For a further discussion of climate related risks see the ESG report pages 46-53.

Summary risk-matrix

¹⁾ Both financial and/or non-financial effects

ESG report

To operate our business in a sustainable manner is of key strategic importance to Entra and is seen as a prerequisite for the company's long-term results and value creation. Entra has a systematic approach towards understanding and managing the company's impact on society, as well as stakeholder requirements and expectations. This report highlights our 2019 activities in greater detail, and outlines what we have planned for 2020.

Reporting standards and responses

To enable our stakeholders to compare and evaluate our reporting, we compile and align the Sustainability report for 2019 with three reporting frameworks: the European Public Real estate Association Sustainability Best Practices Recommendations on Sustainability Reporting (EPRA BPR), the Global Reporting Initiative Standards (GRI) and the Task Force on Climate-related Financial Disclosures (TCFD).

The EPRA BPR Guidelines provide a consistent way of measuring sustainability performance for real estate companies and cover environmental, social and corporate governance categories. The GRI Standards, applicable to all industries, include both relevant disclosures for a range of economic, environmental and social topics as well as reporting principles related to the reporting process. This report has been developed in accordance with the GRI Core option. The TCFD framework provide for consistent climate-related financial risk disclosures. The EPRA, GRI and TCFD tables and references are included at the back of the annual report for 2019.

In this report we have also set out a review of the UN Sustainable Development Goals (SDG) against our Environmental, Social and Governance (ESG) strategy.

We achieved the EPRA Sustainability Gold Level also in 2019 and the Global Real Estate Sustainability Benchmark (GRESB) Green Star status with a total score of 84, up from 81 in 2018.

Third party verification

Entra has engaged Deloitte to conduct a review and provide a limited level of assurance on Entra's ESG Report. The review and assurance are carried out in accordance with the assurance standard ISAE 3000 "Assurance Engagements other than Audits or Reviews of Historical Financial Information" established by the International Auditing and Assurance Standards Board. The auditor's conclusion and scope of work is presented in the Auditor's report, included at the back of this ESG report.

Management approach

Sustainability is fundamental to Entra's strategy and has been so for more than a decade. The Board of Directors determine the sustainability strategy and review performance. This includes responding to climate related opportunities such as investment in renewables, improvements in energy efficiency and investment in low-carbon technologies. The Board also review and determine how to respond to different climate-related risks including policy, regulatory and legal risks, as well as the physical risks to our assets.

Entra's business units present business reviews to the Board of Directors at least on an annual basis. These reviews also

include ESG targets and KPIs. Targets are then aggregated into company KPIs which are followed up on a regular basis.

The CEO is responsible for following up the implementation of the ESG strategy in Entra. Entra's risk management framework is structured to enable effective identification, evaluation and management of climate-related risk. Ownership and management of all risks is assigned to members of the corporate management, who are responsible for ensuring the operating effectiveness of the internal control systems and for implementing key risk mitigation plans. Implementation is mostly handled by the individual business units and is reported to the CEO/CFO through quarterly business reviews and in corporate management meetings.

Entra also has a Sustainability Committee with a separate responsibility to evaluate, follow-up and implement the Environment strategy as well as new initiatives. This Committee reports to corporate management.

Stakeholder dialogue

It is important for Entra to maintain an open and honest dialogue with its main stakeholders. Such dialogue provides valuable feedback and enables Entra to continue to improve, to build trust and to enhance its reputation.

A structured process towards selecting the report's content and confirming its validity is undertaken on an annual basis. The focus areas of this report have been revisited and confirmed by Entra's Board and management. Entra works with

various groups and individuals to understand specific opportunities and concerns about our business and its impact. Such engagement is, amongst others, based on dialogue, meetings and feedback from business partners, shareholders, customers, investors, authorities and employees. Other sources of information include an assessment of media and industry reports. In 2019, the materiality analysis and focus areas have been revisited and their validity confirmed by Entra's management and Board of Directors.

Entra's stakeholders are particularly concerned about how we handle environmental matters, governance, ethics and anti-corruption measures, our corporate culture and employee satisfaction and our role as a major owner and developer of properties in the largest cities in Norway.

Materiality analysis and focus areas:

Entra believes that a systematic approach towards understanding and managing the company's external factors is a prerequisite for value creation. The main steps in selecting the focus areas involve identifying and understanding topics that are important to our business strategy and to our stakeholders.

The focus areas and priorities are based on a broader materiality analysis of areas where Entra and its stakeholders believe the company can make an important and sustainable impact. The topics are believed to be important for future progress and long-term value creation. The outcome of the analysis is in all material aspects similar to the previous year and is illustrated on the next page.

Entra's main stakeholders

Materiality analysis

Focus areas

Based on the materiality analysis the following five areas continue to be seen as core to Entra and the work within each field is further described in this report.

Climate and the environment

Urban development

Motivated employees

Ethics and anti-corruption measures

Health and safety

Supporting the UN Sustainable Development Goals

As a major participant in the Norwegian property market, we believe that we have an important role to play in supporting Norway's response to the 17 Sustainable Development Goals (SDGs). To do this we have reviewed our sustainability strategy and program against the SDGs to highlight where we align.

We see the following goals as particularly significant to our business and how we operate: SDG 9 Industry, Innovation and Infrastructure, SDG 11 Sustainable cities and communities, SDG 12 Responsible consumption and SDG 13 Climate action.

Goal 9: Industry, innovation and infrastructure

Entra focuses on innovation and actively seeks innovative environmental solutions for its properties and building projects. Entra focuses primarily on low energy consumption and

renewable energy in the existing asset portfolio and in all of its projects with an overall ambition that new and totally renovated buildings will have an energy consumption of less than 40 kWh per sqm. (close to zero energy buildings). Entra also seeks solutions for increased production, storage and exchange of renewable energy.

Goal 11: Sustainable cities and communities

Entra seeks to contribute to cities and communities that are sustainable, attractive, inclusive and accessible for residents and others that work or visit the area. We take an active role in

developing the areas and public spaces around our buildings, and we ensure they are accessible to those with disabilities. We seek to use environment friendly materials and solutions when developing and operating our buildings. We seek solutions for re-use of furniture and materials, and we focus on making and maintaining our buildings climate resilient.

Goal 12: Responsible consumption and production

Entra sets performance requirements in its development projects which focus on the efficient use of natural resources, lifecycle

efficiency and high levels of waste reduction and recycling. This is reflected in our management of our buildings where we set targets for waste sorting and place focus on re-use of materials in our projects.

Goal 13: Climate action

We have set science-based targets which are set towards not exceeding a two degrees Celsius rise in global temperature. This means we are committed to reducing our carbon emissions

and making sure our portfolio is climate-resilient. For a more comprehensive description of our work on taking climate action, please see the section below.

Environment

Environmental leadership is one of Entra's three strategic pillars, and Entra has over many years developed a corporate culture with a strong environmental focus throughout the entire company. Entra's work to limit climate change is built on the precautionary principle. Entra's environmental leadership has become well-known among its stakeholders, and the environmental commitment contributes to its ability to attract the best and most competent resources. In addition to the environment strategy outlined below, see EPRA, GRI and TCFD tables and references in the end of the annual report.

Entra's environment strategy 2018-2020

Entra's environment strategy has a 360° approach and includes strategies and targets for 1) own organisation 2) the property portfolio and property management 3) the development projects and 4) counterparties, hereunder suppliers and customers.

Entra revise its environmental strategy on a regular basis. The current strategy for the period 2018-2020 is summed up in the figure on the next page and further outlined in the following text.

Entra's business shall be climate neutral

Entra has a corporate culture where environmental awareness is strongly embedded at all levels in the organization. This is something that Entra wish to maintain and further enhance and use as a lever in implementing an even broader environmental focus. Entra strives for a culture in which every one of the company's employees seeks to influence suppliers, customers and partners to make wise environmental choices. This means that Entra will work actively with initiatives for increased environmental engagement and responsibility among its employees, customers and suppliers. Entra still has much to gain from reinforcing its focus on a circular economy and initiatives that

contribute to reduced consumption, reuse and recycling of building materials and waste handling.

Miljøfyrtårn®

Entra has an ambition to act as an example in relation to a lessee's environmental focus. As a consequence, Entra's head office in Oslo is environmentally certified in accordance with the requirements set out in "Miljøfyrtårn" (Environment Lighthouse). As an extension of this, Entra will work on influencing attitudes and seek to lift everyone's awareness so that the company also is regarded as an environmental leader as an office user.

Entra's ambition is that operation of its buildings shall be climate neutral. Today, energy consumption amounts to approximately 80 per cent of Entra's direct CO₂ emissions and is thus the most important single source in impacting our carbon footprint. From 2018 to 2019, Entra reduced

its greenhouse gas intensity from 5.65 tonnes per sqm. to 4.53 tonnes per sqm, mainly as a result of reduced energy consumption and greener electricity with lower CO₂ emissions. Entra has a goal to reduce its current CO₂ footprint by at least 70 per cent from 2015-2030. This will be achieved through, among other things, replacing energy bought with green energy we have produced ourselves, phasing out environmentally harmful cooling media, reducing the quantity of waste, and focusing on green transport. The rapid developments taking place within solar and battery technology contribute to our optimism in this regard.

The calculation and projection have been made by CEMAsys and Entra, and the CO₂ factor for electricity used in the calculation is based on Electricity Nordic mix.

Entra scenario; Minimum reduction to comply with 2 degree ambition

In order to compensate for its own emissions and make Entra's business close to climate neutral Entra buys guarantees of origin ("green power") corresponding to the electricity consumption of the buildings where Entra is responsible for providing electricity. Entra will also gradually produce more and more renewable energy through new development and refurbishment projects.

Entra has also carried out a number of green measures in its buildings, and this has been an important contributor to succeeding in reducing energy consumption. These measures have, amongst others, been financed through green benefit

Our environment strategy

agreements under which lessees have contributed to the financing through part of the reduced energy costs being used to finance the measure. Entra sees continued possibilities for implementing green measures, for example by using roof and wall surfaces for producing solar power. This type of investment usually has a long payback period, and Entra has adopted a slightly lower return requirement in relation to environment investments and innovation that protects the environment.

Entra shall influence and set requirements for its counterparties

Entra will work actively to influence and set requirements for its suppliers, customers and other interested parties to contribute to the "green transition". Specifically, this means that Entra prefers partners that also have a clear environmental profile and will put the environment on the agenda in meetings with its counterparties. Entra sets environmental requirements on its suppliers and partners through conditions on purchasing and social responsibility. Entra has imposed a total prohibition on the use of materials hazardous to health and the environment that are on the Substance of Very High Concern (SVHC) list and works towards fossil-free construction sites.

Entra seeks to increase awareness of the environment among users of its buildings. Not only our customers, the tenants of the buildings, but also our employees and visitors are included in this definition.

Entra seeks to implement environmental measures that are visible and inspiring for the people that work in our buildings. We will also create conditions for our tenants that enable the implementation of environmental measures, both by tenants individually and in cooperation with Entra through other initiatives. An example is waste sorting where Entra has developed waste sorting stations and supporting material/information brochures. This initiative also underpins Entra's ambition to achieve at least 75 per cent waste sorting on its properties.

Green Benefit Agreements

These agreements are Entra's own scheme for working with customers on environmental measures. Entra's role is to identify the potential together with customers and then implement and finance the measures. Customers refund the cost through an increased rent for a set period of time on the basis that the customers share of operating costs is reduced by more than the increase in rent. Once the initial investment has been paid down, the customer receives the benefit through lower common costs. Since 2011, Entra has signed more than 100 Green Benefit Agreements with its tenants.

In addition, Entra will continue to focus on reduction, reuse and recycling when making tenant alterations and furnishing premises and common areas, and will seek to influence customers and suppliers to make the right environmental choices.

FOCUS AREAS AND TARGETS PURSUANT TO THE ABOVE ARE SUMMARISED BELOW:

Focus areas	Targets and measures
Environmental awareness is part of our corporate culture	• Work to improve expertise and increased environmental awareness and responsibility among the employees • Encourage employees to choose environmentally friendly transport
Climate neutral operations and property management	• Work actively to reduce the CO₂ footprint with an objective to reduce this by at least 70 % from 2015-2030 • Gradually replace energy bought with renewable energy produced by ourselves • Climate compensate for ongoing CO₂ emissions by: • Buying guarantees of origin for all electricity used in our buildings • Phasing out all cooling media that are not climate-friendly • Focus on innovation, consider lower return requirements for environmental investments
Environmental leadership is an important part of our social responsibility and reputation	• Attract the most competent and innovative people and partners • Make our environmental commitment known to our counterparties • Continue to issue green bonds and secure green bank financing where applicable
Environmental certification and reporting targets	• Organisation and head office certified in accordance with "Miljøfyrtårn" (Environment Lighthouse) process • Retain GRESB "Green Star" • Retain EPRA Sustainability Gold • Retain CICERO rating "Dark shade of Green" • Ownership and follow-up of environmental targets in the regions and project development

Entra has been successful in making its environmental commitment known to its counterparties, and has shared, and will continue to share, its expertise and experience with the industry.

Membership of associations

Entra participates actively in various technical bodies, industry cooperation and industry organisations such as

Powerhousealliansen, Næring for Klima, Norwegian Green Building Council, Norsk Eiendom and Norges Bygg og Eiendomsforening (NBEF). Entra has signed up for Oslo European Green Capital Industry Challenges and participates in R&D projects such as "Svalvent" together with Sintef and in a cooperation project with Obos, Norsk Gjenvinning and CSR Consulting regarding industrial solutions for upcycling of materials.

FOCUS AREAS AND TARGETS PURSUANT TO THE ABOVE ARE SUMMARISED BELOW:

Focus areas	Targets and measures
Set environmental requirements for our suppliers	• Environmental requirements in Entra's conditions for purchasing and social responsibility • Requirements for reduced waste quantities, reuse and recycling • Require a prohibition on the use of materials hazardous to health and environment • Put the environment on the agenda in meetings and contracts with suppliers
Increased environmental awareness among users of Entra's buildings	• Carry out environmental measures that are visible and inspiring for people that work in and visit our buildings • Facilitate the carrying out of environmental measures by customers • Green benefit agreements with our customers
Share our expertise and experience	• Hold lectures, contribute to technical bodies, industry cooperation, industry organisations etc.
Contribute to sustainable and good urban development	• Contribute to relevant environmental solutions in property and urban development, with good transport and energy solutions, climate adaptation and greater biological diversity

Entra shall be an environmental leader

Entra shall have a continuous focus on environmental measures in the management portfolio.

Entra uses an environment management system to compare, follow-up and control the various buildings' environmental qualities with a focus on the consumption of energy and water, as well as waste and waste sorting. Entra has BREEAM-in-use certified both the performance and management of 10 buildings in the portfolio. On asset performance seven were scored Excellent and three Very Good. On building management three were scored Outstanding, five Excellent and two Very good. Entra has another six Breeam-in-use certifications ongoing as of year-end 2019. In addition, Entra has BREEAM-NOR certified 14 of its completed project developments.

Over time Entra has built a culture in which energy management is an integrated part of its operations. Entra has worked diligently to reduce energy consumption in its portfolio (from 202 kWh/sqm. in 2011 to 133 kWh/sqm. in 2019). An important reason why Entra has succeeded in this work is focused and systematic work and technical upgrades over time, supported by an energy management system which has made it possible to measure, compare and follow up various initiatives. Entra is now at a level where continued reductions in consumption must primarily be driven through technological development and continuous upgrading of the management portfolio to green buildings.

Entra will maintain its focus on reducing energy consumption in its management portfolio and has a target to get below 135kWh per sqm. in 2020. Entra works to reduce load on the energy grid and lower costs in relation to energy intensity in the portfolio.

Entra will continue to implement a culture where Entra employees work systematically on all aspects of a circular economy – i.e. reducing, reusing and recycling. This means that Entra will focus on reducing the quantity of waste in buildings as well as

Energy consumption in the portfolio 2011-2019

Internal measurement method used, deviates from EPRA methodology as corrected for differences in e.g. outside temperature.

looking at solutions for multi-use and reuse. Examples of this are paperless offices, a reduction in food waste in canteens, as well as a focus on reuse in relation to tenant alterations. Entra has set specific ambitions in relation to residual waste, the degree of sorting and water consumption for the period 2018-2020.

In 2020, Entra will investigate and establish a strategy for environmental measures on its roof surfaces (use of solar panels, solutions for surface water, biological diversity and climate risk). In 2019, Entra did a pilot project and implemented solar panels on the roof and facades of Professor Olav Hanssens vei 10 in Stavanger.

Part of Entra's strategy is to own properties close to public transportation hubs. Entra thus encourages its tenants' employees to use public transport, to cycle or to walk. All Entra's buildings will have provision for bicycle parking.

FOCUS AREAS AND MEASURES PURSUANT TO THE ABOVE ARE SUMMARISED BELOW:

Focus areas	Goals and measures
Good environmental leadership	• Use environment leadership system for control, comparison and follow-up of individual buildings (Optima)
Reduced energy consumption and intensity	• Target 145 kWh/sqm. in 2018, 140 kWh/sqm. in 2019 and 133 kWh/sqm. in 2020 • Increase proportion of self-produced green energy
Reduce peak load	• Focus on load control in order to reduce energy demand during peak usage times
Reduce and recycle waste and water	• 75 % waste sorting in 2019 in both projects and property management. Target for 2020 is 80 % • Reduce water consumption
Environmental measures	• Strategy for roof surfaces and facades • Make provision for bicycle transport • Actively seek innovative and environmentally friendly solutions

Entra's new-build and redevelopment projects shall be characterised by high quality, flexibility and a low environmental burden

Entra is a leader in developing environmentally sustainable buildings and has for many years had high environmental ambitions on all its development projects. In cooperation with the Powerhouse alliance, Entra has redeveloped five older buildings to "Plus buildings/Powerhouses" at Kjørbo in Sandvika and at Brattørkaia in Trondheim a new-built Powerhouse was finalised and opened in 2019. A Powerhouse produces more energy than it uses over its

lifetime, including the materials used for construction. In practice, the buildings therefore act as local power stations that deliver environmentally-friendly energy.

Entra has thus contributed to increased focus of the entire industry to consider "virtually zero use of energy" on both new buildings and redevelopment projects.

Entra's new buildings are BREEAM-NOR certified, with a goal of obtaining, as a minimum, BREEAM-NOR Excellent, while for redevelopment projects the objective is a minimum of

BREEAM certification of the portfolio

Percentage share of portfolio certified in accordance with BREEAM NOR/BREEAM In-Use Very Good or better

BY RENTAL INCOME

BY VALUE

FOCUS AREAS AND MEASURES PURSUANT TO THE ABOVE ARE SUMMARISED BELOW:

Focus areas	Goals and measures
Standardisation and environmental requirements in projects	• Further develop the standard specification for projects (the "Entra building") • Develop a standard specification for tenant requirements • Set requirements for fossil-free construction sites and request fossil-free transport • Establish a strategy for all development projects in Entra with the following objectives: • request and facilitate flexible solutions and multi-use premises • requirements for reuse of materials, reduction of waste quantities and degree of sorting • more materials with low CO₂ emissions (documented through Environmental Product Declaration (EPD)) • choice of building products with low life cycle costs (LCC) • The environment strategy for the project is to be presented as part of the investment decision and reported in Business Reviews
Certification	• Objective of a minimum of BREEAM-NOR Excellent on all new development projects • Objective of a minimum of BREEAM-NOR Very good on major redevelopment projects
Focus on renewable energy and low energy consumption	• Ambition of close to zero energy buildings (energy consumption less than 40 kWh/sqm.) • Plan solutions for increased production, storage and exchange of renewable energy
Innovation	• Actively seek innovative and environmentally friendly solutions

BREEAM-NOR Very Good. This requires, among other things, analysis of life-cycle costs, low energy consumption, a good internal climate and innovative measures. On completion of buildings currently under construction and ongoing certification processes, Entra will have BREEAM-NOR built/redeveloped 19 buildings and BREEAM In-Use certified 16 buildings.

Entra's new buildings and redevelopment projects shall be planned and built in accordance with Entra's specifications - the "Entra building". In the "Entra building", focus is placed on standardisation that will give reduced costs in a life cycle cost perspective (LCC) and operating synergies. Standardised technological systems in the buildings will also simplify integration with new "smart building" technology in the future. Entra is working with requirements for materials with low CO₂ emissions and low life-cycle costs. Planning will provide for flexible solutions and multi-use and reuse of materials will be a focus area. Entra also plans to develop a standard delivery description for tenants where these factors are taken into account.

Entra applies for and receives financial support from Enova for individual environmental measures taken in its development projects. Entra received approximately NOK 3.5 million in support for its development projects in 2019.

Green Bonds

Entra has issued four Green Bonds, capitalizing on the environmental qualities in a selection of its portfolio. CICERO Center for International Climate Research (Norway's foremost institute for interdisciplinary climate research) has provided a second opinion to Entra's Green Bond Framework where Entra

was awarded the rating Dark Green, which is the best rating possible, for its future Green Bonds issues.

The rating Dark Green is given to projects and solutions that realise the long-term vision of a low-carbon and climate-resilient future already today. Typically, this will entail zero-emission solutions and governance structures that integrate environment concerns into all activities. Example projects include renewable energy projects such as solar or wind.

"Based on the overall assessment of the project types that will be financed as well as governance, reporting and transparency considerations, Entra's Green Bond Framework gets a *Dark Green shading*.

No significant weaknesses perceived."

- CICERO, Second opinion

THE ROADMAP TOWARDS 2050 BY THE GREEN BUILDING COUNCIL ("GRØNN BYGGALLIANSE")

Entra has signed up to "The Roadmap towards 2050 for the Property Sector" by Grønn Byggallianse and Norsk Eiendom. Entra complies with and follows the 10 immediate measures set out in the Roadmap listed below:

Measure	Status
Certify the organization	Entra's headquarters were certified as Miljøfyrtårn in 2017
Remove fossil heating in buildings	Completed on all Entra's properties except two buildings which were acquired in 2018. A plan for phasing out will be established
Only buy building products that do not contain hazardous substances	Covered by Entra's sustainable purchasing procedures
Introduce BREEAM In-Use as a management system for the entire portfolio	16 properties certified or in process of being BREEAM In Use certified.
Conduct a study of what the roofs can and should be used for	Study will be conducted in 2020
Demand and reward innovative environmental solutions	Request and demand innovative solutions in new-build development projects.
Require architects to make plans for re-use of materials and minimize waste	Implemented in several of our projects. Possibilities investigated on a project by project basis.
Order energy budgets to calculate real energy use	Implemented in Entra's standard technical requirements
Demand and prioritize building products with low CO ₂ emissions	To be implemented in Entra's standard technical requirements
Demand fossil free construction sites	To be implemented in Entra's standard technical requirements

Climate risks and scenario analysis

Climate change and environmental damage are two of the most dramatic challenges facing the world today, and many countries are already feeling the effects of climate change. In our part of the world, the changes in the Arctic region are particularly dramatic and worrying.

Climate change means climate risk, not only physical risk but also transition risk – the risk associated with economic impacts of the transition to a low carbon economy. Future social developments, climate policy developments and technology developments are subject to high uncertainty, and these factors have a major impact on greenhouse gas emissions. There is also significant uncertainty with regard to how sensitive the climate system is to changes in greenhouse gas emissions, and uncertainty with regard to the effects of a given level of warming.

The analysis of economic implications of climate change is fraught with difficulty, and it is impossible to survey all potential impacts of climate change as no existing scenario or model can fully describe the workings of the entire physical world and how all physical, chemical, geological and biological processes

influence each other. Impacts of climate changes will thus depend on how rapidly they occur, how large the changes are, as well as the adaptability of societies and ecosystems. As such, many analyses are based on factors that lend themselves to some degree of quantification, but climate change will also have effects which are difficult to quantify, or which cannot meaningfully be quantified.

In the Official Norwegian Reports (NOU) 2018: 17 "Climate risk and the Norwegian economy", a report from a commission appointed by Royal Decree on 6 October 2017 to assess climate-related risk factors and their significance for the Norwegian economy, three stylised future scenarios shed light on a wide range of potential outcomes:

1. *"Successful climate policy scenario"* involves a successful climate policy that delivers a swift transition to a low-emission society. No significant self-reinforcing mechanisms in the climate system are triggered, thus implying that the climate changes are moderate and the worldwide economic implications are relatively minor. However, the transition to a low-emission society may be challenging for various stakeholders.

2. *"Late transition scenario"* involves late climate policy tightening – following a period of further warming. We are, at the same time, «lucky» – and no self-reinforcing mechanisms in the climate system are triggered. The climate changes and economic implications are considerably more pronounced than in the above scenario. There is a higher risk that the Norwegian economy will be indirectly affected by climate changes in other countries as the result of conflict escalation, diminished international cooperation and changes in global migration patterns. In addition, belated and more severe policy tightening will increase the risk of financial instability.
3. *"Dramatic climate change scenario"* is involving political failure and/or the triggering of self-reinforcing mechanisms in the climate system. The economic implications of such catastrophic climate changes cannot be meaningfully quantified. Risk management advice would be of minor use, and the relevant measure is quite simply an effective climate policy that reduces the probability of ending up in this scenario.

As such, a catastrophic climate change cannot be excluded. If critical tipping points are crossed, it may trigger self-reinforcing processes that entail major changes. The IPCC special report on 1.5°C warming indicates that some tipping points may be crossed between 1.5 and 2°C global warming.

As investments in commercial real estate, at least in the longer term, is very closely linked to macro development, understanding the environmental impact on Norwegian macro is also key for Entra.

The considerable uncertainty with regard to international developments means that the range of potential outcomes for the Norwegian economy is very wide. Over the long time horizon, the risk outlook will be dominated by the indirect physical risk associated with how climate change affects other countries.

A moderate level of global warming and climate change will have both negative and positive effects on the Norwegian economy. Rich countries in the Northern Hemisphere are generally less exposed to direct negative effects of climate change than are poorer countries in the South. Moreover, rich countries like Norway will by and large have more well-functioning institutions, a higher level of education and a more diversified industrial structure. Higher income levels and flexible labour markets imply a greater capacity for absorbing transition costs whilst transitioning to a low-emission society. Norway seems less vulnerable to climate change than most other countries and is also held to be one of the best placed countries with regard to adaptability.

However, the Norwegian economy is highly integrated into the global economy and directly exposed to developments elsewhere. If already vulnerable states experience major negative effects from climate change, there will be an increased risk of political instability, humanitarian disaster and violent conflict in and between states. Increased migration flows, unstable food prices, supply disruption and changing production and

trading patterns will affect both the global and the Norwegian economy.

An overall assessment of the key risk factors nonetheless indicates that the Norwegian economy can, all in all, be considered relatively resilient. The ND-GAIN Country Index, a program of the University of Notre Dame's Environmental Change Initiative, uses two decades of data across 45 indicators to rank 181 countries annually based upon their vulnerability and their readiness to successfully adapt to climate change. The graph for 2017 is shown on the next page where Norway is indicated in green (Source: <https://gain.nd.edu/our-work/country-index/matrix/>).

Entra has an active approach to assessing, monitoring, and following up on climate related risk, and climate risk is, together with other risks, a topic at the Board of Directors meetings at least two times per year. Actions and follow-ups from the assessments is being acted upon by the organization, including, but not limited to, ensuring that Entra's portfolio of assets are prepared to the extent possible for the possible challenges ahead.

In assessing the specific climate risk facing Entra, we have grouped the risks into two main buckets; (i) physical climate risk, and (ii) transition risk.

(i) Physical climate risk

- Physical climate risk is risk associated with the implications of physical changes in the environment. The climate in Norway has changed significantly over the last century and will continue to change, as in the rest of the world. The Norwegian climate is expected to become wilder, warmer and wetter, and torrential rain episodes may become more intense and frequent. This may result in altered flooding patterns, changed snow patterns and shrinking glaciers. The oceans are likely to become warmer and more acidic. Rising sea levels will worsen the impact of storm surges. Climate change in the Arctic will also affect weather systems in our latitudes. Continued melting of Arctic sea ice could affect the polar jet stream that largely determines the weather patterns over Norway.
- Commonly used benchmarks are the current climate or the pre-industrial climate situation. Norway will probably experience increased precipitation, more flooding, more frequent landslips and rising sea level, and these physical changes and the uncertainty associated therewith constitute risk factors. Many of the physical processes happen very slowly, from a human perspective. Even if net global emissions were to be reduced to zero within a short space of time, it may therefore take a very long time for the climate system to arrive at a new equilibrium.

The expected rising sea level is, however, in the Nordic countries expected to be at least partly offset by the rising of the land with the largest effect in the northern part of the Baltic Sea but with still significant effects across

Norway and other countries vulnerability and readiness for climate change

Source: University of Notre Dame: Global Adaption Index

the Nordic countries. During the most recent ice age, the Nordic countries were pressed down by the weight of glaciers, which sat on top of the countries for about 100,000 years. The land is still rebounding, 10,000 years after the glacial ice melted away, and the ground rising for example in Oslo is around 5mm per year and Trondheim and Bergen of 4 and 2mm, respectively (source: www.kartverket.no).

(ii) Transition risk

Transition risk is risk associated with the implications of climate policy and technological developments upon transition to a low-emission society. An ambitious climate policy is likely to result in carbon-intensive energy sources such as coal and oil being largely replaced by renewable sources such as sun, water and wind, but we do not quite know when and how this will happen. This has major implications not only for energy producers such as Norway, but for large parts of society and the economy worldwide in coming years.

Physical climate risks and opportunities for Entra

Area	Group	Type of risk	Probability	Consequence: ¹⁾	Time horizon: ²⁾	Action	Opportunities	Implications for strategy
Physical risk	Acute	Stronger winds and storms	High	Medium	Short	Is experienced already. Entra must ensure that the buildings are dense and can withstand increased impact from strong wind gusts. Entra already has good maintenance programs for its buildings, including roofs and facades. This means that the buildings are already well equipped for large amounts of rain and heavy winds. The facades are checked visually at least once a year, and are more thoroughly checked based on an individual risk-assessment. Work on establishing a plan of measures for roofs and facades to withstand even greater quantities of water and more extreme weather has begun and is planned to be completed in 2020. This is also something that is considered in all of Entra's newbuilding projects.	Entra's properties are built to high building standards and are considered to be safe and able to withstand considerable winds and storms.	Continue as is in terms of building planning and construction. Enhance focus on solid facades.
	Acute	Extreme rainfall	High	Medium	Short	May be required that buildings in cities must contribute to water depletion. For example, water retardant roofs, opening of streams, etc. A water retardation measure is sedum roofing, which Entra has already installed on some roofs. Sedum roofs also provide extra Breeam-in-use points.		There is a trade-off between using roofs for energy production or collecting water. Doing both can be problematic. Must also be considered if the roofs are solid enough to apply sedum rooms. For all new construction and redevelopment project water management is a priority.
	Chronic	Rising sea levels	High	High	Long	Some of Entra's buildings may be exposed to potentially rising sea levels. A portfolio assessment will be made in this respect during 2020 in order to reveal such potential i the property portfolio.	The vast majority of Entra's buildings are located so that rising sea levels is not a direct problem. This could potentially increase the attractiveness of these locations in the future.	Evaluation of locations exposed to rising sea levels will be a key element in all transaction processes.

.....

¹⁾ Consequence / Financial impact. Lav < 10 mill, Medium 10-100 mill, Høy > 100 mill

²⁾ Time horizon. Short: 0-3 years, Medium: 3-10 years, Long: more than 10 years

Transition risks and opportunities for Entra

Area	Group	Type of risk	Probability	Consequence: ¹⁾	Time horizon: ²⁾	Action	Opportunities	Implications for strategy
Transition risk	Politics and regulations	More stringent regulations and climate requirements	High	High	Medium	A new technical regulation is being prepared (TEK 20). When this is launched, a transition period is usually in place so that it is most likely to become fully applicable to projects that are initiated from 2021. The new technical regulations are most likely to contain stricter sustainability requirements. One of the areas that has been proposed to be tightened is on energy consumption, where there may be requirements for "almost zero energy building". This is an area well known to Entra through our work on passive houses and plus houses. This will result in increased costs in some projects, but we are familiar with the solutions and are close to meeting the requirements of several of our projects today.	Entra seeks to stay ahead of laws and regulations in all projects as well as in regular operations.	Continue current strategy.
	Politics and regulations	Stricter regulations and climate requirements - Paris Agreement	High	High	Medium	Entra's focus on high environmental qualities in its construction and redevelopment projects means that a steadily increasing part of the portfolio contributes directly to the ambitions of the Paris Agreement. Entra's portfolio is on average 8 years since new-built or fully redeveloped. In addition, we will continue to push for good and efficient operation in relation to energy savings.	Entra seeks to stay ahead of laws and regulations in all projects as well as in ordinary operations.	Continue "as is"
	Politics and regulations	Requirements for increased reuse in construction projects	High	High	Medium	Other regulation that is in the pipeline is related to reuse. The requirement in the EU Waste Framework Directive, which Norway is bound to follow through the EEA Agreement, is that 70 per cent (by weight) of non-hazardous building and construction waste should go to material recycling in 2020. Entra has over 90 per cent waste sorting rate in its projects and will have no trouble sorting into the fractions needed to facilitate material recycling. Entra is in dialogue with a partner to test their recycled products within wood. To facilitate recycling products within wood, one of the solutions may be to establish a new wood fraction on the construction site so that wood products you do not want are sorted out. It will be easy for Entra to facilitate this. Entra is also involved in a recycling project together with Obos and Norwegian recycling working towards the industry to achieve increased material recycling of wood and concrete. This is to help establish more circular races for two of the largest waste products within the building and construction sector.	In Entras pilot project in Kristian Augusts gate 13 which is under redevelopment Entra target to use as much as 60 per cent reused materials.	Work to influence the authorities, suppliers and the industry in general with the aim of increasing reuse in all projects and thus reduce embodied carbon in properties and projects.

¹⁾ Consequence / Financial impact. Lav < 10 mill, Medium 10-100 mill, Høy > 100 mill

²⁾ Time horizon. Short: 0-3 years, Medium: 3-10 years, Long: more than 10 years

Area	Group	Type of risk	Probability	Consequence: ¹⁾	Time horizon: ²⁾	Action	Opportunities	Implications for strategy
Transition risk	Technology	Solar and wind technology outperform other energy sources	High	Medium	Medium	Implementing solar and wind technology measures on buildings may impose significant costs.	Become more self-sufficient with energy	Entra monitors the technology development closely.
	Market	Valuation of office properties	High	High	Medium	It is to be expected that valuation of property in the future will increasingly take into account the climate when assessing risk and determining return requirements. It is already seen that buildings with low environmental qualities achieve reduced interest and lower valuation.	Entra's portfolio, where environment has been a leading variable in all major construction projects over the last 10 years, is becoming increasingly attractive.	Continue to have the environment and environmental qualities as a guideline in all projects.
	Market	Tenant requirements	High	High	Medium	For the time being there are rarely any explicit environmental requirements from tenants. However, it is assumed that this will change in the future and that not being able to offer buildings with good environmental qualities and risk-reducing qualities can reduce the interest in the company's products / properties and in the worst case, make them difficult or impossible to rent.	Also on older buildings in Entra's portfolio, energy consumption is on average significantly lower than the industry, which in turn increases the attractiveness of our buildings when attracting tenants.	Continue "as is"
	Market	Financial market requirements	High	High	Short	The financial market has taken on the importance of a sustainable business model and the degree to which the business is exposed to climate risk. These assessments already have a major impact on access to capital and valuation of companies' equity and debt. This is only expected to be reinforced in the future as more and more investors take this into account in their investment decisions.	Entra's green financing started in 2016, and we now have substantial sums in green bonds and bank loans. This will be further strengthened in the future, and we expect that during the next 2-3 years we will have 80 per cent of our debt portfolio as green.	Continue to develop the projects with high environmental quality requirements, which can form the basis for an increasing degree of green funding.
	Reputation	Ability to attract the best workforce, confidence from other stakeholders	High	High	Short	A sustainable and responsible business model that responds and actively works to combat climate change is already very important for attracting talent. It is assumed that this will be strengthened in the future. Furthermore, a company's reputation deteriorates and confidence among the company's other stakeholders is reduced for companies lacking a sustainable business model.	One concrete result of environmental strategy is that Entra is already attracting talent in various functional areas that want a purpose with their professional life

Area	Group	Type of risk	Probability	Consequence: ¹⁾	Time horizon: ²⁾	Action	Opportunities	Implications for strategy
Responsibility risk	Responsibility risk	Lack of climate risk reporting	Low	High	Medium	A sustainable and responsible business model that responds and actively works to combat climate change is already very important for attracting talent. This is to be assumed that this will only be strengthened in the future and that the opposite will significantly reduce access to the best heads.	Entra seeks to be at the forefront in its reporting on the environment as well.	

¹⁾ Consequence / Financial impact. Lav < 10 mill, Medium 10-100 mill, Høy > 100 mill

²⁾ Time horizon. Short: 0-3 years, Medium: 3-10 years, Long: more than 10 years

Social

Entra's focus areas involves its employees and working environment, ethics and anti-corruption, HSE, urban development, human rights and community engagement.

Motivated employees

Entra focuses on developing a culture characterized by pride, positivity, responsibility and involvement. Emphasis is put on employee engagement and motivation, which is considered to form the basis for an individual's desire and willingness to work well and thus to contribute to the development of the company. Employees are offered opportunities for personal and professional development through close dialogue with, and follow-up by, their immediate superior. There is a correlation between resources, tasks and authority. Together the employees create the basis for further development and growth. It is important that employees should consider Entra to be a good and attractive place to work.

At the end of 2019, the Group had 177 employees (including employees in partly owned Hinna Park), of which 172 work full time. 152 of the employees work in Oslo (including Sandvika and Drammen), ten in Bergen, twelve in Trondheim and three in Stavanger.

Focus on developing competence and engagement

Entra's value chain is broad and imposes significant requirements regarding relevant experience, expertise and coordination. Entra therefore acknowledges the individual employee's need for ongoing professional education suited to his/her area of work and has developed the Entra School to provide education and training programmes for all levels of the organisation. These include an introduction course for new employees, which is intended to enable employees to view their role in the company in a wider context. An internal management and key talent development programme that runs for 1.5 years and focuses on the responsibilities and challenges of a management role. Ethics training occupies a central position in the introduction course and through annual dilemma training programmes.

Employee relationship and employee satisfaction

Each year Entra carries out an employee job satisfaction survey. Since 2017 Entra has used the survey from Ennova for this purpose. The survey is standardized and gives a score both for the level of motivation and satisfaction of employees and the factors that drives their experience. Entra's results are compared against a representative national benchmark (GELx) and a benchmark "top in class" of the 25 per cent best in Ennova's client database. In 2019, Entra had an employee motivation and satisfaction score of 85, an improvement of two points from 2018's score. The score is also significantly above

the national benchmark GELx score of 71 and also well above the "top in class" score of 77. The result of this survey confirms the continued positive development from the employee job satisfaction score measured in prior years.

Health and working environment

Entra carries out a number of measures to contribute to the health of its employees. As an example, all employees are offered annual health checks. Entra also has an internal sports club that is active in a number of sports such as running, cycling, skiing and yoga. Sick leave in Entra in 2019 was 2.6 per cent. This is low compared to a country average of approx 5.9¹⁾ per cent. The objective is a continued low level of sick leave.

Workers' rights

Entra complies with established standards and employment legislation. Entra is a member of the Confederation of Norwegian Enterprise, and tariff agreements have been established with employee organisations. Entra is covered by collective bargaining, and the agreements are made applicable to all employees. Negotiations and follow-up in the event of operational changes or restructurings follow Norwegian law.

Safety officer, working environment committee and Board representation

Entra has a safety officer and working environment committee. Employees are represented on Entra's Board with two employee-elected members.

The safety officer's main function is to take care of employee's interests in matters that relate to the working environment. The safety officer is elected for two years from among employees with experience and knowledge of working conditions in the company.

Entra's working environment committee is a decision-making and advisory body. The committee's most important function is to work towards a fully safe working environment. The committee covers issues on its own initiative and at the request of the safety officer. All employees can contact the committee.

Employees in Entra are free to organise themselves and are organised in several different labour associations. Entra has established an accord with the Norwegian Engineers and Managers Association (FLT).

Equality and diversity

Different expertise and experience contribute positively to Entra's development and to a broader and better basis for decision-making. Equal opportunities and diversity are an integral part of the Entra's personnel policy. Entra believes

¹⁾ Source: Statistics Norway: Sickness absence Q3 2019

in the benefits of diversity, and this goal is incorporated into Entra's recruitment procedures and is reflected in the composition of senior management. Entra strives for diversity on a broad basis, including gender, age, background, education and nationality. Employee benefits, such as flexible working hours and full pay during illness and parental leave regardless of the National Insurance scheme's limits, are important measures in the efforts to ensure equal opportunities.

There are especially two areas where Entra is actively working to increase diversity;

- to achieve a more balanced gender distribution in property management (which historically has consisted almost exclusively of men), and
- to increase the proportion of women at the level below group management and in the defined group of talents and key personnel.

To achieve the above targets the administration has defined specific measures on how to hire and develop employees. Such measures include, amongst others, a requirement to include women in the final interview round for key positions, talent development giving deliberate priority to women and leadership development and coaching to promote female talent.

Targets and status

Entra seeks to maintain high employee satisfaction and aims for a continued high score in the employee job satisfaction survey.

Ethics and anti-corruption

Entra has zero tolerance for corruption in all parts of the group's business. Ethical behaviour is a necessary condition for a sustainable business. Entra conducts its business in an ethical and transparent manner, acts within the law and its ethical guidelines and behaves in line with its fundamental values of being responsible, innovative, hands-on, and one team.

Ethical Guidelines

Entra's ethical guidelines are built on principles of equal opportunities for all, concern for the environment and a society view that emphasizes ethics, transparency, honesty and sincerity. The long-term success of the Group is based on trust. To maintain this trust Entra must ensure that its behaviour is consistent with its corporate values. The Group's ethical guidelines describe the way Entra is to treat its stakeholders and the behaviour which is expected of its employees. The ethical guidelines provide guidance and support to the Group and its employees in decision making and problem-solving processes.

The ethical guidelines are incorporated in the management development programme and are evaluated by the Board on an annual basis. Entra creates ethical awareness through training programmes, including an e-learning programme, and all employees and the Board of Directors are required to sign the ethical guidelines annually.

Entra has established whistle-blowing routines. Internal and external questions about ethics, harassment, whistleblowing etc. can be directed to the Group's Compliance Officer, or

anonymously to an independent, experienced law firm with a duty of confidentiality in order to lower the threshold for an employee compared with having to contact a member of staff in Entra. A direct point of contact to the law firm is available on www.entra.no and on Entra's intranet.

Entra's fundamental procurement principle is to achieve the best possible total result through competition and supplier management. Procurement is also to take advantage of economies of scale.

Entra aims to be a responsible purchaser in all parts of the value chain and has established a set of processes and routines for procurement that include requirements on documentation, role/work division (dualism) and equal treatment of suppliers through competition. The routines are set to counter conflicts of interest and corruption.

New employees participate in procurement training covering processes, guidelines and tools for implementing best practice and fair procurement processes. Anti-corruption measures is an item on these training courses.

In 2017, Entra implemented dilemma training in ethics for its employees. The dilemma training is part of the introduction course for new employees and there is an annual target that all employees should complete such online training each year. 100 per cent of the employees as well as the Board of Directors completed online training course in 2019.

Entra continuously monitors the suppliers within its supplier base to ensure that the company only does business with serious counterparties.

Entra's supply chain

Entra spends NOK 2-2.5 bn per year on external suppliers. The main suppliers are the largest construction companies in Norway and their sub-suppliers such as carpenters, electricians, plumbers etc. In property management, the largest suppliers are facility management suppliers such as canteen operations and cleaning services etc. Entra has signed framework agreements with its largest suppliers which mainly consist of large Norwegian companies.

Corporate Social Responsibility in the supply chain

The construction industry in which Entra operates faces serious challenges related to business crime and social dumping. Entra has established procedures to ensure that Entra only uses qualified suppliers.

Entra performs risk assessments for its entire value chain and facilitates action plans to reduce any identified risk. Entra has identified suppliers that perform work on Entra's construction sites and cleaning vendors as high-risk suppliers within social responsibility and follow-up this sector accordingly.

There is considered to be limited risk associated with rights to e.g. exercise freedom of association and collective bargaining, child labour or forced and compulsory labour in Entra's direct

supply chain. There may, however, be more risk further down in the supply chain with sub-suppliers, although none has been identified in 2019.

Supplier qualification requirements

Entra has set "Socially Responsible Purchasing Guidelines" that must be followed by both suppliers and their sub-suppliers in its supplier qualification requirements.

The document covers themes such as:

- Sustainable development and environmental considerations in the choice of materials
- External environment and focus on energy and environmental footprint savings
- HSE on construction sites
- Well-functioning work conditions and labour rights
- Economy and solidity
- Business ethics and relations

The guidelines are set to ensure that there are good working conditions in the suppliers' and in their sub-suppliers' businesses. The guidelines states that it is only allowed with two levels of sub suppliers for large suppliers and one for others.

Suppliers and sub-suppliers are to be registered in the Registry of Business Enterprises and are obliged to provide an corporate identity code.

Entra is against all forms of discrimination. All employees and hired staff who are engaged in working on contracts must have salary and working conditions that fulfil the statutory requirements in accordance with the applicable collective agreements at the relevant time. Entra may require a supplier to produce documentation that shows the salary terms and working conditions for employees and hired staff at the supplier and their sub-suppliers.

Supplier audits

Entra performs supplier audits to assure that all operations follow Norwegian legislation and that principles stated in Entra's Socially Responsible Procurement Guidelines are followed. Risk factors in the supply chain as well as HSE risks are the main focus issues for the audits. An annual audit plan for Entra's operations and especially the property portfolio is prepared based on risks evaluated on the following:

- Project/property/supplier size and complexity
- Contract conditions, contract model and vendor selection
- The results of changes, previously conducted audits and controls
- Project organisation
- Start and life-time of the project

There are no set criteria for the number of audits to be performed each year, although there is typically a correlation with the number of projects in the portfolio.

During 2019, five supplier audits were carried out. The audits were undertaken by a combination of internal personnel and external audit companies, and the reports were thoroughly

evaluated together with the handling of deviations, observations and suggestions for improvement.

Supplier reviews

In addition to supplier audits, Entra performs bi-annual reviews of "high-risk suppliers", with annual sales to Entra exceeding NOK 0.2 million. The review emphasizes supplier adherence to Entra's supplier qualification requirements. It includes;

- Credit checks to ensure suppliers' financial stability
- Checks to ensure suppliers have reported tax/vat submissions (last six months)
- Checks whether construction suppliers are registered in the "StartBank" qualification system
- Checks to determine if cleaning vendors are listed in the regulatory register

Supplier Management Programme

Since 2015, Entra has invited master agreement suppliers to annual meetings to discuss developing a common approach to the challenges faced by the industry (including HSE).

The main purpose is to have an established arena for dialogue and cooperation that, in addition to resolving commercial issues, will focus on contributing to meeting the sector's challenges relating to working conditions, corruption and business crime.

In 2019, Entra reviewed its ethical guidelines for suppliers together with master agreement suppliers in order to ensure that the guidelines are being followed. The goal is closer involvement, increased awareness levels and better reporting.

Targets and status

During 2019, Entra revised the content in the "Socially Responsible Procurement Guidelines" for suppliers. The new version has further strengthened environmental requirements for purchasing materials, and there are stronger restrictions on the use of hazardous materials. In addition, vendors need to have an established return scheme for packaging and waste.

As part of its ongoing business Entra carried out supplier audits and other reviews as described above and will continue to do so in 2020.

Health, Safety and Environment (HSE)

HSE work is central to Entra in all parts of the value chain. HSE is well established as a natural part of day-to-day operations, including being part of the bonus scheme for all employees, and is a focus area at all levels of the organisation and thus recognised widely in the organisation as a personal responsibility of all employees. Entra's HSE strategy involves systematic work with:

- HSE in the daily operation of the buildings
- HSE in development projects
- HSE for our employees

The internal HSE policy in Entra has the following targets:

- It shall be safe to work, visit and travel in and around Entra's properties and development projects
- For our own employees, we will have a health-promoting work environment where no one will be injured or sick as a result of their work
- All HSE-related legal requirements must be met.

Members of the senior management are involved in practical HSE work and are expected to take the lead through behaviour and leadership. As part of this, a review of the latest HSE report is regularly on the agenda at management meetings and Board Meetings. HSE status is also an important item on the agenda at all employee meetings.

Entra works actively to increase awareness with regard to the registration of all types of incidents (including accidents, near misses). The reporting of incidents is important in order to increase awareness internally among Entra's employees, suppliers and customers.

Targets and status

HSE targets are also aggregated into group KPI's with a main focus on avoiding serious accidents. The HSE targets for 2019 were:

- There shall be no injuries involving sick leave absence that are due to Entra in and around our buildings
- There shall be no injuries in our development projects involving more than 16 days' sick leave

Such incidents are reported to the Chief Executive and to the Board of Directors. The incidents are investigated to see what lessons can be learned and are an important element in further strengthening the HSE work.

The status at 31 December 2019 was that there had been one injury involving sick leave absence that was due to Entra in and around our buildings, and there had been no injuries involving sick leave absence in our construction projects that involved more than 16 days sick leave.

Entra performs regular HSE audits of both development projects and management properties. In 2019, Entra performed five HSE audits of which of three development project and two management properties.

Urban development

Entra's strategic core areas are the four main cities Oslo and the surrounding area, Bergen, Stavanger and Trondheim. Entra aims to contribute to urban clusters that are attractive, inclusive and accessible for residents and other relevant parties. A part of Entra's environment strategy is to be located close to major public transportation hubs, thus contributing to less use of private cars to the benefit of public transport and environmentally-friendly alternatives such as bicycles.

For Entra, urban development means creating a good atmosphere and secure surroundings in and around its buildings for

the benefit of tenants, visitors and others who pass through the area. Entra ensure that the space around its buildings and building sites is neat, clean and attractive. Entra gives consideration to tenant composition in order to create life and variation among visitors and users of its buildings. Where applicable, Entra considers how to activate the ground floors of our buildings to contribute to city life at street level.

Entra emphasises the importance of a good dialogue with partners, competitors and other stakeholders in its work on urban development. Entra involves neighbours, local politicians and others who live or work in the group's urban development districts in connection with new buildings and refurbishments. Involvement may constitute meetings and correspondence with neighbours, open meetings, information to the local press and a one-on-one dialogue with selected target groups.

Examples of areas and buildings where Entra has contributed to positive urban development are Papirbredden in Drammen, Brattørkaia in Trondheim, Tullinkvartalet and Tøyen in Oslo and Hinna Park in Stavanger.

Human rights

Entra seeks to contribute to diversity and equal opportunities for all and will promote, respect and prevent breaches of internationally recognised human rights.

Entra does not accept discrimination or bullying in the workplace. Everyone is to be treated with respect, irrespective of gender, religion, age, ethnicity, nationality, any disability or sexual orientation. In order to secure compliance, human rights are included in guidelines and management tools, including those dealing with fundamental values, ethical guidelines, socially responsible procurement, the focus on HSE and the working environment.

Entra provides its employees with opportunities for professional and personal development and facilitates training to ensure that employees have the right competence and are able

to use their expertise and assume responsibility. Entra demonstrates respect for its employees' private life and take into account requirements for personal data protection through secure IT and HR systems.

Community engagement

In addition to its core areas for ESG work, Entra has had a community engagement for many years.

Entra has been a sponsor of the Church City Mission ("Kirkens Bymisjon") in Norway since 2014. Entra's financial support to, and dialogue with, the Church City Mission strengthens the constructive measures that the Church City Mission is carrying out in connection with social challenges in the cities covered by the agreement. In Oslo, Entra is involved, among other things, in the "Neighbour cooperation" project, which involves several companies located in the Oslo city centre and Bjørvika, working to create a safer and better local environment for all those passing through the area. Entra is actively involved in Christmas campaigns to collect money to provide Christmas dinners for the homeless and Entra employees have been knitting scarves for the campaign "Support someone who dreads Christmas". At Tøyen in Oslo, Entra has established and arranged several community arrangements such as a new library for youths, festival with focus on re-use, waste sorting and refurbishment of a public square. At Hinna Park in Stavanger, Entra has arranged several neighborhood arrangements such as outdoor cinema. In total Entra has contributed with community engagement in and around 30 per cent of its portfolio (23 assets).

For 19 consecutive years, Entra has also been a key sponsor of Ridderrennet, a full week of skiing activities and competitions for all classes of visually and mobility disabled persons. Around 500 disabled skiers from different countries participate in various competitions at Beitostølen. In addition to monetary support, Entra employees also serve as volunteers during the event.

Corporate governance

Report on the Norwegian Code of Practice for Corporate Governance ("the Report")

Good corporate governance and corporate management reduce business-related risk, while enabling the company's resources to be utilised in an effective and sustainable manner. Corporate governance deals with issues and principles associated with the distribution of roles between the governing bodies in a company. It calls for effective co-operation and a defined division of responsibilities and roles between the shareholders, the Board and the management as well as respect for the Group's other stakeholders. Openness, transparency, accountability and equal treatment are of key importance and underpin confidence in Entra both internally and externally. The Group's value platform and ethical guidelines are a fundamental premise for its corporate governance.

1. Corporate Governance statement

Entra ASA is subject to the reporting requirements on corporate governance set out in section 3-3b of the Norwegian Accounting Act and the Norwegian Code of Practice for Corporate Governance of October 2018, issued by the Norwegian Corporate Governance Board (NUES), ("the Code"). The code is available at www.nues.no. The Board of Directors also believe that the Report to the Norwegian Parliament no. 27 (2013-2014) - "Diverse and value-creating ownership" is relevant for Entra.

This Report will be addressed at Entra's Annual General Meeting on 30 April 2020.

The Report is structured in the same way as the Code and covers each topic of the Code, including a description of Entra's compliance system and initiatives. The following elements are central in this Report:

- Entra shall maintain open, reliable and relevant communication with the outside world about the Group's business and matters related to corporate governance
- Entra shall have a board that is independent of the Group's management
- Emphasis shall be placed on avoiding as far as possible conflicts of interest between shareholders, the Board and management
- Entra shall have a clear division of work between the Board and management
- All shareholders shall receive equal treatment

1.1 The Board of Directors' Corporate Governance statement

Entra's Board actively adheres to good corporate governance standards and will at all times seek to ensure that Entra complies with the requirements of section 3-3 b of the Accounting Act and the Code. This is done by ensuring that good governance is an integral part of the decision-making process in matters dealt with by the Board. Moreover, Entra's corporate governance standards are subject to annual assessment and discussion by the Board.

2. Business

According to the Entra's Articles of Association, Entra's objective is to own, acquire, sell, operate, develop and manage real estate, and carry out other activities in this connection. The Group can invest in shares or ownership interests and participate in companies engaged in the business referred to above.

Entra's strategy is to actively work with new and existing tenants to ensure maximum retention, pursue strategic development projects, expand its commitment to environmental sustainability and optimise its property portfolio through focused acquisitions and divestments.

The Board is responsible for establishing the strategy, relevant targets and an appropriate risk profile for the Group that aims to create shareholder value. The strategy, targets and risk profiles are evaluated and amended on an annual basis.

A more detailed description of the Group's targets, main strategies, business, property portfolio and risk profile, as well as the full set of Articles of Association, are set out in Entra's annual report and on www.entra.no

3. Equity and dividends

3.1 Equity

At 31 December 2019, the Group's book equity was NOK 24,517 million (NOK 22,269 million), representing an equity ratio of 48 per cent (47 per cent). The Board considers this to be satisfactory by reference to the Group's goals, strategy and risk profile. At any given time, the company's financial strength and exposure is considered in the light of its objectives, strategy and risk profile.

3.2 Dividend

The Board of Entra targets to pay out dividends corresponding to approximately 60 per cent of Cash Earnings on a semi-annual basis. Cash Earnings is defined as net income from property management less tax payable.

3.3 Capital increases and purchases of own shares

Capital increase

The Board has not been authorised to issue shares.

Purchase of own shares

The Board has been authorised on behalf of the company to acquire Entra shares in the market with a combined nominal value up to NOK 3,642,641, corresponding to 2 per cent of outstanding shares, up to a maximum purchase price of NOK 729 million. The minimum and maximum amount that may be paid per share is respectively NOK 50 and NOK 200. Within these limits, the Board can decide at which prices and at which times acquisitions may take place. Own shares acquired in relation to this authorisation may only be used for cancellation through a reduction in capital, cf. the Norwegian Public Limited Liability Companies Act section 12-1. The authorisation is valid until the general meeting in 2020, but no longer than until 30 June 2020. Entra has repurchased no shares under the buy-back programme in 2019.

The Board has also been authorised on behalf of the company, to acquire up to 500,000 own shares with a maximum nominal value of NOK 500,000, provided that the company's total holding of such own shares does not at any time exceed 0.3 per cent of the outstanding shares. Own shares so acquired are to be used

for the purpose of establishing a share ownership scheme for all employees and a long-term share incentive scheme for the Senior Executives of the Entra Group. The lowest price per share to be paid is NOK 50 and the highest price per share to be paid is NOK 150. The authorisation is valid until the general meeting in 2020, but no longer than until 30 June 2020.

4. Equal treatment of shareholders and transactions with related parties

4.1 General

Entra has only one share class. Each share carries one vote and otherwise has equal rights including the right to participate in general meetings.

4.2 Capital increases without preferential rights and transactions in the group's own shares

The Board's mandate to acquire treasury shares is based on the assumption that acquisitions will take place in the market. Acquired shares may be cancelled through a reduction in capital, cf. the Norwegian Public Limited Liability Companies Act section 12-1 or be disposed through the share schemes for the Group's employees.

The Group's transactions in its own shares shall take place over the stock exchange or otherwise at market price. If there is limited liquidity in the share, consideration shall be given to meeting the requirement for equal treatment in other ways.

In the case of not immaterial transactions between Entra and a shareholder, a shareholder's parent company, a Board member, a Senior Executive or persons related to them, the Board is to ensure that a valuation is in place from an independent third party. This does not apply when the general meeting is to consider the matter in accordance with the rules in the Norwegian Public Companies Act. An independent valuation shall also be provided in the case of transactions between companies in the same group where there are minority shareholders in such companies.

The Board is not aware of any transactions in 2019 between the company and shareholders, directors, executive personnel or parties closely related to such individuals that could be described as material transactions.

5. Free transferability

The shares are freely negotiable, with the exception of shares purchased by employees at a discount, and shares allocated in connection with the company's long-term incentive (LTI) scheme, see section 13.3 in the Report. The Articles of Association place no restrictions on voting, ownership or negotiability in the shares.

6. General meeting

6.1 Exercise of rights

The Board shall arrange for as many shareholders as possible to be able to exercise their rights to participate in Entra's general meeting, and for the general meeting to be an effective meeting place for shareholders and the Board, through, among other things, ensuring that:

- agenda documents are sufficiently detailed for shareholders to be able to take a position on all matters that are to be considered;
- the deadline for notice of attendance is set as close to the meeting as practically possible and in accordance with the provisions in the Articles of Association;
- the Board and chair of the Nomination Committee attend the general meeting
- routines are in place to ensure that the general meeting can elect an independent person to chair the general meeting; and
- the Board and the person chairing the meeting shall ensure that the general meeting is able to vote on each item, hereunder for individual candidates for appointment to the Group's governing bodies.

6.2 Participation by proxy

Shareholders who are not able to be present at the general meeting shall be given the opportunity to vote through a proxy or through electronic participation. Entra shall:

- give information on the procedure for attending by proxy;
- appoint a person who can vote for shareholders as proxy; and
- prepare a proxy form, which as far as possible is laid out in such a way that votes can be given for each matter that is to be considered and candidates who are to be elected.

The entire Board has not usually attended the General Meeting as the items on the agenda of the General Meeting have not required this. The Chair of the Board is always present, and other Board members participate on an ad hoc basis. From the Group's perspective, this is considered to be sufficient.

7. Nomination Committee

Article 6 of the Group's Articles of Association states that the company shall have a Nomination Committee composed of up to five members.

The members of the Nomination Committee, including the chair of the Nomination Committee, are elected by the general meeting for a period of up to two years. Members of the Nomination Committee shall be shareholders or representatives of shareholders and the committee should be composed so that broad shareholder interests are represented. Each gender shall be sought represented in the Nomination Committee.

The Nomination Committee shall give its recommendation to the general meeting regarding election of shareholder-elected members to the Board of Directors and members of the Nomination Committee, as well as remuneration to members of the Board of Directors and the Nomination Committee. The remuneration to members of the Nomination Committee is determined by the general meeting, and the general meeting may adopt instructions for the Nomination Committee. The Nomination Committee ensures that shareholders' views are taken into account when qualified members are nominated to the governing bodies of Entra, and shareholders are invited to provide input to the Nomination Committee.

None of the Committee's members represents Entra's management or Board and they are all considered to be independent of daily management and the Board. The Nomination Committee is considered to have a composition that reflects the common interests of the community of shareholders.

See www.entra.no for more information on the members of the Group's Nomination Committee and the Nomination Committee's contact details.

8. Board composition and independence

The shareholders elect between five and eight shareholder-elected members to the Board, including the Chair, for a period of two years. Entra has established a group scheme for the election of two employees to the Board of Entra.

Emphasis is placed on the combined Board being able to safeguard the interests of the shareholders as a whole and the Group's need for expertise within the Group's main business and board work. In addition, the Board shall have the capacity to carry out its tasks. Consideration shall be given to the Board being able to function well in a collegiate manner. Participants in the Group management shall not be members of the Board.

The Board is composed so that it can act independently of special interests. All the shareholder-elected members are independent of the Senior Executives, the Group's main shareholders, and significant business connections.

Information regarding the Board members' expertise is provided in the annual report. In addition, information is given about those Board members who are considered to be independent. Board members are encouraged to own shares in the Group.

9. The work of the Board

9.1 The functions of the Board

The Board has responsibility for the management and control of the Group, including determining the Group's overall strategy and objectives, and for ensuring proper management and organisation of the Group's business. The Board shall also supervise day-to-day management and the Group's business in other respects. The Board adopts the overall governing documents for the Group's business, including, among others, the business plan and investment limits.

The Board shall keep itself informed about the Group's financial situation and ensure that its business, financial reporting and asset management are subject to adequate controls and in accordance with applicable legislation. The Board shall ensure that the Group has good internal controls and appropriate systems for risk management in relation to the extent and nature of the Group's business.

The Board's functions also include considering all matters that in relation to the Group are of an unusual nature or of major importance. The Board shall further consider matters that are specifically accorded to the Board by law.

Conflicts of interest and incapacity

Entra considers it important to be transparent and cautious in relation to transactions where there might be a close relationship between the Group and a shareholder, a shareholder's parent company, a Board member, a senior employee or closely related parties of any of these. The guidelines for the Board regulate the Board members' duty to report any other directorships, roles and related parties. The guidelines for the Board state that Board members and the CEO cannot participate in discussions or decisions on issues that affect them personally or affect a related party where they have a significant personal or financial interest in the matter. The Board has also approved guidelines for transactions with related parties, describing the rules and procedures for these types of transactions.

9.2 Composition of the Board

The Board consists of the following seven members: Siri Hatlen (Chair), Kjell Bjordal (Vice Chair), Ingrid Dahl Hovland, Widar Salbuviik, Camilla Aldona Cakste Tepfers, Mariann Halsvik Larsen and Erling Nedkvitne.

The Board schedules regular board meetings each year. Ordinarily, 7-8 meetings are held each year. Additional meetings are held on an ad hoc basis. 11 (10) Board meetings were held in 2019.

Siri Hatlen, Kjell Bjordal, Widar Salbuviik and Ingrid Dahl Hovland were elected at the general meeting on 20 April 2018 whereas Camilla A.C. Tepfers was elected on the general meeting on 26 April 2019. All board members are up for election at the general meeting to be held on 30 April 2020.

Linnea Tviberg Scharning and Erling Nedkvitne were elected by the employees in May 2018 for a two-year period. Linnea Tviberg Scharning was replaced by Marian Halsvik Larsen from 4 March 2019. The employee elected board members are up for election in 2020.

The Chair of the Audit Committee is Widar Salbuviik and the Chair of the Remuneration Committee is Siri Hatlen.

9.3 Organisation of the Board's work

The Chair of the Board chairs board meetings. The Board has a Vice Chair who chairs meetings when the Chair cannot or should not lead the work of the Board. All directors receive regular information about the Group's operational and financial progress in advance of the Board meetings. The Company's business plan, strategy and risk are regularly reviewed and evaluated by the Board. The Board draws up and adopts an annual plan, including topics for the Board meetings. Ordinarily, the CEO proposes the agenda for each individual Board meeting. The final agenda is decided in consultation between the CEO and the Chair of the Board. In addition to the directors, Board meetings are attended by the CEO, CFO, other EVPs as needed, and the Chief Legal Officer (secretary of the Board). Other participants are called in on an ad hoc basis. The Board decides on matters of material importance to the Group. These include, but are not limited

to, approval of the annual and quarterly accounts, strategies and strategic plans, the approval of significant investments, the approval of significant contracts and the approval of substantial business acquisitions and disposals.

The Board receives quarterly reports and presentations on the Group's operational and financial status. The reports describe progress and status in the Group's operative and administrative functions during the reporting period. The individual business units hold meetings with the CEO and CFO to review operating activities prior to and in connection with such reporting. The reports form the basis for internal control, communication on status and necessary measures. The quarterly reports are reviewed at Board meetings, and also form the basis for the external financial reporting.

Each year the Board and its committees assess their own work and way of working as a basis for assessing the need for changes and other measures. This assessment includes an evaluation of the Board's expertise, collectively and for each member, and how well the Board works as a team.

9.4 Guidelines for the CEO

The Board has adopted guidelines that regulate the CEO's tasks and the relationship with the Board. The CEO is responsible for the day-to-day management of the Group and the Group's business and for ensuring that the Board's resolutions are implemented, as well as ensuring that the Group's employees and other involved parties receive sufficient information on the Board's resolutions. The CEO is further responsible for ensuring that the Board receives the information that is necessary for it to be able to exercise its functions in accordance with applicable statutory requirements at the relevant time and with board procedures.

The CEO is obliged to inform the Chair of the Board if the CEO finds that circumstances exist that require the Board to consider a matter, and the CEO is to notify the Board when the assumptions for a previous decision that is relevant to the business have changed significantly.

9.5 Board committees

The Board has established an Audit Committee and a Remuneration Committee. The Board has established

mandates for the work of the committees, which are subject to annual revision. In accordance with their respective mandates, the Audit Committee and the Remuneration Committee shall have two or three qualified shareholder representatives from the current Board. The representatives are in general elected by the Board for two years at a time. In case of Board changes during the election period affecting members of the Audit Committee or Remuneration Committee, the period lasts until the representative is up for next election as a Board member. The committees assist the Board with preparing its work, but decisions are taken by the whole Board.

The Audit Committee acts as a preparatory body and supports the Board in the exercise of its responsibility relating to financial reporting, auditing, internal controls, compliance with ethical guidelines and overall risk management. The CFO, the Head of Group Accounting, the Group Controller and the Head of Accounting (secretary of the Audit Committee) attend as representatives of the management. The Group's auditor also participates in all meetings. The CEO and other members of the management attend as required. The Audit Committee has an established calendar of meetings. 7 (7) meetings were held in 2019.

The purpose of the Remuneration Committee is to act as a preparatory body for the Board's consideration of compensation issues. The Remuneration Committee's main task is to prepare the Board's consideration of matters relating to the salary and employment terms of the CEO and Senior Executives, as well as changes to them. In addition, the Remuneration Committee prepares the Board's consideration of principle issues relating to salary levels, result-related pay schemes (including share schemes), the pension scheme/conditions, employment contracts and similar for the Senior Executives of Entra, as well as other matters relating to compensation that are of particular importance for the Group's competitive position, profile, ability to recruit, reputation etc. The CEO discusses the handling of individual conditions of Senior Executives with the Remuneration Committee. The Remuneration Committee furthermore discusses and presents proposals to the Board on guidelines for the remuneration of Senior Executives, prepares the Board's statement on the determination of salaries and other remuneration of Senior Executives in accordance with section 6-16a of the Norwegian Public Companies Act, and deals with other statutory reporting requirements.

PARTICIPATION IN BOARD MEETINGS AND BOARD COMMITTEES IN 2019

	Board meetings	Audit committee	Remuneration committee
Siri Hatlen (Chair)	11		4
Kjell Bjordal (Vice Chair)	11	4	4
Ingrid Dahl Hovland	11		
Widar Salbuviik	11	7	
Camilla Aidona Cakste Tepfers (from 26 April 2019)	6		
Katarina Staaf (until 26 April 2019)	3	3	
Mariann Halsvik Larsen (from 4 March 2019)	8		
Erling Nedkvitne	11		
Linnea Tviberg Scharning (until 4 March 2019)	2		

The Remuneration Committee is composed of the Chair of the Board and one or two shareholder-elected members of the Board, and shall be independent of Senior Executives. The CEO attends as the representative of the management. The CEO does not participate in discussions on issues that affect the CEO personally or matters that relate to the Senior Executives as a whole. The Group's Chief Legal Officer acts as the committee's secretary. 4(4) meetings were held in 2019.

9.6 The Board members' shareholdings

At 31 December 2019, the Board members held the following portfolios of shares in the Group:

- Siri Hatlen (Chair) holds 1,163 shares
- Kjell Bjordal (Vice Chair) holds 44,704 shares
- Ingrid Dahl Hovland holds no shares
- Widar Salbuvik holds 10,000 shares
- Camilla Aldone Cakste Tepfers holds no shares
- Mariann Halsvik Larsen holds 3,117 shares
- Erling Nedkvitne holds 9,384 shares

10. Risk management and internal controls

10.1 General

The Board is responsible for ensuring that the Group's business, financial reporting and asset management are subject to adequate control and in accordance with applicable law. Entra's risk management is to support the Group's strategic and financial goals and help the Group avoid events that may have an adverse impact on the Group's operations, financial situation and reputation.

Entra works systematically to ensure continuous improvement of its internal controls linked to financial reporting and efficient operation. The Group has a proactive approach towards risk management, and potential risks are identified, assessed, quantified and managed. This is further elaborated in the section on Risk Management in the Annual Report.

10.2 Reporting

As part of the management's follow-up of the business, quarterly reports and reviews are prepared for all business areas. The Board undertakes a semi-annual review of the Group's risk and internal control activities. The Board is also informed quarterly of developments in the Group's risk exposure. This, combined with the management's risk assessments and information on ongoing measures, put the Board in a good position to judge whether the Group's risk management procedures are satisfactory. Risk management and internal controls are also considered by the Board's Audit Committee.

10.3 Monitoring and control of financial reporting

Procedures have been established for financial reporting that involve carrying out a review of significant estimates, provisions and accruals in conjunction with preparation of the quarterly and annual financial statements. Separate memorandums are prepared for significant accounting assessments and non-routine transactions and are discussed with the Audit Committee. The valuation of the Group's properties is subject to a separate review and assessment at management level at the close

of each quarter. This involves, among other things, holding meetings with the external valuers, with a particular emphasis on discussing perceptions of the market, risk premiums and documentation.

The Group reconciles and documents all balance sheet items in the group companies each quarter. Balance sheet items such as bank deposits, receivables, non-current assets and liabilities are subject to special reviews. Bank loans, interest rates and interest rate hedging are subject to manual reconciliation each month. Ongoing projects are reviewed on a quarterly basis by the Project Development department. Rental income and other significant profit and loss items are subject to reconciliation each quarter. All reconciliations are reviewed and quality assured, as well as being analysed against the Group's forecasts and previous accounting periods.

Management reports significant operational and financial matters to the Board at the Group's Board meetings. Any significant matters and situations that arise outside Board meetings are discussed with the Chair of the Board and if necessary additional Board meetings are held.

In connection with the quarterly reporting, the Group's external auditor performs a review of the financial reporting, without issuing a review report.

The Group's quarterly and annual financial statements are reviewed by the Audit Committee before they are considered by the Board. As part of this process, management prepares a memorandum for the Audit Committee that describes significant accounting and financial assessments made during the quarter. The Audit Committee annually reviews the external auditor's audit report, as well as the findings and assessments of reviews and audits in conjunction with interim and annual reports, if applicable. Key Audit Matters and significant issues in the auditor's report are presented to the whole Board.

10.4 Financial management

The Group is managed by means of financial targets linked to operational results and development, the return on equity and the weighted average cost of capital, the management of the debt portfolio and the return on the property portfolio. Risk assessments and profitability calculations are performed in connection with acquiring property and commencement of building projects, in accordance with the Group's calculation model and required rate of return. The present value and other key financial metrics of building projects are monitored throughout the course of each project. Long-term projections are made of expected financial developments as a component of the Group's risk management, using a model with detailed assumptions concerning the business's results, cash flow and balance sheet. The projections take into account cyclical developments in the economy, financial parameters and the property market. Scenarios and simulations are prepared for various developments. The simulations provide insightful information for the Board and management in their monitoring of developments in central balance sheet key figures and cash flow.

Allocation of capital and risk profiles are important parameters for guiding financial operations. Entra's finance policy contains a framework for the day-to-day management of the Group's financial risk. Principles have been defined for borrowing, management of liquidity risk and interest rate risk, and credit and counterparty risk. The Group's model for financial projections provides updated key figures, which are monitored on a continuous basis. Reports are made to the management monthly in accordance with the management guidelines for the financial operations, and to the Board through the quarterly business report.

Systematic monitoring of the general economic situation and its impact on the Group's financial risk is carried out. Based on expected developments in the economy and analysis of the Group's financial position, expected developments in both short-term and long-term interest rates, the strategy for interest rate positioning, capital requirements and planned financing activities are discussed, as well as opportunities in the financing market.

10.5 Monitoring of risk management and internal controls

In consultation with the Audit Committee, management defines areas where the Group is to carry out a review of internal controls. Both internal and external resources are used on these reviews. The results of the most important reviews related to internal control are presented to the Audit Committee and the Board on an annual basis. An internal control plan is presented to the Board.

10.6 Monitoring ethical guidelines and socially responsible procurement

The Group follows up issues relating to ethical guidelines and corporate social responsibility. The environmental perspective is an integral part of the assessments made in connection with the Group's potential investments. Special requirements have been defined for the Group's suppliers in the document "Socially Responsible Procurement", and a supplier verification process is conducted each year to ensure that the Group's suppliers are familiar with and adhere to the contractual conditions. This is further elaborated in the ESG report which is included in the Annual Report.

10.7 Monitoring of compliance

The Group's Chief Compliance Officer (CCO) is responsible for compliance with Entra's regulatory and legal requirements as well as internal policies and bylaws. The CCO performs an annual review of the Group's governing documents, including guidelines for ethical conduct, procurement, sustainability, anti-corruption, data protection and privacy, and supports the Board and the CEO in ensuring that these guidelines are implemented and enforced. The CCO is further responsible for the Group's whistleblowing channels. The Board of Directors are provided semi-annual reports on compliance related matters.

11. Remuneration of the Board

The general meeting determines each year the remuneration of the Board based on the Nomination Committee's proposal. The Board's remuneration shall reflect the Board's responsibilities,

expertise, and use of time and the complexity of the business. Remuneration shall not be dependent on results and no share options shall be issued to Board members.

Board members or companies to which they are connected should not undertake separate assignments for the Group in addition to the Board appointment. If they nevertheless do, the whole Board is to be informed. Fees for such assignments are to be approved by the Board. If remuneration has been paid above the normal Board fee, this is to be specified in the annual report.

12. Remuneration of Senior Executives

12.1 Board statement regarding Senior Executives' remuneration

The Board prepares a statement on the determination of salaries and other remuneration of Senior Executives in accordance with section 6–16a of the Norwegian Public Companies Act. The statement is presented to the general meeting. The statement sets out the main principles for the Entra's Senior Executives' salary policy and seeks to contribute to the alignment of interests between the shareholders and Senior Executives.

12.2 Determination of salaries and compensation of Senior Executives

The Board assesses the CEO's terms and conditions of employment once a year following a recommendation from the Board's Remuneration Committee. The CEO consults the Remuneration Committee in connection with the annual adjustment of the salaries of the Group's Senior Executives.

12.3 Performance-related pay

The Group operates a performance-related pay scheme for Senior Executives. Performance-related pay for the Group's Senior Executives includes a performance-related pay scheme ("STI") and a long-term performance-based share incentive program ("LTI"). See note 15 to the consolidated financial statements for a more detailed description of the Group's performance-related pay scheme for Senior Executives.

13. Information and communication

13.1 Financial reporting and communication

The financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as approved by the EU. Reporting fulfils statutory requirements and provides sufficient information to allow Entra's stakeholders to form as accurate a picture of the business as possible. Entra reports in accordance with the rules in the Norwegian Securities Trading Act, as well as with the requirements specified by the Oslo Stock Exchange for companies with listed shares and bonds.

Entra provides its shareholders, the Oslo Stock Exchange and the financial market in general with timely, consistent and precise information. Such information is given in the form of annual reports, quarterly reports, stock exchange notices and investor presentations. The Group's report on corporate social responsibility is integrated in the annual report. The Board has set an IR policy for Entra's reporting of financial and other information.

The Board has approved insider regulations relating to the handling of inside information and trading in the company's shares. Primary insiders require internal clearance by the Chief Legal Officer before they can buy or sell Entra shares.

13.2 Information to Entra's shareholders

The Group considers it important to inform shareholders about the Group's development and economic and financial status. Management members (CEO, CFO and Investor Relations Manager) are available for discussions with shareholders in order to develop a balanced understanding of such shareholders' situation and focus, subject however to the provisions in legislation and regulations. The Chair of the Board ensures that shareholders' viewpoints are communicated to the whole Board.

Information to the Group's shareholders is published on Entra's website at the same time as it is sent to the shareholders. The Board has determined an IR policy for Entra's contact with shareholders outside the general meeting.

14. Takeover bids

The Board has an approved set of guidelines for takeover bids and will handle such situations in accordance with Norwegian law and the Norwegian Code of Practice for Corporate Governance. In a bid situation, Entra's Board and Senior Executives have a responsibility to help ensure that shareholders are treated equally, and that the Group's business activities are not disrupted unnecessarily. The Board will not hinder or obstruct takeover bids for Entra's activities or shares. The Board will ensure that shareholders are given sufficient information and time to form an opinion on an offer. If a takeover offer is received, the Board will issue a statement making a recommendation as to whether shareholders should or should not accept the offer.

15. Auditor

The general meeting elects the Group's auditor. Since 2012 Entra's auditor has been Deloitte. Eivind Skaug has been the responsible partner of the audit team since 2014.

15.1 Plan for the auditor's work

Each year the auditor presents a plan for his work to the Audit Committee that in turn informs the Board of its most important aspects.

15.2 Auditor's relationship to the Board

The auditor attends all meetings of the Audit Committee, as well as relevant Board meetings to consider and adopt the annual report and financial statements. At the meetings, the auditor goes through any significant changes in the Group's accounting principles, the evaluation of material accounting estimates and all material matters where there has been disagreement between the auditor and the management. There is one annual meeting with the Audit Committee and the auditor, and one meeting with the whole Board and the auditor, which is not attended by representatives from the management.

15.3 Auditor's review of the group's internal controls and financial reporting

When presenting the results of the interim audit to the Audit Committee, the auditor focuses on the Group's internal controls, identified weaknesses and proposals for improvements. The auditor summarises the findings and assessments of the annual audit for Group management and the Audit Committee. Material issues if applicable are summarised for the Board.

15.4 Auditor's independence

Each year the auditor's independence is assessed by the Audit Committee. The Board has drawn up guidelines on the engagement of the external auditor, governing what work the auditor can do for the Group in view of the requirement for independence. Any major assignments other than statutory audits are approved by the Audit Committee in advance. The management informs the Audit Committee of additional services supplied by the external auditor under a fixed item on the agenda at each meeting.

15.5 General meeting

The auditor attends the annual general meeting for consideration of the annual financial statements. The auditor's fee for the statutory audit and other services is approved by the general meeting.

To the Board of Directors of Entra ASA

INDEPENDENT AUDITOR'S ASSURANCE REPORT ON ENTRA'S ESG REPORT FOR 2019

We have been engaged by the Board of Directors of Entra to provide limited assurance in respect of the environmental, social and governance information presented in the Entra – Annual Report 2019, the sections ESG report, pages 34 – 69, GRI and TCFD tables, pages 163 – 168, and EPRA Sustainability Performance Measures, pages 169 – 175, in total referred to as "the Report". Our responsibility is to provide a limited level of assurance on the subject matters concluded on below.

Responsibilities of the Board of Directors

The Board of Directors are responsible for the preparation and presentation of the Report and that it has been prepared in accordance with the reporting criteria described in the Report, including the GRI Standards, level Core, and the Norwegian Code of Practice for Corporate Governance. The Board of Directors are also responsible for establishing such internal controls that they determine are necessary to ensure that the information is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities

Our responsibility is to express a limited assurance conclusion on the information in the Report. We have conducted our work in accordance with ISAE 3000 (Revised) Assurance Engagements other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board.

Deloitte AS is subject to International Standard on Quality Control 1 and, accordingly, applies a comprehensive quality control system, including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Considering the risk of material misstatement, our work included analytical procedures and interviews with management and individual resources responsible for the preparation of the Report and for sustainability management at corporate level, as well as a review on a sample basis of evidence supporting the information in the Report.

We believe that our work provides an appropriate basis for us to provide a conclusion with a limited level of assurance on the subject matters.

Deloitte AS and Deloitte Advokatfirma AS are the Norwegian affiliates of Deloitte NSE LLP, a member firm of Deloitte Touche Tohmatsu Limited ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. Please see www.deloitte.no for a more detailed description of DTTL and its member firms.

Conclusions

Based on our work, nothing has come to our attention causing us not to believe that:

- Entra has applied procedures to identify, collect, compile and validate ESG information for 2019 to be included in the Report, as described in the Report.
- ESG information presented for 2019 is consistent with data accumulated as a result of these procedures and appropriately presented in the Report.
- Entra applies a reporting practice for its corporate governance reporting aligned with the Norwegian Code of Practice for Corporate Governance.
- Entra applies a reporting practice for its sustainability reporting aligned with the Global Reporting Initiative (GRI) Standards reporting principles and the reporting fulfils in accordance level Core according to the GRI Standards. Entra's GRI index presented in the Report appropriately reflects where information on each of the disclosures of the GRI Standards is to be found within the Entra - Annual Report 2019.

Report of the Board of Directors 2019

2019 was another solid year for Entra. Net asset value grew by seven per cent mainly as a result of solid letting and project development and growth in market rents. Rental income grew by four per cent and net income from property management by three per cent. The Board proposes to pay a semi-annual dividend of NOK 2.40 per share for the second half of 2019 and thus NOK 4.70 per share for the full year, up from NOK 4.50 per share in 2018.

Entra is one of Norway's leading real estate companies and number one in the office segment, focusing on large, high quality, flexible and environment friendly office properties with central locations in the largest cities in Norway. Entra has its head office in Oslo.

Entra had rental income of 2,338 million (2,243 million) in 2019. Net operating income was 2,149 million (2,058 million) and net income from property management was 1,471 million (1,434 million). Net positive value changes were 1,955 million (1,486 million) and profit before tax was 3,735 million (3,073 million).

Entra signed new and renegotiated leases with an annual rent totalling 370 million. Net letting for the year was NOK 62 million.

The most important lever for securing profitable growth for Entra is through project development, and Entra normally has 7-8 per cent of the portfolio in project development. In 2019, Entra finished the new-build projects Powerhouse Brattørkaia in Trondheim, Tullinkvartalet in Oslo, Brattørkaia 12 in Trondheim and the redevelopment of Tollbugata 1A in Oslo. Entra also started a 28,100 sqm. redevelopment project in Universitetsgata 2 in Oslo as well as the redevelopment of 4,300 sqm. in Kristian Augusts gate 13 in Oslo. The project in Kristian Augusts gate 13 will demonstrate Entra's strong commitment to work for more sustainable solutions by incorporating a target of more than 60 per cent re-use of building materials.

To operate its business in a sustainable manner is of key strategic importance to Entra. Entra's ESG report can be found on pages 36-67. The outputs are compiled and aligned using two reporting frameworks: The EPRA Best Practices Recommendations on Sustainability Reporting and GRI (core requirements). Entra has also reviewed the UN Sustainable Development Goals for its business.

It should be safe to work, visit and live in and around Entra's properties and development projects. Entra's goal of being a zero-harm workplace for people, the environment and society underpins all the Group's health, safety and environmental work. HSE is an important focus area for the Board. The Board is satisfied with the dedicated HSE work in the organisation and the initiatives taken to prevent serious incidents.

In 2019, Entra had one injury involving sick leave absence that was due to Entra in one of its buildings and no injuries involving sick leave absence in its construction projects that involved more than 16 days sick leave. Absence due to illness in Entra was 2.6 per cent in 2019 vs 4.2 per cent in 2018. This is low compared to a country average of 5.9¹⁾. Cooperation with the employee organisations is good and constructive and yields a positive contribution to the operation of the Group.

The Board has supervised management and monitored the Group's business in accordance with good corporate governance. In 2019, the Board has focused on organisational development, business strategy, hereunder new and ongoing development projects, active portfolio management (acquisitions and divestments), HSE, business and technology development, climate risk, sustainability and compliance.

Statement of comprehensive income, balance sheet and statement of cash flows

Income

Rental income was up by 4 per cent from 2,243 million in 2018 to 2,338 million in 2019. The increased rental income is explained in the table on the next page.

¹⁾ Source: Statistics Norway: Sickness absence Q3 2019

All amounts in NOK millions	2018 to 2019
Rental income in 2018	2 243
Development projects	-2
Acquisitions	37
Divestments	-27
Other ¹⁾	13
Like-for-like growth	75
Rental income in 2019	2 338

¹⁾ Includes extraordinary lease buy-out of net 9 million

The increase in rental income in 2019 is mainly driven by an underlying like-for-like growth of 3.8 per cent (75 million), compared to an annual CPI of 3.5 per cent. Development projects affected rental income by -2 million as the completion of two newbuild projects, Powerhouse Brattørkaia and Tullinkvartalet, is offset by the vacating of Universitetsgata 2 and Schweigaards gate 15 awaiting the redevelopment projects to begin.

Nearly all Entra's lease contracts are 100 per cent linked to positive changes in CPI. The annual adjustment is mostly made on a November to November basis.

The occupancy rate was 97.1 per cent (96.5 per cent) as of 31 December 2019. The rental value of vacant space was approximately 69 million (82 million) on an annualised basis.

Operating costs amounted to 189 million (184 million) and are split as follows:

All amounts in NOK millions	2019	2018
Maintenance	33	35
Tax, leasehold, insurance	58	72
Letting and property administration	57	43
Direct property costs	40	34
Operating costs	189	184

As a consequence of the effects explained above, net operating income came in at 2,149 million (2,058 million) in 2019.

Other revenue totalled 300 million (521 million) and other costs amounted to 260 million (500 million) in 2019. 185 million (429 million) of other revenue and 166 million (429 million) of other costs are related to the development of Tollbugata 1A in Oslo, which was forward-sold and delivered to the buyer in November 2019.

Income and costs related to assets in the Bryn portfolio which was acquired in September 2018, and subsequently will be taken over by a third party and developed to residential buildings, is recognised under Other revenue and Other costs. The net effect of this is 14 million in 2019.

Rent (12m rolling) per sqm. and occupancy rate

In addition to the effects explained above, Other revenue mainly consist of income from extra services provided to tenants. Other costs consist of other property costs mainly related to depreciation and rental expenses, in addition to the corresponding cost from extra services provided to tenants.

Administrative expenses amounted to 171 million (157 million) in 2019. The increase in 2019 is primarily related to Entra's innovation, technology and digitalization initiatives.

Entra's share of profit from associates and JVs was 312 million (156 million) in 2019. The profit mainly relates to the net gains from the completion and delivery of residential apartments and the recognition of income and cost related to the completion and sale of forward-sold commercial assets in Bjørvika.

Net realised financials amounted to -551 million (-491 million) and are composed as follows:

All amounts in NOK million	2019	2018
Interest and other finance income	10	17
Interest and other finance expense	-561	-509
Net realised financials	-551	-491

Net income came in at 1,780 million (1,587 million). When including only the income from property management in the results from JVs, the net income from property management was 1,471 million (1,434 million) for 2019. Refer to the alternative performance measures section of this report for calculation of the net income from property management.

Net value changes amounted to 1,955 million (1,486 million) for 2019. The valuation of the property portfolio resulted in a net positive value change of 1,909 million (1,387 million) for the financial year 2019.

During 2019, about 1,172 million in value change is attributable to increased market rent, primarily in the Oslo market, 170 million is related to the net effect from letting activities in the portfolio and 122 million is due to yield compression mainly in Bergen. In addition, about 430 million of value changes stems from development in the project portfolio as each project moves towards completion with a corresponding risk reduction. The remaining is a result of realised value changes from the divestment of several properties above book value throughout the year and negative effects from other property related changes.

Net changes in the value of financial instruments totalled 46 million (99 million) in 2019. The positive development is mainly explained by higher market interest rates and reduced time to maturity on high interest rate swaps, partly offset by a termination cost of 45 million for terminated swap contracts with a notional amount of 1,800 million during 2019.

Tax payable of 11 million (13 million) for 2019 is mainly related to the partly owned entity Papirbredden in Drammen. The change in deferred tax was -498 million (-325 million) in 2019. The effective tax rate during 2019 is less than the Norwegian corporate income tax rate mainly due to sales of properties without tax effect. At year-end 2019, the tax loss carry forward for the Group's wholly-owned subsidiaries was 68 million (321 million).

Profit before tax was 3,735 million (3,073 million) whereas profit after tax was 3,225 million (2,735 million). Total comprehensive income for the period was 3,229 million (2,729 million).

Balance sheet

The Group's assets amounted to 51,160 million (47,709 million) as at 31 December 2019. Of this, investment properties amounted to 49,095 million (44,714 million). No (3) properties were classified as held for sale as at 31 December 2019.

Inventory properties of 413 million (407 million) at the end of the quarter relates to the properties in the Bryn portfolio expected to be zoned for residential development and subsequently sold to a third party.

Other receivables and other current assets was 226 million (671 million) at the end of 2019. The 2018 amount included contract assets related to the forward-sold asset Tollbugata 1A, which was delivered to the buyer in November 2019.

Other non-current liabilities was 505 million (456 million) at the end of the year. The increase is mainly related to the capitalisation of lease liabilities of 235 million following the implementation of IFRS 16. The increase is partly offset by the derecognition of the provision for the contract obligation assumed from the University of Oslo for the remaining lease period from 2019 to 2025 at St. Olavs plass 5. The provision was derecognised following the acquisition of St. Olavs plass 5 in 2019.

Book equity totalled 24,517 million (22,269 million), representing an equity ratio of 48 per cent (47 per cent). Book equity per outstanding share was 135 (122). Equity per share was 151

Net income from property management per share (Annualised, rolling 4 quarters)

Per share

(141) based on the EPRA NAV standard and 141 (131) based on EPRA NNAV. Outstanding shares at 31.12.19 totalled 182,109,045 (182,669,987) as Entra held 23,010 (1,062,474) treasury shares.

Cash flow statement

Net cash flow from operating activities came to 1,352 million (1,389 million) in 2019.

The net cash flow from investment activities was -1,005 million (-1,645 million) for 2019.

Proceeds from property transactions was 1,619 million (618 million) in 2019, mainly due to the disposal of Pilestredet 19-21, Pilestredet 28, Kristian Augusts gate 23, Aasta Hansteens vei 10 and Karoline Kristiansens vei 2. Purchase of investment properties was -1,241 million (-925 million), mainly due to the acquisition of St. Olavs plass 5 in Oslo and Møllendalsveien 6 and 8 in Bergen.

The cash effect from investment in and upgrades of investment properties amounted -1,427 million (-1,201 million) in 2019. Investment in property for sale and inventory properties of -192 million (-362 million) in 2019 mainly relates to construction costs related to the forward-sold asset Tollbugata 1A.

Dividends from associates and JVs of 308 million (231 million) in 2019 are mainly related to dividends from Oslo S Utvikling AS.

Net cash flow from financing activities was -260 million (297 million) in 2019.

Net proceeds of interest bearing debt was 731 million (1,211 million) in 2019. During 2019, Entra had a net decrease in commercial papers of 700 million, and an increase in bank loans and bond loans of 731 million and 700 million, respectively.

In 2019, Entra repurchased shares for 69 million (116 million) under the share buy-back program initiated in July 2018.

Dividends paid amount to 840 million (790 million) in 2019. For 2019, Entra paid dividends of NOK 2.30 per share to the shareholders for the first six months and has proposed NOK 2.40 per share for the second half year. For the financial year 2018, Entra paid out total dividends of NOK 4.50 per share.

Dividends paid to non-controlling interests was 75 million (8 million) in 2019. The dividends were paid to the non-controlling interests in Entra OPF Utvikling AS and Papirbredden Eiendom AS.

The net change in cash and cash equivalents was 87 million (41 million) for 2019.

Going concern

The financial statements have been prepared based on the going concern assumption, and the Board confirms that this assumption is valid. The company is in a healthy financial position and has good liquidity.

Financial structure and exposure

The Group has a well-diversified financial structure comprising of both bank credit facilities and capital markets instruments.

Maintaining strong banking relationships is a key focus for Entra, and currently the Group has significant business activities with five of the top six Nordic banks. Entra has a strong presence in the Norwegian debt capital market as it is among the largest issuers in Norwegian kroner. Entra has a Moody's investment grade rating Baa1 with Stable Outlook. The Moody's Baa1 rating contributes to an increased credit availability in domestic and international debt capital markets and enables Entra to further extend its debt maturity profile.

The Group has adopted a conservative financial strategy that secures financial flexibility throughout an economic cycle. This is reflected in the financial policy through a set of financial risk parameters limiting risks related to financial leverage, interest rates, financing and liquidity. Consequently, Entra's financial profile is characterised by a moderate loan-to-value ratio, strong interest coverage ratio, diversified debt maturity and an ample liquidity position. As a general principle, Entra's financing is based on a negative pledge of the Group's assets that enables a broad and flexible financing mix.

"Green financing" has become a global trend within real estate finance. The real estate sector is responsible for about 40 per cent of global greenhouse gas emissions. This fact has spurred increasing awareness among investors and financial institutions that a conditional capital supply represents a key factor in accelerating the green shift within the sector. Entra, with its highly environment friendly development projects and BREEAM certified investment properties, is well positioned for capitalizing on this favourable supply of green financing.

The debt capital markets funding accounted for 67 per cent (70 per cent) of the total interest bearing debt, with bank funding representing the remaining part of the financing mix. The

Group's liquid assets amounted to 317 million (230 million) as at 31 December 2019. In addition, the Group had committed, unutilised credit facilities totalling 6,190 million (5,210 million). The Group's average interest rate as at 31 December 2019 was 2.99 per cent (2.85 per cent), and 59 per cent (57 per cent) of the Group's total interest bearing debt was subject to fixed interest rates. Entra's loan-to-value ratio decreased to 40.2 per cent (41.3 per cent) and the interest coverage ratio decreased to 3.3 (3.6) at year-end 2019.

Corporate governance

Entra's Board has approved guidelines for good corporate governance in accordance with the Norwegian Code of Practice for Corporate Governance issued by the Norwegian Corporate Governance Board (NUES).

The corporate governance section of this annual report on pages 60-67 provides a more detailed description of the corporate governance principles and reporting pursuant to Section 3-3b of the Norwegian Accounting Act.

Equality and diversity

At 31 December 2019, 38 per cent (35 per cent) of the Group's 177 employees were women and 62 per cent (65 per cent) were men. Three out of seven of the Senior Executives were women and four were men. Four of seven of the Board members were women and three were men. The Group believes in the benefits of diversity, and this goal is incorporated into Entra's recruitment procedures and is reflected in the composition of senior management. Entra strives for diversity on a broad basis, including gender, age, ethnicity, personal beliefs, background, education, sexual orientation and nationality. Key metrics regarding diversity is included in the EPRA sustainability performance measures section of the annual report and further information on Entra's efforts to increase diversity is included the ESG report.

Risks associated with the business

Entra assesses risk on an ongoing basis, primarily through a semi-annually comprehensive review of the groups risk maps, which includes assessments of all risk factors in collaboration with all levels of the organization. Each risk factor is described and presented with the possible negative outcome given an increased probability of a situation to occur. The risk assessment also includes a broad description on how we monitor and work to minimize the risks, as well as a statement on how we assess the changes in the last period on each risk factor.

Entra's main risk factors, both financial and non-financial, are described on pages 28-34.

Shareholder information

Entra's share capital is NOK 182,132,055 divided into 182,132,055 shares, with each share having a par value of NOK 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares

carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra.

As of 31 December 2019, Entra had 5,846 shareholders.

Norwegian investors held 35 per cent of the share capital. The 10 largest shareholders as of 31 December 2019 were as follows:

Shareholder	% holding
Folketrygdfondet	8.8 %
Norwegian Ministry of Trade, Industry and Fisheries	8.2 %
State Street Bank (Nominee)	7.4 %
The Bank of New York (Nominee)	3.4 %
JP Morgan Chase Bank (Nominee)	1.5 %
BNP Paribas Securities (Nominee)	1.5 %
Danske Invest Norske	1.4 %
State Street Bank (Nominee)	1.2 %
Morgan Stanley & Co. (Nominee)	1.1 %
State Street Bank (Nominee)	1.1 %
Sum 10 largest shareholders	35.8 %

Profit for the year and allocations

In 2019, the parent company Entra ASA made a profit after tax of 1,134 million (604 million), as set out in the financial statements prepared in accordance with the Norwegian Accounting Act and Norwegian generally accepted accounting principles.

In accordance with the defined dividend policy of paying out approximately 60 per cent of cash earnings, defined as net income from property management less tax payable, the Board proposes that Entra ASA distributes a dividend of 437 million (420 million) corresponding to 2.40 per share (2.30 per share) for the last six months of 2019. The remainder of the result after tax of 697 million is to be transferred to retained earnings.

The Board confirms that the company has sufficient equity and liquidity following payment of the proposed dividend.

Outlook

Entra continues to deliver on its core strategic pillars; profitable growth, customer satisfaction, and environmental leadership.

Solid letting and management of high quality assets, combined with deliberate and targeted project development of both new-builds and redevelopments are the main sources of profitable growth in Entra. Emerging trends like co-working, employee wellbeing and increased flexibility demands from tenants will impact Entra's priorities, making technology development and being close to the tenants even more important. Entra has in recent years had the most satisfied customers amongst the major Norwegian real estate companies, and a priority is to further develop end-user focus with product and service offerings to realize the vision of owning buildings where the most satisfied people work.

Environmental leadership and sustainability have been key priorities for Entra during the last decade and is an integral part of all business operations in the company. Circular economy and re-use of building materials has strong momentum, and through ambitious pilot projects Entra is leading and challenging the industry to work with circular value chains. There is a continued growing interest and commitment from all stakeholders for sustainable business operations, and the financial benefits are also materialising through increasing appreciation from tenants, lower cost of funding through green bond and bank financing, and higher valuations of environmentally friendly properties. In addition, a true and genuine purpose spurs employee motivation and attracts new talent to the company.

The Norwegian economy is seeing a stable and positive momentum with GDP growth and increasing employment. Nevertheless, there is still general uncertainty about the future stemming primarily from geopolitical and financial macro factors that could impact the Norwegian economy.

Modern, environmentally friendly offices located near public transportation hubs are attractive and obtain solid rents compared to premises located in less central areas. Entra's portfolio in Oslo constitutes around 63 per cent of the market value of the management portfolio, and particularly the central Oslo office market is expected to continue favourably with low vacancy levels and increasing market rents. The office market in Bergen is also developing positively from a solid base, and we continue to see a moderate recovery in Stavanger. Trondheim is expected to remain relatively stable.

Interest rates are expected to remain at historically low levels in the foreseeable future, as uncertainty in the global economy will impact economic growth prospects.

The Norwegian transaction market is very active and driven by strong demand supported by a well-functioning debt market. The yield compression levelled out during 2018, and one expects a relatively flat development over the coming years. Entra's high quality portfolio with a healthy mix of attractive yielding properties and value enhancing development project combined with a positive rental market outlook should provide a continued positive portfolio value development.

With Entra's flexible properties in attractive locations and clusters, strong tenant base with long lease contracts, exciting project pipeline and solid financial position, the Board believe that the company is well positioned for the future.

Notes

NOTE 1 GENERAL INFORMATION

Entra ASA ("the Company") is listed on Oslo Stock Exchange with the ticker ENTRA. Entra ASA and its subsidiaries (together "Entra" or "the Group") is one of Norway's leading real estate companies, focusing on high quality, flexible office buildings with central locations. The Group owns and manages 89 (92) buildings with a total area of approximately 1.3 million (1.3 million) sqm. As of 31.12.19 the real estate portfolio had a market value of around 49 billion (46 billion).

The public sector represents approximately 60 per cent (63 per cent) of the total customer portfolio. Entra's strategic areas are Oslo, Sandvika, Drammen, Stavanger, Bergen and Trondheim. Entra has its head office in Oslo.

The consolidated financial statements were adopted by the Company's Board on 4 March 2020.

NOTE 2 ACCOUNTING PRINCIPLES

All amounts in NOK million

ACCOUNTING PRINCIPLES

The most important accounting principles applied in the preparation of the annual financial statements are described below. These principles are applied in the same way for all periods presented, unless otherwise indicated in the description.

BASIC PRINCIPLES

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations by the IFRS Interpretation Committee (IFRIC), as adopted by the EU, as well as additional Norwegian reporting requirements pursuant to the Norwegian Accounting Act.

The consolidated financial statements have been prepared on the basis of the historical cost principle, with the following modifications: investment properties as well as certain financial assets and financial liabilities have been measured at fair value. Financial instruments measured at fair value include the Group's derivatives.

Presenting the accounts in accordance with IFRS requires the management to make certain assessments and assumptions. The application of the Group's accounting principles also requires management to exercise judgement. Estimates and subjective judgements are based on past experience and other factors that are considered appropriate. Actual results may deviate from these estimates.

Estimates and underlying assumptions are continuously reassessed. Changes in accounting estimates are recognised in the period in which the changes occur if they apply only to that period. If the changes also apply to future periods, the impact is distributed over the current and future periods. Note 3 details items in the accounts that are based on a significant amount of subjective judgement.

The consolidated financial statements have been presented on the assumption of the business being a going concern.

Application of new and revised International Financial Reporting Standards (IFRSs) in 2019

New and amended standards adopted by the Group:

The Group applied IFRS 16 for the first time in 2019. The nature and effect of the changes as a result of adoption of this new accounting standard are described below.

Several other amendments and interpretations apply for the first time in 2019, but do not have an impact on the consolidated financial statements of the Group. The Group has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

IFRS 16 Leases

IFRS 16 was issued in January 2016 and is effective for accounting periods beginning on or after 1 January 2019. The standard replaced IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The distinction between operational and financial leases under IAS 17 is removed for lessees and replaced by a model which is to be used for all leases.

IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under IAS 17. The standard substantially carries forward the lessor accounting requirements in IAS 17, and continues to require a lessor to classify a lease either as an operating lease or a finance lease. For leases with at lease term of 12 months or less and leases of low-value assets, the Group will recognise a lease expense on a straight-line basis as permitted by IFRS 16.

The Group adopted IFRS 16 on 1 January 2019, applying the modified retrospective transition method. Under the modified retrospective transition method, the cumulative effect of initially applying the standard is recognised at the date of initial application.

The effect of the implementation of IFRS 16 on the opening balance sheet as of 1 January 2019 was the following:

	Effect 01.01.2019
Investment properties	231
Total assets	231
Total equity	-10
Deferred tax liability	-3
Other non-current liabilities	235
Other current liabilities	9
Total equity and liabilities	231

Property lease contracts

The Group has analysed all its lease contracts for the lease of ground, parking lots and buildings to evaluate if they fulfil the criteria to qualify as leases according to IFRS 16. Only fixed payments are included in the initial measurement of the lease liability, excluding the Group's turnover based lease contracts. Based on this analysis, the Group has identified a limited number of lease contracts according to the standard concerning leased ground, parking lots and buildings.

Lease liabilities are measured at the net present value of fixed lease payments due under the contract. The lease term corresponds to the non-terminable period. Extension options are not included as the Group is not reasonably certain to exercise these options. The discount rate used to calculate the lease liability is determined, for each asset, based on the Group's incremental borrowing rate for leases with under 15 years until maturity. For leases with over 15 years until maturity, the discount rate is based on the properties' net yields, adjusted for features that affect Entra's incremental borrowing rate, such as tenant-specific factors and the length of the lease.

Entra applies the fair value model in IAS 40 to its investment properties, where the rental expenses under the property lease contracts until the implementation of IFRS 16 were included in the individual property's assumed future cash flows. The leased properties meet the definition of investment properties in IAS 40 and Entra also applies the fair value model to right-of-use assets associated with the property lease contracts. By separating the rental expenses from the other cash flows of the property, the discounted cash flows of the property increase by an amount equal to the value of the right-of-use asset.

The difference between the value of right-of-use assets and lease liabilities is a deductible temporary difference which resulted in a reduction of the deferred tax liability.

On the transition to IFRS 16, the Group elected to use the practical expedient to apply the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application.

Other leased assets

The Group has made an analysis of all the lease contracts on other assets to evaluate if they fulfil the criteria to qualify and to account a lease according to IFRS 16. No other material leased assets were identified in this analysis.

Short-term lease payments, payments for leases of low-value assets and variable lease payments not included in the measurement of the lease liability are presented under Operating costs in the statement of comprehensive income.

The impacts on the statement of comprehensive income in 2019 was the following:

- Reduction of the rents included in Operating costs of 9 million compared to accounting treatment in accordance with IAS 17;
- Financial costs on the lease debt of 12 million is included in Net realised financials; and
- Changes in the value of the right-of-use assets is included in Changes in value of investment properties.

Lease payments are presented in the statement of cash flows as follows:

- Short-term lease payments, payments for leases of low-value assets and variable lease payments not included in the measurement of the lease liability are presented under operating activities;
- Cash paid for the interest portion of a lease liability is presented under operating activities; and
- Cash payments for the principal portion for a lease liability are presented under financing activities.

New standards and interpretations not yet adopted by the Group

A number of new IFRS standards and IFRIC interpretations are effective for annual periods beginning after 1 January 2020, and have not been applied in preparing these consolidated financial statements. None of the new accounting standards or interpretations that have not yet come into effect are expected to have a significant impact on the Group's consolidated financial statements.

CONSOLIDATION PRINCIPLES

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the group has control. The Group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity.

The Group reassesses whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether the Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- Potential voting rights held by the Group, other vote holders or other parties;
- rights arising from other contractual arrangements;
- any addition facts and circumstances that indicate that the Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including vote patterns at previous shareholder's meetings.

Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

The acquisition method is used to account for purchases of subsidiaries that constitute a business. The consideration given is measured at the fair value of the transferred assets, the equity instruments that have been issued, liabilities assumed on the transfer of control and direct costs relating to the actual purchase. The cost of acquisition also includes the fair value of all assets or liabilities that are the result of an agreement on contingent consideration.

Identifiable purchased assets, assumed liabilities and contingent liabilities are recognised at fair value on the date of acquisition. The costs associated with the business combination are expensed when they are incurred.

If the aggregate of the consideration, the carrying amount of non-controlling interests and the fair value on the acquisition date of any previously held ownership interests exceeds the fair value of the acquired entity's identifiable net assets, the difference is capitalised as goodwill. If the aggregate is less than the company's net assets, the difference is immediately recognised in profit or loss.

Contingent consideration is recognised at fair value on the date of acquisition. Subsequent changes in the fair value of the contingent consideration are recognised in profit or loss or recognised as a change in other comprehensive income, if the contingent consideration is classified as an asset or a liability. Contingent consideration classified as equity is not remeasured, and subsequent settlement is recognised in equity.

For accounting purposes, acquisitions of subsidiaries that do not constitute a business as defined in IFRS 3, such as subsidiaries that only consist of a property, are treated as asset acquisitions. The cost of acquisition is then attributed to the individual identifiable assets and liabilities based on their relative fair values on the acquisition date. Expenses associated with the transaction are capitalised under the investment property. In such cases no provision is made for deferred tax (cf. exceptions in IAS 12).

Intra-group transactions, balances and unrealised gains are eliminated. Unrealised losses are eliminated, but are considered evidence of impairment in terms of writing down the value of the transferred asset. If necessary, the accounting policies at subsidiaries are changed in order to bring them into line with the Group's accounting policies.

Transactions with non-controlling interests

Transactions with non-controlling interests in subsidiaries are treated as equity transactions. If shares are acquired from a non-controlling interest, the difference between the payment and the proportion of the carrying amount of the subsidiary's net assets attributable to the shares is recognised in the equity of the parent company's owners. Gains and losses arising from the sale of shares to non-controlling interests are similarly recognised in equity.

If the Group loses control, any residual holding is remeasured at fair value through profit or loss (FVTPL). Thereafter, the fair value is used as the acquisition cost for accounting purposes, and the holding is treated as an investment in an associate, in a jointly controlled entity or in a financial asset. Amounts previously included in comprehensive income that relate to the company are treated as if the Group had disposed the underlying asset and liability. This may result in amounts that were previously included in comprehensive income being reclassified to the income statement.

Joint arrangements

Under IFRS 11, investments in joint arrangements are classified as either joint operations or joint ventures. In a joint arrangement, no single party controls the arrangement on its own. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

Entra classifies its investments based on an analysis of the degree of control and the underlying facts. This includes an assessment of voting rights, ownership structure and the relative strength, purchase and sale rights controlled by Entra and other shareholders. Each individual investment is assessed. Upon changes in underlying facts and circumstances, a new assessment must be made as to whether this is still a joint venture. Changes in contractual rights and obligations relating to the underlying asset or debt and changes in the shareholders agreement might lead to a shift in the accounting method.

In joint ventures, the Group's share of the companies' profit/loss after tax, adjusted for amortisation of excess value and any deviations from accounting policies, are presented on a separate line in the consolidated income statement. Joint ventures are recognised in the consolidated accounts using the equity method and presented as non-current assets.

A transaction that entails a change of control from an investment in a joint venture to an investment in a subsidiary is treated as a realisation and require that a gain/loss at the time of derecognition of the joint venture has to be calculated and recognised in the income statement as results from associates and JVs according to the equity method. Equity transactions in a joint venture is presented as an equity transaction in the Group's statement of changes in equity.

Associates

Associates are companies over which the Group has significant influence but not control or joint control. Significant influence normally exists where the Group's investment represents between 20 and 50 per cent of the capital with voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost. Investments in associates include any excess values and goodwill identified at the time of acquisition, less any subsequent impairment losses.

The Group's share of the profit and loss of associates is recognised and added to the carrying amount of the investments. The Group's share of the comprehensive income of associates is recognised in the Group's comprehensive income and added to the carrying amount of the investments. The Group does not recognise its share of a loss if this would result in a negative carrying amount for the investment (including the entity's unsecured receivables), unless the Group has taken over obligations or made payments on behalf of the associate.

The Group's share of unrealised gains on transactions between the Group and its associates is eliminated. This also applies to unrealised losses, unless there is a permanent loss of value. Where necessary, the accounts of associates have been brought into line with the Group's accounting policies. Gains and losses arising from the dilution of ownership interests in associates are recognised in profit or loss.

If the Group no longer has significant influence, any residual holding is remeasured at FVTPL. Thereafter, the fair value is used as the acquisition cost for accounting purposes, and the holding is treated as a financial asset. Amounts relating to the company that were previously recognised in comprehensive income are treated as if the associate had disposed of the underlying assets and liabilities. This may result in amounts that were previously included in comprehensive income being reclassified to the income statement. If the Group reduces its shareholding but retains significant influence, a proportionate share of the amounts previously recognised in comprehensive income is reclassified to the income statement.

INVESTMENT PROPERTY

Investment properties are owned with the aim of achieving a long-term return from rental income and increase in value. Investment properties are recognised at fair value, based on market values estimated by independent valuers.

Initial measurement also takes into consideration the property's cost price, which includes direct transaction costs such as document duty and other public duties, legal fees and due diligence costs. Transaction costs associated with properties acquired through business combinations (as defined in IFRS 3) are expensed.

Subsequent expenditure is added to the investment property's carrying amount, if it is probable that future financial benefits associated with the expenditure will flow to the Group and the

expense can be measured reliably. Other maintenance costs are recorded through the income statement in the period in which they are incurred. When investment properties are disposed of, the difference between the net sales proceeds and carrying amount is recognised as change in value from investment properties.

Investment properties are valued at each reporting date. The values are estimated by independent valuers. The valuation is based on the individual property's assumed future cash flows, and property values are arrived at by discounting cash flows with an individual risk-adjusted required rate of return.

The required rate of return for each property is defined as being a long-term risk-free interest rate plus a property-specific risk supplement. The latter is defined on the basis of the property segment to which the property belongs, its location, standard, occupancy rate, tenants' financial reliability and remaining lease term. Known market transactions with similar properties in the same geographical area are also taken into consideration.

Changes in fair value, including gains and losses on sale of investment properties, are recognised as "Changes in value of investment properties".

Investment properties held for sale

Investment properties are classified as held for sale if their carrying amount will be recovered through a sales transaction rather than through their continuing use. This condition is regarded as met if the sale is highly probable and the investment property is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets. For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the investment property, and an active programme to locate a buyer and complete the plan must have been initiated. Further, the investment property must be actively marketed for sale at a price that is reasonable in relation to its current fair value. In addition, the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification. Investment properties classified as held for sale are measured at fair value in the same way as other investment properties.

Borrowing costs

Borrowing costs for capital used to finance investment properties under construction are capitalised under the asset in question. When calculating the capitalised borrowing costs, the average interest rate on the company's debt portfolio over the course of the year is used, unless there is separate financing for the specific project. In such cases the specific borrowing cost for the loan in question is used. When calculating the average interest rate to be used for the capitalisation of borrowing costs, loans taken out for specific projects are not included.

REVENUE RECOGNITION

Revenue from lease contracts

The Group enters into lease agreements as a lessor with respect to its investment properties. Lease contracts where a significant proportion of the risks and benefits of ownership remain with Entra are classified as operating leases. Revenue recognition under a lease commences at the inception of the lease. Rent payments for the leases are recognised in a straight line over the duration of the lease.

In negotiating a new or renewed operating lease, Entra may provide incentives for the lessee to enter into the agreement. Examples of such incentives are rent exemptions, up-front payments to the lessee or the reimbursement or assumption by the lessor of costs of the lessee (such as relocation costs, leasehold improvement and costs associated with a pre-existing lease commitment of the lessee). Entra recognises the aggregate benefit of incentives as a reduction of rental income over the lease on a straight-line basis. The accrued loss of rent or costs is presented under other receivables. Payments relating to the termination of contracts are recognised in the period from the contract being entered into until the date of its termination. Rental income encompasses the fair value of the payments received for services that fall within the ordinary activities of the company. Rental income is presented net of VAT, rebates and discounts.

Rental income from letting of inventory properties is presented as "Other revenue".

Costs for shared services provided to the tenants by external parties do not affect the result beyond an administrative premium recognised as rental income. Shared costs are charged to tenants and recognised in the balance sheet together with payments on account of tenants. Shared costs are settled after the balance sheet date.

Revenue from contracts with customers

In determining the basis for revenue recognition from contracts with customers, the Group identifies the distinct performance obligations under the contracts, allocate the transaction price to each identified performance obligation and account for revenue as each performance obligation is met.

Revenue from development of commercial properties, including transactions that are structured as sale of shares, are recognised over time according to the stage of completion if the buyer does not have the right to cancel a contract, and the Group as a seller can require a buyer to pay the consideration agreed in the contract even if the buyer acts to terminate a contract. A project's stage of completion is measured by reference to the contract costs incurred up to the end of the reporting period as percentage of total estimated costs. Contract assets related to non-invoiced revenue from such construction contracts are included in "Other receivables and other current assets".

Revenue from development of inventory properties for sale is recognised when the properties are handed over to the customer as the Group does not have an enforceable right to collect payment for the benefits performed to date.

Service income for extra services to tenants is recognised in the period the service is performed.

FINANCIAL INSTRUMENTS

A financial instrument is defined as being any contract that gives rise to a financial asset at one entity and a financial liability or equity instrument at another entity. Financial instruments are recognised on the transaction date, i.e. the date on which the Group commits to buying or selling the asset. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them.

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and FVTPL. For a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are "solely payments of principal and interest (SPPI)" on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Further, the financial assets shall be held within a business model whose objective is to hold the financial assets in order to collect contractual cash flows. The majority of the Group's financial assets are classified as measured at amortised cost.

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. The Group's financial assets at amortised cost includes trade and other current receivables, cash and cash equivalents and other financial assets.

Financial assets at FVTPL include financial assets held for trading, financial assets designated upon initial recognition at FVTPL, and financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVTPL. The Group's financial assets at FVTPL includes financial derivatives and shares held for trading.

The Group recognises an allowance for expected credit losses on all debt instruments not held at FVTPL. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument. For trade receivables and contract assets, the Group applies the "simplified approach" by utilising a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Financial liabilities are classified upon initial recognition as financial liabilities at FVTPL and financial liabilities at amortised cost. Financial liabilities at FVTPL comprise loans designated at fair value upon initial recognition and derivatives. Financial liabilities at amortised cost consist of liabilities that do not fall under the category at FVTPL.

Trade receivables, contract assets and other financial assets

Trade receivables, contract assets and other financial assets are classified as financial assets measured at amortised cost. Interest is ignored if it is insignificant. The Group applies the simplified approach in IFRS 9 to measure the loss allowance at lifetime expected credit losses. A provision for bad debt are determined by estimating expected credit losses with reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. There has been no change in the estimation techniques or significant assumptions made during the current reporting period. Any subsequent

payments received against accounts for which a provision has previously been made are recognised in the income statement. Trade receivables, contract assets and other financial assets are classified as current assets, unless they are due more than twelve months after the balance sheet date. If so, they are classified as non-current assets.

Cash and cash equivalents

Cash and cash equivalents consist of bank deposits and other short-term, highly liquid investments with an original term to maturity of no more than three months.

Financial derivatives

The Group uses derivatives to manage its interest rate risk. Derivatives are initially recognised at fair value on the date on which the contract was signed, and subsequently at fair value. Gains or losses on remeasurement at fair value are recognised in the income statement. Regular payments are presented as interest and other finance expenses. Changes in the value of the derivatives are presented under "Changes in value of financial instruments".

The fair value of interest rate swaps is the estimated amount the Group would receive or pay to redeem the contracts on the balance sheet date. This amount will depend on interest rates and the contracts' remaining term to maturity. The derivatives are classified on the balance sheet as current or non-current, depending on whether they are expected to be redeemed under or over 12 months from the balance sheet date.

Trade payables and other non-interest bearing financial liabilities

Trade payables and other non-interest bearing liabilities are classified as financial liabilities at amortised cost, and are measured at fair value upon initial recognition, and subsequently at amortised cost using the effective interest rate method. Interest is ignored if it is insignificant.

Interest bearing liabilities

Interest bearing liabilities are classified as financial liabilities at amortised cost, and are measured at fair value upon initial recognition, and subsequently at amortised cost using the effective interest rate method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included as net realised financials in the statement of profit or loss. The liabilities are measured at their nominal value when the effect of discounting is immaterial.

Interest bearing liabilities are classified as current liabilities where the debt is due for repayment less than 12 months from the balance sheet date.

LEASE CONTRACTS (THE GROUP AS A LESSEE)

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease contracts in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as vehicles and technical and office equipment). For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

Only fixed payments are included in the initial measurement of the lease liability, and the lease term corresponds to the non-terminable period. The discount rate used to calculate the lease liability is determined, for each asset, based on the Group's incremental borrowing rate for leases with under 15 years until maturity. For leases with over 15 years until maturity, the discount rate is based on the properties' net yields, adjusted for features that affect Entra's incremental borrowing rate, such as tenant-specific factors and the length of the lease. The lease liability is presented as part of other liabilities in the balance sheet.

Entra applies the fair value model in IAS 40 to its investment properties, where the rental expenses under the property lease contracts before 1 January 2019 were included in the individual property's assumed future cash flows. The leased properties meet the definition of investment properties in IAS 40 and Entra applies the fair value model to right-of-use assets associated with the property lease contracts. The right-of-use assets associated with the investment properties are measured by discounting the assumed future cash flows under the lease contracts. The discount rate used to calculate the right-of-use asset is different from the discount rate used to calculate the lease liability. The right-of-use assets are presented as part of investment properties in the balance sheet.

The Group also has certain leases of vehicles and technical and office equipment with lease terms of 12 months or less or with low value with low value. The Group applies the "short-term lease" and "lease of low-value assets" recognition exemptions for these leases.

Before 1 January 2019, rent payments for operating leases were expensed in a straight line over the duration of the lease.

INTANGIBLE ASSETS

Goodwill

Goodwill is the difference between the cost and the fair value of the Group's share of net identifiable assets in the entity on the acquisition date. Goodwill arising from the acquisition of subsidiaries that constitute a business as defined in IFRS 3, is classified as an intangible asset. For the purposes of impairment testing, goodwill is allocated to the relevant cash-generating units. Goodwill is allocated to the cash-generating units or groups of cash-generating units that are expected to benefit from the acquisition from which the goodwill arose. Goodwill is tested for impairment annually and is recognised at cost less any impairment losses. Impairment of goodwill is not reversed. Gains and losses on the sale of an operation include the carrying amount of goodwill relating to the sold operation.

Goodwill arising from the purchase of shares in associates and jointly controlled entities is included under the investment in the associate or jointly controlled entity, and is tested for impairment as part of the carrying amount of the investment.

Impairment of intangible assets

Intangible assets with an uncertain useful life are not depreciated and are instead tested annually for impairment. Intangible assets that are depreciated are also tested for impairment if there is any indication to suggest that future cash flows cannot justify the carrying amount of the asset. Write-downs are recorded through the income statement as the difference between the carrying amount and the recoverable amount. The recoverable amount is the value in use or fair value, whichever is the higher, less selling costs. When

testing for impairment, intangible assets are grouped at the lowest possible level at which it is possible to identify independent cash flows (cash-generating units). In conjunction with each financial report, the company assesses whether it is possible to reverse past write-downs of non-financial assets (except goodwill).

PENSIONS

The Group has both defined benefit and defined contribution pension schemes. A defined benefit pension scheme is a pension arrangement that defines the pension payment an employee will receive on retirement. The pension benefit payable is dependent on a number of factors, such as the employee's age, number of years of membership of the Norwegian Public Service Pension Fund and salary.

The recognised pension obligation relating to defined benefit plans is the present value of the defined benefit on the balance sheet date less the fair value of the plan assets. The gross pension obligation is calculated annually by an independent actuary using the projected credit unit method. The gross pension obligation is discounted using a discount rate based on bonds with preference rights, which mature around the same time as the related pension obligations.

Changes to benefits payable under the pension plan are recognised in the income statement as they arise.

Actuarial gains/losses resulting from new information or changes to actuarial assumptions are recognised against equity via comprehensive income in the period they arise.

Contributions to defined contributions plans are recognised in the income statement in the period in which they accrue.

SHARE BASED PAYMENTS

The Group has a share-based incentive program for executives ("LTI"). The LTI scheme is reported in accordance with IFRS 2. LTI remuneration is share-based and has a vesting period of one year and a lock-up period of three years. The fair value at the grant date is measured applying Black-Scholes (BS) based on the market price. The fair value of the shares allocated through the LTI is calculated on the basis of the share price at grant date, taking into account the likelihood of the employee still being employed after three years. The amount is recognised as payroll expenses at grant date and accrued for the period from grant date to the date when the shares are without any restrictions.

SHARE DISCOUNTS

Sales of shares to employees in the share saving scheme are reported in accordance with IFRS 2. The recognised discount is calculated as the difference between market price and purchase price at the time of purchase, taking into account the agreed lock-in period for the shares. The effect of the agreed lock-in period is calculated as the value of a put option using the BS model. The assumptions relating to volatility are based on the actual fluctuations in the price of Entra's shares. The share of the discount that represents the difference between the calculated BS value and the market value of the shares is recognised against equity and the remaining discount, that represents the difference between the paid amount for the shares by the employees and the B&S value, is recognised as payroll expenses at the time of allocation.

TAX

The tax expense consists of tax payable and deferred tax. Tax is charged to the income statement, except where it relates to items that are recognised in comprehensive income or directly in equity. In such cases, the tax is either recognised in comprehensive income or directly in equity.

Deferred tax is calculated using the liability method for all temporary differences between the tax values and consolidated accounting values of assets and liabilities. Deferred tax liabilities are not calculated and recognised upon initial recognition of assets or liabilities obtained through an acquisition of a subsidiary not classified as a business combination. Deferred tax is defined using tax rates and laws which are enacted or likely to be enacted on the balance sheet date, and which are expected to be used when the deferred tax asset is realised or when the deferred tax is utilised.

Deferred tax is calculated and provided or reduced in the event of adjustments to the value of investment properties at a nominal tax rate of 22 per cent. A deferred tax asset is recognised to the extent that it is likely that future taxable profit will be available against which the temporary differences can be offset.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in jointly controlled entities, except where the Group is able to control the reversal of the temporary differences and it is probable that the temporary difference will not reverse in the foreseeable future.

PROVISIONS

The Group recognises provisions for legal claims when a legal or self-imposed obligation exists as a result of past events, when it is likely that an outflow of resources will be required to settle the obligation and its amount can be estimated with a sufficient degree of reliability.

In cases where there are several obligations of the same nature, the likelihood of settlement is determined by assessing the Group as a whole. A provision for the Group is recognised even if there is little likelihood of settlement of the Group's individual elements.

Provisions are measured at the present value of expected payments to settle an obligation. A discount rate before tax is used which reflects the present market situation. Any increase in an obligation as a result of a changed time value is reported as a financial expense.

A provision for onerous contracts is recognised when the expected benefits to be derived by Entra from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract and taking into consideration any reasonably obtainable subleases.

INVENTORY PROPERTIES

The Group's residential projects involve zoning, development and construction. Where the Group constructs the residential projects, the individual units are handed over to the purchaser when they are completed. Properties under zoning for residential purposes

may be handed over to other residential developers. The residential projects are intended for sale in the ordinary course of business or which is in the process of construction or development for such sale. Inventory property thus comprise properties held for resale, property under development and construction, and completed units which are not sold. Inventories are measured at the lower of cost and net realisable value.

OTHER OPERATING ASSETS (EQUIPMENT)

Other operating assets are recognised at acquisition cost, less depreciation. The acquisition cost includes costs directly related to the acquisition of the asset. Other operating assets are depreciated in a straight line over their anticipated remaining useful life.

The assets' remaining useful life and residual value are reassessed on each balance sheet date and changed if necessary. If the carrying amount of an asset is higher than its recoverable amount, the value of the asset is written down to the recoverable amount.

Gains and losses on disposals are recognised through profit or loss, and are calculated as the difference between the sales price and the carrying amount at the time of disposal.

CURRENCY

The Group's presentation currency is NOK. This is also the functional currency of the parent company and all its subsidiaries.

Foreign currency transactions are translated at the exchange rate on the date of the transaction. Monetary foreign currency items are translated to NOK at the exchange rate on the balance sheet date. Non-monetary items that are measured at cost in a foreign currency are translated to NOK using the exchange rate on the transaction date. Non-monetary items that are measured at fair value in a foreign currency are translated to NOK using the exchange rate on the balance sheet date. Exchange rate fluctuations are recognised in profit or loss as they arise.

SEGMENT INFORMATION

Operating segments are reported in the same way as in internal reports to the Group's highest decision-making authority. The Group's highest decision-making authority, which is responsible for allocating resources and assessing the profitability of the operating segments, has been identified as the Board of Directors and the CEO.

STATEMENT OF CASH FLOWS

The statement of cash flows is prepared using the indirect method. This means that the statement is based on the Group's profit before tax in order to present cash flows from operating, investing and financing activities respectively. Interest on leases and net interest and fees paid on loans are presented as operating cash flows. Dividends paid to shareholders and non-controlling interests are presented under financing activities.

DIVIDENDS

Entra pays semi-annual dividends. Dividend payments to the company's shareholders for the first half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Board of Directors. Dividend payments to the company's shareholders for the second half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Annual General Meeting.

NOTE 3 CRITICAL ACCOUNTING ESTIMATES AND SUBJECTIVE JUDGEMENTS

Fair value of investment properties

Investment properties are measured at their fair value based on external, independent valuations.

Each quarter, all the properties are valued by two independent, external valuers. The valuations at 31 December 2019 were obtained from Akershus Eiendom AS and Cushman & Wakefield Realkapital. The valuations are mainly based on the discounted cash flow method, which involves discounting future cash flows over a specified period using an estimated discount rate and then adding a residual value at the end of the period. Future cash flows are calculated on the basis of cash flows from signed leases, as well as future cash flows based on an expected market rent at the end of the lease terms. The fair value of investment properties is therefore mainly affected by expected market rents, discount rates and inflation. The market rent for each property takes into account the property's situation, standard and leases signed for comparable properties in the area. For the duration of existing lease terms, the discount rate is mainly based on an assessment of the individual tenants' financial solidity and classification. After the end of the lease term, cash flows are discounted using a discount rate that takes into account the risk relating to letting and location. Inflation is estimated using the consensus of a selection of banks and official statistics.

When carrying out their valuations, the valuers receive comprehensive details of the leases for the properties, floor space and details of any vacant premises, and up-to-date information about all ongoing projects. Any uncertainties relating to the properties/projects and leases are also clarified verbally and in writing as and when required. The Group management performs internal controls to ensure that all relevant information is included in the valuations.

The valuers perform their valuations on the basis of the information they have received, and estimate future market rents, yields, inflation and other relevant parameters. Each individual property is assessed in terms of its market position, rental income (contractual rents versus market rents) and ownership costs, with estimates being made for anticipated vacancy levels and the need for alterations and upgrades. The remaining term of the leases is also assessed for risk, along with any special clauses in the contracts. Each property is also compared with recently sold properties in the same segment (location, type of property, mix of tenants, etc).

The table below shows to what extent the value of the property portfolio is affected by inflation, market rents, discount rates (interest rates) and exit yields (market yields), assuming that all other factors are equal. However, there are interrelationships between these variables, and it is expected that a change in one variable may influence one or more of the other variables.

Change variable	Change in per cent	Value change (NOKm) ¹⁾
Inflation	+ 1,00	502
Market rent	+ 10,00	4 213
Discount rates	+ 0,25	-1 320
Exit yield	+ 0,25	-1 381

¹⁾ Estimates by Cushman & Wakefield Realkapital in conjunction with valuations at 31 December 2019.

Consolidation of entities in which the Group holds less than a majority of shares

Entra considers that it controls Entra OPF Utvikling AS and Hinna Park Eiendom AS even though it owns 50 per cent of the shares in the companies. In this assessment, Entra has considered all relevant facts and circumstances in assessing whether the voting rights are sufficient to give Entra power over the two companies. A key consideration is whether Entra has the practical ability to unilaterally direct the relevant activities that affect the amount of Entra's return. The relevant activities, including property management, ongoing maintenance and minor redevelopment projects, are directed by the Board of Directors in the two companies. The shareholder agreements include certain provisions that restricts Entra from making

significant changes to the business of the two companies. These provisions are not considered to give the co-investors power over the companies, and are only considered to be protective rights. As Entra shall appoint the Chairman of the two companies and the Chairman has a double vote in the Board of Directors of the companies, Entra has concluded it controls these companies.

Fair value of financial derivatives

The Group uses interest rate derivatives and fixed rate loans to manage the interest rate risk. The financial derivatives are valued at fair value in the Group's balance sheet. See note 8 for further information on the valuation of the Group's financial derivatives.

NOTE 4 FINANCIAL RISK MANAGEMENT

All amounts in NOK million

Governance structure, exposure and reporting

The Board of Entra ASA has defined limits for the financial exposure of the Group through the financial policy. The financial policy regulates the following:

- Allocation of responsibility for financial management
- Overall limits and principles for management of financial exposure
- Principles for borrowing
- Definitions of financial risk parameters and key controls that must be in place to ensure adequate risk management
- Requirements for reporting and monitoring. The Group's overall financial risk exposure is reported regularly to the Board.

There is a responsibility and authority matrix for the Finance department, which defines authority for the day-to-day management of financial transactions within the overall framework of financial management.

The Group must ensure that there is adequate operational risk management and internal control through clear areas of responsibility and allocation of duties. The procedures relate in particular to the management of financial exposure and the division of responsibility between the various roles in the Finance department and the department's financial systems. There are guidelines for managing financial exposure, which include checklists related to the control of current transactions.

The finance department is continuously assessing the Group's financial risks and opportunities. Projections and simulations are made in the corporate financial model based on detailed assumptions on macroeconomic development, financial parameters and the property market. The simulations are intended to provide information for the Board and management in their monitoring of key financial figures for the Group.

The Group's finance strategy shall ensure that the Group has financial flexibility and that it achieves competitive financial terms. The Group is exposed to financial risk and has defined the following relevant risk areas:

- Financing risk
- Capital management and solvency
- Interest rate risk
- Credit/counterparty risk
- Currency risk

Financing risk

Financing risk is the risk that the Group will be unable to meet its financial obligations when they are due and that financing will not be available at a reasonable price.

The Group seeks to limit financing risk through:

- minimum level of committed capital to cover refinancing requirements
- average time to maturity requirements for the group's financing
- the use of various credit markets and counterparties
- diversified maturity structure for the Group's financing

Capital management and solvency

The main purpose of the Group's capital management is to maintain a good balance between debt and equity, in order to maximise the value of the shares in the Group, while also maintaining a good credit rating and obtaining loan terms with lenders that reflect the risk profile of the Group. The Group has defined a target for the Loan-To-Value ratio which shall not exceed 50 per cent over a time period. There are covenants in the Group's loan agreements that specify requirements in relation to the company's financial strength.

Interest rate risk

Interest rate risk arises from the interest-bearing debt being affected by changes in market rates. Interest rate risk affects the Group's cash flows and the market value of the Group's liabilities. The main purpose of the Group's interest rate strategy is to ensure that the Group achieves the desired balance between the interest expense and interest rate risk. The Group's interest rate risk is managed within the following financial policy requirements:

- minimum 40 per cent of the interest-bearing debt to be hedged at fixed interest rate.
- average remaining time to maturity for interest rate hedges in the interval 2-6 years.
- diversification of the maturity structure for fixed interest rates.

Credit and counterparty risk

Stable, predictable and long-term access to capital is critical for Entra. Entra considers that the ability of creditors to behave predictably over the long term is often dependent on their creditworthiness. For this reason, Entra wants the Group's creditors to be of a good credit quality and has established credit rating limits for the Group's creditors. The credit ratings of the Group's financial counterparties are continuously monitored. The fair value of all financial derivative assets was 274 million (321 million).

Trade receivables at 31 December 2019 was 43 million (47 million), contract assets was nil (439 million), external loans was 143 million (106 million) and other long-term receivables was 91 million (94 million). The concentration of credit risk with respect to trade debtors is assessed to be low, as the majority of Entra's customers are paying their rent in advance. The creditworthiness of counterparties in construction contracts that give rise to contract assets and contracts with debtors that give rise to other receivables are thoroughly evaluated before entering into the contracts.

Cash and bank deposits at 31 December 2019 amounted to 317 million (230 million). The deposits were placed with financial institutions with A-/A3 or better credit ratings.

Currency risk

The Group shall not incur any currency risk. The Group did not have any currency exposure at 31 December 2019.

Financial covenants

There are covenants in the Group's bank loan agreements relating to interest cover ratio (ICR) and the loan-to-value of property (LTV). At 31 December 2019, the Group was not in breach of any covenants.

There are no covenants in relation to the Group's bond or commercial paper loans.

MATURITY PROFILE OF ALL FINANCIAL INSTRUMENTS

Total	2 309	2 690	1 257	8 712	4 860	470	71	1 153	21 522

The table is based on undiscounted contractual cash flows. The maturity analysis is based on the earliest possible redemption for instruments where the counterparty has a choice as to when to redeem the instrument. Estimated interest is based on the interest rate on the individual loan/ instrument on the balance sheet date. In order to manage its liquidity risk, the Group has available, unused credit facilities with Norwegian and international banks, as well as available liquid assets.

UNUSED CREDIT FACILITIES

31.12.2019	TERM TO MATURITY								Total
	Under 3 months	4-12 months	1-2 years	2-4 years	4-6 years	6-8 years	8-10 years	Over 10 years

31.12.2018	TERM TO MATURITY								Total
	Under 3 months	4-12 months	1-2 years	2-4 years	4-6 years	6-8 years	8-10 years	Over 10 years	
Unused credit facilities	-	1 500	-	1 180	2 530	-	-	-	5 210
Total unused credit facilities	-	1 500	-	1 180	2 530	-	-	-	5 210

At 31 December 2019, the Group had 283 (197) million of available liquid assets. See Note 25.

Interest rate risk

The Group's liabilities are subject to fixed interest rates (59 per cent of liabilities at 31 December 2019 compared to 57 per cent at 31 December 2018). The Group uses a variety of derivatives to adapt its portfolio to the chosen fixed rate structure. The choice of fixed interest profile is based on an evaluation of the Group's financial strength and ability to generate long-term, stable cash flow.

At 31 December 2019, the weighted average remaining term to maturity was 3.0 years (3.4 years). The average interest rate was 2.99 per cent (2.85 per cent) at 31 December 2019.

The table below shows the nominal value of outstanding current and non-current interest-bearing debt including derivatives.

MATURITY STRUCTURE OF THE GROUP'S EXPOSURE TO NOMINAL INTEREST RATE RISK

As at 31.12.2019	31.12.2020	31.12.2021	31.12.2023	31.12.2025	31.12.2027	31.12.2029	31.12.2029+	Total

KEY FIGURES FOR THE GROUP'S FINANCIAL INSTRUMENTS

	2019	2018
Nominal value of interest rate derivatives on the balance sheet date ¹⁾	12 010	14 260
of which		
- Fixed-to-variable swaps ¹⁾	3 000	3 200
- Variable-to-Fixed swaps	9 010	11 060
Range of fixed interest rates	From 1.1050 % to 5.6450 %	From 1.1050 % to 5.800 %
Variable rate basis	NIBOR	NIBOR
Average fixed rate excl. forward starting swaps	2.41 %	2.93 %
Average fixed rate incl. forward starting swaps	2.07 %	2.00 %
Fair value of derivatives on the balance sheet date (NOKm)	-68	-159
Change in fair value of interest rate derivatives over the year	46	99

¹⁾ 3,000 million (3,200 million) of swaps linked to the fixed-interest bonds issued by the Group are included in the volume of interest rate swaps. These bonds are swapped to a variable rate in order to ensure that the Group is in a position to manage its interest rate fixing independently of the bonds. The real volume used for interest rate fixing is therefore 9,010 million (11,060 million). At 31 December 2019 the Group has no interest rate options or option-related products.

NOTE 5 RISK LEASE MANAGEMENT

All amounts in NOK million

The Group mainly enters into lease contracts with fixed rent for the lease of property. Lease payments for the majority of the contracts include CPI increases.

THE GROUP'S FUTURE ACCUMULATED RENT FROM NON-TERMINABLE OPERATIONAL LEASE CONTRACTS AT 31.12.

	2019	2018
≤ 1 year	2 073	2 302
1 year < 5 years	8 679	8 856
≥ 5 years	6 127	6 425
Total ¹⁾	16 878	17 583

THE GROUP'S LEASE CONTRACTS AT 31.12 HAVE THE FOLLOWING MATURITY STRUCTURE MEASURED IN ANNUAL RENT ¹⁾

Remaining term	No. of contracts	2019 Contract rent	Contract rent, %	No. of contracts	2018 Contract rent	Contract rent, %
≤ 1 year	238	250	10	243	227	9.5
1 year < 5 years	267	1 015	41	243	880	36.9
5 years < 10 years	101	847	35	112	844	35.4
≥ 10 years	26	343	14	28	433	18.2
Total	632	2 456	100.0	626	2 385	100.0

The table above shows the remaining non-terminable contractual rent for current leases without taking into account the impact of any options.

¹⁾ The rent is stated as the annualised contractual rent, and is therefore not reconcilable with the rental income for the year for accounting purposes.

OTHER PARAMETERS RELATING TO THE GROUP'S LEASE PORTFOLIO

	2019				2018			
	Area (sqm.)	Occupancy (%)	Wault (yrs)	Share of public sector tenants (%)	Area (sqm.)	Occupancy (%)	Wault (yrs)	Share of public sector tenants (%)
Oslo	583 428	97.0	6.7	58	611 397	96.6	6.0	62
Trondheim	154 776	95.4	7.2	67	133 668	97.4	7.7	75
Bergen	119 533	96.1	6.0	59	104 986	93.2	7.4	56
Sandvika	98 961	99.8	8.4	57	98 733	99.4	9.2	61
Stavanger	78 607	99.4	7.2	50	78 612	95.8	8.5	51
Drammen	70 422	98.1	6.2	81	70 405	98.4	6.9	84
Total management portfolio	1 105 727	97.1	6.8	60	1 097 801	96.5	6.7	63
Project portfolio	107 201		9.6	76	103 322		17.1	76
Regulated development sites	114 859		0.3	-	97 859		0.4	-
Total property portfolio	1 327 787		6.9	61	1 298 982		7.4	64

On account of the high occupancy rate, the high proportion of public sector tenants and the relatively long average remaining contract term, the risk to the Group's cash flow is considered low.

NOTE 6 SEGMENT INFORMATION

All amounts in NOK million

The Group has one main operational unit, led by the COO. The property portfolio is divided into six different geographic areas in Oslo, Sandvika, Drammen, Stavanger, Bergen and Trondheim, with management teams monitoring and following upon each area. The geographic units are supported by a Market and Property Development division, Project Development division and a Digital and Business Development division. In addition, Entra has group and support functions within accounting and finance, legal, investment, procurement, communication and HR.

The geographic areas do not have their own profit responsibility. The geographical areas are instead followed up on economical and non-economical key figures ("key performance indicators"). These key figures are analysed and reported by geographic area to the chief operating decision maker, that is the board and CEO, for the purpose of resource allocation and assessment of segment performance. Hence, the Group report the segment information based upon these six geographic areas.

	No. of properties	Area	Occupancy	Wault	Market value		12 month rolling rent		Net yield	Market rent	
31.12.2019	(#)	(sqm.)	(%)	(yrs)	(NOKm)	(NOK/sqm.)	(NOKm)	(NOK/sqm.)	(%)	(NOKm)	(NOK/ sqm.)
Oslo	35	583 428	97.1	6.7	28 163	48 272	1 380	2 365	4.5	1 545	2 647
Trondheim	11	154 776	95.2	7.2	4 506	29 111	255	1 648	5.3	272	1 760
Bergen	8	119 533	95.6	6.0	4 794	40 105	239	1 999	4.6	278	2 327
Sandvika	9	98 961	99.8	8.4	2 922	29 528	173	1 747	5.5	150	1 521
Stavanger	5	78 607	99.4	7.2	2 293	29 174	142	1 808	5.8	133	1 691
Drammen	8	70 422	98.1	6.2	2 085	29 611	129	1 825	5.8	121	1 720
Total management portfolio	76	1 105 727	97.1	6.8	44 764	40 483	2 318	2 096	4.8	2 500	2 261
Project portfolio	7	107 201		9.5	3 368	31 420

Total property portfolio	89	1 327 787		6.9	48 964	36 877					

The calculation of net yield is based on the valuers' assumption of ownership costs, which at 31.12.19 corresponds to 7.6 per cent of market rent.

The Groups 20 largest tenants accounts for approximately 40 per cent of the Group's total rental income. The Group does not have any tenants contributing to more than 10 per cent of the Group's rental income.

NOTE 8 INFORMATION ABOUT FAIR VALUE

All amounts in NOK million

Investment properties are valued at fair value based on independent external valuations.

Financial derivatives are measured at fair value using valuation methods where the significant parameters are obtained from quoted market data.

The Group uses the following hierarchy to classify assets and liabilities, based on the valuation methods used to measure and disclose their fair value.

Level 1: Quoted (unadjusted) prices in active markets for identical assets and liabilities.

Level 2: Other techniques where all of the parameters that have a significant impact on measuring fair value are either directly or indirectly observable.

Level 3: Valuation techniques that use parameters that significantly affect the valuation, but which are not observable.

ASSETS MEASURED AT FAIR VALUE

	31.12.2019	Level 1	Level 2	Level 3

The difference between the fair value and the amortised cost of interest-bearing liabilities is described in note 27. Other financial liabilities, except for the amounts above, are short term and the difference between the fair value and the amortised cost is marginal.

NOTE 9 CONSTRUCTION CONTRACTS

All amounts in NOK million

In 2018, the Group entered into a property swap transaction with Aberdeen Eiendomsfond Norge I regarding certain properties in Oslo, including Tollbugata 1A, which was under redevelopment. Revenue from the construction contract and related costs were recognised over time according to the stage of completion. In 2019, the Group recognised other revenue of 185 million (429 million) and other costs of 166 million (429 million). The redevelopment was completed in October 2019 and the property was delivered to the buyer in November 2019.

The change in contract assets relates to the progression of the construction contracts. The net balance sheet position for ongoing construction contracts is as follows:

	2019	2018
Contract assets	-	439
Total	-	439
The contract assets relates to:		
Amounts due from reclassification from investment properties	-	429
Aggregate costs incurred	-	10
Total	-	439

Entra does not have any material contract liabilities.

¹⁾ Salaries, performance-related pay and other taxable benefits includes a 10 million (13 million) provision for performance-related pay for all employees in 2019, which has not yet been paid out.

NOTE 15 STATEMENT ON THE DETERMINATION OF SALARIES AND OTHER REMUNERATION OF SENIOR EXECUTIVES

STATEMENT ON THE DETERMINATION OF SALARIES AND OTHER REMUNERATION OF SENIOR EXECUTIVES

The statement on the remuneration of the Chief Executive Officer (CEO) and other senior executives (hereafter "Senior Executives") of the company has been prepared in accordance with the provisions of the Norwegian Public Limited Companies Act, the Norwegian Accounting Act and the Norwegian Code of Practice for Corporate Governance.

The Board of directors believe that the Norwegian Government's guidelines on remuneration of Senior Executives are well suited for the determination of salaries and other remuneration of Senior Executives. Entra thus seeks to comply with these guidelines.

Guidelines for management remuneration

Remuneration of Senior Executives is based on the following general principles:

- Entra shall be a professional organisation that attracts and retains skilled personnel and develops the competence of its staff. Entra thus needs to use remuneration, including competitive salaries, in order to ensure that the Group can recruit and retain competent and attractive expertise
- Moderation in the level of salaries of the Group's employees is of importance
- Management remuneration shall be competitive, but not leading in the relevant industry
- The fixed salary shall be the main element of the remuneration but all remuneration elements shall be considered in total
- The targets for any performance-related pay scheme shall be objective, measurable and definable, and there should be a clear correlation between the Group's business goals and the targets in such performance-related pay scheme
- Senior Executive remuneration shall be transparent and in line with the principles of good corporate governance

Process for determination of remuneration

The Board has established a separate Remuneration Committee consisting of the Chair of the Board and one additional board member to follow up on the remuneration of the Group's Senior Executives. The CEO normally participates in the committee's meetings unless the committee is considering issues regarding the CEO.

The Remuneration Committee functions as an advisory body for the Board and the CEO and is responsible primarily for:

- Making recommendations to the Board based on the committee's evaluation of the principles and systems underlying the remuneration of the CEO and other Senior Executives
- Making recommendations to the Board based on the committee's evaluation of the overall remuneration of the CEO, including the annual basis for bonus payments and bonus payments actually made
- Assisting the CEO in determining the remuneration of the other Senior Executives
- Advising the Board and the CEO in compensation matters which the committee finds to be of material or principle importance for Entra

Determination of remuneration in 2020

The guidelines for management remuneration set forth above form the basis for all remuneration of Senior Executives. The Board of Directors furthermore proposes that the following principles shall apply for 2020 and up until the annual shareholders' meeting in 2021.

The total remuneration of the CEO and other Senior Executives consists of a fixed package of salary and benefits supplemented by performance-based bonuses, share-based long-term incentive plans, employee share plans, pension and insurance arrangements.

Fixed remuneration

The fixed remuneration provided to Senior Executives includes a base salary (which is the main element of remuneration) and benefits in kind such as a car allowance, mileage agreements and telephone. The Senior Executives also have insurance coverage and other benefits in line with what is offered to the other employees in accordance with collective agreements, legislation and normal practice in Norwegian companies.

Performance-related pay

The Group operates performance-related pay schemes for Senior Executives. For the Group's Senior Executives, performance-related pay in 2020 includes a performance-related pay scheme ("STI") and a long-term performance based share incentive program ("LTI").

STI scheme

The STI scheme is based on set targets at Group level in accordance with Board approved scorecards for 2020, as well as predefined personal targets. The scorecard for 2020 consist of the following KPI's and topics:

- NOI margin (net operating income less administrative cost/rental income)
- Customer satisfaction score
- Energy consumption and waste management in the property portfolio
- HSE (health, safety and the environment)
- Employee satisfaction
- Compliance

For the CEO and the deputy CEO the STI scheme has a maximum limit of 50 per cent of base salary and for other Senior Executives the maximum limit is 30 per cent of base salary.

LTI scheme

The LTI scheme is based on two Key Performance Indicators (KPIs); Return on Equity before tax (RoE) and Total Shareholder Return (TSR), each weighting 50 per cent. The Board believes that these KPIs align the interest of Senior Executives and shareholders in a beneficial manner, even though both KPIs are also influenced by external factors beyond the control of management.

Actual performance is determined on a linear target scale between a hurdle at 80 per cent and a cap at 120 per cent for both KPIs.

1. Return on Equity: three-year average RoE compared to a target determined by the Board of Directors.
2. Total Shareholder Return: annual Entra TSR performance compared to the performance of the FTSE EPRA/NAREIT index.

OVERVIEW OF REMUNERATION SCALE LTI SCHEME 2020

	Target scale 2020 (%)			Maximum LTI result CEO and deputy CEO (%) ¹⁾	Maximum LTI result Senior Executives (%) ¹⁾
	80	100	120		
RoE	4.5	5.6	6.7	15	10
TSR	80 % of index	100 % of index	120 % of index	15	10
Result LTI	-	50	100	30	20

¹⁾ Calculated as actual achieved RoE / TSR divided by target RoE / TSR ("Result"). This Result is compared to the target scale for 2019 and if between 80 and 120 per cent, the linear percentage achievement is multiplied by the maximum LTI result. I.e. if the Result is 100 per cent on the target scale, LTI remuneration is calculated as 50 per cent multiplied by the maximum LTI of 20 per cent and 30 per cent for Senior Executives and CEO/deputy CEO, respectively. The maximum LTI payout is 20 and 30 per cent of the base salary for Senior Executives and CEO/deputy CEO, respectively.

The LTI remuneration will be distributed in shares which will have a vesting period of one year and a lock-up period of three years. LTI remuneration is not included in the basis for pensionable salary.

Share purchase scheme

The CEO and other Senior Executives are eligible to participate fully in Entra's discounted employee share purchase plan on the same terms as all other employees.

Pension benefits

The CEO and other Senior Executives has a contribution-based service pension on the same terms as other employees. The contributions are 5 per cent of salaries between 0 G and 7.1 G and 15 per cent of salaries from 7.1 G to 12 G.

Board compensation for company management and other employees

The CEO and the other Senior Executives have a number of internal directorships in subsidiaries and partly-owned companies. They do not receive any remuneration for these directorships.

Employee-elected members of the Board of Entra ASA receive fees in line with shareholder-elected Board members.

Severance package arrangements

The CEO has the right to 6 months' severance pay based on the base salary in cases where the Board takes the initiative to terminate the employment. No other Senior Executives have pre-agreed severance pay agreements.

Determination of remuneration in 2019

Determination of remuneration of Senior executives for 2019 has been carried out in accordance with the guidelines determined by the Board in 2019. The base salary of the Senior Executives increased by on average 4.7 per cent (4.0 per cent) in 2019. Performance-related pay for 2018 was determined and paid in 2019 on the basis of the principles determined in 2018. Performance-related pay for 2019 will be determined and paid in 2020 on the basis of the principles determined in 2019.

OVERVIEW OF TOTAL REMUNERATION TO SENIOR EXECUTIVES IN 2019

PAYMENTS TO SENIOR EXECUTIVES

All amounts in NOK thousand	Salary	Performance related pay (STI) ¹⁾	LTI ²⁾	Benefits in kind	Pension costs	Total remuneration 2019
Sonja Horn, EVP Property Management until 30.06.19, CEO from 01.07.19	3 090	950	456	155	108	4 759

Investment properties	49 095	44 714

No investment properties (3) are held for sale on 31 December 2019.

Investment properties are valued at fair value based on independent external valuations. The valuation method is included at level 3 in the valuation hierarchy. Reference is made to note 8.

For information about valuations and fair value calculations for investment properties, see Note 3 "Critical accounting estimates and subjective judgements".

Certain of the Group's properties are subject to purchase options, as described below.

Pursuant to the lease agreements entered into between Entra and the Norwegian Ministry of Culture on 22 April 2005, 15 October 2003 and 30 June 2005, respectively, the tenant has an option to acquire the three buildings comprising the National Library in Henrik Ibsens gate 110/Observatoriegaten 1 in Oslo Municipality (the refurbished building, the "Magazine" and the office building

“Halvbroren”). The tenant has the right to acquire the refurbished building and the “Magazine” at expiry of each 25 year lease period (expiring on 6 June 2030 and 31 December 2029, respectively). The leases include an unlimited number of 25-year extension periods, at market rents. Further, the tenant has the right to, upon six months’ notice, acquire “Halvbroren” if the tenant itself leases and uses more than 50 per cent of the building. As of 31 December 2019, the tenant leased and used 66 per cent (66 per cent) of the building. The purchase price for all three buildings shall equal the market value of the buildings based on the capitalised future rental income based on the assumption that the lease agreements are continuously prolonged in accordance with the renewal clause in the lease agreements.

Pursuant to the lease agreement entered into between Entra and Bærum municipality on 23 June 2005, which expires on 27 January 2027, the tenant has an option to acquire Vøyenenga School in Bærum municipality. The option is exercisable in 2022 at a purchase price of 86.9 million; and in 2027 at a purchase price of 63.3 million.

Pursuant to the lease agreement entered into between Entra and Oslo Havn KF on 4 October 1979 relating to the Langkaia properties, the lessor has an option to acquire the buildings without any compensation and free of any encumbrances upon expiry of the lease agreement on 1 January 2031. As the property is valued based on the cash flow until expiry of the lease agreement (i.e. no residual value), there will be an ongoing decrease in the balance sheet value until 2030.

Pursuant to the lease agreement entered into between Entra and University of Oslo (“UiO”) on 16 June 2016, the tenant has an option to acquire the property Kristian Augusts gate 15-21 (building and land) in 2034 and in 2044. The purchase price shall be based on a gross market yield (market value) at time of calling the option and valued at a remaining vault of fifteen years of the lease agreement. The gross yield has a cap at 5.25 percent (gross yield < 5.25 per cent). The option to acquire must be called twelve months ahead of the two points in time at the latest. If the option to acquire is called at the first possible point in time (after 15 years), the remaining rent compensation paid by UiO to Entra regarding St. Olavs Plass 5 (previous lease agreement), must be paid in full together with the purchase price for the property.

Pursuant to the lease agreement and option agreement entered into between Entra and BI Norwegian Business School (“BI”) on 15 February 2016, the tenant has an option to acquire the company which owns the building Brattørkaia 16, 5, 10, 15 and 20 years after the lease agreements commences. The lease agreement commenced in 2018, and according to this the options to acquire will be in year 2023, 2028, 2033 and 2038. The purchase price shall be based on a pre-agreed net yield (stated in the option agreement). The net rent at the time of exercising the option, includes value added tax (vat) compensation. The option to acquire must be called twelve months ahead of the four points in time at the latest.

Restricted bank deposits	34	33
Total bank deposits	317	230

Restricted bank deposits relate to the withholding tax account and guarantees for loans.

NOTE 26 SHARE CAPITAL AND SHAREHOLDER INFORMATION

Entra's share capital is 182,132,055 divided into 182,132,055 shares, with each share having a par value of 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra. Entra owns 23,010 (1,062,474) of its own shares at 31 December 2019.

As of 31 December 2019 Entra had 5,846 shareholders (5,267 shareholders). Norwegian investors held 35 per cent (55 per cent) of the share capital and foreign investors 65 per cent (45 per cent) at 31 December 2019.

The tables below sets out the change in share capital, the average number of shares in the last three years, the largest shareholders at year end, and shares owed by directors at 31 December 2019.

	No. of shares	Share capital (NOKm)	Share premium (NOKm)	Face value (NOK)
End of year 31.12.2017	183 732 461	184	2 619	1
End of year 31.12.2018	183 732 461	184	2 619	1
End of year 31.12.2019	182 132 055	182	2 595	1

Paid-in capital amounts to 3,705 million (3,718 million) and consists of 182 million (184 million) in share capital, of which nil (1 million) is related to treasury shares, and 3,523 million (3,535 million) in other paid-in capital.

Entra ASA has a share purchase scheme, offering all employees, including management, the opportunity to purchase shares in Entra ASA at a 20 per cent discount. The shares are subject to two-year lock-in period. The purchase price in the employee offering was calculated as the volume weighted average share price the last 30 days (VWAP) until and including 25 April 2019 less a 20 per cent discount. A total of 92,123 (106,904) shares were acquired and sold to the employees in connection with the share purchase scheme in May 2019. In addition, Entra purchased 10,000 shares in March 2019 in connection with the LTI scheme for senior executives. A total of 11,201 shares were awarded to senior executives in March 2019.

In June 2019, Entra decreased the share capital by 1,600,406 shares as a result of a share buy-back program initiated in June 2018. As of 31 December 2019 Entra has a total of 182,132,055 shares outstanding. As of 31 December 2019 Entra owns 23,010 of its own shares.

For other changes in shareholders' equity, see the consolidated statements of changes in equity.

The 20 largest shareholders as registered in the VPS as of 31 December 2019 were as follows:

Shareholder	No of shares per 31.12.2019	Shareholding %	Country

MORTGAGES

In general the Group's financing is based on the parent company borrowing from external parties using negative pledge clauses. Wholly-owned subsidiaries are generally financed using intra-group loans.

For projects/properties with special characteristics, separate mortgage-based financing can be arranged. At 31 December 2019, there are one bond loan that is secured with pledge on assets. The bond of 1,100 million (1,100 million) is secured against the National Library and associated buildings, located at Henrik Ibsens gate 110 in Oslo. The lender also has a mortgage on the rental income from the property.

For subsidiaries that are not wholly-owned by Entra ASA, separate financing is generally arranged without any guarantee from the shareholders. This kind of financing is generally secured through a mortgage.

	2019	2018
Carrying amount of liabilities secured through mortgages	2 541	2 581
Carrying amount of mortgaged assets		
Investment properties	5 056	4 820

NOTE 28 TAX

All amounts in NOK million

INCOME TAX EXPENSE

	2019	2018
Tax payable	11	13
Change in deferred tax on profit and loss	498	325
Change in deferred tax on comprehensive income	1	-2
Income tax expense	510	338

INCOME TAX PAYABLE IS CALCULATED AS FOLLOWS

	2019	2018
Profit before tax	3 735	3 073
Share of profit/loss at associates and jointly controlled entities	-312	-156
Other permanent differences	-1 107	-298
Historical change in tax - jointly controlled entities	-	-172
Changes in temporary differences	-1 982	-1 894
Changes in loss carry-forwards	-282	-496
Profit for tax purposes	51	56

Tax payable on the balance sheet	11	13
Tax payable on the balance sheet	11	13

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits of the consolidated entities as follows:

	2019	%	2018	%
Profit for accounting purposes multiplied by nominal tax rate	822	22.0	707	23.0
Tax on share of profit/loss at associates and jointly controlled entities	-69	-1.8	-36	-1.2
Tax on permanent differences	-244	-6.5	-69	-2.2
Historical change in tax - jointly controlled entities	-	0.0	-40	-1.3
Devaluation deferred tax asset	-	0.0	-4	-0.1
Effect of change in tax rate from 23 per cent to 22 per cent	-	0.0	-221	-7.2
Tax expense for accounting purposes	509	13.6	338	11.0

From the income year 2019 the tax rate on normal income is reduced from 23 per cent to 22 per cent. Deferred tax as at 31 December 2018 was measured using the new rate. The effect on tax for the period in 2018 was - 221 million.

DEFERRED INCOME TAX

The Group has offset deferred tax assets and deferred tax liabilities on the balance sheet as the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority. The following net value was recognised:

	2019	2018
Deferred tax liability	5 626	5 144
Deferred tax assets	259	283
Net deferred tax	5 367	4 861

CHANGE IN DEFERRED TAX (+)/DEFERRED TAX ASSETS (-)

	Non-current assets	Financial instruments	Current assets	Gains/ losses account	Provisions	Loss carried forward	Total
01.01.2018	4 669	-54	1	39	-19	-186	4 450
Recognised in profit and loss	408	29	3	-16	-2	114	535
Recognised in comprehensive income	-	-	-	-	2	-	2
Consolidation effect Entra OPF change of control	264	-	-	-	-	-168	96
Transferred between categories	-69	-	69	-	-	-	-
Acquisition of subsidiaries	10	-	-	-	-0	-11	-1
Effect of change in tax rate	-230	1	-3	-1	1	11	-221
31.12.2018	5 053	-24	69	22	-19	-240	4 861
Change in accounting principles	51	-	-	-	-54	-	-3
01.01.2019	5 104	-24	69	22	-72	-240	4 858
Recognised in profit and loss	426	13	-3	-1	1	62	498
Recognised in comprehensive income	-	-	-	-	1	-	1
Acquisition of subsidiaries	10	-	-	-	-	-	10
31.12.2019	5 540	-11	66	20	-70	-178	5 367

Deferred tax linked to the retrospective accumulated change in the value of investment properties at 31 December 2019 is 4,582 million (4,050 million).

NOTE 29 PENSIONS

All amounts in NOK million

The Group's pension scheme for new employees is from 1 July 2015 a defined contribution scheme. The defined contribution scheme includes 161 (145) employees in the Group. The defined benefit pension scheme for the group cover a total of 15 (19) current employees and 63 (68) pensioners.

The Group also has a contractual early-retirement scheme (AFP) from the age 62. At 31 December 2019, 9 (9) former employees had chosen to make use of the AFP scheme. The net pension liabilities associated with the AFP scheme amounted to 21 million (24 million), which is included under total pension liabilities in the table below.

The Group's pension scheme satisfies the requirements of the Norwegian Act on Compulsory Occupational Pensions.

The cost for the accounting period shows the employees' pension entitlement of the agreed future pension in the financial year.

THE BALANCE SHEET LIABILITIES HAVE BEEN CALCULATED AS FOLLOWS

	2019	2018
Present value of accrued pension liabilities in defined benefit schemes in unit trusts	185	193
Fair value of pension scheme assets	-131	-130
Employers' NICs accrued	8	9
Net pension liabilities on the balance sheet at 31.12	62	73

CHANGE IN DEFINED-BENEFIT PENSION LIABILITIES OVER THE YEAR

	2019	2018
Pension liabilities at 01.01	193	187
Present value of pensions earned this year	2	2
Interest expense	5	4
Pension benefits paid	-7	-6
Plan amendment	-2	-
Actuarial losses (+)/gains (-)	-6	4
Pension liabilities at 31.12	185	193

CHANGE IN FAIR VALUE OF PENSION SCHEME ASSETS

	2019	2018
Pension scheme assets at 01.01	130	130
Anticipated return on pension scheme assets	3	3
Contributions from employer	7	4
Pension benefits paid	-7	-6
Actuarial losses (-)/gains (+)	-3	-2
Pension scheme funds at 31.12	131	130

TOTAL COST RECOGNISED IN THE INCOME STATEMENT

	2019	2018
Cost of pension benefits accrued during current period	-	3
Employers' National Insurance contributions	-	1
Contribution scheme	14	10
Total pension benefits accrued during the period	15	13
Net interest expense	1	1
Total pension benefits accrued in income statement	16	14
Actuarial losses (-)/gains (+) accrued in comprehensive income	-5	7
Total pension benefits accrued in total comprehensive income	12	22

The actual return on pension scheme assets was 1 million (1 million).

THE FOLLOWING ECONOMIC ASSUMPTIONS HAVE BEEN USED

	2019	2018
Discount rate	2.30 %	2.60 %
Anticipated return on pension scheme assets	2.30 %	2.60 %
Annual wage growth	2.25 %	2.75 %
Annual adjustment to the National Insurance Scheme's basic amount ("G")	1.25 %	2.50 %
Annual adjustment of pensions	1.25 %	1.75 %
Mortality rates	K2013	K2013
Disability rates	200 % * K63	200 % * K63
Proportion of entitled employees making use of AFP	20 %	20 %

The actuarial assumptions are based on generally accepted assumptions in the insurance industry with regard to demographic factors.
The pension scheme assets are invested in government bonds.

AMOUNTS FOR THE CURRENT YEAR AND FOR THE FOUR PREVIOUS YEARS

	2019	2018	2017	2016	2015
Gross defined-benefit pension liabilities	185	193	187	198	172
Fair value pension funds 31.12	-131	-130	-130	-141	-137
Net defined-benefit pension liabilities	54	64	57	56	35

Expected payments to the defined contribution plan for the period 1 January 2020 - 31 December 2020 are 12 million (11 million) and for the defined benefit pension plan 7 million (9 million).

SENSITIVITY ANALYSIS

The present value of pension obligations is dependent on several different factors that are determined by a number of actuarial assumptions.

The assumptions used to calculate net pension costs (revenue) include the discount rate. Any changes to these assumptions will affect the carrying amount of the pension obligations.

The Group determines the relevant discount rate at the end of each year. This is the interest rate used to calculate the present value of the future estimated outgoing cash flows required to fulfil the pension obligations. When determining the relevant discount rate, the Group looks at the interest rate for high-quality corporate bonds or bonds with preference rights, which mature around the same time as the related pension obligations. At 31 December 2019, the discount rate was determined on the basis of bonds with preference rights.

The table below sets out a sensitivity analysis for the assumptions used to calculate pension assets and liabilities.

DISCOUNT RATE

		Impact on liabilities (NOKm)	Impact as a percentage
0.5 percentage point reduction	1.80 %	17	9.6
Discount rate at 31.12.2019	2.30 %	-	-
0.5 percentage point increase	2.80 %	-15	-8.3

WAGE GROWTH

		Impact on liabilities (NOKm)	Impact as a percentage
0.5 percentage point reduction	1.75 %	-1	-0.3
Expected wage growth at 31.12.2019	2.25 %	-	-
0.5 percentage point increase	2.75 %	1	0.3

NOTE 30 OTHER NON-CURRENT LIABILITIES

All amounts in NOK million

	2019	2018
Lease liabilities (see note 32)	228	-
Pension liabilities (see note 29)	62	73
Prepayments from customers	82	89
Subordinated loans	18	13
Seller's credit and withheld purchase price	82	169
Other non-current liabilities	33	113
Total non-current liabilities	505	456

MOVEMENTS IN PROVISIONS FOR NON-CURRENT LIABILITIES

	2019	2018
Movements in provisions		
Opening balance at 01.01.	113	119
Provisions used during the year	-103	-1
Unused provisions reversed during the year	-	-5
Closing balance at 31.12.	10	113

NOTE 31 OTHER CURRENT LIABILITIES

All amounts in NOK million

	2019	2018
Lease liabilities (see note 32)	9	-
Holiday pay owed	17	16
Unpaid government taxes and duties	15	14
Interest accrued	160	130
Tenant prepayments	100	89
Provisions for current liabilities	20	14
Other liabilities	6	18
Total other current liabilities	328	281

Provisions mainly consist of provisions for salaries and fees.

NOTE 32 LEASES

THE GROUP AS A LESSEE

The Group has entered into certain operating leases of ground, parking lots and buildings classified as investment properties, with remaining lease terms between 8 and 60 years. The Group applies the fair value model to right-of-use assets associated with the property lease contracts. Leased assets included in investment properties at 31 December 2019 was 966 million (703 million).

Total future minimum lease payments under non-cancellable operating leases at 31 December 2018 reconciles to lease liabilities recognised at 1 January 2019 as follows:

	2018
≤ 1 year	21
1 year < 5 years	85
≥ 5 years	504
Total	610
Discounted using a weighted average discount rate of 4.97 %	-367
Lease liability recognised as at 1 January 2019	244

The majority of the lease payments for the Langkaia properties, where the lease agreement expires on 1 January 2031, are based on the turnover of the property. Only the fixed parts of the lease payments are included in the lease liability. Variable, turnover based lease payments for the property is included in Operating costs.

See note 27 for details on the movements in lease liabilities during the period.

Set out below are the amounts recognised in profit or loss:

	2019
Interest expense on lease liabilities	12
Expense relating to leases of low-value assets and short-term leases	1
Variable lease payments	9
Total amount recognised in profit or loss	22

The Group had total cash outflows for leases of 31 million in 2019 (32 million).

Refer to note 4 for maturity profile of the Group's lease liabilities based on contractual undiscounted payments as at 31 December 2019.

THE GROUP AS A LESSOR

The Group has entered into operating leases on its investment property portfolio. Refer to note 5 for the Group's future accumulated rent from non-terminable operational lease contracts, maturity structure and further details relating to the Group's lease portfolio.

NOTE 33 SUBSIDIARIES

All amounts in NOK million

The Group comprises the following legal entities at 31 December 2019. All subsidiaries are incorporated in Norway.

NOTE 34 RELATED PARTIES

All amounts in NOK million

The Group's transactions and balances with associates and jointly controlled entities in 2019 mainly related to administrative fees, loans, interest payments on loans and dividends. The aggregate figures are shown in the table below.

	2019	2018
Income statement		
Other revenue	1	2
Dividends	308	231
Balance sheet		
Receivables	-	-
Loans	-	1

NOTE 35 AUDITOR'S FEE

All amounts in NOK thousand

	2019	2018
Statutory audit	2 928	2 882
Tax advice	195	233
Other services not related to auditing	39	35
Other assurance services	717	594
Total auditor's fee (excl. VAT)	3 879	3 744

NOTE 36 EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the net profit attributable to shareholders by the weighted average number of ordinary shares outstanding during the year.

Entra has not issued options or other financial instruments which have a dilutive effect on outstanding shares.

	2019	2018
Total comprehensive income for the year attributable to equity holders of the Company (NOKm)	2 949	2 532
Average number of outstanding shares (Note 26)	182 354 790	183 564 901
Basic earnings per share (NOK)	16	14

NOTE 37 DIVIDEND PER SHARE AND DIVIDEND POLICY

Entra targets a dividend pay-out ratio of approximately 60 per cent of cash earnings. Refer to the alternative performance measures section of the annual report for calculation of cash earnings.

Entra's dividend policy is based on semi-annual dividend payments. In line with the dividend policy, the board of Entra will propose to distribute a semi-annual dividend of 2.40 (2.30) per share for the second half of 2019. In October 2019, Entra paid out 2.30 per share (2.20 per share) for the first six months of 2019. For the financial year 2019 Entra will thus have paid out 4.70 per share (4.50 per share).

Dividend payments to the company's shareholders for the second half year are classified as debt from the date on which a resolution regarding the dividend is passed by the Annual General Meeting.

NOTE 38 LEGAL DISPUTES

Entra is currently involved in legal disputes with Oslo municipality and the Norwegian Ministry of Local Government and Modernisation.

Entra was in 2016 in zoning processes regarding two of the Groups properties in Oslo. Oslo municipality claimed Entra for a contribution for unrelated projects, of which 16 million was paid in 2017. Entra was of the opinion that the claim was unlawful and applied for a ruling by Oslo District Court, which ruled in favour of Entra in June 2019. Oslo municipality has appealed the ruling, and we expect a ruling by the higher court June 2020. Entra's claim is regarded as a contingent asset and is not recognised in the balance sheet.

The Norwegian Ministry of Local Government and Modernisation has had an option to buy the property Munchs gate 4/Keyzers gate 13, which is let to the Norwegian Ministry of Justice and Public Security. In 2013, the Ministry of Local Government and Modernisation gave notice to Entra that they intended to exercise the purchase option on the property in April 2014. Near closing, the Ministry of Local Government and Modernisation gave notice that they would not close the transaction as they were not granted funding to the purchase in the National Budget for 2014.

From that time, Entra has been of the opinion that the purchase option was voided. The Ministry of Local Government and Modernisation had a conflicting view and applied for a ruling by the Oslo District Court, which ruled in favour of the Ministry of Local Government and Modernisation in September 2019. According to the ruling, the Ministry of Local Government and Modernisation has the right to purchase the property as of June 2018 for 486 million. The estimated settlement according to the ruling is reflected in the measurement of the fair value of the property. Entra disagrees with, and has appealed, the ruling, and we expect a ruling by the higher court June 2020.

The current annual rental income is 39 million and the remaining lease term is 15 years. If it, in the end, is not ruled in favour of Entra, the property will be derecognized when Entra ceases to control of the property.

NOTE 1 GENERAL INFORMATION

Entra ASA ("the Company") is listed on Oslo Stock Exchange with the ticker ENTRA. Entra ASA and its subsidiaries (together "Entra" or "the Group") is one of Norway's leading real estate companies, focusing on high quality, flexible office buildings with central locations. The Group owns and manages 89 (92) buildings with a total area of approximately 1.3 million (1.3 million) sqm. As of 31.12.19 the real estate portfolio had a market value of around 49 billion (46 billion). The public sector represents approximately 60 per cent (63 per cent) of the total customer portfolio. Entra's strategic areas are

Oslo, Sandvika, Drammen, Stavanger, Bergen and Trondheim. Entra has its head office in Oslo.

The financial statements were adopted by the Company's Board on 4 March 2020.

The company has changed its presentation form for the statement of income from function to nature in 2019. The 2018 figures has been restated.

NOTE 2 ACCOUNTING PRINCIPLES

ACCOUNTING PRINCIPLES

The most important accounting principles applied in the preparation of the annual financial statements are described below. These principles are applied in the same way for all periods presented, unless otherwise indicated in the description.

Basic principles

The annual financial statements have been prepared in accordance with Norwegian Accounting Act of 1998 and good accounting practice (NGAAP).

The annual financial statements have been prepared on the basis of the historical cost principle.

Presenting the accounts in accordance with NGAAP requires the management to make certain assessments and assumptions. The application of the company's accounting principles also requires management to exercise judgement. Estimates and subjective judgements are based on past experience and other factors that are considered appropriate. Actual results may deviate from these estimates.

Estimates and underlying assumptions are continuously reassessed. Changes in accounting estimates are recognised in the period in which the changes occur if they apply only to that period. If the changes also apply to future periods, the impact is distributed over the current and future periods.

The annual financial statements have been presented on the assumption of the business being a going concern.

General principles for measurement and classification of assets and liabilities

Assets intended for long-term ownership or use are classified as non-current assets. Other assets are classified as current assets. Receivables that are repayable within a year are classified as current assets. When classifying non-current and current liabilities, equivalent criteria have been applied.

Current assets are valued at the lower of the acquisition cost and fair value.

Income recognition

Revenue is recognised when it is earned, i.e. when the claim to remuneration arises. This occurs when the service is performed, as the work is being done. The revenue is recognised with the value of the remuneration at the time of transaction.

Costs

Costs are normally reported in the same period as the related income. Where there is no clear link between expenditure and the income, allocation is determined on the basis of assessment criteria.

Currency

The presentation currency is NOK. This is also the functional currency of the company.

Foreign currency transactions are translated at the exchange rate on the date of the transaction. Monetary foreign currency items on the balance sheet are translated at the exchange rate on the balance sheet date.

Intangible assets - Software

Purchased software is recognised at cost (including expenditure on making programs operative) and is amortised over the expected useful life. Expenses directly associated with development of identifiable and unique software owned by the group and which is likely to generate net financial benefits for more than one year are capitalised as intangible assets, and are depreciated over the useful life, normally 5 years. Expenses relating to the maintenance of software are expenses as incurred.

Property and equipment

Property and equipment are recognised at acquisition cost on the balance sheet and are depreciated to a schedule over the anticipated useful life of the assets. The acquisition cost includes costs

directly related to the acquisition of the asset. Direct maintenance of property and equipment is recognised in the income statement on an ongoing basis. Additions or improvements are added to the asset's cost price and are depreciated in line with the asset.

Subsidiaries

Investments in subsidiaries are included in the company accounts using the cost method. Investments are written down to their fair value if the reduction in value is other than temporary and the write-down appears to be necessary in accordance with generally accepted accounting principles.

Dividends and Group contributions from subsidiaries are recognised as income from the investment in the subsidiary in the year that the allocation is made by the subsidiary. Dividends and Group contributions from subsidiaries that exceed the retained earnings over the period of ownership are considered as repayments of the acquisition cost.

Jointly controlled entities and associates

Jointly controlled entities are entities where the company shares control with other parties, and where an agreement between the parties ensures that strategic decisions on financial and operating policies are unanimous. This applies to companies where a shareholder agreement ensures joint control of the business.

Associates are entities over which the company has significant influence but not control. Significant influence normally exists where the company's investment represents between 20 and 50 per cent of the capital with voting rights.

Investments in jointly controlled entities and associates are included in the company accounts using the cost method. Investments are written down to their fair value if the reduction in value is other than temporary and the write-down appears to be necessary in accordance with generally accepted accounting principles.

Trade receivables

Trade receivables and other receivables are reported at nominal value after deduction of loss provisions. Loss provisions are made on the basis of an individual assessment of each receivables.

Cash and cash equivalents

Cash and cash equivalents consist of bank deposits and other short-term, highly liquid investments with an original term to maturity of no more than three months.

The company has an account in a Group cash pooling arrangement and finances its subsidiaries' liquidity requirements.

Non-current liabilities

Non-current liabilities are shown on the balance sheet at nominal value on the initial date. Premiums and discounts in connection with taking on non-current liabilities, as well as arrangement fees, are accrued over the period of the loan. Similarly, in the event of the repurchase of bonds, premiums and discounts are accrued over the remaining term to maturity for the relevant liabilities.

All of the company's debt is subject to variable rates (including fixed rate bonds, which are swapped to a variable rate). The company has

then used interest rate swaps to convert its debt to fixed rate loans with varying maturities. For information on maturities, please see Note 14. The company accrues these interest-rate swaps in such a way that the fixed rate is expensed in the income statement. On the termination of interest rate swap agreements, the profit or loss is accrued over the remaining term to maturity of the agreement in question.

The company has chosen to apply accounting principles which mean that changes in the value of the company's interest rate swaps are not recognised in the income statement. Hedged items are carried at their nominal value.

In general, the Group's financing is based on negative pledge clauses.

Pension

The company has both a defined-benefit pension scheme and a defined contribution pension-scheme. A defined benefit pension scheme is a pension arrangement that defines the pension payment an employee will receive on retirement. The guarantee means that employees will receive at least 66 per cent of their pension qualifying salary. Any income over and above 12 times the National Insurance Scheme's basic amount is not included in the qualifying salary. The pension benefit payable is based on the employee's salary, average percentage of full-time equivalents and length of service (30 years' service qualifies for a full pension)

The recognised pension obligation relating to defined-benefit plans is the present value of the defined-benefit on the balance sheet date less the fair value of the plan assets. The gross pension obligation is calculated annually by an independent actuary using the projected credit unit method. The gross obligation is discounted using a discount rate based on bonds with preference rights, which mature around the same time as the related pension obligations.

Changes to benefits payable under the pension plan are recognised in the income statement as they arise.

Actuarial gains/losses resulting from new information or changes to actuarial assumptions are recognised against equity.

Defined contribution schemes comprise arrangements whereby the company makes annual contributions to the employees' pension plans, and where the future pension is determined by the amount of the contributions and the return on the pension plan assets. In the defined contribution schemes, the cost is equal to the contributions to the employees' pension savings in the accounting period and are recognised in the income statement in the period in which they accrue.

Tax

The tax expense consists of tax payable and deferred tax. Tax is charged to the income statement, except where it relates to items that are recognised directly in equity. In such cases, the tax is recognised directly in the balance.

Deferred tax is calculated using the liability method for all temporary differences between the tax values and accounting values of assets and liabilities. Deferred tax is defined using tax rates and laws which are enacted or likely to be enacted on the balance sheet date, and which are expected to be used when the deferred tax asset is realised or when the deferred tax is utilised.

A deferred tax asset is recognised to the extent that it is likely that future taxable profit will be available against which the temporary differences can be offset.

In principle, deferred tax is not calculated on temporary differences arising from investments in subsidiaries. This does not apply in cases where the company is not in control of when the temporary differences will be reversed, and it is probable that they will be reversed in the foreseeable future.

STATEMENT OF CASH FLOWS

The statement of cash flows is prepared using the indirect method. This means that the statement is based on the company's profit before tax in order to present cash flows from operating, investing and financing activities respectively. Dividends paid to shareholders are presented under financing activities.

DIVIDENDS

Dividend payments to the company's shareholders for the fiscal year are classified as debt at the balance sheet date.

GROUP

Entra ASA is the parent company of a Group of companies. The consolidated financial statements can be obtained from Entra ASA, Postboks 52, Økern NO-0508 Oslo.

NOTE 3 REVENUE

Sales revenue consists of property management services, project development services and administrative services provided to subsidiaries, associates and jointly controlled entities. All services are delivered in Norway.

NOTE 4 PAYROLL AND RELATED COSTS

All amounts in NOK million

	2019	2018
Salaries, performance-related pay and other taxable benefits ¹⁾	170	157
Employers' National Insurance contributions	26	24
Pension expenses	13	13
Other personnel costs	16	13
Total payroll and related costs	225	207
Number of full-time equivalents	172	150
Number of employees at 31.12.	174	161

¹⁾ See note 15 "Statement on the determination of salaries and other remuneration of senior executives" to the consolidated financial statements for the Entra Group for information and details related to remuneration for senior executives and the Board of Directors.

NOTE 5 OTHER OPERATING COSTS

All amounts in NOK million

	2019	2018
Cost of renting premises	11	11
Consulting services	20	14
Office expenses, furnishings and equipment	20	16
Other costs	21	21
Total operating costs	72	62

NOTE 6 OTHER FINANCIAL INCOME

All amounts in NOK million

	2019	2018
Gain on sales of share	930	270
Other interest income	6	6
Total other financial income	935	276

NOTE 7 OTHER FINANCIAL COSTS

All amounts in NOK million

	2019	2018
Fees and premiums	12	14
Termination cost	42	33
Write-downs of financial assets	78	-
Other financial costs	3	3
Total other financial costs	135	51

NOTE 8 TAX

All amounts in NOK million

	2019	2018
Tax expense		
Change in deferred tax recognised in profit and loss	-17	33
Total tax expense	-17	33

Income tax payable is calculated as follows

Profit before tax	1 117	637
Dividend received	-353	-231
Other permanent differences	-841	-262
Change in temporary differences	39	51
Change in loss carry-forwards	37	-195
Profit for tax purposes	-	-

CHANGE IN DEFERRED TAX (+)/DEFERRED TAX ASSETS (-)

	Non-current assets	Financial instruments	Gains/losses account	Provisions	Loss carried forward	Total
31.12.2017	-7	7	44	-20	-45	-21
Recognised in profit and loss	-	-2	-9	-1	45	33
Recognised in equity	-	-	-	-2	-	-2
Effect of change in tax rate	-	-	-2	1	-	-
31.12.2018	-7	5	34	-21	-1	10
Recognised in profit and loss	1	-3	-7	-	-8	-17
Recognised in equity	-	-	-	1	-	1
31.12.2019	-6	2	27	-20	-9	-6

The tax on profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits as follows:

	2019	%	2018	%
Profit for accounting purposes multiplied by nominal tax rate	246	22.0 %	146	23.0 %
Tax on dividend	-78	-6.9 %	-53	-8.3 %
Tax on permanent differences	-185	-16.6 %	-60	-9.5 %
Effect of change in tax rate	-	0.0 %	(0)	-0.1 %
Tax expenses for accounting purposes	-17	-1.5 %	33	5.1 %

From the income year 2019 the tax rate on normal income is reduced from 23 per cent to 22 per cent. Deferred tax as at 31 December 2018 was measured using the new rate. The effect on tax for the period in 2018 was 1 million.

NOTE 9 INTANGIBLE ASSETS, PROPERTY AND EQUIPMENT

All amounts in NOK million

	Intangible assets	Property and equipment
Acquisition cost at 01.01.2019	47	20
Acquisition	-4	3
Disposal	-43	-3
Acquisition cost at 31.12.2019	-	20
Accumulated depreciation at 01.01.2019	36	10
Depreciation	4	3
Disposal	-40	-
Accumulated depreciation at 31.12.2019	-	12
Carrying amount at 31.12.2019	-	8
Anticipated useful life	3 years	3-5 years
Depreciation schedule	linear	linear

NOTE 10 SUBSIDIARIES, JOINTLY CONTROLLED ENTITIES AND ASSOCIATES

Investments in subsidiaries, jointly controlled entities and associates are recognised using the cost-method.

NOTE 13 SHARE CAPITAL AND SHAREHOLDER INFORMATION

Entra's share capital is 182,132,055 divided into 182,132,055 shares, with each share having a par value of 1.00. All the shares have been issued in accordance with the Norwegian Public Limited Companies Act and are fully paid. Entra has one class of shares. All shares provide equal rights, including the right to any dividends. Each of the shares carries one vote. There are no share options or other rights to subscribe for or acquire shares issued by Entra. Entra owns 23,010 (1,062,474) of its own shares at 31 December 2019.

As of 31 December 2019 Entra had 5,846 shareholders (5,267 shareholders). Norwegian investors held 35 per cent (55 per cent) of the share capital and foreign investors 65 per cent (45 per cent) at 31 December 2019.

The tables below sets out the change in share capital, the average number of shares in the last two years, the largest shareholders at year end, and shares owned by directors at 31 December 2019.

	No. of shares	Share capital (NOKm)	Share premium (NOKm)	Face value (NOK)
End of year 31.12.2018	183 732 461	184	2 619	1
End of year 31.12.2019	182 132 055	182	2 595	1

Entra ASA has a share purchase scheme, offering all employees, including management, the opportunity to purchase shares in Entra ASA at a 20 per cent discount. The shares are subject to two-year lock-in period. The purchase price in the employee offering was calculated as the volume weighted average share price the last 30 days (VWAP) until and including 25 April 2019 less a 20 per cent discount. A total of 92,123 (106,904) shares were acquired and sold to the employees in connection with the share purchase scheme in May 2019. In addition, Entra purchased 10,000 shares in March 2019 in connection with the LTI scheme for senior executives. A total of 11,201 shares were awarded to senior executives in March 2019.

In June 2019, Entra decreased the share capital by 1,600,406 shares as a result of a share buy-back program initiated in June 2018. As of 31 December 2019 Entra has a total of 182,132,055 shares outstanding. As of 31 December 2019 Entra owns 23,010 of its own shares.

The 20 largest shareholders as registered in the VPS as of 31 December 2019 were as follows:

2024	2 000	
Total	6 190	5 210

SPECIAL TERMS AND CONDITIONS IN ENTRA ASA'S LOAN AGREEMENTS

In general, the financing is based on negative pledge clauses.

LOANS AND INTEREST RATE HEDGES

Interest rate hedging at Entra ASA is part of the Group's overall risk management, and must be viewed in that context. Interest-rate positions should support the company's strategic development, risk profile and anticipated future market interest rates based on the Group's interest rate view. The Group's guidelines on managing interest rate risk are expressed as a preferred interest rate structure (standard portfolio).

At 31 December 2019 the weighted average remaining term to maturity was 3.4 years (3.7 years). The company's average interest rate was 2.9 per cent (2.8 per cent) at 31 December 2019.

ENTRA ASA PORTFOLIO OF LOANS AND INTEREST RATE HEDGES HAVE THE FOLLOWING INTEREST RATE MATURITY PROFILE

	%	Fixed interest 2019	INTEREST RATE HEDGE WITH FUTURE START	
			Volume	Maturity (year)
Up to 1 year	45 %	7 860	1 650	6.39
1-2 years	5 %	850		
2-4 years	15 %	2 550		
4-6 years	15 %	2 600		
6-8 years	17 %	3 000		
Over 8 years	3 %	500		
Total	100 %	17 360		

The effect of interest rate hedges is shown in the income statement. The fair value of the company's portfolio of interest rate hedges is not shown on the balance sheet.

INTEREST BEARING DEBT ASSOCIATED WITH HEDGING ACTIVITIES

Entra ASA uses interest rate derivatives and fixed rate loans to manage the interest rate risk associated with the company's interest bearing debt financing.

The company's debt financing consists of bank loans, as well as commercial paper and bonds. The bank loans are subject to variable interest rates. Commercial paper is subject to variable interest rates. The company has issued both fixed-rate and variable-rate bonds. Outstanding fixed-rate bonds are hedged using fixed-to-variable interest rate swaps. As a result, the hedged bonds are classified as part of the company's portfolio of variable rate loans. Fixed rate bonds without hedging amounted per 31 December 2019 to 2.800 million. These bonds are fixed rate and is included as part of the company's cash flow hedges.

NOT VALUE HEDGED FIXED RATE BONDS IN 2019

	Maturity	Nominal value	Market value
ISIN NO0010740061	13.06.2022	800	803
ISIN NO0010766389	02.06.2023	1 100	1 101
ISIN NO0010852684	22.05.2026	900	904
Total		2 800	2 808

The company's exposure to variable interest rates is hedged for cash flow risk using variable-to-fixed interest rate swaps.

CASH FLOW HEDGING

Entra ASA's debt are directly or indirectly subject to variable interest rates. Entra ASA uses variable-to-fixed interest rate derivatives to manage the company's interest rate risk. Cash flows are hedged by matching the terms and volumes of the interest rate derivatives with the expected maturity profile of the company's interest bearing debt. The expected maturity profile of Entra ASA's interest-bearing debt is based on an assessment of the need to refinance existing debt and to obtain additional financing.

The table below shows that after taking into account cash flow hedges, 64 per cent (61 per cent) of the company's interest bearing liabilities are effectively subject to fixed interest rates.

Changes in NIBOR rates will therefore affect the interest expense on 36 per cent (39 per cent) of the company's interest bearing debt.

CASH FLOW HEDGING

	2019	2018
Hedged item		
Variable interest rate liabilities	17 360	16 590
Hedge		
Interest rate swaps (variable-to-fixed)	11 150	10 200
Hedge ratio (unhedged position)	6 210	6 390
Hedge ratio (% hedged)	64 %	61 %

Changes in the cash flow hedges over the financial year:

CHANGE IN VALUE

	2019	2018
Opening balance market value of liability	407	598
Change in value	-119	-190
Closing balance – market value of liability	289	407

The fair value of the company's interest rate swaps used as cash flow hedges specifies the present value of the contractual fixed-interest rate agreements. The present value represents the market value of the company's liabilities to the counterparty of the interest rate swaps. The change in value over the financial year represents the change in the market value of liabilities. The reason for the decrease in the company's market value of liabilities for fiscal year 2019 is mainly a reduced term for old interest rate swaps agreements with high-rate interest rate.

FAIR VALUE HEDGING

Entra ASA has the following fair value hedges for the company's outstanding fixed-rate bonds:

FAIR VALUE HEDGING 2019

	Total	Maturity structure up to 1 year	Maturity structure 1-5 years	Maturity structure > 5 years
Hedged item				
Fixed interest rate liabilities	4 700	700	2 800	1 200
Hedge				
Interest rate swaps (fixed-to-variable)	1 900	700	900	300
Hedge ratio (unhedged position)	60 %	0 %	68 %	75 %
Hedge ratio (% hedged)	40 %	100 %	32 %	25 %

FAIR VALUE HEDGING 2018

	Total	Maturity structure up to 1 year	Maturity structure 1-5 years	Maturity structure > 5 years
Hedged item				
Fixed interest rate liabilities	4 000	500	3 500	-
Hedge				
Interest rate swaps (fixed-to-variable)	2 100	500	1 600	-
Hedge ratio (unhedged position)	47 %	0 %	54 %	0 %
Hedge ratio (% hedged)	53 %	100 %	46 %	0 %

Changes in the value of fair value hedges over the financial year:

CHANGE IN VALUE

	2019	2018
Opening balance – market value of liabilities (+) /receivables (-)	-67	-119
Change in value	41	51
Closing balance – market value of liabilities (+) /receivables (-)	-27	-67

At 31 December 2019, the market value of the company's fair value hedges represented a receivable for the company.

NOTE 15 PENSION

All amounts in NOK million

The company's pension scheme for new employees is from 1 July 2015 a defined contribution scheme. The defined contribution scheme includes 160 (144) employees. The defined benefit pension scheme cover a total of 13 (17) current employees and 63 (68) pensioners.

The company also has a contractual early-retirement scheme (AFP) from the age of 62. At 31 December 2019, 9 (9) former employees had chosen to make use of the AFP scheme. At 31 December 2019, the net pension liabilities associated with the AFP scheme amounted to NOK 21 million (NOK 24 million), which is included under total pension liabilities in the table below

The company's pension scheme satisfies the requirements of the Norwegian Act on Compulsory Occupational Pensions.

THE BALANCE SHEET LIABILITIES HAVE BEEN CALCULATED AS FOLLOWS

	2019	2018
Present value of accrued pension liabilities in defined-benefit schemes in unit trusts	182	190
Fair value of pension scheme assets	-128	-127
Employers' NICs accrued	8	9
Net pension liabilities on the balance sheet at 31.12	61	72

CHANGE IN DEFINED-BENEFIT PENSION LIABILITIES OVER THE YEAR

	2019	2018
Pension liabilities at 01.01	190	185
Present value of pensions earned this year	2	2
Interest expense	5	4
Pension benefits paid	-7	-6
Plan amendment	-2	-
Actuarial losses/(gains)	-6	5
Pension liabilities at 31.12	182	190

CHANGE IN FAIR VALUE OF PENSION SCHEME ASSETS

	2019	2018
Pension scheme assets at 01.01	127	129
Anticipated return on pension scheme assets	3	3
Contributions from employer	7	3
Pension benefits paid	-7	-6
Actuarial (gains)/losses	-2	-2
Pension scheme funds at 31.12	128	127

TOTAL COST RECOGNISED IN THE INCOME STATEMENT

	2019	2018
Cost of pension benefits accrued during current period	2	2
Plan amendment	-2	-
Employers' National Insurance contributions	-	-
Contribution scheme and contractual early-retirement scheme	13	11
Total pension benefits accrued during the period	13	13
Net interest expense	2	1
Total pension benefits accrued in income statement	15	14
Actuarial losses (-)/gains (+) accrued in equity	-5	7
Total pension benefits accrued	9	21

The actual return on pension scheme assets was NOK 1 million (NOK 1 million).

THE FOLLOWING ECONOMIC ASSUMPTIONS HAVE BEEN USED

	2019	2018
Discount rate	2.30 %	2.60 %
Anticipated return on pension scheme assets	2.30 %	2.60 %
Annual wage growth	2.25 %	2.75 %
Annual adjustment to the National Insurance Scheme's basic amount ("G")	2.00 %	2.50 %
Annual adjustment of pensions	1.25 %	1.75 %
Mortality rates	K2013	K2013
Disability rates	200 % * K63	200 % * K63
Proportion of entitled employees making use of AFP	20 %	20 %

The actuarial assumptions are based on generally accepted assumptions in the insurance industry with regard to demographic factors.

The pension scheme assets are invested in government bonds.

	2019	2018
Gross defined-benefit pension liabilities	182	190
Fair value pension funds	-128	-127
Net defined-benefit pension liabilities	53	63

Expected payments to the defined contribution plan and contractual early-retirement scheme for the period 1 January to 31 December 2020 are 11 million and for the defined benefit pension plan 7 million.

To the General Meeting of Entra ASA

INDEPENDENT AUDITOR'S REPORT

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Entra ASA. The financial statements comprise:

- The financial statements of the parent company, which comprise the balance sheet as at 31 December 2019, the income statement and cash flow statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and
- The financial statements of the group, which comprise the balance sheet as at 31 December 2019 and income statement, statement of changes in equity, cash flow for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion:

- The financial statements are prepared in accordance with the law and regulations.
- The accompanying financial statements give a true and fair view of the financial position of the parent company as at 31 December 2019, and its financial performance and its cash flows for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.
- The accompanying financial statements give a true and fair view of the financial position of the group as at 31 December 2019, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the EU.

Basis for Opinion

We conducted our audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the company and the group as required by laws and regulations, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of investment property

Key audit matter

The majority of the Group's assets consist of Investment property. Investment property is recognised at fair value, based on fair values identified by independent valuers. Each quarter, all properties are valued by two independent external valuers. We refer to note 3 "Critical accounting estimates and subjective judgments" for further information.

The fair value is based on assumptions and estimates as well as property specific information. These assumptions and estimates require significant judgment and therefore valuation of investment property is a key audit matter.

How the matter was addressed in our audit

The Group has established internal controls to ensure that relevant property information is included in the external valuations. We have assessed the design of these controls, and for a sample of these controls we have tested if they have operated effectively in the reporting period.

For a sample of the investment properties, we reconciled the property information regarding annual rent and square meters in the external valuers' reports to the Group's own records.

We met with the external valuers, and assessed their qualifications and expertise. We reviewed their terms of engagement in order to determine whether there were unusual fee terms that might have affected their objectivity. We assessed the valuation methods used against generally accepted valuation standards and practices.

For a sample of investment properties, we obtained the external valuers' valuation reports and reconciled the values used in the financial statements to the valuation reports.

For a sample of investment properties, we obtained and assessed the Group's analysis and rationale for the changes in fair value from quarter to quarter.

In carrying out the procedures related to valuation of investment property, we used our internal valuation specialists.

We assessed whether the disclosures in note 3, 8 and 19 regarding valuation of investment properties was adequate.

Other information

Management is responsible for the other information. The other information comprises the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and the Managing Director for the Financial Statements

The Board of Directors and the Managing Director (management) are responsible for the preparation and fair presentation of the financial statements of the parent company in accordance with Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for the preparation and fair presentation of the financial statements of the group in accordance with International Financial Reporting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements of the parent company use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations. The financial statements of the group use the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and the Group's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Opinion on the Board of Directors' report

Based on our audit of the financial statements as described above, it is our opinion that the information presented in the Board of Directors' report and in the statements on Corporate Governance and Corporate Social Responsibility concerning the financial statements, the going concern assumption, and the proposal for the allocation of the profit is consistent with the financial statements and complies with the law and regulations.

Opinion on Registration and Documentation

Based on our audit of the financial statements as described above, and control procedures we have considered necessary in accordance with the International Standard on Assurance Engagements (ISAE) 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, it is our opinion that management has fulfilled its duty to produce a proper and clearly set out registration and documentation of the company's accounting information in accordance with the law and bookkeeping standards and practices generally accepted in Norway.

Oslo, 4 March 2020

State Authorised Public Accountant

Alternative performance measures

Entra's financial information is prepared in accordance with the international financial reporting standards (IFRS). In addition, the company reports alternative performance measures (APMs) that are regularly reviewed by management to enhance the understanding of Entra's performance as a supplement, but not as a substitute, to the financial statements prepared in accordance with IFRS. Financial APMs are intended to enhance comparability of the results and cash flows from period to period, and it is Entra's experience that these are frequently used by analysts, investors and other parties. The financial APMs reported by Entra are the APMs that, in management's view, provide the most relevant supplemental information of a real estate company's financial position and performance. These measures are adjusted IFRS measures defined, calculated and used in a consistent and transparent manner over the years. Operational measures such as, but not limited to, net letting, vacancy and WAULT are not defined as financial APMs according to ESMA's guidelines.

ENTRA'S FINANCIAL APMS:

- Net Income from property management
- Cash earnings
- Market value of the property portfolio
- Net nominal interest bearing debt
- Debt ratio – Loan-to-value (LTV)
- Interest coverage ratio (ICR)
- EPRA Earnings
- Net Asset Value – EPRA NAV and EPRA NNNAV
- EPRA net initial yield
- EPRA cost ratio

All amounts in NOK million

NET INCOME FROM PROPERTY MANAGEMENT & CASH EARNINGS

EPRA reporting

The following performance indicators have been prepared in accordance with best practices as defined by EPRA (European Public Real Estate Association) in its Best Practices Recommendations guide. The EPRA Best Practices Recommendations Guidelines focus on making the financial statements of public real estate companies clearer and more comparable across Europe.

SUMMARY EPRA PERFORMANCE MEASURES

	Unit	2019 / 31.12.2019	2018 / 31.12.2018
A	EPRA earnings per share (EPS)	NOK 5.81	5.59
B	EPRA NAV per share	NOK 151	141
	EPRA triple net asset value per share (NNNAV)	NOK 141	131
C	EPRA net initial yield	% 4.8	5.0
	EPRA, "topped-up" net initial yield	% 4.8	5.0
D	EPRA vacancy rate	% 2.9	3.3
E	EPRA cost ratio (including direct vacancy costs)	% 15.0	14.8
	EPRA cost ratio (excluding direct vacancy costs)	% 13.4	13.3

The details for the calculation of the key figures are shown in tables on the following pages.

EPRA CAPITAL EXPENDITURE

All amounts in NOK million

	2019	2018
Aquisitions	1 174	914
Developments	1 352	1 104
- Newbuild projects	791	812
- Redevelopment projects ¹⁾	561	292
Like-for-like portfolio	120	58
- Tenant alterations	112	51
- Maintenance capex	8	7
Other	41	35
- Capitalised borrowing cost	41	35
Capital expenditure	2 686	2 110

¹⁾ Also includes tenant alterations and maintenance capex when this is done as a part of asset redevelopment

A. EPRA EARNINGS

EPRA Earnings is a measure of the operational performance of the property portfolio. EPRA Earnings is calculated based on the income statement, adjusted for non-controlling interests, value changes on investment properties, changes in the market value of financial instruments and gains/losses on the sale of properties and the associated tax effects.

All amounts in NOK million

	IFRS reported 2019	EPRA adjustments 2019	Non- controlling interests 2019 ¹⁾	EPRA Earnings 2019	IFRS reported 2018	EPRA adjustments 2018	Non- controlling interests 2018 ¹⁾	EPRA Earnings 2018
Rental income	2 338	-	153	2 185	2 243	-	136	2 106
Operating costs	-189	-	-10	-179	-184	-	-11	-173

Tax payable ³⁾	-11	-	-4	-7	-13	-	-4	-9
Change in deferred tax ³⁾	-498	-187	-19	-292	-325	-35	-7	-283
Profit for period/EPRA Earnings	3 225	2 077	89	1 059	2 735	1 624	85	1 026
Average outstanding shares in period (million)				182.4				183.6
EPRA Earnings per share (NOK)				5.81				5.59

¹⁾ Excluding non-controlling interests in relation to EPRA adjustments.

²⁾ From Q1 2019, earnings from the associated company OSU are excluded from EPRA Earnings as the business of this company is development of properties for sale and is not considered relevant for measurement of the operating performance of the underlying property portfolio under management.

³⁾ The corporate income tax rate is 22 per cent for 2019 and 23 per cent for 2018.

B. NET ASSET VALUE – EPRA NAV AND EPRA NNNAV

The objective with EPRA NAV is to demonstrate the fair value of net assets given a long-term investment horizon. EPRA NAV is calculated as net asset value adjusted to include market value of all properties in the portfolio, and to exclude certain items not expected to crystallise in a long-term investment property business model such as e.g. financial derivatives and deferred tax on the market value of investment properties.

The objective with EPRA NNNAV is to report the fair value of net assets in the Group on the basis that these are immediately realised. EPRA NNNAV is EPRA NAV adjusted to reflect the fair value of debt and derivatives and in order to include deferred tax on value changes.

All amounts in NOK million

	31.12.2019	31.12.2018
Total equity	24 517	22 269
Less: Non-controlling interests	1 947	1 746
NAV per financial statement	22 570	20 524
Add: Adjustment to property portfolio	-	1
Add: Revaluation of investments made in JVs	400	981
Add: Net market value on financial derivatives	68	159
Add: Deferred tax arising on revaluation moments	4 517	4 065
EPRA NAV	27 555	25 729
Market value on property portfolio	48 964	45 630
Tax value on property portfolio	18 944	17 800
Basis for calculation of tax on gain on sale	30 021	27 830
Less: Market value of tax on gain on sale (5 % tax rate)	1 501	1 391
Net market value on financial derivatives	68	159
Tax expense on realised financial derivatives ¹⁾	15	35
Less: Net result from realisation of financial derivatives	53	124
Market value of interest bearing debt ²⁾	20 212	19 351
Nominal value of interest bearing debt	19 901	19 171
Basis for calculation of tax on realisation of interest bearing debt	311	180
Market value of tax on realization ¹⁾	68	40
Less: Net result from realisation of interest bearing debt	242	140
Less: MV of tax on gain on sale (5 % tax rate) & realisation of financial derivatives in JVs	93	142
EPRA NNNAV ²⁾	25 666	23 931
Outstanding shares at period end (million)	182.1	182.7
EPRA NAV per share (NOK)	151	141
EPRA NNNAV per share (NOK) ²⁾	141	131

¹⁾ 22 per cent from 31.12.2018

²⁾ The market value of interest bearing debt was in the report for the fourth quarter of 2019 reported as 19,910, resulting in a reported EPRA NNNAV of 25,901 (142 per share).

C. EPRA NET INTIAL YIELD

EPRA Net initial yield measures the annualised rental income based on the cash rents passing at the balance sheet date, less non-recoverable property operating expenses, divided by the market value of the property, increased with (estimated) purchasers' costs.

EPRA "topped-up" net initial yield incorporates an adjustment to the EPRA NIY in respect of the expiration of rent-free periods (or other unexpired lease incentives such as discounted rent periods and step rents).

All amounts in NOK million

	Oslo	Trondheim	Sandvika	Stavanger	Drammen	Bergen	Total

<i>GRI Standard: Environmental Compliance</i>		
307-1	Non-compliance with environmental laws and regulations	There has been no such incidents in 2019

GRI Standard: Supplier environmental assessment

308-1	New suppliers that were screened using environmental criteria	ESG: Ethics and anti-corruption, supplier qualification requirements

SOCIAL

103-1-3	Management approach for social standards and disclosures	AR: Board report; ESG: Management approach; Materiality analysis and focus areas; Motivated employees; Ethics and anti-corruption; Health, safety and environment (HSE); Urban development

GRI Standard: Labor/Management relations

402-1	Minimum notice periods regarding operational changes	ESG: Motivated employees - Workers' rights

GRI Standard: Occupational Health and Safety

403-1	Workers representation in formal joint management-worker health and safety committees	ESG: Motivated employees - Safety officer, working environment committee and board representation
403-2	Types of injury and rates of injury, occupational diseases, lost days, and absenteeism, and number of work-related fatalities	ESG: Health, Safety and Environment (HSE); EPRA Sustainability Performance Measures

GRI Standard: Training and education

404-1	Average hours of training per year per employee	ESG: EPRA Sustainability Performance Measures
404-3	Percentage of employees receiving regular performance and career development reviews	ESG: EPRA Sustainability Performance Measures

GRI Standard: Diversity and Equal Opportunity

405-1	Diversity of governance bodies and employees	ESG: EPRA Sustainability Performance Measures

GRI Standard: Non-discrimination

406-1	Incidents of discrimination and corrective actions taken	There has been no such incidents in 2019

GRI Standard: Freedom of Association and Collective Bargaining

407-1	Operations and suppliers identified in which the right to exercise freedom of association and collective bargaining may be violated or at significant risk	ESG: Ethics and anti-corruption There has been no such incidents in 2019

GRI Standard: Child Labor

408-1	Operations and suppliers at significant risk for incidents of child labor	ESG: Ethics and anti-corruption There has been no such incidents in 2019

GRI Standard: Forced or Compulsory Labor

409-1	Operations and suppliers in which the right to freedom of association and collective bargaining may be at risk	ESG: Ethics and anti-corruption There has been no such incidents in 2019

GRI Standard: Local Communities

413-1	Operations with local community engagement, impact assessments, and development programs	ESG: Community Engagement

GRI Standard: Marketing and Labeling

417-1	Requirements for product and service information and labeling	Entra certify new-build and rehabilitation projects in accordance with the BREEAM standard. The BREEAM standard is a third party certification of the assessment of an asset's environmental, social and economic sustainability performance, using standards developed by BRE
417-2	Incidents of non-compliance concerning product and service information and labeling	There has been no such incidents in 2019
417-3	Incidents of non-compliance concerning marketing communications	There has been no such incidents in 2019

GRI Standard: Customer Privacy

418-1	Substantiated complaints concerning breaches of customer privacy and losses of customer data	There has been no such incidents in 2019

GRI Standard: Socioeconomic Compliance

419-1	Non-compliance with laws and regulations in the social and economic area	There has been no such incidents in 2019

Reporting according to the Task Force on Climate-Related Financial Disclosures (TCFD)

Entra has started a process to adapt the company's reporting in accordance with the recommendations in the TCFD framework to describe how we work strategically with climate related risks and opportunities. Entra's approach to climate risk and opportunity is discussed in our ESG Report on pages 34–6, and as part of the overall risk analysis on page 28–34. The table below describes the scope of the reporting and page references are made for the respective areas.

Governance Recommended disclosures	Strategy Recommended disclosures	Risk Management Recommended disclosures	Indicators and goals Recommended disclosures
A. The Board's monitoring of climate-related risks and opportunities -> pages ESG report pg 36 and 46–53	A. Climate-related risks and opportunities the organisation has identified -> pages Rsk factors pg 34, ESG report pages 46–53	A. The organization's process for identifying climate-related risks -> pages Rsk factors pg 28–34, ESG report pages 46–53	A. The organisations indicators for evaluating climate-related risks and opportunities -> pages ESG report pages 46–53
B. Management's role regarding assessing and managing climate-related risks and opportunities -> pages ESG report pg 36 and 46–53	B. Impact from risks and opportunities on the organisations operations, strategy and financial planning -> pages Rsk factors pg 28–34, ESG report pages 46–53	B. The organizations' processes for managing climate-related risks -> pages Risk factors pg 28–34, ESG report pages 46–53	B. Emissions of Scope 1, 2 and 3 under the Greenhouse Gas Protocol -> pages EPRA reporting pages 169–174
	C. Preparation of the organisation's strategy in consideration of various climate-related scenarios -> pages 46–53	C. Integration of the above processes in the organizations general risk management -> pages Risk factors pg 28–34, ESG report pages 46–53	C. Goals for managing climate-related risks and opportunities -> pages ESG report pages 40–52

EPRA Sustainability Performance Measures

Entra reports on its energy, GHG emissions, water, waste and social governance impacts in accordance with the EPRA Sustainability Best Practice Recommendations (SBPR). This common reporting standard is a framework developed by property companies to promote transparency in sustainability reporting. To give our stakeholders greater confidence, this report has been independently assured by Deloitte based on the international standard ISAE 3000 "Assurance Engagements other than Audits or Reviews of Historical Financial Information".

ORGANIZATIONAL BOUNDARY

Entra reports on asset-level sustainability impacts for assets within the management portfolio over which it has full operational control. This boundary coincides with the Group organizational structure as determined for financial reporting purposes and excludes assets under construction or in redevelopment. We do not report data for our single-let properties as we have no management control of these properties and are unable to collect utilities data. The environmental reporting period corresponds to the period from 1 January to 31 December.

DATA COVERAGE

For each asset-level performance measure, Entra discloses the number of properties reported on out of the total number of management properties in the Group portfolio for. Entra does not presently have data collection on each asset-level performance measure for every asset within the organizational boundary but aims to increase the data coverage going forward as it creates conditions for proper efficient technical management in our buildings.

Like-for-like performance measures include properties consistently in operation during the two most recent full reporting years and exclude asset acquisitions, disposals, major refurbishments and developments as well as fully vacant properties. Like-for-like performance measures also exclude assets with changes in the level of data coverage between the two reporting periods where the missing data cannot be reliably estimated.

ESTIMATION

In general estimation of missing data for partially unavailable or unreliable utility consumption for asset-level performance measures is carried out to a very small extent. In these cases, data for missing periods is estimated using known consumption from other periods for the metered supply in question. The proportion of estimated data is disclosed as a percentage of the total data provided for the relevant performance measure. The same method of estimation is used for all performance measures and for all assets. For 2019 there was no estimation except for HQ as described below.

Note that while there is limited estimation of waste data itself, the percentage of waste per disposal route is calculated by multiplying

actual waste created by the proportion of waste solutions for each waste group. This information on waste processing is provided directly by our waste management supplier.

As information is unavailable for Entra's office space HQ only, all performance measures for Entra's headquarters (excluding electricity) are calculated based on Entra's proportionate share of actual utility data for the property where Entra is a tenant.

Entra does not carry out data adjustment based on climate or occupancy rates. Variations in asset-level performance attributed to fluctuations in these factors are instead commented directly in the performance narrative, if relevant.

THIRD PARTY ASSURANCE

Entra has obtained third party assurance of its sustainability data for this reporting period. Statement from our auditors can be found on pages 68-69.

LANDLORD/TENANT BOUNDARY

Entra is responsible, as landlord, for obtaining a portion of the overall utilities consumed at the assets level. Total landlord-obtained consumption includes both utilities for common areas as well as tenant consumption sub-metered from the landlord. The remaining consumption is obtained and paid directly by the tenants. Entra has access to tenant-obtained consumption data and reports on whole building consumption for all asset-level environmental performance measures. Utilities purchased by Entra as the landlord (landlord-obtained) and those directly purchased by tenants (tenant-obtained) are presented separately under total consumption.

NORMALISATION

As a majority of Entra's management portfolio is utilized as office space, floor area is deemed the most appropriate denominator for asset-level performance measures. Whole building consumption is divided by Gross Leasable Area (GLA). The denominator GLA is closely aligned with the numerator as total consumption includes tenant-obtained utilities and is also consistent with the areas disclosed in Entra's financial reporting.

For absolute intensities, Entra either includes pre-existing data or pro-rates consumption up to the full year for properties entering or exiting the management portfolio during the reporting period. This removes the mismatch between the collected consumption data in the numerator and GLA as the denominator for more comparable absolute intensities.

Number of hours/days worked is used as the denominator when calculating health and safety performance measures.

SEGMENTAL ANALYSIS

Segmental reporting and analysis by geography or property type does not grant significantly greater insight into asset-level performance measures. As presented in its financial reports, Entra's management portfolio contains mainly office properties within Oslo, Norway and other regional cities, of which Oslo represents the majority location of portfolio value.

DISCLOSURE ON OWN OFFICES

Entra discloses the environmental impact of its own occupation separately within its sustainability reporting. As Entra is a tenant at a property within its own management portfolio, this data is also included in the total portfolio consumption. Please refer to the paragraph on estimation for a note concerning the calculation of data for Entra's headquarters.

PERFORMANCE NARRATIVE ON SOCIAL PERFORMANCE

Diversity-employee gender is calculated as a percentage of female to men. The women's share of Group employees has increased from 2018 to 2019. Diversity pay gender ratio is calculated men to woman. In 2019 Entra hired a female CEO which has affected the gender pay ratio from 2018 to 2019. The Chairman in Entra since 2012 is a woman.

Employee turnover is stable. In 2019, 32 people started working in Entra and 17 people left the company. Over a two-year period Entra has focused on new technology, increased environmental activities, and staffed up with a new digitalization department. New hire rates are calculated based on people started in Entra divided on the number of employees by the end of 2019. Turnover rate is calculated based on people that left Entra divided on the number of employees by the end of 2019.

There has been no serious incidents involving direct employees in Entra in 2018 or 2019 (calculated per 100,000 hours worked). The Injury rate, Lost day rate and Accident severity rate has been 0 both in 2018 and 2019.

PERFORMANCE NARRATIVE ON OUR MANAGED ASSETS

The following provides a short commentary on the asset-level performance indicators for Entra's management portfolio and headquarters for 2019. For an outline on our plans for managing future performance please refer to the ESG report, pages 40–53.

MANAGEMENT PORTFOLIO:

Energy

Entra's focus on improving energy efficiency has given results over the past 10 years, not only through concrete measures such as replacing central environment operation control systems and improving the zoning control of outdoor environments but also by generally optimizing the management of its properties. In 2019, absolute electricity consumption across the 66 managed assets with available data, totaled 89,111 MWh, a 4 per cent decrease from 2018. Measured as like-for-like, the increase was 4 per cent. Landlord-obtained consumption amounted to 59,633 MWh, of which 1.3 per cent came from renewable resources. Entra aims to increase this proportion by extending its green energy consumption through solar panels, wind and hydropower.

Absolute district heating and cooling consumption across the 48 managed assets totaled 45,019 MWh, a like-for-like decrease of 2 per cent compared with 2018. Landlord-obtained consumption amounted to 37,335 MWh.

Total direct fuel consumption was 0.6 MWh in 2019, down from 23 MWh in 2018. Entra is currently working towards phasing out fossil fuel consumption within its portfolio, and has in 2019 removed one of two oil boilers.

Building energy intensity across the 56 management properties in our portfolio with like-for-like performance data was 138 kWh per square meter in 2019, down by 3 per cent in comparison with 2018. Greenhouse gas intensity from building energy across the same assets fell to 4.61 kg CO₂e per square meter, a drop of 21 per cent compared with 2018. This decrease is mainly explained by a 13 per cent reduction in the Nordic mix electricity emission factor.

GHG emissions presented in the EPRA table are based on local-based and market-based emission factors for electricity. If calculated using market-based emission factor for electricity, the GHG emission from electricity is about 1,933 tonnes CO₂e in 2019, down from about 3,536 tonnes CO₂e for 2018. In 2018 and 2019 Entra has purchased guarantees of origin for all electricity purchased by Entra (land-lord obtained electricity consumption).

Water

100 per cent of water consumption comes from municipal water supplies sources. Absolute water consumption across the 64 managed assets with available data in 2019 was 277,800 m³ compared with 241,246 m³ in 2018. On a like-for-like basis, total water consumption increased by 7 per cent due to various reasons, such as some properties included in like-for-like become fully let, shifts in tenant consumption etc. Examples is more properties with training and shower facilities, possibilities for bike wash and one tenant using more water in combination with research. Building water intensity across the 55 assets with like-for-like performance data was 0.25 m³ per square meter in 2019, a 4 per cent decrease from 2018.

Waste

In 2019, absolute waste creation across the 57 managed assets with available data was approximately on same level as 2018, with 3,383 tons. Like-for-like increase with 15 per cent from 2,773 tons in 2018 to 3,189 tons in 2019. This is mainly explained by Entra's increased registration of waste data and fully let properties. Entra continuously works towards greater coverage of waste created by tenants who have waste groups managed independently of Entra's waste monitoring system.

Entra Headquarters:

Entra's electricity consumption at its headquarters totaled 114,097 kWh in 2019, a 10 per cent rise compared to 103,563 kWh in 2018. This increase is explained by a larger number of active users due to fully let building, with a direct effect on the amount of lighting and ventilation needed.

Entra's pro-rated share of district heating and cooling increased by 2 per cent from 87,857 kWh in 2018 to 89,785 kWh in 2019.

The property at which Entra is a tenant does not have fuels as an energy source.

Energy intensity for Entra's headquarters was 72 kWh per square meter in 2019, up by 7 per cent in comparison with 2018.

Greenhouse gas intensity from energy ended at 2.05 kg CO₂e per square meter down from 2.12. This is mainly explained by a reduction of 13 per cent in the Nordic mix factor from IEA energy statistics for 2019.

Entra's proportionate share of water consumption in 2019 was 751 m³ compared with 984 m³ in 2018. This 24 per cent decrease is a directly consequence of a flood in the basement autumn 2018 and wardrobes and shower facilities were closed in the beginning of 2019 due to refurbishment. Building water intensity was 0.27 m³ per square meter in 2019, compared to 0.35 m³ per square meter in 2018.

Entra's proportionate share of total waste created decreased by 3 per cent from 13.2 tonnes in 2018 to 12.8 tons in 2019. Most of this decrease directly reflects on less refurbishments/reconstructions in the building due to fully let.

Location of EPRA Sustainability Performance in companies' reports

Entra reports the entirety of the EPRA Sustainability Performance Measures in its Annual Report, including a comprehensive EPRA sBPR table that uses the performance measure codes.

Reporting period

Entra reports both absolute and like-for-like performance measures for the two most recent years, but may choose to report performance measures over a longer period in the future should this provide meaningful data.

Materiality

Entra has not conducted a materiality review for the EPRA performance indicators as we consider all the sustainability performance measures in the EPRA table to be material.

1. 1: NA = "Not applicable"

2: GHG Scope 1 emissions from fossil fuels and refrigerants are calculated using DEFRA factors.

3: GHG Scope 2 emissions from use of electricity and district heating and cooling are calculated using a location based approach. For electricity, a three-year rolling average of the Nordic mix factor from IEA energy statistics reports is utilized.

4: GHG Scope 2 alternative Electricity emission - Market based method (REC's, GoO)

5: GHG Scope 3 emissions from travel, waste and water consumption are calculated using a location based approach and DEFRA and Ecoinvent 2.2 factors.

6: Entra's headquarters data is also included in the total portfolio as that Entra is a tenant at one of its own properties.

EPRA Sustainability Performance Measures

Definitions

12 months rolling rent	The contractual rent of the management properties of the Group for the next 12 months as of a certain date, adjusted for (i) signed new contracts and contracts expiring during such period, (ii) contract based CPI adjustments based on Independent Appraisers' CPI estimates and (iii) the Independent Appraisers' estimates of letting of current and future vacant areas
Back-stop of short-term interest bearing debt	Unutilised credit facilities divided by short-term interest bearing debt
Capital expenditure	Property related capital expenditure, split into four components: (i) Acquisition, (ii) Development, (iii) Like-for-like portfolio and (iv) Other. The components Development and Like-for-like portfolio combined ties to the line item Investment in the property portfolio in the investment properties rollforward, while the two other categories ties to separate line items in the rollforward.
Cash Earnings	Net income from property management less tax payable
Contractual rent	Annual cash rental income being received as of relevant date
EPRA	European Public Real Estate Association
GRESB	Global ESG Benchmark for Real Assets
Gross yield	12 months rolling rent divided by the market value of the management portfolio
Interest Coverage Ratio ("ICR")	Net income from property management excluding depreciation and amortisation for the Group, divided by net interest on interest bearing nominal debt and fees and commitment fees related to investment activities
Independent Appraisers	Akershus Eiendom and Cushman & Wakefield Realkapital
Land and dev. properties	Property / plots of land with planning permission for development
Like-for-like	The percentage change in rental income from one period to another given the same income generating property portfolio in the portfolio. The figure is thus adjusted for purchases and divestments of properties and active projects
Loan-to-value ("LTV")	Total net nominal value of interest bearing debt divided by the total market value of the property portfolio.
Management properties	Properties that are actively managed by the company
Market rent	The annualised market rent of the management properties, fully let as of the relevant date, expressed as the average of market rents estimated by the Independent Appraisers
Market value of portfolio	The market value of all properties owned by the parent company and subsidiaries. The figure does not include Inventory properties.
Net Income from property management	Net income from property management is calculated as Net Income less value changes, tax effects and other income and other cost from associates and JVs
Net letting	Net letting is calculated as the annualised rent of new lease contracts plus lease-up on renegotiated contracts less terminated contracts
Net nominal interest bearing debt	Nominal interest bearing debt less cash and bank deposits
Net rent	12 months rolling rent less the Independent Appraisers' estimate of ownership costs of the management properties of the Group
Net yield	Net rent divided by the market value of the management properties of the Group
Occupancy	Estimated market rent of occupied space of the management properties, divided by the market rent of the total space of the management portfolio
Outstanding shares	The number of shares registered with a deduction for the company's own repurchased shares at a given point in time. EPRA Earnings and Cash Earnings per share amounts are calculated using the weighted average number of ordinary shares outstanding during the period. All other per share amounts are calculated using the number of ordinary shares outstanding at period end.
Period-on-period	Comparison between one period and the equivalent period the previous year
Property portfolio	Properties owned by the parent company and subsidiaries, regardless of their classification for accounting purposes. Does not include the market value of properties in associates and jointly controlled entities
Project properties	Properties where it has been decided to start construction of a new building and/or redevelopment
Total area	Total area including the area of management properties, project properties and land / development properties
Total net nominal interest bearing debt	Net nominal interest bearing debt and other interest bearing liabilities, including seller's credits and lease liabilities for land and parking lots in connection with the property portfolio.
WAULT	Weighted Average Unexpired Lease Term measured as the remaining contractual rent amounts of the current lease contracts of the management properties of the Group, including areas that have been re-let and signed new contracts, adjusted for termination rights and excluding any renewal options, divided by Contractual rent, including renewed and signed new contracts
